And Why Not Exhibit?

The photographs seen on this page are examples of work completed by students in the Art and Civilization course. Displayed in Memorial Auditorium today, the creations represent the process and skill of the junior fine arts majors.

The very fact that the display is placed in Life Hall is a credit to the planning of the Art Department. Too often students’ work is tucked away in their respective teaching areas never to be seen by others frequenting certain buildings. Further appreciation and interest is aroused in department areas when student projects can be viewed by all. To avoid “separatism” and isolation of departments, encouraging public display of student creativity should be fostered by faculty and students.

Many have said Montclair fine arts majors are capable of producing only modern abstractions. The display so doubt dispels many of these ideas and sheds new light on the abilities and interests of art majors. It is possible that many more preconceived notions regarding other department areas could be discarded if more talent were displayed.

Failure to prove one’s work or the fear of criticism can reverse the goals of education and life itself. Now that we have witnessed the art work, good or bad depending on one’s values, where is the rest of the talent and skill that is supposed to flood through the gates at MSC?

Applications for temporary dormitory rooms during the 10 week work-teaching period are now available in Dr. Henry’s office.

All organizations are requested to submit a list of newly elected officers to Dr. Henry’s office as soon as possible after the election.

EDITOR’S NOTE

In the December 11 issue of the MONTCLAIRIAN, the impression was given that all the faculty members voted on the seniors for Who’s Who in American Universities and Colleges. A special committee of administrators, faculty department heads, and the SGA Board of Trustees select thirty seniors from a list of all seniors. This number is reduced to the final fifteen (the number allowed this year) by a second committee of the President and six administrative officials.

YOUR PRESIDENT SPEAKS

Undoubtedly, the closing of the Recreation Room on the lower level of Life Hall will result in some controversy on campus. It is hoped by your SGA that some worthwhile suggestions aimed at improving conditions in that area will result from this action.

This action, drastic as it may seem, was necessary because of the behavior of a few “atypical” students. The slovenly habits and undesirable behavior of these few have now caused considerable inconveniences to the student who makes worthwhile use of the area in question.

During the fall semester members of the Board of Trustees and the Editorial staff of the MONTCLAIRIAN had two meetings with the President of the College, the Dean of Students, and the Director of Life Hall in an attempt to find a way to correct the unsightly conditions that prevailed in the “Wreck Room.” It is more than four hours of talk, and many more hours of serving among students, this group was unable to find a way to better operate this facility without the cooperation of the student body. It is clear to me that unless the students who use this room help to maintain order and cleanliness, this area will be closed because of constant and undesirable behavior of these few.

As president of your SGA, I am asking you, the students of Montclair State, to use your facilities with the responsibility adults, in this way we will be able to keep areas such as the Recreation Room open for our use.

President

Five MSC Students Spend Holiday in Puerto Rico, Attend Conference

by Nick Mitchell

Montclair State College was well represented at the Association of International Relations Clubs' first annual Christmas seminar on International and World Affairs at New York University. Five of us, all members of Montclair's International Relations Club, attended. Among us three and one-half hours from New York to San Juan; a distance of approximately 3,000 miles. We spent three days and two nights in Puerto Rico. We were greeted by our hosts from Porta Coeli Church, believed by many to be the most ready for harvest, and we most impressed by the beauty and scenic beauty of the land remained the same.

The Inter-American University is situated in the picturesque town of Lomas de Santa Maria (the hills of San Juan). It is a university with a large enrollment, as well as through large cities such as Arecibo and Mayaguez. Our sugar cane fields are the all-time best for sugar, and we saw some of the great industrial attractions portrayed by Puerto Rico's Industrial incentives program, featuring a complete freedom from taxes for certain industries. We saw the mansions of the rich and the homes of the sugar cane workers, Puerto Rico, seemed to be a land of contrast everywhere we looked—only the beauty of the land remained the same.
