May 10 and 11 will see MSC's campus turn into a Carnival grounds that will surely rival all the previous Carnivals. This year's Carnival will have as its theme, "Grin ' n' Bear It." Using this theme, the organizations participating have chosen their various booth titles, and have decided on their locations.

Titles of booths include the sophomore class' "Peanuts," the freshman class' "Donald Duck Farm," Theta Chi Rho's "Little King's Onion Rings," Sigma Pi's "Flash Gordon," and Phi Lambda Pi's "Gasoline Alley." Also Phi Sigma Epilale's "Cabin and the Kernel" and Delta Theta Phi's "Flinstonettes' Funhouse".

The Carnival will run from 6 p.m. until midnight on Friday, May 10, and from 2 p.m. until 11 midnight on Saturday, May 11. During this time, there will probably be in the vicinity of 10,000 people on campus, both taking part and spending money.

There will be no direct exchange of money between the patrons and each booth. As in past years, chips will be bought for 10 cents a piece or 15 for one dollar.

At the awards assembly, to be held in late May, Martin Wronczewski and John Lord, this year's Co-Chairmen will present the awards as chosen by them and a committee consisting of President and Mrs. Partridge, Dr. Henry, and Mr. Stover. There will be ten awards presented. They will be for first and second and third prizes for best money-making; first, second, and third prizes for originality; and first prize each for food, game, souvenir and entertainment.

At the present time there has been no definite decision as to the manner in which the proceeds from Carnival 1963 will be used, but this will be announced in the near future.

S.G.A. Results

In the annual Student Government Association election held April 24, 1963 from 8:30 a.m. to 4:30 p.m. the only contested office, that of the vice president of SGA, was won by Richard Catullo.

By a vote of 367 to 140, Catullo defeated opponent Chuck Mainini for the position of vice president. Catullo drew 597 votes from a possible 880.

Ray Meyers received 475 votes for SGA president, while Rich Gribenick 477 votes for recording secretary and Mary Jane Clark 460 votes for treasurer.

The referendum which concerned new class elections procedure was passed by a vote of 347 to 82.

It is interesting to note that last year the students, both taking part and spending money, with an increased enrollment only 976 votes were written.

SEAM Sponsors Russian Talks

The Student Education Association at Montclair (SEAM) is starting a new type of program to create a wider interest in education.

Two Russians are coming to campus to start this program on Monday, May 7. The meeting is being held to introduce any facet of Soviet society, from education to politics and government. They have requested that the talks be informal so that they will not be officially held to any statements they make and can therefore give us a deeper and more authentic insight into Russian life.

These men are among the best qualified to talk on areas as Soviet education. Mr. Oleshkevitch spent four years as a teacher in Russia's Polytechnic Institute and the following years (Decca), and the following year became internationally famous.

In the summer of 1930, Basie had a ten-piece band which John Hammond, the noted music critic, heard on a small Kansas City radio station. Hammond helped bring the band to Chicago and then to New York in 1935, where it was enlarged. In January 1937 the band made its first recordings (Decca), and the following year became internationally famous.

Through the forties, the band realized the occasional loss of key soloists. Basie, however, consistently maintained a band renowned for its originality and sense of style, including Joe Newman among the trumpet stars, the trombone section included Vic Dickenson and Jay Jay Johnson.

Except for a period in 1948-49 when he led a swing sextet, Basie has led a big band continuously for two and a half decades. He has gained a global reputation for his undying allegiance to the best, his loyalty to the blues, his basic form and his ability to produce.

Crough in the Year

Montclair State College has certified itself and his modern music immortal during the last twenty-five years as a band leader.

If Florida the Gulf Stream seems to have a pulse which makes the water flow in repeated streams like blood in an artery.

Change for the best

Colleges are continually attempting to make their systems more efficient and productive. In the April 4 issue of THE STUDENT, the tri-semester system was discussed. MSC is presently contemplating a change to this system or to some other system. Many students have advantages for the administration, but no one expects administration to do anything about it.

Two obvious advantages are offered by the trimester system. One advantage is that the students may choose the time of year when they wish to attend school. Another advantage is that the students may choose the time of year that they wish to work when work is most available. The other is that an additional trimester program may be earned in three years.

The most important advantages which permit our 'ectual lafrescence' are offered by it. In most systems like the one currently in operation, the student is not free to change the college. In some systems, such as the quarter system, the amount of courses taken each term is reduced. In any case, such systems offer greater opportunity for variety, concentration, and change which we do not now have in the present system. In addition, just add a lot of vacations which seem to be a necessity.

The vacations of these plans fall at regular vacation times and coincide with those of the schools.

Thin seriously about the proposed plans. When the student is not in school taking any course, he must use his advantage in it. does your position, or does it in 80 the argument in favor of the new system. Students of MSC: I would like to make a modest proposal. In the past, few proposals have been made, and as I've seen. Science has increased so much that the Institution has grown in members, so has the MSC grown in obligations. What has been increased, the organization of all the members of the institution, as a result of the organization, play a dominant role. One would think that the organization of the institution is the result of the department of student interest.

This is not the case! In fact, the lack of interest apparent in the days preceding the election. Petitions for these offices which were received on April 5 and had to be returned on April 11. As a result of the petitioning, there was one person running for each of five offices and two people for only one of the offices. Was this a real election? But where does the fault lie? It has become clear that the student body does not vote. We call it an election and the student body only seven people felt called upon to run for office.

The scarcity of candidates was not the only reason for this not being a real election. The general lack of interest in the entire happening had much to do with it. Last year it was estimated that only approximately 32% of the student body voted in the elections. This year only twenty-four percent of the student body voted. The elections were held in an accessible place and one could vote at his convenience.

There is no reason why every student could not cast his vote. As a United States citizen you are urged to take a walk in your national, state, or local election. You must register and vote in these elections. If you are to become a leader and a responsible adult citizen, you must take an active part in the management of your government.

If you are to become a leader and a responsible adult citizen, you must take an active part in the management of your government.

One area that has caused untold hardship to the members of the association is the constant recruiting by the MAC and WRA of part-time students to vote for the representatives of these governing bodies. Your interest in the government of your school is directly related to your interest in being a leader in your community. If you are to become a leader and a responsible adult citizen, you must take an active part in the management of your government.

If you are to become a leader and a responsible adult citizen, you must take an active part in the management of your government.

Dear Editor,

This is to speak out about the current problem in the math department at M.C. Many of us have heard stories about the excellence of teachers and one or two, who, unfortunately, are not up to par. One is particularly troubling. The subject of a number of complaints, but a freshman who has not had the opportunity to be the subject of complaints. The fact that the subject of complaints is one in the teaching profession has been a constant complaint.

One look at his grades reveals that many of his students are getting Cs and Fs for the first time. Only the loyal and dedicated students have to struggle to earn these marks in M.S.C.'s bi-semester courses.

I sincerely hope that our math department will correct this situ-

Dr. Bruce E. Meserve, chairman of the mathematics department, has been elected the first president-elect of the National Council of Teachers of Mathematics. He will automatically assume the presidency for two years after serving for one year in the newly-inaugurated post.

Balloting was done by mail, with Dr. Meserve receiving a 1,640 vote majority over his opponent for the office. Dr. Meserve is retiring president of the Association of Mathematics Teachers of New Jersey and immediate past president of the MOC Faculty Association.

A graduate of Bates College, where he was elected Phi Beta Kappa, he holds a both a master's and doctor's degree from Duke University. Before joining The Montclair State Faculty in 1954, he taught for eight years at the University of Illinois.

Dr. Meserve is advisory editor in mathematics for Encyclopaedia Americana and has written over 40 articles and reviews for professional journals. He is author of "Fundamental Concepts of Geometry," and "Fundamental Concepts of Algebra," and is author of a number of other texts. He has lectured frequently at professional meetings, institutes and workshops.

He now assumes the presidency of the only international organization of its type that has had a major influence on the teaching of mathematics. Its purpose, as stated in its charter, "is to assist in promoting the interests of mathematics in America, especially in the elementary and secondary schools and to facilitate and coordinate the work of local organizations of teachers of mathematics."

The most outstanding person in mathematics education have been leaders and participants in the Council's programs. It has served as an agency for both the coordination and stimulation of major efforts to improve the teaching of mathematics.

The membership of the Council has grown continuously and rapidly. The total number of members has quadrupled within only eight years. The latest count reveals that there are 50,000 members in the Council, coming from many scattered countries throughout the world.

LOST: 3 month envelopes on campus during grade regula- tion. Contents included transcript, certificates, and military discharge papers etc. If found by a found set or any other set. He has lectured frequently at professional meetings, institutes and workshops.

CINEMA:
THE ACADEMY AWARDS

By G. T. Goodman

During the recent vacation, Hollywood presented itself with the ancient rite known as the dedication of "Oscar" or the annual Academy Awards. These yearly attention-getters proved usually turn out to be one long bland campaign in which the effects of movies that are better than ever. The latest presentation of The Motion Picture Academy of Arts and Sciences proved to be dull, unglamorous, unexciting and uninteresting.

The role of Bob Hope as emcee was indespensible to the show. He appealed to one F. Sinatra, a charming

CINEMA: THE ACADEMY AWARDS

Answer Your Questions

Question: Are you in favor of the entertainment industry "closing door" situation?

Answer: I think that it's much better to keep a distance between the entertainment industry and the political process. The entertainment industry should not be involved in political campaigns.

Questions

1. How do you feel about the entertainment industry "closing door" situation?
2. Why do you think that the entertainment industry should not be involved in political campaigns?
3. What is your opinion on the role of Bob Hope as emcee of the Academy Awards?
4. Do you think that the Academy Awards are a successful event?
5. What do you think is the role of the entertainment industry in society?

Just From States

The recent rumblings concerning gambling and fixing across college sports reached a head last week with the suspensions of Green Bay Packer, Joe Hornung and Minnesota Viking, Alex Karras. Along with these severe penalties, Longhorn Sports Commissioner Tom Wilson sentenced five other Liners $2,000 each and slapped the Big Ten Conference with management for insufficient supervision.

This action is sure to have repercussions, Hornung, a 4-time Pro Ball back and Player of the Year 1961, is an important defense. He will be hard to replace for the Buckeyes. In the series of meetings between the league and the players, the league and the players have failed to come to an agreement. Regardless of whether they beat other teams or their own, whether they played off or not, they still refused to report their betting activities to the proper authorities. They deserve to be punished, Pete Rozelle has taken a strong stand to clean up sports. Other pro administrators should heed his courageous action. Football will be much better because of it.

The Montclair State Indians ran rough shod over their opponents in a 9-0 triumph over Springfield College Saturday. The double loss knocked the Indians exploded for 12 hits. The team is lead by number two hitter, Joe Black, who pitched 7 innings on relief to shut out Upsala. Bob Purcell, the Indians distance last season, has had early-season problems and whether they shaved points or not, they still refused to report their betting activities to the proper authorities. They deserve to be punished, Pete Rozelle has taken a strong stand to clean up sports. Other pro administrators should heed his courageous action. Football will be much better because of it.

The team is lead by number one man Bob Cannon, who is considered one of the best in the conference by many, Bob's partner in crime Paul Bloom, of All-Conference basketball fame, is ripping the cover off baseball threatening a new season's scores that day for MSC in every event. His Indians distance last season, has had early-season problems but is expected to regain his form shortly. Bobby has contributed several second place finishes in distance runs this year. Chuck Swenson, sophmore physical education major, provided a pleasant surprise in the Uphala meet as he charged home third with a personal best mile clocking at 5:30.

The sprint trio of Grant Bach, Joe Black, and Pete Bloom finally tasted victory the next day as they defeated Paterson State University by Just 8 pins out of a possible 200. Paterson State lead the way with an 89-42 against Upsala. Paul Simp- son has three 880 victories and is unbeaten in the 800- Interna- tional. Bob Cannon, the Indian's second in the mile and 880 and Jimmy Caviglietta in the 440 against Upsala. Bill McPherson, the fourth member of the team, has scored consistently in the sprintests and 440 in all meets to date.
