Feb 5th, 4:00 AM - 5:00 AM

Global Sustainability that Respects Cultural Diversity & Individual Health Needs

Meriterese Racanelli
Goya Foods

Follow this and additional works at: https://digitalcommons.montclair.edu/sustainability-seminar
Part of the Food Science Commons, and the Sustainability Commons

https://digitalcommons.montclair.edu/sustainability-seminar/2019/spring2019/2

This Event is brought to you for free and open access by the Conferences, Symposia and Events at Montclair State University Digital Commons. It has been accepted for inclusion in Sustainability Seminar Series by an authorized administrator of Montclair State University Digital Commons. For more information, please contact digitalcommons@montclair.edu.
The USA Centers for Disease Control and National Institutes of Health have classified excessive sodium consumption, high blood pressure and diabetes as national health epidemics across various ethnic cultures. The United Nations and other countries classify these as Global Epidemics. Interestingly, some ways to help fix this national and global health crisis can be found in the balance of sustainable environmentally-friendly agriculture, green technologies, and cultural competencies.

Learn how sustainability studies, research, and jobs can still respect an individual’s ethnic heritage, culture, and nutritional health needs, while improving the community health at large... from local to global. Sustainability can help us fight climate change, reduce pollution, secure food and water supplies... and yes ...reduce national health epidemics like high blood pressure and diabetes. **Join us on Feb 5th at 4pm to learn more about burgeoning global sustainability career opportunities and jobs of the future.**

Contact Dr. Amy Tuininga at 973-655-3667 for more info
