Richardson Cuts Ribbon
As T.U.B. Becomes Reality
By GINNY SAUNDERSON

Although a sharp, cold wind and threatening rain shortened the opening ceremony of TUB, it did not lessen the enthusiasm which was exhibited by all who attended. Mr. Edward Yezo, director of the Temporary Union Building, opened the ceremony by welcoming the administrators, guests, and audience of approximately 75 to 100 students and faculty.

Dr. Richardson, who instituted the idea of renovating the vacated Annex 3 into student life facilities, then noted the importance of the student lounge and recreational facilities which MSC urgently needs.

Ron Szabo, a senior industrial education major who designed TUB, then gave a brief history of TUB, including the opening ceremony of TUB, it did make a breakthrough in education. And frustration develops easily for these students when they fail to receive the proper financial aid and appointments.

T.R.Y. was initiated at MSC last year. It is now under the directorship of Mr. David Witcher, who is also assistant director of admissions. It is a program supported by funds from the Federal government.

Initially, T.R.Y. was formed to distribute information to ghetto high school students concerning ways that these students could finance their college education. For educators are well aware of the disadvantages that ghetto (or center-city) students face in receiving an adequate high school education. And frustration develops easily for these students when they fail to receive assistance from their high school guidance departments in gaining admission to college. Too often, center-city guidance department personnel are over-loaded with work.

So T.R.Y. hopes that it could create an incentive for ghetto students by going into the high schools and talking to these students.

But it soon became apparent to T.R.Y. members that it was even more frustrating for these students to become aware of financial needs at their disposal and then fail to gain admission to college.

Dungan Answers
Student's Probes
By BILL LANG

"It's up to the student to do something." That prophetic statement came out of an interview with Chancellor Dungan on March 25 at a meeting of the Association of New Jersey Colleges and Universities held at Montclair. He was responding to a question: "What can you do to help the colleges out of the financial squeeze?"

It may be good politics to put the responsibility on someone else but it brings up a good point. We, as college students, have the responsibility to rectify the situation we find ourselves in.

T.R.Y. thus devised a program whereby 40 students will be admitted to MSC above and beyond the number of students accepted as part of the regular admissions program. These 40 students will face tremendous academic pressures and a new, completely different environment. They will be assisted by special tutoring programs. And it is hoped that their presence on the campus will also stimulate an awareness of the problems of poor students. So the majority of MSC students, coming from a secure, middle-class background, should receive a basic education in human relations from this experiment.

A special curriculum will be devised for these students by Mr. George Bernstein of the education department. Mr. Bernstein was relieved of teaching duties for this semester to work on T.R.Y.

MG has the opportunity to make a breakthrough in education which could have dramatic effects across the state and the nation, for in September, 1968, MSC will admit 40 disadvantaged students accepted as part of the regular admissions program. These 40 students will face tremendous academic pressures and a new, completely different environment. They will be assisted by special tutoring programs. And it is hoped that their presence on the campus will also stimulate an awareness of the problems of poor students. So the majority of MSC students, coming from a secure, middle-class background, should receive a basic education in human relations from this experiment.

A special curriculum will be devised for these students by Mr. George Bernstein of the education department. Mr. Bernstein was relieved of teaching duties for this semester to work on T.R.Y.

T.R.Y. (Continued on Page 2)

Future Frosh Admitted Through T.R.Y. Efforts

students and the maintenance crew. Annex 3 became the comfortable and handsome student center which will ease the burden of the Life Hall facilities.

Presentations were made by Mr. Gary Leo, Director of Life Hall and Student Activities, to Ron Szabo, William Finnerty, a junior social science major who was active in the rejuvenation of Annex 3, and to Lenny Elowitz and Allen Daumce, co-chairmen of the TUB committee.

Dr. Richardson then cut the ribbon which marked the official opening of TUB, and immediately a surprised and delighted crowd entered MSC's newest student center.

The student body owes their gratitude to all those who made the effort to complete the student center which will ease the student's adjustment to college life.

Richardson (center) cuts the ribbon to mark the Temporary Union Building opening.

Left to right: Mr. Gary Leo, Mr. Edward Yezo (hidden by Mr. Leo), Ron Szabo, designer of TUB, Alan DeCuzens, co-chairman, Dean Allan Moorehead, Lenny Elowitz, co-chairman, and Mr. Vincent Calabrese, director of business services look on.

C.U.E. Appeals To Trenton
New Jersey state college students sent representatives to Trenton recently to plead their cause before a joint session of the Senate and Assembly education committees, with a strong appeal for additional financial support.

The students represent a group known as CUE (Committee for Undergraduate Education), which was reactivated at a meeting at Newark State College March 26.

In the past, CUE was active in lobbying for a broad base tax and a separate department of higher education, according to Bill Lang, representative from Montclair State. After these goals were achieved, it disbanded.

"However," Lang said, "even after the enactment of the sales tax and the creation of the Department of Higher Education, New Jersey has fallen from 46th to 50th in the nation in per capita spending for public higher education. It is apparent," he continued, "that the state revenue base must be broadened and that a massive bond issue is needed to finance capital construction in addition to increased financial support, other CUE objectives are: 1. To provide the state colleges with increased fiscal autonomy similar to Rutgers, Newark College of Engineering, and the county colleges, 2. To act as an organization through which students can effectively voice their concern and the state government's apparent lack of concern for the problems of New Jersey education.

Besides Lang, representatives attending the CUE reorganization meeting were Frank Nero of

SGA Elections

For the upcoming SGA election, the MONTCLARION will offer space in the April 26 issue to all candidates for SGA president, vice president, secretary and treasurer. We urge all candidates to accept our offer and submit their platforms. Candidates may provide their own pictures or ask that the MONTCLARION take a picture for them. All platforms must be in the MONTCLARION office by April 17. Any material submitted after that date will not be printed.
Board of Trustees Express Dissatisfaction With Budget

Montclair State College Board of Trustees has expressed dissatisfaction with Governor Hughes' proposed budget, which they felt fell short of the college's needs. They have pledged its full support to efforts to secure, through the Legislature, additional funds for higher education in the state.

Speaking in behalf of his fellow trustees, Board Chairman W. Lincoln Hawkins pointed out that, in accordance with the Higher Education Act of 1966, the college has an obligation to direct the future growth of the college into a multipurpose institution of the highest possible caliber," he declared.

However, he continued, the proposed budget "falls far short" of providing the minimum financial support required "to proceed with the development of the college as directed." Montclair State's total budget request of $5,982,729 for 1966-1967 was reduced to $7,185,687 in the proposed state budget.

Funds must be made available for the expansion of the college's physical plant to accommodate the accelerated growth in student population, Dr. Hawkins said. He noted that in September 1967, the College Sponsors

Summer Tour

Of Great Britain

A banquet in a medieval castle in Limerick will be one of the highlights of a tour of the British Isles and Europe sponsored by the Bureau of Field Studies, Montclair State College, July 11 to Aug. 1. This year's tour will be conducted by Dr. C. Bye, will conduct the tour, which may be taken for three graduate or undergraduate credits, if so desired.

Also on the itinerary will be: London, Bristol, Bath, Salisbury, Winchester and York Cathedrals, Stonehenge, Windsor Castle, Regent House, Hampton Court, Oxford and Cambridge Universities, Stratford-on-Avon, the lake districts of England and Scotland, Glasgow, Edinburgh, Dublin, Cork, Ring of Kerry, Killarney Lakes, and Blarney Castle.

Tour members will fly via TWA to London, returning on the same airline, and will travel by chartered bus while there. The cost of $875 covers all expenses: tuition, airfare, hotel, meals, and sightseeing. A special rate has been arranged for those who wish to sail from Liverpool to New York, returning from New York.

Dr. Ralph N. Haber, newly named chairman of the psychology department at the University of Rochester, spent two days on campus recently as a visiting consultant from the American Psychological Association. Montclair was one of more than 50 colleges across the country selected by the association from over 600 applicants for such a consultation. The visit was made possible by a National Science Foundation grant.

While here, Dr. Haber lectured to psychology students and consulted with members of the psychology department about its further growth and development.

Montclair State rejected, for lack of available space, three out of every four qualified applicants from secondary schools in the area. This year, with College Board scores above 625 and many with scores above 550. Many of these have joined the majority of New Jersey high school graduates who have found it necessary to leave the state for their college training, the board chairman declared. "Other states cannot be expected-with the pressures for college admission over increasing to continue to accept students from New Jersey," he asserted. It is reported that some states have already reduced their quotas for out-of-state students, particularly from New Jersey.

The Montclair State Board is in complete accord with the Board of Higher Education in its efforts to secure the necessary funds for higher education in the state, according to Dr. Hawkins. "New Jersey can no longer afford the dubious distinction of spending less per capita on higher education than any other state in the country," he concluded.

CINA Receives Money For Research Bulletin

CINA, the Council on National and International Affairs received $300 from the SGA to publish an on-campus undergraduate political-historical publication to provide "objective, documentary, historical facts" to the students of Montclair. As Montclair is growing both physically and intellectually, CINA feels that there exists a need for non-opinionated fact as a background for opinions on contemporary affairs.

This 30-page publication, to be released after the Easter vacation, will be open to any student who wishes to submit factual, documented articles to the editors. It will be distributed free of charge.

APD Chairman Visits Campus

Dr. James Mehorter, world renowned psychologist, will officially open the National Student Board of the Music Educators National Conference (MENC) to the Eastern Division of the Music Educators National Conference (MENC). MENC is a division of the National Education Association (NEA). It is the only music educators' professional association in the country. The conference has 125 chapters in the 12 eastern states with 4000 members.

Elected at the national convention of MENC in Seattle, Washington, Lee began his term of office in July 1 of this year.

Lee was selected as student chairman of the Eastern Division of the Music Educators National Conference (MENC). He is just completing his fourth year at Massachusetts State College, Amherst, and will represent the Eastern Division at the national MENC convention in September.

Several of the colleges have newly formed campus groups with aims similar to those of CUE.
MS Liberal Arts Program Restated

Some confusion exists as to the curriculum and overall goals of the liberal arts program at MSC. The Resource Committee on Liberal Arts, formed at MSC, recently developed a statement of philosophy regarding the program. The philosophy can be summed up by the following excerpts from the statement: "A Liberal Arts education prepares responsible members of society for the world-wide tasks. Hence, the liberal arts major has a total of 42-56 credits for electives.

In over 50 countries throughout the world, the Peace Corps is associated with human dignity. The war against poverty, ignorance and disease is no small task. Thus, the Peace Corps is constantly looking for recruits.

In the Peace Corps, the individual is provided with more than the product of such an education is education. It will be offered on a monthly basis. The science seminars are designed to determine an individual's ability to learn a specific subject. Although he agreed that the course is non-competitive aptitude test, this test is designed to determine an individual's ability to learn a specific language. It will be offered on April 23 and 24 and no previous experience is necessary. In addition to the test, two movies will be shown on April 22 and 23:

1999
2. A Step at a Time
3. Peace Corps To See'

Recruits On Campus

The importance of the Oak Ridge Mobile Radiotrace Laboratory program has been felt on college campuses from "Tacoia to Tampa" since the new year began. The mobile laboratory 'offered' by MSC is not the same. The cables, the transistors, the computers, are the same, but the educational service, spanning the continental United States, will appear at 30 colleges and universities until June. At the institutions they present a concentrated two-week course in radioisotope techniques and applications.

A mobile laboratory will present a program of laboratories and lectures in state colleges and universities from April 16 through April 26 daily from 4:00 to 5:30 P.M. in New Jersey state colleges. The lectures are presented to nearly 16 participants. A recent lecture was given by Professor Roland Flynn, chemistry coordinator and chairman of the science department. Its success is indicated by the number of requests for visits that the laboratory has received in the past three years, although he agreed that the "impossible" educational service, spanning the continental United States, will appear at 30 colleges and universities until June. The lecture was given by Professor Flynn, and it was the first in a series of lectures on the subject of radioisotope techniques and applications.

Exciting Seminar Is Available to Students

By RICH LUPO

Professor Roland Flynn, chemistry coordinator and chairman of the science department has stated that many undergraduates are not aware of the science seminars held for a month for science majors.

The science seminars are basic science courses designed to supplement the regular science curriculum offered to the students. They are designed to meet the specific needs of each student and the students of the college.

Science seminars are conducted either by the college faculty members or the National Science Foundation. MSC is also the site of lectures put on by the American Chemical Society performed on a monthly basis.

A recent lecture was given by Professor Flynn of Montclair State College and an outside speaker representing Hoffman-LaRoche is scheduled for a seminar on April 25.

Professor Flynn mentioned that the seminars have been in existence for over three years. The number of seminars has increased over the years, but he said that the seminars have not been publicized to their fullest extent. The science bulletin board will publicize information on these seminars.

The seminars are "happenings," happenings open to anyone who is interested. The amount of scientific knowledge over that which his regular classes provide.

Be economical about it. Some times are cheaper than others, if you're calling long distance. And as long as you are about to do the "right" thing, do it right.

Instead of letting your parents sit home wondering whatever happened to their personal investment in higher education, pick up the telephone and call home.

New Jersey Bell
Part of the Nationwide Bell System

Montclair to Receive Benefits of Mobile Lab

The Mobile Radiotrace Laboratory program has been felt on college campuses from "Tacoia to Tampa" since the new year began. The mobile laboratory 'offered' by MSC is not the same. The cables, the transistors, the computers, are the same, but the educational service, spanning the continental United States, will appear at 30 colleges and universities until June. At the institutions they present a concentrated two-week course in radioisotope techniques and applications.

A mobile laboratory will present a program of laboratories and lectures in state colleges and universities from April 16 through April 26 daily from 4:00 to 5:30 P.M. in New Jersey state colleges. The lectures are presented to nearly 16 participants. A recent lecture was given by Professor Roland Flynn, chemistry coordinator and chairman of the science department. Its success is indicated by the number of requests for visits that the laboratory has received in the past three years, although he agreed that the "impossible" educational service, spanning the continental United States, will appear at 30 colleges and universities until June. The lecture was given by Professor Flynn, and it was the first in a series of lectures on the subject of radioisotope techniques and applications.

A mobile laboratory will present a program of laboratories and lectures in state colleges and universities from April 16 through April 26 daily from 4:00 to 5:30 P.M. in New Jersey state colleges. The lectures are presented to approximately 16 participants. A typical course pattern consists of a 90-minute lecture five days a week, with two laboratory sections scheduled at convenient times. Topics for the lectures include: introduction to radiation, characteristics of beta and gamma radiation, detection and instrument calibration, use of radioactive sources, Carbon 14, radiotracer methodology, radioisotopes in biology, physics, radiochemical separations, and synthesis of labeled compounds.

Since the program began in 1959, more than 2000 schools in 37 states have requested and received the mobile laboratory course presentation. Approximately 3,000 faculty members and students have participated.

At each campus, a series of laboratory experiments and lectures is presented to approximately 16 participants. A typical course pattern consists of a 90-minute lecture five days a week, with two laboratory sections scheduled at convenient times. Topics for the lectures include: introduction to radiation, characteristics of beta and gamma radiation, detection and instrument calibration, use of radioactive sources, Carbon 14, radiotracer methodology, radioisotopes in biology, physics, radiochemical separations, and synthesis of labeled compounds.

The last value and purpose of the program is the instruction and guidance of students in science facilities. Its success is indicated by the fact that requests for visits have been made for the past three years, and that many colleges, following a visit, have established a course or a series of courses patterned after the mobile laboratory.
The Year of the Project

1968 seems to be the "Year of the Project." From operations such as heart transplants to new programs for pre-school age children, people are organizing to effect better conditions for the common good of all men. "Operation Headstart," "Operation Heartbeat," "Upward Bound," T.R.Y., S.P.U.R.T., and "Project Understanding" are just a few of the various programs which have been initiated or expanded in recent months to help others.

It is concerning this last project that the MONTCLARION wishes to dedicate this editorial space. Project Understanding, a peace march through the murk-in-the-dark of riot-torn Central Ward of Newark, is hoped to have far-reaching beneficial effects. It is an attempt on the part of white suburbanites to show the inhabitants of the Central Ward that someone really does care. Priests, college students, nurses, city officials, children and anyone else interested in spreading brotherhood in a practical way will participate in the 2½ mile walk to be held on Palm Sunday, April 7.

The MONTCLARION urges all MSC students to consider advantages of this opportunity. This project can only succeed through the efforts of concerned citizens. Show you care and join the project of the year, which can accomplish so much good. Take a step towards understanding and join the marchers to Newark on April 7.

C.A.U.S.E. Is Your Cause

A student group, C.A.U.S.E., has recently been set up to help us the students. C.A.U.S.E. committee for aid to underdeveloped state education, comprises a handful of interested students fighting a battle for 4300 of us. C.A.U.S.E. groups on other state college campuses are being formed. With their aid and possibly the aid of the other state universities, Rutgers and Newark College of Engineering, the organization will be representing over 30,000 students.

Their plea is more state aid for higher education. This should be the major item of concern among state college students. Especially as voters and future voters, the legislators and officials of Trenton cannot ignore over 30,000 students (who help to place them in office or remove them).

We can act to show we care about the present and future of New Jersey's higher educational system. C.A.U.S.E. is acting to focus attention on our desperate needs--needs which are great on all state college campuses. Recently C.A.U.S.E. has asked students to send to their legislators the form letters published in the March 22 issue of the MONTCLARION. We can help C.A.U.S.E.

This is not "just another" committee. This is a statewide movement representing over 30,000 students. This committee cannot be ignored. C.A.U.S.E. is extremely important to every MSC student. Support this cause.

Hail, TUB!

Thank-you Ron Szabo and Alan DaCunzo. Thank-you students, administration and SGA.

We now have a temporary union building designed to ease the crowd of the Life Hall lounges. TUB now provides lounge areas, a snack bar, game area, television and music. TUB is newly decorated, painted, equipped and open. It is ready for us to provide with areas of "our own."

A greatful thank-you to all who helped TUB to become a reality from all of us who will enjoy it.

Dump Johnson?!

Perhaps one of the most astonishing political events since the abbreviation of Britain's Duke of Windsor as king was Johnsonian renunciation of all claims to the 1968 Democratic presidential nomination. A shock to many and a relief to still others, history will be the sole judge of Johnsonian policies and not massive demonstrations.

Johnson's withdrawal from the 1968 political arena sheds a new light on the campaign and the candidates. Before the unexpected event of last Sunday night's radio and television broadcast, it was assumed probability that Johnson would be the most likely candidate to contend. However, now the prospective voter is in a precarious position. With Johnson out of the picture, he must rely upon a limited field of candidates and an even more limited lot of credentials. "We know what we have, we're never sure of what we'll get." This familiar quotation is applicable to many topics, including the elections.

Finally, there is now no basis for the lament, "dump Johnson!", he has dumped himself. Now America reacts in consternation and, in some cases, sadness. Perhaps this is only a gimmick; perhaps, it is the real thing. In any case, the speculators are quick to pass judgment. It is human nature that man regrets what he no longer has, but now is not the time for regret. Let's reassess the political scene and do the best with what we have.
Letters To The Editor

The editorial board of the Montclarion requests that all submissions to this column be limited to 250 words. All letters must be typed. We wish to state that all views expressed in these letters do not necessarily reflect the views of the editorial board.

To the Editor:

In response to the letter regarding Pi's Follies in last week's Montclarion, the men of Omega Phi Delta regret that anyone may have been offended by our presentation of "Amos and Andy." However, let it be known that our motives were in no way intended to be of a detrimental nature to any one person or particular group of people.

Sincerely,

THE MEN OF OMEGA PHI DELTA

CANADIAN HAVEN?

To the Editor:

Since my activities at Montclair State College bring my actions under somewhat closer scrutiny among the student, faculty, and administrative bodies, relative to other students, I would like to take this opportunity to inform those persons interested in such things as to my present status and some of the reasons for my having done so.

On Feb. 26, my wife Mary and I were admitted to Canada, and we have since settled in Toronto, Ontario. We stand together in our belief that the United States—which we learned about on May 10 and 11, and not behind Mallory Hall as stated in the March 29 edition of the MONTCLARION—are feeling the financial pinch. Does the answer lie in limiting state funds to the colleges, or in giving our colleges the financial support necessary to deal adequately with such problems as the ghetto?

Sincerely,

P. E. PEPIN

CORRECTION

Owing to revised plans, the location of Carnival '68 will be held in the faculty parking lot on May 10 and 11, and not at the faculty swimming pool as previously stated.

Sincerely,

P. E. PEPIN

New Discs
High Chorus

By MAURICE MORAN

Nowadays, if a group wants to cut a record, they got to have some connection with the Big Wheels. The Rotary Connection has just succeeded and with their first album offer prime example of "classic rock." Boring about eight in number (one can never be too sure), the ROTARY CONNECTION has put together a Pops Orchestra, male tenors and a beautiful female monotone.

"Let me know what it's about" they intone in TURIN, ME ON, and that's exactly the question haunting you throughout the album. Sounding more like the Pontifical Choir of Rome than like a rolling stone, RUBY TUESDAY is barely identifiable in the hit from England.

LADY JANE, another English bit from the Stones turns on the "Greenleaves" of the 20th century. And then there's LIKE A ROLLING STONE with the orchestra playing the instrumental part, but the high alto female purring, "How does it feel to be on your own?"

A surprising addition (among others) to this list is SOUL MAN, the original of which can still be heard echoing in the hallows of the lower lounge. If you want to hear what the ROTARY CONNECTION do to it, you'll have to buy the album.

HONORABLE MENTION: THE MOODY BLUES with another classic rock album, Days of Future Past. Speaking of classic, LEONARD BERNSTEIN has a complete collection of "Gustaaf" albums. OTIS REDDING has an album around "Dock Of The Bay" showing the enormous talent of this R&B man...lastly, BLOOD, SWEAT AND TEARS (old Blues Project) with "The Child is Father to the Man."

Czech Film Movie: Poignant, Direct

By RICH KAMENICK

It is a relief these days to view a motion picture that does not utilize color trick photography and squirming made bodies to create cinematic art. But CLOSELY WATCHED TRAINS is just such a movie. It relates the initiation of an awkward Czech boy into the world of sexual pleasure.

The main action occurs during World War II in Nazi-occupied Czechoslovakia. The boy, Miloš, works as an assistant at a rural train station. Perplexed by the ease with which his co-worker, Vladimir, handles his 'women,' Miloš proceeds to take his girl to bed. This escapade is a miserable failure on the part of Miloš who can not accomplish his first attempt at intercourse.

Up to this point he has provoked only the laughter of the audience. Miloš' longing for a romantic experience despairs, fears that he is impotent and attempts suicide.

Bonnie and Clyde: Byronic Heroes

By JOHN LORD

The controversial movie, "Bonnie and Clyde," has caused a vehemence reactions due to the seemingly-heroic interpretation of the two film characters. However, this interpretation of the two main characters. However, the interpretation of the movie, as a picture of folk-heroes in the annals of American crime, is completely out of line with the tenor of statements made by Clyde Barrow and Bonnie Parker themselves.

They is especially evident in the scene following their second sexual encounter. While regarding their victims, Clyde asks "If that he had the chance, would he have done everything the same as you done on the parade? Would things really turn out the same way if they had it to do all over again?" Mickey Rooney replies that no, he certainly would not! Everything would be better because they would really live by robbing in one state, while living quietly in a neighboring state. This is definitely not the statement of a person to be emulated.

Also, the sequence of still photographs immediately preceding, or involved in the ambush is a perfect explanation of the position in the cosmos which these two people hold. Surely, one can see that there is a look of sheer wonder on their faces. It seems as though each were telling the other "I want..." and one never finds out what is wanted. However, this again is the point of the entire film. They are two people who use almost everyone wanting, love wanting, love things, wanting (most of all) life. However, their recognition of the fact that although wanting something is no crime in itself. Brandy shows that to answer these desires in the manner of Bonnie and Clyde is no answer at all.

But like his sexual endeavors, he falls at this too.

The film now acquired added dimension. It was noticed that sexual plain stands as an insurmountable obstacle blocking his efforts to gain priority. His story is the story of all youth, and the demanding pangs of puberty and gradually lose their grasp upon school imbroglios.

Ultimately an anti-Nazi partisan, Victoria, proves to be the most beautiful movie one may assume that it came either from off-Broadway or from England. In recent years several British imports, such as M A R A T - S A D E, THE INVESTIGATION, and more recently, ROSENCRANTZ AND GUILDENSTERN ARE DEAD and JOE EGG, have made an impact on the Broadway stage.

"PORTRAIT OF A QUEEN" is the newest addition to this list and a worthwhile one, indeed. The characters are as fitting as the play is heroic. They are as tragic as the play is heartwarming passion emoted by the narrator. The British shines famously in PORTRAIT. The episodes with Dtesche and Gladstone attest to the fact, even Lord Melbourne appears delightful as Victoria, tongue in cheek. Described as the man "with tears in his eyes."

I can't imagine any other sets than those created by Marvin Reiss. They are as fitting as the play is excellent. Only in America is filler Merit, the sets being impressive not glamorous and surrounded by elaborate and splashy sets while in England the material stands on its frame of reference.

The controversial movie, "Our Corner of the Night." The vocalist has a new release, "Let me know what it's about" and the entire film. They are two people who feel the earthy dialogue, their vitality, Bonnie asks Clyde their plight stands as an insurmountable barrier to their young child, I only wanted it for yourself. It can be seen at the Circle In The Square which is located at 159 Bleeker Street. Tickets are at a reasonable price.

By MAURICE MORAN

When good theater is in town, one may assume that it came either from off-Broadway or from England. In recent years several British imports, namely M A R A T - S A D E, THE INVESTIGATION, and more recently, ROSENCRANTZ AND GUILDENSTERN ARE DEAD and JOE EGG, have made an impact on the Broadway stage.

"PORTRAIT OF A QUEEN" is the newest addition to this list and a worthwhile one, indeed. The dialogue of the play consists entirely of letters and words written or spoken by the actual characters.

Dorothy Tutin as Queen Victoria executes her role in commanding fashion. She captures the cleverness, satirical wit and charming demeanor of the regal personage and never falter.

Victoria's life and times are traced throughout her sixty year reign in England; her internal and external self are exposed first hand. Considerable emphasis is given to the marriage of Victoria and Prince Albert. The parents of eight children, Queen Victoria and Prince Albert were so devoted to each other that after the Prince died, the Queen never fully recovered from his loss. She dropped almost entirely out of social events and her political appearances were so scarce that Parliament and the English people began to wonder if they had a queen.

The graceful aging of the Queen is shown by progressively slower speech, mannerism and facial expression. Makeup does not play a dominant role in this life process; Miss Tutin's acting alone suffices to make the audience know that she is aging.

The ironic, wit and intellectual humor of the British shines famously in PORTRAIT. The episodes with Dtesche and Gladstone attest to the fact, even Lord Melbourne appears delightful as Victoria, tongue in cheek. Described as the man "with tears in his eyes."

I can't imagine any other sets than those created by Marvin Reiss. They are as fitting as the play is excellent. Only in America is filler Merit, the sets being impressive not glamorous and surrounded by elaborate and splashy sets while in England the material stands on its frame of reference.

A beautiful picture of the English PORTRAIT OF A QUEEN subsums a human, enchanging quality throughout the work. It is a testament as curious about the Victorian era and a pleasure for those who already like the English. At any rate, see the play no matter what your frame of reference.

Gentleman, the most beautiful movie ever produced. The story is tender and striking; the mood is peaceful; and the outcome tragic. Archer Winston of THE NEW YORK POST believes that this movie is "...of such incomparable beauty and star that one sees in vain for its equal." One will find that the acting is superlative, and the color unlike anything ever previously experienced.

Elvira is breathtaking, sensitive, and lovely throughout the film. Sixten, her love, is compassionate, irrational, and very much in love. Sixten, however, cannot be condemned for his illicit romance with Elvira. The braces of society are never really present until the movie is concluded.

The theme of ELVIRA MADIGAN is one of youthful love. One may easily relate to the heartwarming passion emitted by Elvira and Sixten. The love affair is ultimately wrong, but the morality of the situation matters little. What occurs is beautiful; a work of art in every sense of the word. ELVIRA MADIGAN is one grand poem: a poem of life and love, and a Romanticist's delight. If, as Robert Frost says, "we love the things we love for what they are," then ELVIRA MADIGAN is truly "a lover's quarrel with the world."
By DEAN HAMDEN
Assistant Professor of Physics

I was very pleased to see the debate on the Vietnam War in the last issue of the MONTCLARION. I hope that more students and faculty will participate in the discussion of this most controversial issue of our time, one that could very well shape the future of this nation.

In reference to a letter written by Tim Fanning in the last issue of the MONTCLARION in defense of L.B.J.'s policy, I am surprised to see that the Vietnam War is still going on. The American people have heard the news or chooses to ignore it. First, politically this country has never been in a worse state: dissension and disillusionment darken the atmosphere of every political and intellectual gathering, there has been a decline of our prestige among our own allies; and our democratic system has turned into a near dictatorship by which the administration, headed by one man, makes all the decisions and controls the press.

The opening of the gold market in 1971 was a threat to the dollar and led to devaluation. This is just the beginning of economic injustices are wrecking our economy. The latest news of the Middle East looks like a war.

I am very pleased to see the upcoming programs on former President Lyndon B. Johnson's policy is Viet Nam at a time when the racial and social situation is much worse than ever before.

M.S.C.'s Urban Project Topic

Montclair State College's urban education projects will be joined in the discussion by two students, Edward Stevens of Hackensack, who is enrolled in the urban teaching program, and Wergo Pereira of East Orange, a graduate student who will present the Upward Bound program.

The second will be presented on Channel 13 April 20 at 5:30 and Channel 13 on April 25 at 7. It will feature Harold Ashby, president of the Newark Board of Education, in a discussion with David Wetherwax, director of Project CAUCUS (Children and Urban Community) at Montclair State, and Quentin Young of Mamaroneck, another SPURT student.

SELECTIVE SERVICE RESPONSIBILITIES & RIGHTS: Part I

It is the responsibility of every male citizen of the United States over 18 and under 25 to register with the Selective Service System within 30 days of turning 18. If you are a convicted felon, you will not be eligible to register. You are also not eligible if you have been dishonorably discharged from the armed forces.

The act of registering is only one of the duties which must be performed under the Selective Service System. After registration, you must comply with any restrictions fixed by Congress. The act of registering is only one of the duties which must be performed under the law. After registration, you must comply with any restrictions fixed by your local board.

The law says it is a privilege to serve in the Armed Forces of the United States; and responsibilities to country and fellow citizens, counter-balanced by personal privileges and rights. The combination is the result of decades of study to produce the greatest possible degree of personal equity consistent with national interest.

The Armed Service for men are high, the national interest. The Armed Services for women are high, the national interest.
MSC Students Back Johnson, "Peace Union" Poll Asserts

By CHARLES SCOTT

The news media continues to report that significant numbers of college students are turning their support to peace candidates. However, it may be seen in the increasing number of anti-war, pro-Carthy buskers and stickers appearing across the campus. However, the results of the Student Peace Union's poll indicate that the majority of the Montclair student body continue to support the Johnson administration and actions in regard to the Viet-Nam war.

The evidence is as follows:

"The United States is morally right in maintaining its military presence in Viet-Nam." 54.2% Agree 45.4% Disagree

"To produce negotiations, we should halt the bombing of North Viet-Nam, and not for an unlimited period of time." 39.6% Agree 61.4% Disagree

"By no means is Mr. Sobolik's vision of the political and social "system" as it is, the political and social system in the United States." 68.6% Agree 28.6% Disagree

"The United States should vacate the Viet-Nam war." 39.4% Agree 58.6% Disagree

"The United States should allow all groups, including the communists, to participate in the government of South Viet-Nam if fairly elected by internationally controlled elections." 71.6% Agree 27.9% Disagree

Concerning the draft and anti-war protests, the following was revealed:

"Those who through legal activities protest against the war." 40.4% Support 42.5% Tolerate 6.2% Do Not Support

"If I were to lose my deferment and faced with the possibility of being drafted, my course of action would be:" 52.5% Accept military service 33.6% Disagree 4.0% Leave the country 7.9% Disagree

The general support of Montclair students beingwives is the unwillingness of the majority of students regarding nuclear weapons use and anti-war protests among the members of the Montclair College community, two possible answers emerge.

With the 70% majority of Montclair students being communicators, their ideals and actions are most significantly molded by their home environment and connection with parents. Secondly, the social activity and thought of the students, both at home and on campus, diminish the time and desire of the individuals to actively engage in contemporary political affairs.

"Nuclear weapons should be used against North Viet-Nam." 7.8 Agree Strongly 13.1 Agree 52.0 Disagree

"The overwhelming majority of 83.3% refused to advocate the use of nuclear weapons against North Viet-Nam, it must be recognized that 16.5% or one of every six persons polled did agree, but the majority disagree, rather than side with the slim majority of 52% who were opposed to the use of atomic weapons. It has been suggested that the rejection of the strong disagreement against the use of nuclear weapons is reflective of the American characteristic of moderation in public expression and of a sense of historical commitment. Yet, it must be remembered that a mere two thirds of the American world was witness to the mass destruction of two rather primitive atomic weapons of World War II.

Concerning the draft and anti-war protests, the following was revealed:

"Those who through illegal activities protest against the war." 2.0% Support 12.0% Tolerate 88.0% Do Not Support

"If I were to lose my deferment and faced with the possibility of being drafted, my course of action would be:" 55.2% Accept military service 34.6% Disagree 10.2% Leave the country

The general tolerance, but lack of support for legal protests against the war, the lack of mere presence for acts of civil disobedience against the war, and the overwhelming acceptance by means of military service, indicate the general support of Montclair students for the present Viet-Nam policy.

In seeking to explain the absence of strong numbers of anti-war activists, the general support for the present Viet-Nam policy, and the moderate stance of the majority of students regarding nuclear weapons use and anti-war protests among the members of the Montclair College community — two possible answers emerge.

With the 70% majority of Montclair students being communicators, their ideals and actions are most significantly molded by their home environment and connection with parents. Secondly, the social activity and thought of the students, both at home and on campus, diminish the time and desire of the individuals to actively engage in contemporary political affairs.

"I do like this car!" said Portly. "Yes, sir," said E. Pluribus.

"It's yours," said Portly.

"Thank you," said E. Pluribus.

"You say your wife like a mint car?" said Portly.

"I feel sure she would," said E. Pluribus, "but I am not married.

"Do you want to be?" said Portly.

"Then clean living, clean shaven American does not?" said E. Pluribus.

Portly pressed a button on the dashboard of the convertible and the trunk opened up and out came a nubile maiden with golden hair, rosy knees, a perfect disposition, and the appendix already removed. "This is Svetlan," said Portly. "Would you like to marry her?"

"I am not very sure," said E. Pluribus.

"Then clean living, clean shaven American does not?" said E. Pluribus.

\textbf{Newman Notes}

The Palm Sunday march through Newark will take place as planned to unite those who are concerned with the urban situation. The marchers will assemble at High Street between Springfileld Ave. and Court St. between 1 and 3:30 P.M. to facilitate beginning at 2. The 25 mile walk, which should take less than an hour, will terminate in front of the Newark Courthouse with two short talks. The speakers are the Very Reverend Monsignor Thomas Carey of the Inner-City Apostolate and Willie Wright of the United Afro-American Apostolate and Willie Wright of the United Afro-American Association.

Parking lots in the downtown business area are not attended on Sundays and may be used to park cars. Parking is also allowed on the streets on Sundays. An in-depth discussion of war is being planned by St. Peter's College Christian Action Group on April 6. Tickets, which include admission to panels, lectures and lunch, cost $2 and may be purchased from John Milop, c/o President's Office, St. Peter's College, Jersey City N.J. 07306. A distinguished group of men from educational and political fields will join the students in their discussions.

\textbf{Panel Discusses Ghetto Problems}

The urban crisis is one of the most pressing issues facing America today. Appearing on campus on April 23 will be a panel discussion under the title of "Urban Crisis." It will take place in room 15 of the music building at 8:15.

Negroes from the ghetto areas of Newark will constitute the panel, and they will report on many topics. Students will hear first hand accounts of what it is actually like to live in the poor housing of the ghetto, how it was living there during last summer's racial violence, living on welfare, being an unwed mother and attending overcrowded schools. There will be ample opportunity for questions and answers after the panelists report.

Much understanding has been achieved through "Urban Crisis" between churches and other community groups and the Black panalists. A few results of the discussions have been formation of career preparation groups, tutoring committees, youth centers and community action programs.

The "Urban Crisis" panel is sponsored by the Protestant Foundation, the Newman Community, and the Student Peace Union. All students are invited to attend.

\textbf{What's it like to work for a giant?}

Depends on the giant. If the giant happens to be Ford Motor Company, it can be a distinct advantage. See your placement director and make an appointment to see the man from Ford when he is here on...
The Montclair State College Faculty Association has awarded James Pettigrove, a professor in English, as its president for the coming year. He succeeds Dr. Robert Beckwith, professor of history.

Other officers are: Dr. L. Howard Fox, chairman of the speech department, vice-president; Ernest Shade of the foreign language department, secretary; and George Place of the science department, treasurer.

Also elected were: Dr. Foster Weyant of fine arts, a representative to the college's committee on committees; Ralph Vernacchia, fine arts, to the faculty review committee; Dr. Frank Cordasco, coordinator of federal programs, to the executive committee of the New Jersey State College Faculty Association; Albert Rossetti, business education, and Horace Shappard, education, representatives to the Essex County Education Association.

Mrs. Dorothy Garland and Dr. James Mehorter, both of the psychology department, were named to the social committee.

David Witcher, assistant director of admissions at Montclair State College, has been awarded a two-year fellowship to the Woodrow Wilson School at Princeton University for study for a master's degree in education, and Horace Sheppard, president of the American Chemistry Association.

A 1967 graduate of Montclair State, Mr. Witcher taught music in Seventh Avenue Junior High School, Newark, last semester. He returned to his alma mater in February to direct the TRY (Talent Research for Youth) program, which assists high school students from disadvantaged areas who have college potential.

Mr. Witcher is well-known in this area for his musical activities, having appeared with such groups as Montclair’s Up With People and the Essentials.

Dr. Earl C. Davis, a professor of psychology and guidance at Montclair State College, has been appointed coordinator for the national convention of the American Personnel and Guidance Association, to be held in Atlantic City in April 1971. Dr. Davis met recently in Atlantic City with members of his committee and the national officers to select the hotels and facilities needed to accommodate the more than 12,000 members expected to attend the week-long convention.

Dr. Frank F. Merlo, an associate professor of education at Montclair State College, has been appointed to a statewide task force to study the elimination of architectural barriers for the physically handicapped in schools and other public buildings. The group, selected by the New Jersey Rehabilitation Commission, will prepare materials for possible action by the State Legislature.

A school plant specialist, Dr. Merlo has participated in more than 30 comprehensive studies of New Jersey school districts and has prepared several college master plans. He is the author of numerous publications in this field and has developed several research instruments widely used by school plant planners.

Dr. Max Sobel, professor of math at MSC, has completed a book to be published on April 13 by Prentice-Hall, entitled ELEMENTS OF MATH. The book is a sequel to the INTRODUCTION TO MATH also written by Dr. Sobel and co-authored by Dr. Bruce Meserve, former MSC math department chairman. It is currently in use throughout schools in California and Florida.

ELEMENTS OF MATH is geared to the non-major and is designed for use by the liberal-arts student.

Fencers Place 62 Wins; Bryer Captures Crown

The 1967-1968 men's varsity fencing team turned in a seven and one record, the most successful season in Montclair history. This sterling effort on the part of Coach Al Macke's team was marked by brilliant fencing from his sabre team. In sabre, the Indians combined for 62 wins and two losses. Dale Rogers, captain for the second straight year, had a record of 22 wins in sabre and two in foil. Another fine performer was sophomore, Jordan Denner. Denner, a music major from Springfield, had a 15-11 record.

In epee, the top man was senior, Jim Harris, who had a record of 13 wins, 8 losses. Backing him up were freshmen, Todd Boepple and Ken Zurich; both men look forward to a fine season next year. The reserve man for foil was Bob Critchley who turned in fine efforts whenever called upon.

In foil, the top man was sophomore, Dan Ehrgott, 9-5. Hampered by a knee injury, Dan joined the team in mid-season, posting a fine dual meet record for a first year man, helping whenever he could. Dave Shapiro was the top reserve man in both epee and foil.

In epee, Bruce Kinter, 13-10, and sophomore, Dan Ehrgott, 9-5, performed brilliantly. In sabre, Bruce Kinter and Jordan Denner. Kinter faced very stiff competition and did not fare as well as expected. Denner, however, fencing the weapon for the first time, made his way to the finals only to lose in a three way tie-only to lose in a three way tie-off. His fine performance was hampered by a knee injury that may require an operation to correct.

In foil, Zurich and Boepple faced experienced fencers and could only pick up a pair of wins between them. In spite of this, the outlook for next year seems to indicate that both will be ranked among the top fencers in the metropolitan area.

The prospects for next year, after an excellent record and post season tournament look excellent, as the only senior is Jim Harris. The other eight starters are freshmen and sophomores. Congratulations to a job well done and to a fine team effort.

Trophy-winning fencers Dave Bryer (left) and Dale Rodgers represented Montclair State in sabre competition in the North Atlantic Intercollegiate Fencing Tournament, held in Rochester.

The men's varsity fencing team for 1967-1968: standing, from left to right: Bruce Kinter, Dan Ehrgott, Jim Harris, Jordan Denner, Dave Bryer, Todd Boepple and Jim Robertson. Kneeling, from left to right are: Dave Shapiro, Ken Zurich, Dale Rodgers, Bob Critchley, Coach Al Macke.

A Medical Answer For MUSCULAR Low Back Pain

Promptly Relieves Pain So Stiff Muscles Loosen Up and You're Back Into Action

Doctors who specialize in back troubles report that aching backs are due to weak, tense muscles which can go into painful spasm as you suddenly bend, stretch or twist. To relieve such backache doctors recommend the pain-relief compound in Anacin® Analgesic Tablets. And Anacin gives you more of this medication than any other leading tablet.

Anacin is a special fortified formula. It promptly relieves pain, helps reduce swollen tissues, and so relieves pressure on sensitive back nerves. Then notice how stiff muscles loosen up and you move around with greater ease.

Only Anacin has this special fortified formula. It's not found in any other product. See if Anacin's exclusive formula doesn't work better for you.

ATTENTION—BASEBALL FANS

Montclair State vs. defending conference champs Gloucester State on Thursday, April 11 at 1:30 P.M. on the baseball field. Support your team's effort in the contest for the championship by attending the crucial game.

PROBABLE INDIAN LINEUP

Montclair Trackmen Face Rugged Slate

A schedule calling for seven dual and one triangular meet has been announced for Montclair State College's 1968 varsity track team.

The Indians will open the season on April 10 at home against Fairleigh Dickinson University. The one triangular meet will take place with the University of Bridgeport and City College of New York on April 20. The meet will be at the Indians Sprague Field.

Montclair State will also take part in the Penn and Quonset Relays, New Jersey State College, Collegiate Trace and the District No. 31, National Association of Intercollegiate Athletics Meet.

The 1968 season will be the 30th in intercollegiate track at Montclair State since the sport was introduced in 1942.

For April:

April 20 University of Bridgeport and City College of New York
April 24 Jersey City State April 27 Penn Relays

Winter Sports Award Winners Announced

The naming of Jim Greico, Rich Schwartz, Dave Bryer, Luther Bowen and Bob Lester as MAJOR AWARD WINNERS in the four winter sports at Montclair State College has been announced by Bill D'Aguzzardi, director of athletics.

Greico, a junior from Brick Township (NJ), was named the most valuable wrestler for the 1967-68 season while Bryer, a freshman from Fairfield (NJ), took a similar award in fencing.

Schwartz, a junior from Morris Plains, captured his second straight most valuable player trophy in gymnastics.

Lester and Bowen, who helped lead the Indians to a 20-8 record in basketball, were named co-winners of the Cobra Award.

Montgomery Sees Winning JV Baseball Season

Depth at all positions, the possible exception of pitching, strong hitting, and sound defense, especially up the middle (catcher, second base, shortstop, and centerfield) are a pair of hard hitters in sophomore English major, John Seijto and John Treuwar, a freshman from Palisades Park. The job will more than likely go to the player defensively.

The starting three will come from the likes of Ray Matlosz, Bill Mosca, Chuck Arechdeacon, Frank Cipot, Jay Kierce, and Nick Corby.

Pitching, the only spot not overfilling with talent, still has quality in Norman Smith, the number one starter from Essex Catholic, and Joel Naughton from Bricktown. Jim Robertson, and Frank Ariola are also expected to help.

"I think," states Coach Montgomery, "that this year's pressure practice sessions and scrimmages will prove quite interesting. No jobs are really up for grabs."

I look toward a real good season, although the pitching situation concerns me a little. However, with our defense and potentially powerful lineup we should score a lot of runs."
