# Problem:

- New Jersey Department of Environmental Protection was not able to handle the amounts of current and potential influx of new sites in need of remediation. ~20,000 open sites in system.

Source: Data from "NJDEP Known Contaminated Sites in New Jersey Reports"

## Need for change:

- 2006: ~20,000 open sites / Accuterm
- Site Remediation Reform Act (SRRA) 2009 – All sites must be under a Licensed Site Remediation Professional (LSRP) by May 7, 2012
- SRRA 2.0 – 2019
- Determine the hierarchy of the Strength, Weaknesses, Opportunities, and Threats of the privatization of the New Jersey remediation program.

SWOT factors and their priority and overall priority scores								
Strengths	Factors priority scores				Overall priority scores			
	GLE	BTO	NGO	LSRP	GLE	BTO	NGO	LSRP
S1: LSRPs ability to use Professional Judgment	<b>0.3610</b>	<b>0.2471</b>	0.2050	0.1597	1.8048	1.2357	1.0252	0.7983
