Richardson Cuts Ribbon  
As T.U.B. Becomes Reality

By S inquiry Saunderson

Although a sharp, cold wind and a threatening rain shortened the opening ceremony of TUB, it did not lessen the enthusiasm which was exhibited by all who attended. Mr. Edward Yezo, director of the Temporary Union Building, opened the ceremony by welcoming the administrators, students, and 尚未读取的文本。

Dr. Richardson, who instituted the idea of renovating the vacated Annex 3 into student life facilities, then noted the importance of the student lounge center.

Ron Szabo, a senior industrial education major who designed TUB, gave a brief history of how, through the cooperation of students and the maintenance crew, Annex 3 became the comfortable and handsome student center which will ease the burden of the Life Hall facilities.

Presentations were then made by Mr. Gary Leo, Director of Life Hall and Student Activities, to Ron Szabo, William Finnerty, a junior social science major who is also assistant director of MSC, and Dr. Tomography, co-chairman of the TUB committee.

Mr. Bernstein was active in the rejuvenation of Annex 3 and to Lenny Elowitz and Alan DaCunzo, co-chairmen of the TUB committee.

Dr. Richardson then cut the ribbon which marked the official opening of TUB, and immediately a surprised and delighted crowd entered MSC's newest student center.

The student body owes their gratitude to all those who made TUB a reality.

Future Frosh Admitted Through T.R.Y. Efforts

MSC has the opportunity to make a breakthrough in education which could have dramatic effects across state and the nation for, in September, 1968, MSC will admit 40 disadvantaged students accepted as part of the regular admissions program. These students will face tremendous academic pressures and a new, completely different environment. They will be assisted by special tutoring programs. And it is hoped that their presence on the campus will also stimulate an awareness of the problems of poor students. So MSC urgently needs.

Ron Szabo, a senior industrial education major who designed TUB, gave a brief history of how, through the cooperation of students and the maintenance crew, Annex 3 became the comfortable and handsome student center which will ease the burden of the Life Hall facilities.

Presentations were then made by Mr. Gary Leo, Director of Life Hall and Student Activities, to Ron Szabo, William Finnerty, a junior social science major who was active in the rejuvenation of Annex 3, and to Lenny Elowitz and Allen DaCunzo, co-chairmen of the TUB committee.

Dr. Richardson then cut the ribbon which marked the official opening of TUB, and immediately a surprised and delighted crowd entered MSC's newest student center.

The student body owes their gratitude to all those who made TUB a reality.

Dungan Answers Student's Probes

By Bill Lang

"It's up to the student to do something." That prophetic statement came out of an interview with Chancellor Dungan on March 25 at a meeting of the Association of New Jersey Colleges and Universities held at Montclair. He was responding to a question: "What can you do to help the colleges out of the financial squeeze?" It may be good politics to put the responsibility on someone else but it brings up a good point. We, as college students, have the responsibility to rectify the situation we find ourselves in. In reply to other questions, the Chancellor said that he has no intention of eliminating the Education part of the curriculum, rather he would expand it if there were available spaces. In other words, both Liberal Arts and Education would be expanded if there was money to expand.

That brought up another sore point: the question of finances. The Chancellor stated that the current budget is woefully inadequate even if it includes the five million deferred. Dungan stated that even though eighty-five million dollars was requested, actually five hundred million would be needed to bring the colleges up to snuff. The five million needed, compared to the one million given, points out the position of Higher Education in this state. The Chancellor said that there were no easy answers to the problem because there are many other critical needs of the state.

Our cities and our roads, as well as secondary education, all need massive state support. There is no money in the state treasury to adequately finance solutions to these problems. The Chancellor was then asked whether he was inferring that a new broad base tax must be established. He answered that we may draw any conclusions that we wish, but that these items must be financed somehow. The one conclusion that must be drawn from the interview is if Higher Education is in a deplorable condition. The time has come for action. Now is the time to DO SOMETHING ABOUT IT!!!

SGA Elections

For the upcoming SGA election, the MONTCLAIRION will offer space in the April 26 issue to all candidates for SGA president, vice president, secretary and treasurer. We urge all candidates to accept our offer and submit their platforms. Candidates may provide their own pictures or candidates that the MONTCLAIRION take a picture for them. All platforms must be in the MONTCLAIRION office by April 17. Any material submitted after that date will not be printed.

C.U.E. Appeals To Trenton

New Jersey state college students sent representatives to Trenton recently to plead their cause before a joint session of the Senate and Assembly education committees, with a strong appeal for additional financial support. The students represent a group known as CUE (Committees for Undergraduate Education), which was reactivated at a meeting at Newark State College March 26.

In the past, CUE was active in lobbying for a broad tax base and a separate department of higher education, according to Bill Lang, representative from Montclair State. After these goals were achieved, it disbanded.

"However," Lang said, "even after the enactment of the sales tax and the creation of the Department of Higher Education, New Jersey has fallen from 46th to 50th in the nation in per capita spending for public higher education. It is apparent," he continued, "that the state revenue base must be broadened and that a massive bond issue is needed to finance capital construction."

In addition to increased financial support, other CUE objectives are: 1. To provide the state colleges with increased fiscal autonomy similar to Rutgers, Newark College of Engineering, and the county colleges; and 2. To act as an organization through which students can effectively voice their concerns to the state government and the people of New Jersey about the problems of New Jersey education.

Besides Lang, representatives attending the CUE reorganization meeting were Frank Nero of...
The Montclair State College Board of Trustees has expressed dissatisfaction with Governor Hughes' decision to relegate the college's full support to efforts to secure, through the Legislature, additional funds for higher education in the state.

Speaking in behalf of his fellow trustees, Board Chairman W. Lincoln Hawkins pointed out that, in accordance with the Higher Education Act of 1966, the college has an obligation to expand its facilities and curricula. "The Montclair State Board of Trustees accepts and will pursue with all dispatch its responsibility to direct the future growth of the college into a multipurpose institution of the highest possible caliber," he declared.

However, to be continued, the proposed budget "falls far short of providing the minimum financial support the college needed to proceed with the development of the college as directed." Montclair State's total budget request of $8,952,729 for 1966-67 was reduced to $7,185,687 in the proposed state budget.

Funds must be made available for the expansion of the college's physical plant to accommodate the increased growth in student population, Dr. Hawkins said. He noted that in September 1967, 8,000 students were enrolled.

College Sponsors Summer Tour

Of Great Britain

A banquet in a medieval castle in Limerick will be one of the highlights of a tour of the British Isles sponsored by the Bureau of Field Studies, Montclair State College, July 11 to Aug. 1. The trip, sponsored by A.P.S. Chairman C. Bye, will conduct the tour, which may be taken for three graduate credits or an undergraduate credit, if so desired.

Also on the itinerary will be: London, Bristol, Bath, Salisbury, Winchester and York Cathedrals, Stonehenge, Windsor Castle, Runnymede, Hampton Court, Oxford and Cambridge Universities, Stratford-on-Avon, the lake districts of England and Scotland, Glasgow, Edinburgh, Dublin, Cork, Ring of Kerry, Killarney Lakes, and Blarney Castle.

Tour members will fly via TWA to London, returning on the same airlines. TWA and British Airways will travel by chartered bus while there. The cost of $875 covers all expenses except expenses of personal items such as tips and fees in London, travel taxes, if any, and passport. Reservations must be made to the Bureau of Field Studies, Montclair State College, Upper Montclair, N.J. 07043.

### A.P.S. Chairman Visits Campus

Dr. Ralph N. Haber, newly named chairman of the psychology department at the University of Rochester, spent two days on campus recently as a visiting consultant from the American Psychological Association. Montclair was one of 50 colleges across the country selected by the association from over 600 applicants for such a consultantship. The program was made possible by a National Science Foundation grant.

While here, Dr. Haber lectured to psychology students and conducted interviews with the psychology department about its further growth and development.

Montclair State rejected, for lack of available space, three out of every four qualified applicants from secondary schools in the area. The admissions procedure with College Board scores above 625 and many with scores above 550. Many of these have joined the majority of New Jersey high school graduates who have found it necessary to leave the state for their college training, the board chairman said. The state cannot be expected-with the pressures for college admission ever increasing to continue to accept students from New Jersey," he asserted. It is reported that some states have already reduced their quotas for out-of-state students, particularly from New Jersey.

The Montclair State Board is in complete accord with the Board of Higher Education in its efforts to secure the necessary funds for higher education in the state, according to Dr. Hawkins. "New Jersey can no longer afford the dubious distinction of spending less per capita on higher education than any other state in the country," he concluded.

CINA Receives Money For Research Bulletin

CINA, the Council on International and National Affairs received $300 from the SGA to publish an on-campus, underground, political-historical publication to provide "objective, documentary, historical facts." The students of Montclair, as Montclair is growing both physically and intellectually, CINA feels that there exists a need for non-opinionated fact as a background for opinions on contemporary affairs.

This 30-page publication, to be released after the Easter vacation, will be open to any student who wishes to submit factual, documented articles to the editors. It will be distributed free of charge.

Prior to this publication, CINA had been using the facilities of WVMs and providing various on-campus lectures sponsored by WVMs. Students, CINA, along with faculty and SGA support, will now provide a well documented research publication covering factual background on such international hot-spots as Vietnam and Africa.

The subjects discussed will be contemporary issues viewed through a historical background. The causes of conflict, prior attempts at settlement, and other

Dr. Mehorter recently completed a two-volume book, tentatively titled THE PSYCHOLOGY OF GENIUS which deals with the personality and behavior of extraordinarily gifted people. The work is not a textbook but more of a creative treatise and monograph.

Lee Dunow, a junior voice major from Paterson, was recently selected as student chairman of the Eastern Division of the Music Educators National Conference (MENC). MENC is a division of the National Education Association (NEA). It is the only music educators professional organization in the country. The conference has 125 chapters in the 12 eastern states with 4000 members.

Elected at the national convention of MENC in Seattle, Washington, Lee will begin his term as president of the New Jersey Student Board of Directors. It was at his proposal that T.R.Y. will hold a luncheon on July 1 of this year.

The MENC Board of Directors chose Lee after he had been nominated for the post by the Eastern Division. His name was then approved by the student body of MENC and its adult sponsors. His nomination and subsequent election were based upon past work he had done for the college. Lee is a protégé of the Montclair chapter of MENC. He is just completing his term as president of the New Jersey Student Board of Directors. The idea of a student division of MENC is a relatively new one. Two years ago, Dr. Ralph N. Haber, director of psychology at the University of Vermont, West Virginia University, and a Dean at Berkshire College, prior to joining MENC, has been a strong advocate of T.R.Y. for its work up to date. In fact, NBC is planning a TV special on the T.R.Y. project.

The T.R.Y. program has already elicited a response from 1,700 students in disadvantaged urban areas. T.R.Y., originally started at M.S.C., now has seven cooperating colleges in the program.

The T.R.Y. program will hold a luncheon on April 20 which will be attended by business and educational leaders from across the state. Much praise has been given T.R.Y. for its work up to date. In fact, NBC is planning a TV special on the T.R.Y. project.

Ultimately, T.R.Y. realizes that such success will depend upon the continued support of the Montclair State community. For M.S.C., if it is to become involved in the social problems of today, must react positively to the efforts of T.R.Y.
Some confusion exists as to the curriculum requirements and overall goals of the liberal arts program at MSC. The Resource Committee on Liberal Arts, in a recent report, has developed a statement of philosophy regarding the program. The philosophy can be summed up by the following excerpts from the statement: “A Liberal Arts education prepares responsible members of a democratic society. It is a reasoned decision in a disciplined democratic society. ... The product of such an education is provided with more than the special tools to perform a task; he is given the whole equipment of his society to decide what is worthy to be done.”

Peace Corps To See:

Recruits On Campus

In over 50 countries throughout the world, the Peace Corps is associated with human dignity. The war against poverty, ignorance and disease is no small task. Thus, the Peace Corps is constantly looking for recruits.

Three Peace Corps representatives will be on campus on April 22, 23, 24, to recruit students for the world-wide program. In the Life Hall lounge, applications will be accepted and registration for the test will take place.

The test, which is a non-competitive aptitude test, is designed to determine an individual's ability and desire to learn a language. It will be offered on April 23 and 24 and no previous language knowledge is necessary.

In addition to the test, two movies will be shown on April 22 and 23: "A Step at a Time" and "Peace." Over the years there has been a consistent increase in the number of students at MSC applying for Peace Corps. Presently serving in the Peace Corps are the following MSC students: Ralph Davidson, Cameron; Helena Moksay, Dominican Republic; Robert Moore, Bolivia; Phyllis Valentine, Senegal; Carole Wüg, Guatemala; Dorothy Zielinski, Philippines.

A mobile laboratory will present a program of laboratories and lectures at Montclair State from April 16 through April 26 daily from 4:00 to 5:30 P.M. in the science building. Topics for the lectures include: introduction to radiation, characteristics of beta and gamma radiation, detection and instrument calibration of radioactive sources, Carbon 14, radiotracer methodology, radiation physics, chemical separations, and synthesis of labeled compounds.

Since the program began in

1959, more than 200 schools in

90 countries have participated.

A typical course pattern consists of a 90-minute lecture five days a week, with two laboratory sections scheduled at convenient times.

The lasting value and purpose

of the program is the instruction
direction of students towards

an understanding of the scientific field.

Science seminars are conducted either by the college faculty members or the National Science Foundation. MSC is also the site of lectures put on by the American Chemical Society performed on a monthly basis.

A recent lecture was given by Professor Norman Lange, an authorized representative of the American Chemical Society. The lecture was presented on April 25.

Professor Flynn mentioned that the seminars have been in existence for the past three years. The seminars are "in the move" educational service, spanning the continental United States, and will appear at 30 colleges and universities until June. At the institutions they present a concentrated two-day course in chemistry for college faculty members and advanced science students in radiotracers techniques and applications.

The impact on the Oak Ridge Mobile Radiotrace Laboratory program has been felt on college campuses from "Tucoma to Tampa" since the new year began. The motorized, "on-the-move" educational service, spanning the continental United States, will appear at 30 colleges and universities until June. At the institutions they present a concentrated two-day course in chemistry for college faculty members and advanced science students in radiotracers techniques and applications.

Exciting Seminar Is Available to Students

By RICH LUPO

Professor Roland Flynn, chemistry coordinator and chairman of the science department has stated that many undergraduates are not aware of the science seminars held on a monthly basis.

The science seminars are basically mobile courses devised to supplement the regular science curriculum offered to the students. The seminars are designed for those of a specific nature which add greater depth to the students' knowledge of science.

Science seminars are conducted either by the college faculty members or the National Science Foundation. MSC is also the site of lectures put on by the American Chemical Society performed on a monthly basis.

A recent lecture was given by Professor Norman Lange, an authorized representative of the American Chemical Society. The lecture was presented on April 25.

Professor Flynn mentioned that the seminars have been in existence for the past three years. The seminars are "in the move" educational service, spanning the continental United States, and will appear at 30 colleges and universities until June. At the institutions they present a concentrated two-day course in chemistry for college faculty members and advanced science students in radiotracers techniques and applications.

The seminars are "happening," and open to any undergraduate who wishes to add more to his scope of scientific knowledge over that which his regular classes provide.

Montclair to Receive Benefits of Mobile Lab

Instead of letting your parents sit home wondering whatever happened to their personal investment in higher education, pick up the telephone and call home.

But be economical about it. Some times are cheaper than others, if you're calling long distance. And as long as you are about to do the "right" thing, do it right.

Now, don't you feel devoted and slightly self-righteous already?
The Year of the Project

1968 seems to be the “Year of the Project.” From operations such as heart transplants to new programs for pre-school age children, people are organizing to effect better conditions for the common good of all men. “Operation Headstart,” “Operation Heartbeat,” “Forward Bound, T.R.Y., S.P.U.R.T., and “Project Understanding” are just a few of the various programs which have been initiated or expanded in recent months to help others.

It is concerning this last project that the MONTCLARION wishes to dedicate this editorial space. Project Understanding, a brotherhood in a practical way will provide us with areas of “our own.”

The MONTCLARION urges all MSC students to consider advantages of this opportunity. This project can only succeed through the efforts of concerned citizens. You show care and join the project of the year, which can accomplish so much good. Take a step towards understanding and join the marchers to Newark on April 7.

The MONTCLARION urges all MSC students to consider advantages of this opportunity. This project can only succeed through the efforts of concerned citizens. You show care and join the project of the year, which can accomplish so much good. Take a step towards understanding and join the marchers to Newark on April 7.

C.A.U.S.E. Is Your Cause

A student group, C.A.U.S.E., has recently been set up to help us the students. C.A.U.S.E., committee for aid to underdeveloped state education, comprises a handful of interested students fighting a battle for 4300 of us. C.A.U.S.E. groups on other state college campuses are being formed. With their aid and possibly the aid of the other state universities, Rutgers and Newark College of Engineering, the organization will be representing over 30,000 students.

Their plea is more state aid for higher education. This should be the major item of concern among state college students. Especially as voters and future voters, the legislators and officials of Trenton cannot ignore over 30,000 students (who help to place them in office or remove them).

We can act to show care about the present and future of New Jersey’s higher educational system.

C.A.U.S.E. is acting to focus attention on our desperate needs—which are great on all state college campuses. Recently C.A.U.S.E. has asked students to send to their legislators the form letters published in the March 22 issue of the MONTCLARION. We can help C.A.U.S.E.

This is not “just another” committee. This is a statewide movement representing over 30,000 students. This committee cannot be ignored, C.A.U.S.E. is extremely important to every MSC student. Support this cause.

Hail, TUB!

Thank-you Ron Szabo and Alan DaCunzo. Thank-you students, administration and SGA.

We now have a temporary union building designed to ease the crowded of the Life Hall lounges. TUB now provides lounge areas, a snack bar, game area, television and music. TUB is newly decorated, painted, equipped and open. It is ready for us to provide us with areas of “our own.”

A greatful thank-you to all who helped TUB to become a reality from all of us who will enjoy it.

DUMP JOHNSON?!?

Perhaps one of the most astonishing political events since the abdication of Britain’s Duke of Windsor as king was Johnson’s renunciation of all claims to the 1968 Democratic presidential nomination. A shock to many and a relief to still others, history will be the sole judge of Johnson’s policies and non-massive demonstrations.

Johnson’s withdrawal from the 1968 political arena sheds a new light on the campaign and the candidates. Before the unexpected event of last Sunday night’s radio and television broadcast, it was an assumed probability that Johnson would be the most likely candidate to contend. However, now the press has a field of candidates to choose from a precarious position with Johnson out of the picture, he must rely upon a limited field of candidates and an even more limited set of credentials. “We know what we have, we’re never sure of what we’ll get.” This familiar quotation is applicable to many topics, including the elections.

Finally, there is now no basis for the lament, “dump Johnson”; he has dumped himself. Now America reacts in consternation and, in some cases, sadness. Perhaps this is only a gimmick; perhaps, it is the real thing. In any case, the speculation are quick to pass judgment. It is human nature that man regrets what he no longer has, but now is not the time for regret. Let’s reassess the political scene and do the best with what we have.

BLOOD BANK

Alpha Phi Omega’s drive to build the College’s reserve in the blood bank is a great service to all of us at the College—students, faculty, staff and their families. I congratulate the members of the fraternity and if I have any blood left, I plan to make a contribution on May 2.

NEW POLICY

On March 15, 1968 the Board of Higher Education established a general policy for the governance of our institutions. Their statement is important to all of us attempting to understand the direction of change in higher education in New Jersey. Montclair has a history and a current program which is close to the Board of Higher Education’s policy but in some respects, I think that we will need to make changes. I will include in this article the two principle paragraphs of the policy so that you can form your own opinion.

College of Arts and Sciences

The Higher Education Act of 1966 directed the conversion of the State colleges to colleges of arts and sciences, multi-purpose in nature. This difficult task of conversion from single to multi-purpose institution should have the highest priority in terms of manpower and resources, and the Board expects that all who have responsibility for the colleges will address themselves urgently to the policy set forth in the policy.

The Board recognizes that the curricula of the State colleges have evolved through the years and that there are some teacher education programs which have fine liberal arts bases. This is the direction in which we must continue to move. It is the policy of the Board of Higher Education therefore, to continue to provide teacher education, but none of these programs can be structured as separate curricula which are parallel to the new liberal arts offerings—all of the programs of the State colleges must be built upon the framework of an arts and sciences curriculum.

Basic to this change is the situation in which future teachers in the State colleges will be pursuing their studies along with non-teachers. A campus devoted to pluralist ends, we believe, can enrich teacher education as well as open a wide variety of careers to students. Concurrently, the change in curriculum should nourish a greater variety and depth in the subjects that make for a broad and general education.

“General Education”

The Board considers that the role of an institution of higher education is to provide broad knowledge of the world in which we live by study of the major divisions into which man’s accumulated knowledge has traditionally been organized. This would imply two things: the organization of the college courses along the lines of the principle disciplines, and some substantial exposure to several disciplines before a student may be awarded a baccalaureate degree. At least half of the student’s time during a four-year baccalaureate program should be devoted to acquiring a solid base of understanding of the scope of man’s knowledge. This broad general educational base can be accomplished by (1) survey courses, (2) inter-disciplinary programs which relate major fields or bodies of knowledge, and (3) depth courses in the various disciplines taught by specialists and carefully chosen because of the insight these particular courses can provide into the nature of the larger discipline."

THOMAS H. RICHARDSON

“Catch Me If You Can!”

The Yellow Brick Road

The President’s Desk
Letters To The Editor

The editorial board of the Montclarion requests that all submissions to this column be limited to 250 words. All letters must be typed. We wish to state that all views expressed in these letters do not necessarily reflect the views of the editorial board.

To the Editor:

In response to the letter regarding Pi's Follies in last week's Montclarion, the men of Omega Phi Delta regret that anyone may have been offended by our presentation of "Amos and Andy." However, let it be known that our motives were in no way intended to be of a detrimental nature to any one person or particular group of people.

Sincerely,

THE MEN OF OMEGA PHI DELTA

CANADIAN HAVEN?

To the Editor:

Since my activities at Montclair State College brings my actions under somewhat closer scrutiny among the student, faculty, and administrative bodies, relative to other students, I would like to take this opportunity to inform the people interested in such things as to my present status and some of the reasons for my having done so.

On Feb. 26, my wife Mary and I were admitted to Canada, and we have since settled in Toronto, Ontario. We stand together in our belief that the United States—which we learned about while we were living in Willow, Canada— is actually one of the most efficient and pervasive purveyors of violence and human degradation. The fact that 6% of the world's population controls 94% of the world's resources is enough on which to base a charge of economic imperialism.

The draft system, which so many accept and yet, when it strikes personally, so many quietly try to evade with student deferments or occupational exemptions, is an atrocious abrogation of individual rights. I have chosen Canada because it is preferable to the life-long imprisonment which effective resistance offers.

Those of our acquaintances who would like to get back in touch with us may write to us at the address below. We would like to continue our friendships.

Sincerely,

(Mr. and Mrs.)

Joseph J. Witalis Jr.

The following letter, a reaction to an article in the Newark News, was published in the March 29 issue of the Newark News.

Dear Editor:

In reply to the March 3, 1968 article DUNGAN SAYS UNIVERSITIES IGNORE GHETTO PROBLEMS, and Chancellor Dungan's statements "that the state colleges in New Jersey are serving only middle class whites and building 'moats' to keep out the problems of the ghetto..." and that he does not "want higher education to get a greater share of state funds..." the cities are much more important," Mr. Dungan seems to be at least a year behind in information about what is happening at the state colleges.

Far from building 'moats' Montclair State College, for example, has several existing programs for bridging socio-economic gaps, which include Talent Research for Youth (encouraging and recruiting high school students to enter college) and Special Preparation for Urban Teaching, of which I am a member.

The state colleges CARE about the problems of the ghetto but they also recognize, as Mr. Dungan does not seem to, that the support of existing programs and the creation of new ones takes MONEY. New Jersey now ranks 50th in per capita state appropriations to higher education and the state colleges are feeling the financial pinch. Does the answer lie in limiting state funds to the colleges, or in giving our colleges the financial support necessary to deal adequately with such problems as the ghetto?

Sincerely,

PATRICIA E. PEPIN

CORRECTION

Owing to revised plans, the location of Carnival '68 will be held in the faculty parking lot on May 10 and 11, and not behind Mallory Hall as stated in the March 29 edition of the Montclarion. The Montclarion regrets this error.

The Montclarion would like to correct an error that appeared in the March 22 issue. The correct spelling of the off-campus literary magazine is CORDUROY. Our apologies to the editor and staff of CORDUROY.

**Czech Movie: Poignant, Direct**

By RICH KAMENCIK

Nowadays, if a group wants to cut a record, they've got to have a promotion. They are as fitting as the play is thematically sound.OTIS REDDING has an album around your own?" Iphigenia was spent trying to save the position in the cosmos which permits us to forget the realism we are usually conditioned with and adopt for an easier interpretation of the human condition. The irony, wit and intellectual dominance that his love-making fails at this too. They are two prime examples of "classic rock." There is a whole climate in which rock music may develop and Clyde is no answer at all. The苴lands that his co-worker, Miloshi, destroys a closely watched Nazi ammunition train. The director, Beatty shows that to answer these questions is important. It seems as though every character is acutely aware of the fact that although wanting something is nothing in itself, Bonnie asks Clyde "Do you want me back?" The vocal parts are sung by the Pontifical Choir of Rome than the "Greensleeves" of the 20th century. The film is conclusion.

**Elvira Madigan:** Tender Love Story

By MICHAEL ANTELL

**Elvira Madigan** is perhaps the most beautiful movie ever produced. The story is tender and striking; the mood is peaceful; and the outcome tragic. Archer Winston of THE NEW YORK POST believes that this movie is "...of such inexpressible beauty and grace that one sees in vain for its equal." One will find that the acting is superlative, and the color unlike anything ever previously experienced. Elvira is breathtaking, sensitive, and lovely throughout the film. Sixten, her love, is compassionate, irrational, and very much in love. Sixten, however, cannot be condemned for his illicit romance with Elvira. The theme of **ELVIRA MADIGAN** is one of youthful love. One may easily relate to the heartwarming passion emitted by Elvira and Sixten. The love affair is ultimately wrong; but the morality of the situation matters little. What occurs is beautiful: a work of artistic genius. **ELVIRA MADIGAN** is one grand poem: a poem of love and life, and a Romanticist's delight. If, as Robert Frost says, "we love the things we love for what they are," then **ELVIRA MADIGAN** is truly "a lover's quarrel with the world."

**Greek Drama Proves Disappointing**

By JOHN LORD

There is a whole climate in which rock music may develop and Clyde is no answer at all. This is especially evident in the scene following their second sexual encounter. While regaining their virility, Clyde asks Miloshi if he could have the chance, would he have done everything the same as before? Now I can recommend judging the play from the stage. This young woman is asSo, the sequence of still photographs immediately preceding, or involved in the ambush is a perfect explanation of the position in the cosmos which these two people hold. Surely, one can see that there is a look of wonder on their faces. It seems as though every character was telling the other "I want..." and "and one never finds out" what he is wanted. However, this again is the point of the entire film. They are two people who have completely found wanting: love wanting, love things, wanting (most of all) life. However, this again is the point of the entire film. They are two people who have completely found wanting: love wanting, love things, wanting (most of all) life. However, this again is the point of the entire film. They are two people who have completely found wanting: love wanting, love things, wanting (most of all) life. However, this again is the point of the entire film. They are two people who have completely found wanting: love wanting, love things, wanting (most of all) life. However, this again is the point of the entire film. They are two people who have completely found wanting: love wanting, love things, wanting (most of all) life. However, this again is the point of the entire film. They are two people who have completely found wanting: love wanting, love things, wanting (most of all) life. However, this again is the point of the entire film. They are two people who have completely found wanting: love wanting, love things, wanting (most of all) life. However, this again is the point of the entire film. **IPHIGENIA IN AULIS** has a complete collection of fotalk-heros in the annals of American crime, is completely out of line with the tenor of statements made by Clyde Barrow and Bonnie Parker themselves. This is especially evident in the scene following their second sexual encounter. While regaining their virility, Clyde asks Miloshi if he could have the chance, would he have done everything the same as before? Now I can recommend judging the play from the stage. This young woman is as

MONTCLARION

April 5, 1968

STATEMENT
COLUMN OF COMMENT

By DEAN HAMDEN
Assistant Professor of Physics

I was very pleased to see the debate on Viet Nam on page 7 of the MONTCLARION. I hope that more students and faculty will participate in the discussion of this most controversial issue of our time, one that could very well shape the future of this nation.

In reference to a letter written by Tim Fanning in the last issue of the MONTCLARION in defense of L.B.J.'s policy is Viet Nam, he states, “The conflict is one of preservation of the U.S. politically, militarily, and economically.” Mr. Fanning either has not heard the news or chooses to ignore it. First, politically this country has never been in a worse state: dissension and trouble the dollar is. I would go far beyond that and say it is a crisis. Economically, we are spending close to $33 billion a year in Viet Nam at a time when racial and economic injustices are wrecking our cities and a token budget is allocated to correct these conditions. Our balance of payments is in such doldrums that the administration suggests restricting travel, an infringement on individual rights not even attempted by non-democratic countries. The latest news of the closing stock market in London shows how deep in trouble the dollar is. I would go further and predict that the price of gold will go to $25 an ounce. The gold standard will collapse and $35 unless the administration alters its policy in Viet Nam. This means the American people, who would pluck this country into a most serious economic crisis.

Mr. Fanning points out free elections as the way to a democratic South Viet Nam. This is a vast difference in opinion that Viet Nam will drift. A people who worry about where their government is going to come from, do not lose sleep over democracy. With all their misery, homesickness, and fear to protect them, we kill 15,000, wound many more thousands, and send more citizens into a country that is homeless as a result. But, we are giving them democracy.” I do not wonder why the South Viet Name people are apathetic about the government and scorn the Americans. It is clear at present that a victory in Viet Nam is impossible without 3 million troops and the use of savage tactics of World War II. Our devotion of dollars, men, and munitions. Even if we do win, at least a million troops will be needed to keep us winning. This is a sacrifice of the country, and Russia will sit and watch, which is most disastrous.

So I suggest that we stop the bombing of the North, get negotiations underway, and prepare for an eventual withdrawal. Let the Viet Name people decide what to do by themselves. Let them live under communism, they will have to fight it themselves. Viet Nam will be independent. We cannot stop wars of liberation, so let us stop forcing our will on them. The more, then, of them will like us.

MSC's Urban Project Topic
Of Ex-Gov.'s TV Program

Montclair State College's urban education projects will be one of the topics to be discussed on two upcoming programs on former Governor Robert Meyner's University Forum.

On the first, to be aired April 13 at 5:30 on Channel 47 and April 18 at 7 on Channel 13, George Bernstein, as assistant professor of education, who has been working with SPURT, the college's special program for urban teaching, will be joined in the discussion by two students, Edward Stevens of Hackensack, who is enrolled in the SPURT program, with Wergio Pereira of East Orange, a graduate student who awaits with the Upward Bound program.

The second will be presented over Channel 13 on April 20 at 5:30 and Channel 13 on April 25 at 7. It will feature Harold Ashby, president of Project TRY (Teaching the Young) at Montclair State, and Quentin Young of Mamaroneck, another SPURT student.

SELECTIVE SERVICE
RESPONSIBILITIES & RIGHTS: Part I

It is the responsibility of every registrant to inform himself with a few exceptions such as members of the military services, to present himself for registration with the Selective Service System within 5 days after his 18th birthday. He may register at any Local Board or through the services of any special registrar.

The address he gives as his home address, not the place where he registers, will determine which of the most that men of the System will be sent his registration card for permanent custody.

The act of registering is only one of the duties which must be performed under the law. After registration, every registrant must comply with the oath that he has given by his Local Board subject to severe penalties. His principal requirement, in addition to the requirement to see that his Local Board always has his current mailing address, that is, in its possession, is that he respond promptly to all inquiries, and that he report when and where instructed by the Board for interview, physical examination, or induction.

The President of the United States has said, “The knowledge that military service must sometimes be borne by and imposed on our fellow citizens, may be preserved is woven deeply into the fabric of the American experience. Americans have been obliged to take up arms in the cause of liberty since our earliest days on this shore. From the militiaman who shouldered his musket to protect his community in the wilderness to the master of the machine gun who serves the common defense and then returns to civilian life, we have known the price of freedom as well as its glory.”

He also said that “because of the conditions of the world we live in now, we must continue to ask one form of service—military duty—of our young men. We would be an irresponsible nation if we did not—and perhaps even an extinct one.”

The Selective Service System was created to provide an orderly method of involving the American people in military service by registering the young men of the nation and classifying them as to their availability for military service to meet the national health, safety, and interest.

Registration with the Selective Service System is for the new registrant the beginning of a long process of preparation for military service and responsibilities to country and fellow citizens, counter-balanced by personal privileges and rights. The combination is the result of the decades of study to produce the greatest possible degree of personal equity consistent with the national interest.

The need of the Armed Service for men is high, the chances of a registrant being called to active service is greater even though his circumstances are the same. Conversely, when military manpower needs are low, the chances of a registrant being called will be less. The Selective Service System does not determine how many men are to be called for service, but it is the Department of Defense subject to restrictions fixed by Congress.

The law says it is a privilege to serve in the Armed Forces of the United States, and it is. Most of the men in the armed forces volunteered for enlistment to exercise that privilege.

MSC Students Back Johnson, "Peace Union" Poll Assesses

By CHARLES SCOTT.

The news media continues to report that significant numbers of college students are tuning in to support peace candidates Senators Eugene McCarthy and Robert Kennedy, and this may be seen in the increasing numbers of anti-war, pro-McCarthy bumper stickers and buttons appearing across the campus. However, the results of the Student Peace Union Poll indicate that the majority of the Montclair student body continue to support the Johnson administration, and actions in regard to the Viet-Nam war.

The evidence is as follows:

"The United States is morally right in maintaining its military presence in Viet-Nam."
54.2% Agree 45.4% Disagree

"To produce negotiations, we should halt the bombing of North Viet-Nam, and the U.S. should send in troops for an unlimited period of time."
39.6% Agree 60.4% Disagree

"An objective of the United States in Viet-Nam is to enable the people of South Viet-Nam to determine their own government by the democratic process."
53.0% Agree 46.0% Disagree

"The United States should escalate the Viet-Nam war."
39.4% Agree 58.6% Disagree

"The United States should allow all groups, including the communists, to participate in the government of South Viet-Nam, if fairly elected by internationally controlled elections."
71.6% Agree 27.9% Disagree

Regarding the use of nuclear weapons, the responses to the following questions were tabulated:

"Nuclear weapons should be used against North Viet-Nam."
7.8 Agree Strongly 53.1 Agree 20.7 Strongly Disagree

"25.0% Agree Strongly 52.0 Disagree Strongly 22.0% Disagree

"If I were to lose my deferment and faced with the possibility of being drafted, my course of action would be:"
52.5% Accept military service 36.0% Refuse to serve, accepting deferment and faced with the illegal consequences. 2.4% Refuse to serve, accepting illegal consequences 2.2% Evade through illegal activities protest against the war. 3.8% Leave the country

Concerning the draft and anti-war protests, the following was revealed:

"I feel sure she would," said E. Pluribus, "but I am not married." 89.5% Strongly Agree 8.0% Agree 2.5 Strongly Disagree

"Do you want to be?" said Portly. 85.0% Strongly Agree 1.5% Agree 3.5 Strongly Disagree

"I am Portly Prosperous, president of American Xerographic Data Processing and Birth Control, Incorporated. Are you a senior?"
40.0% Support 42.5 Tolerate 6.2% Do Not Support 1.3% Leave the country

The general tolerance, but lack of support for legal protests against the war, the lack of mere recognition for acts of civil disobedience against the war, and the overwhelming acceptance by military service, indicate the general support of Montclair students for the present Viet-Nam policy.

In seeking to explain the absence of strong anti-war activists, the general support for the present Viet-Nam policy, and the moderate stance of students regarding nuclear weapons use and anti-war protests among the members of the Montclair College community, two possible answers emerge.

When the 70% majority of Montclair students are being commuters, their ideals and actions are probably significantly molded by their home environment and connection with parents. Secondly, the social activity associated with students, both at home and on campus, diminishes the time and desire of the individuals to actively engage in contemporary political affairs.

The PRODUCER:
Mr. W. Scott MacConnell

MONEY: THE STORY OF AN ENGINEER

We all know, of course, that in this age of technology every engineering senior is receiving fabulous offers of employment, but do we realize just how fabulous these offers are? Do we comprehend just how keenly industry is competing? To illustrate, let me cite the true and typical case of E. Pluribus Ewbank, a true and typical senior. Two days last week, while strolling across the M.I.T. campus, E. Pluribus was hailed by a portly and prosperous man who sat in a yellow convertible stuffed with precious gem stones. "Hello," said the portly and prosperous man, "I am Portly Prosperous, president of American Xerographic Data Processing and Birth Control, Incorporated. Are you a senior?"

"Yes, sir," said E. Pluribus.

"Do you like this car?" said Portly.

"Yes, sir," said E. Pluribus.

"It's yours," said Portly.

"Thanks, hey," said E. Pluribus.

"Do you like Personna Super Stainless Steel Blades?"

52.5% Agree 47.5% Disagree

"What clean living, clean shaven American does not?"

80.0% Agree 20.0% Disagree

Portly pressed a button on the dashboard of the convertible and the trunk opened up and out came a nubile maiden with golden hair, rosy knees, a perfect disposition, and the appendix already removed. "This is Svet­lana," said Portly. "Would you like to marry her?"

"Is her appendix out?" said E. Pluribus.

"Yes, hey," said E. Pluribus.

"Okay, hey," said E. Pluribus.

"I will call Svetlana," said Portly. "And for the happy bride, a set of 300 monogrammed pewter forks."

"Thanks, hey," said Svetlana.

"Now then," said Portly to E. Pluribus, "let us get down to business. My company will start you at $75,000 a year. You will retire at full salary upon reaching the age of 26. We will give you an eleven-story house made of Stainless Steel Blades every twelve minutes as long as you shall live. We will keep your teeth in good repair and also the teeth of your wife and children into the third generation. We will send your dentist a pack of Personna Stainless Steel Blades every twelve minutes as long as they shall live. We will keep your teeth in good repair and also the teeth of your wife and children into the third generation."

"Do you want the job?" said Portly.

"I feel sure she would," said E. Pluribus, "but I am not married."

"Do you want to be?" said Portly.

"I am Portly Prosperous, president of American Xerographic Data Processing and Birth Control, Incorporated. Are you a senior?"

"Yes, sir," said E. Pluribus.

"If I were to lose my deferment and faced with the possibility of being drafted, my course of action would be:"

"Okay, hey," said E. Pluribus.

"I will call Svetlana," said Portly. "And for the happy bride, a set of 300 monogrammed pewter forks."

"Thanks, hey," said Svetlana.

By GREG DOUCETTE.

People attending Players' production of THREE I SING will probably learn from this program that Mr. Donald Sobolik is credited with the costumes and that the sets were the responsibility of Mr. W. Scott MacConnell. The musical will take place April 25, 26 and 27 and May 2, 3 and 4 and even in its early stages, promises to be one of the best shows ever to be mounted on the stage of Memorial Auditorium.

Mr. Sobolik's main job is to cloth the actors in a manner that will be compatible to the mood, tone and theme of the show. However, in a recent interview, he stressed the necessity of not making the costumes too intrusive. He maintained that "The play's the thing" and that his job was to "not be an aid. By no means is Mr. Sobolik's job easy. The two main problems he has had to overcome have been the large number of people he has had to cloth and depicting the exact time period. How to go about it? First don't realize, it clothes have not changed much since the turn of the century. The basic garment has remained the same, the only changes have occurred in the realm of details.

"The most impressive thing to me is the character of modern times. It has been 25 years since I left school. By no means is Mr. W. Scott MacConnell, who is credited with the set building and the sets was the responsibility of Mr. W. Scott MacConnell. He explained that the sets for a show such as O. T. I. S. had to be one of the most extravagant. MacConnell maintains that the sets should be a background for the action, therefore, they are not more important than sets for M A C C O N N E L L, or ADDING MACHINÉ, only more obtuse. With this show, his biggest problem will be the space that is available. When not in use, the show's six sets will be rolled out of Memorial Auditorium and into the Players' Studio Theatre. The most impressive thing to be learned from talking to either Mr. Sobolik or Mr. R. Scott MacConnell is not what they say, but how they say it. Both men obviously enjoy their jobs. They exhibit a dynamic enthusiasm which is backed by years of experience. The play may be the thing but costumes and sets run a close second.

In seeking to explain the absence of strong anti-war activists, the general support for the present Viet-Nam policy, and the moderate stance of students regarding nuclear weapons use and anti-war protests among the members of the Montclair College community, two possible answers emerge.
The staff of QUARTERLY, MSC's literary magazine, has initiated a new submission policy for all students who submit their work to QUARTERLY for evaluation.

Any writer who has submitted his work to QUARTERLY and wishes to know why that work was accepted or rejected, and also wishes to look over the actual critical comments that their work has received by the literary staff may do so under the following conditions:

Due to this new policy, all the old evaluation sheets from the last issue, Winter 1968) will be kept on file in the publications office in the new submission period. Also, any writer that wishes to return his submissions is free to come to the publications office and/or contact any QUARTERLY staff member in order to have his work reviewed. There will be no admissions submissions kept on file for more than one submission period.

Panel Discusses Ghetto Problems

The urban crisis is one of the most pressing issues facing America today. Appearing on campus on April 23 will be a panel discussion on the topic of "Urban Crisis." It will take place in room 15 of the music building at 8:15.

Negroes from the ghetto areas of Newark will constitute the panel, and they will report on many topics. Students will hear first hand accounts of what it is actually like to live in the poor housing of the ghetto, how it was living there during last summer's racial violence, living on welfare, being an unwed mother and attending overcrowded schools. There will be ample opportunity for questions and answers after the panelists report.

Much understanding has been achieved through "Urban Crisis" between churches and other community groups and the Black panellists. A few results of the discussions have been formation of career preparation groups, tutoring committees, youth centers and community action programs.

The "Urban Crisis" panel is sponsored by the Protestant Foundation, the Newman Community, and the Student Peace Union. All students are invited to attend.

Delta Theta PSI

Delta Theta Psi would like to extend its thanks to Jean Caramelli and Doreen Hay for brooding and breeding "Our Chickens" on to a third place victory in Pi's Folliess. Their successful chairmanship was much appreciated. And that's no yoke!

The Delta Athletic Association achieved a third place victory in WRA's Inter-Sorority Bowling Tournament. As of yet, they have not been invited to play in the Olympics, but they have not given up hope!! Congratulations, D.A.A.!!

Congratulations to Patricia Bailey and Bobby Fallon, USMC, on their recent pension. That should put old Maple Shade on the map! Heartiest congratulations to Constance Byrke and Carl Bauman, Lambda Chi Delta, 67, on their engagement. Best wishes from us all!!! Best of luck to Kathy (Mallazo) and Mary Chamberlain (Lambda Chi Delta, 67) on their marriage. An eternity of happiness!!

Delta Sigma Chi

The culinary ability of the sisters of Chi shone forth once again last Monday when we held our first semi-annual "Pot Luck Dinner in college." This pre-pledging activities. Thanks to Sharon Miller for leading the after dinner singing.

Plans are now under way for our spring charity project, establishing a library for the Essex County Children Shelter. With the end of the semester fast approaching, we are looking forward to our Parent-Daughter Day, Yacht Party, Shore Weekend, and the Senior Farewell.

Congratulations to our newly-elected committee members, JoAnn Shello and Paula Scholz who will head our Carnival Committee. Also, our very best wishes to: Pinned

Jan Thorne. 70 to Stan Jakubik. 70.

Iota Gamma Xi

The women of Iota Gamma Xi have many plans in the works for spring semester. First congratulations to Pat Magrath and Sue Lake for their entry in the Miss Montclair State Contest. We would like to thank Pat LaCarruba and Dot Holt, co-chairmen of Pi's Folliess, for their hard work in "Beautiful Land." The sisters are all working hard on our spring tea, in anticipation of a great pledge class.

Congratulations to Janice Dime and Carol Kramberg on their acceptance to participate in the Experiment in International Living.

Married: Sue Rogoff, '69, to Ed Mochik, '68.

Faculty Notes

The Montclair State College Faculty Association, headed by James Pettigrew, a professor in English, as its president for the current year. He succeeded Dr. Robert Beckwith, professor of history.

Other officers are: Dr. L. Howard Fox, chairman of the speech department, vice-president; Ernest Holder, chairman of the foreign language department, secretary; and George Placek of the science department, treasurer.

Also elected were: Dr. Foster Wygant of fine arts, a representative to the college’s committee on committees; Ralph Vernacchia, fine arts, to the faculty review committee; Dr. Frank Cordasco, coordinator of federal programs, to the executive committee of the New Jersey State College Faculty Association; Albert Rossetti, business education, and Horace Sheppard, education, representatives to the Essex County Education Association.

Mrs. Dorothy Garland and Dr. James Mehother, both of the psychology department, were named to the social committee.

David Witcher, assistant director of admissions at Montclair State College, has been awarded a two-year fellowship to the Woodrow Wilson School at Princeton University for study, leading to a master’s degree in public affairs.

A 1967 graduate of Montclair State, Mr. Witcher taught music in Seventh Avenue Junior High School, Newark, last semester. He returned to his alma mater in February to direct the TRY (Talent Research for Youth) program, which assists high school students from disadvantaged areas who have college potential.

Mr. Witcher is well-known in this area for his musical activities, having appeared with such groups as Montclair’s Up People and the Essentials.

Dr. Earl C. Davis, a professor of psychology and guidance at Montclair State College, has been appointed coordinator for the national convention of the American Personnel and Guidance Association, to be held in Atlantic City in April, 1971. Dr. Davis met recently in Atlantic City with members of his committee and the national officers to select the hotels and facilities needed to accommodate the more than 12,000 members expected to attend the week-long convention.

Dr. Frank P. Melo, an associate professor of education at Montclair State College, has been appointed to a statewide task force to study the elimination of architectural barriers for the physically handicapped in schools and other public buildings. The group, selected by the New Jersey Rehabilitation Commission, will prepare materials for possible action by the State Legislature.

A school plant specialist, Dr. Melo has participated in more than 30 comprehensive studies of New Jersey school districts and has prepared several college master plans. He is the author of numerous publications in this field and has developed several research instruments widely used by school plant planners.

Dr. Max Sobel, professor of math at MSC, has completed a book to be published on April 13 by Prentice-Hall, entitled ELEMENTS OF MATH.

The book is a sequel to the INTRODUCTION TO MATH also written by Dr. Sobel and co-authored by Dr. Bruce Meserve, former MSC math department chairman. It is currently in use throughout schools in California and Florida. ELEMENTS OF MATH is geared to the liberal-arts student.

Do your contact lenses lead a clean life?

Contact lenses can be heaven...or hell. They may be a wonder of modern science but just the slightest bit of dirt under the lens can make them unbearable. In order to keep your contact lenses as comfortable and convenient as they were designed to be, you have to take care of them.

Until now you needed two or more separate solutions to properly prepare and maintain your contacts. You would think that caring for contact lenses should be as convenient as wearing them. It can be with Lensine.

Lensine is the one lens solution for complete contact lens care. Just a drop or two, before you insert your lens, coats and lubricates it allowing the lens to float more freely in the eye’s fluids. That’s because Lensine is an “isotonic” solution, which means that it blends with the natural fluids of the eye. Cleaning your contacts with Lensine retards the buildup of foreign deposits on the lenses. And soaking your contacts in Lensine between wearings assures you of proper lens hygiene. You get a free soaking case on the bottom of every bottle of Lensine.

It has been demonstrated that improper storage between wearings may result in the growth of bacteria on the lenses. This is a sure cause of eye irritation and in some cases can endanger your vision. Bacteria cannot grow in Lensine which is sterile, self-sanitizing, and antiseptic.

Let your contacts be the convenience they were meant to be. Get some Lensine, from the Murine Company, Inc.
Fencers Place 62 Wins; Bryer Captures Crown

The 1967-1968 men's varsity fencing team turned in a seven and one record, the most successful season in Montclair history. This sterling effort on the part of Coach Al Macke's team was marked by brilliant fencing from his sabre team. In sabre, the Indians combined for 62 wins and no losses. Dale Rodgers, captain for the second straight year, had a record of 22 wins in sabre and two in foil. Another fine performer was sophomore, Jordan Denner. Denner, a music major from Springfield, had a 15-11 record.

In epee, the top man was senior, Jim Harris, who had a record of 13 wins, 8 losses. Backing him up were freshman, Bruce Kinter, 13-10, and sophomore, Dan Ehrcott, 9-5. Hampered by a knee injury, Dan joined the team in mid-season, posting a fine dual meet record for a first-year man, helping whenever he could. Dave Shapiro was the top reserve man in both epee and foil.

In foil, Macke worked hard to develop his three inexperienced men. The future looks bright and hopeful as Jim Robertson, Bruce Kinter and Jordan Denner, Dave Bryer, Todd Boepple and Jim Robertson. Kneeling, from left to right are: Dave Shapiro, Ken Zurich, Dale Rodgers, Bob Critchley, Coach Al Macke.

Both teams had records of 18-4. In epee, MSC was represented by Bruce Kinter and Jordan Denner. Kinter faced very stiff competition and did not fare as well as expected. Denner, however, fencing the weapon for the first time, made his way to the finals only to lose in a three-way fence-off. His fine performance was hampered by a knee injury that may require an operation to correct.

In foil, Zurich and Boepple faced experienced fencers and could only pick up a pair of wins between them. In spite of this, the outlook for next year seems to indicate that both will be ranked among the top fencers in the metropolitan area.

The prospects for next year, after an excellent record and post season tournament look excellent, as the only senior is Jim Harris. The other eight starters are freshmen and sophomores. Congratulations to a job well done and to a fine team effort.

3) Frank Ross, Steep, C.
4) Ken Meek, Jr., S.S.
5) Ron Ian Filippus, Fresh, 3B
6) Ken Frank, Jr., 1B
7) Bruce Kinter, Sr., R.F.
8) Tony Picaro, Soph., L.F.
9) Pete Jerald., P.

Low Back Pain

Promptly Relieves Pain
So Stiff Muscles Loosen Up and
You're Back Into Action

Doctors who specialize in back troubles report most aching backs are due to weak, tense muscles which can go into painful spasm as you suddenly bend, stretch or twist. To relieve such backache doctors recommend the pain-relief compound in Anacin's Analgesic Tablets. And Anacin gives you more of this medication than any other leading tablet.

Anacin is a special fortified formula. It promptly relieves pain, helps reduce swollen tissues, and so relieves pressure on sensitive back nerves. Then notice how stiff muscles loosen up and you move around with greater ease.

Only Anacin has this special fortified formula. It's not found in any other product. See if Anacin's exclusive formula doesn't work better for you.
Montclair Trackmen

The Montclair Trackmen are looking forward to another winning season for the young Indians. However, a successful year will not be easy due to the fact that, as Montgomery puts it, "we have the best group of freshmen players ever to enter the college. The fact that we hold the Indians back is the most basic — the schedule. This year's new teams have been added, making it one of the toughest junior varsity small college states in the East. The Indians will face the likes of Fordham, the Navy 'B' squad, Wagner, Rutgers (New Brunswick), Fairleigh Dickinson, St. Peter's and Adelphi, at least once and twice in most cases during the season.

Surprisingly the schedule does not seem to overly bother Montgomery as he sticks to his rule, as he still looks toward a good year. The reason for his optimism could be the vast wealth of talent fighting for starting positions to double play, are the only two)

Montgomery Sees Winning JV Baseball Season

Montclair Trackmen Face Rugged Slate

A scheduling for seven dual and one triangular meet has been announced for Montclair State College's 1968 varsity track team. The Indians will open the season on April 10 at home against Fairleigh Dickinson University. The one triangular meet will take place with the University of Bridgeport and City College of New York on April 20. The meet will be at the Indians' Sprague Field.

Montclair State will also take part in the Penn and Quantico Relays, New Jersey State College, Collegetown and the District No. 31, National Association of Intercollegiate Championship Meets.

The 1968 season will be the 30th in intercollegiate track at Montclair State since the sport was introduced in 1942. The 1968 schedule:

April 20 University of Bridgeport and City College of New York
April 24 Jersey City State
April 27 Penn Relays
April 29 At East Stroudsburg State (Pa.)

May 1 At Southern Connecticut State
May 4 Quantico Relays
May 8 New Jersey State College Championships
May 11 Collegiate Track Conference Championships
May 13 Trenton State
May 18 District 31, National Association of Intercollegiate Athletics

Winter Sports Award Winners Announced

The naming of Jim Grieco, Rich Schwartz, Dave Bryer, Luther Bowen and Bob Lester as MAJOR AWARD WINNERS in the four winter sports at Montclair State College has been announced by Bill Dioguardi, director of athletics.

Grieco, a junior from Brick Township (NJ), was named the most valuable wrestler for the 1967-68 season while Bryer, a freshman from Fairfield (NJ), took a similar award in fencing. Schwartz, a junior from Morris Plains, captured his second straight most valuable player trophy in gymnastics.

Lester and Bowen, who helped lead the Indians to a 20-8 record in basketball, were named co-winners of the Cobra Award. The Cobra Trophy presented by Coach Ollie Gelston for the first time this year, is for outstanding defensive play during the season.

In addition to Grieco's MVP award in wrestling, other trophies presented by Coach Tim Sullivan went to John Bellavia of Newark (outstanding freshman) and Bob Hurley of Bergenfield and Mike Nuzzo of Edison (undefeated in regular season competition).

Grieco posted the top individual mark in wrestling at Montclair State College during the year winning 22 of 26 bouts. The talented junior from Brick Township captured the 167-pound championship in the Metropolitan Intercollegiate and District No. 31, National Association of Intercollegiate Athletics Wrestling Tournaments.

Schwartz, winning the MVP award for the second straight year, is the winningest gymnast and highest point scorer in Montclair State College history. This year Schwartz captured 25 events while placing second in 14 and taking third and fourth places on nine occasions. He turned in nine first place wins in trampoline and eight in floor exercises. Lester, a junior out of Newark, and Bowen, a junior out of East Orange, turned in brilliant defensive exhibitions on numerous occasions during the 1967-68 season. Both boys were New Jersey State College Conference first team selections and second team picks by the New Jersey Basketball Writers.
