What about a case study analyzed from a criminal justice and human services perspective?

Build a web site or create a logo for a new business.

Imagine an original song collaboration between a poet and musician.

Design a soccer field.
WHAT ELSE?

Is the way pharmaceutical drug companies market drugs ethical?

Could an ELS student give an accurate description from which a sketch could be drawn?

How would original song lyrics be interpreted in American Sign Language?

Would a writer describe a photograph the same way the photographer experienced the scene?
