Administrators Deny Existence of Agents

President Thomas Richardson and Dean Lawton Blanton both denied last week any knowledge of alleged Federal narcotics agents on campus.

Rumors have been heard around campus that these agents exist, posing as students. Many students feel that the existence of such agents disrupts the traditional educational atmosphere of a college. They feel that any necessary disciplinary action should be taken by the administration, or outbreaks of the college by the students. Dr. Richardson expressed surprise when confronted with the question, saying that this was the first he had heard of the matter. He did admit, however, that there is a possibility that the agents are on campus as registered students. If they were qualified, he stated, there would be no way for the college to deny them admission.

Dormitory Price Rise Imminent By 1970

By MARTIN J. FUCIO

Montclair students may have to face a rise in dormitory and off-campus rates. This news was conveyed by Vincent Calabrese, director of business services, to a gathering of approximately 100 students in the lower lounge of Grace Freeman Hall on Oct. 29. Mr. Calabrese said that a raise would probably be in effect by 1970, although just what the Board of Higher Education in Trenton may do is still unclear.

The purpose of the Freeman gathering was to warn the student body that they may have to pay more for room and board. The students were also told that a new women's dormitory would be in operation by September of 1970. The students, while reluctantly agreeing to the need for a rise, requested student participation in any decision-making.

Mr. Calabrese pointed out that Montclair's room and board rates, which are now $818 annually, have not risen since 1965. He explained that the cost of maintaining and operating Montclair's five dorms has risen due to inflation. The new dorm rates, if they go into effect, will be calculated by dividing the costs of running the dorms by the number of students. The college will then send that figure to Trenton for approval. Since the student body does not cover dormitories, money for upkeep would come out of the dorm receipts themselves.

During the course of the Freeman meeting a student proposed that dorm costs be held down by having only two meals a day for dorm students. Dorm committees had made this proposal last year. The proposal was not included in the new food contract because, according to Mr. Calabrese, it would have been more expensive.

The food supplier is able to keep the prices of meals down by assuming that a certain number of students will not show for a certain meal, usually breakfast. Money that would be spent on breakfast is funneled into the other two meals. If breakfast was eliminated, the prices of the remaining two meals would be driven up. In this situation in prices would be realized, and some students would lose out on a meal. Nevertheless, Mr. Calabrese urged the students to form committees to check on how their dorm fees are spent and to complain about such things as the food service.

Vandals Attack

MSC Suffers Loss Of Money, Property

A wave of vandalism and theft recently hit the Montclair campus. The first incident was reported last Monday morning, Oct. 28, after the members of the Council on International and National Affairs (CINA) discovered that $240, the proceeds from a dance to benefit Biafra, was stolen from their office. Then, the sum of $82 was reported missing by the Faculty-Student Co-op. A typewriter was reported stolen from another institution, Dr. John Ford, director of Sprague Library, stated that a light fixture was removed from the area of the library where pictures were ripped off by the behavior of students.

A committee, under the chairmanship of Larry Ridpath, editor of COMPUTER CHRONICLE, is now being organized to investigate these occurrences; however, further information was unavailable at press time.

All Tuition Monies Used For Educational Purposes

"Where is the tuition increase going?" is a question that many state college students and their parents are asking. Last May the Board of Higher Education increased the tuition at the state colleges from $150 to $350 per year. Eight hundred thousand has been appropriated for salary increases for faculty and administration.

In May the Board of Higher Education approved a new salary guide for faculty. This guide was later cut by the legislature who substituted one of their own and made the unusual move of

Trenton Releases Findings

Of Heller Associates

The purpose of the study was to analyze demand for higher education in New Jersey between now and 1980, to determine what facilities would be required over that period, and to estimate the costs of these facilities. On the basis of their analysis, the major conclusions of the study are that:

- demand for undergraduate education will increase by 37 per cent over the period -- from 140,000 in 1967 to 220,000 in 1975-80.
- full-time undergraduate enrollment of New Jersey students at the public institutions of higher education will increase from 41,100 in 1967 to 109,000 by 1975-80.

This will increase the percentage of New Jersey residents enrolled as undergraduates in State public institutions from 28 per cent to 49 per cent. Enrollment should be increased as follows:

- at the state colleges, from 26,900 to 42,000; at the state universities, from 5,500 to 12,000; at the Newark College of Engineering, from 2,400 to 5,400; at the Montclair State College, from 12,000 to 20,800; at the Newark State University, from 12,000 to 20,800; at the New Jersey College of Engineering, from 2,400 to 5,400; at the College of New Jersey, from 2,400 to 5,400.

(Continued on Page 3)
Chancellor Ralph A. Dungan said: Mr. William Grant. He talked Democratic platform. participate in a political party. He The cost of $110,000 was paid for government we really want. He Education. Copies can be Education Facilities Commission.

The first political speaker was a member of the Republican party, Mr. William Grant. He talked about American political history and explained that democracy succeeded because of the two party system. Mr. Grant said not to be discouraged by the small turnout in the auditorium because one will find this typical of many aspects of life. He reminded the audience that the numbers can perform big feats. He then talked about his party’s platform and stated that the party can only accomplish what is in our capacity to accomplish.

The Peace and Freedom Alternative of New Jersey was represented by Ralph Cato, its Dick Gregory and David Frost. Mr. Cato explained that his party’s primary platform was education. He criticized the previous speakers for not comprehending the nation’s vast myriad. He cited for example that the fact thousands of people were denied a permit in Federal Court to assemble peacefully in Chicago while thousands were allowed to gather on Wednesday at the gate of some secretary’s over-abundant dimensions. He ended his speech by saying that Dick Gregory would not win and that perhaps this country’s number one problem is that Americans like to win and winning is all that matters to Americans.

Mr. Grant. He closed the day’s speeches by noting “God is on the side of those on the make, not those who’ve got it made.”

The first political speaker was Reverend John Harms. He closed the day’s speeches by noting “God is on the side of those on the make, not those who’ve got it made.”

The first political speaker was Reverend John Harms. He closed the day’s speeches by noting “God is on the side of those on the make, not those who’ve got it made.”

"FINDINGS" (Continued from Page 1) undergraduate graduates from out-of-state can increase from 7,500 at present to a level of 100,000, but beyond that the capacity of out-of-state institutions to accept them will be strained.

Graduate and professional education should expand to a total of approximately 16,000 full-time students by 1975-80.

The cost of providing the needed facilities at public colleges and universities will be $738 million. After deducting self-financing facilities, bond funds already available and likely federal and state funds, the funding required from local sources in 1975-80 is $281 million. The funding requirement between now and 1975 is approximately $175 million.

Now that the final study is completed, the data and the recommendations will be most useful to the Department and the Board in developing the State’s Master Plan for higher education.

In analyzing the data, Mr. Delaney said that New Jersey is far behind in providing the higher education the state requires and that the cost of catching up will be great. The Higher Education Facilities Commission took the vital importance of the bond issue before submitting the report to the Governor.

The study was commissioned in June 1967 by the Higher Education Facilities Commission. The cost of $110,000 was paid for by the United States Office of Education. The report can be obtained by writing: Director, Division of Planning Department of Higher Education State of New Jersey Trenton, New Jersey 08625.

this field work is that the student should know the conditions the ghetto student faces both inside and outside of the school community.

The field work takes six hours a week and is varied in its scope. This semester the junior section is involved in the social agencies in Paterson, Orange and Passaic. The following are selections of the thoughts of some of the junior SPURT members who are now involved in social agencies.

Field Work

James Vasielli works in the James Recreation Center in Paterson. He comments that this is usually accomplished.

Ellen Field also works in the Paterson area. "The field work involves spending time with ten-to-four-year-olds at a Headstart Center in Paterson. This type of early pre-school preparation is organized to aid the ghetto child in his school experience. I believe that this is usually accomplished."

Dennis Cervenka visits the Young Opportunity Center in Paterson for his field experiences. "I progress from department to department and learn how an applicant looking for a job is tested and placed. Training is available if needed."

The SPURT program also has students working with the Paterson Board of Health. In this case, the members accompany a health inspector as he investigates the complaints of ghetto dwellers.

Social Work

The field experiences encompass all age groups of the inner-city. While some junior members have contact with preschool children, others are involved directly in the ghetto environment.

The high school dropout is tutored so that he can pass the High School Equivalency Examination.

Not all SPURT members are directly in the ghetto environment. Four students are involved in their work at the Essex County Children Shelter in Belleville. Patt O'Keefe explains what the "Shelter" is and offers her feeling about the children's needs. "The shelter is an emergency home for children from the pre-school years to age 15. The duration of stay varies for each child depending on how soon he can return to his home or be placed in foster home. I am the director of a class of students ages 11 to 15. Their academic and emotional needs are immeasurable. There is a crucial need at the Shelter for people who care and are willing to give time and attention to the needs of these children."

Field work is only half of the SPURT program. Each semester the student takes six credits of courses geared toward preparation for urban teaching. All interested sophomores or juniors can become involved. The spring program includes field experiences in the Paterson school system as an observer and teacher. For additional information, contact Dr. Kenyon in the education office located in College Hall or ask a present SPURT member. Membership is rewarding to the individual not only because of its field experiences, but also because of specialized classes and the group solidarity of members.

Teaching is 'Ultimate Satisfaction'

By ARTHUR MOREY

To attempt to condense even the most significant events of my first six weeks of student teaching into an article of a few hundred words would be a task as pointless as it would be difficult. For this teaching experience of any individual is unlike that of any other. Accordingly, I can only offer my own impressions of the last six weeks.

First, there is the voluminous paperwork: assignments, homework questions, vocabulary quizzes, compositions — an endless pile of paper — overwhelming and yet the amazing thing is that it can be done! By down all the misspelled words are checked, all the impossible grammar is corrected, all the formless ideas are commented upon.

Second, and more enjoyable is the abundance of reading. Plato, Chaucer and Aeschylus — all to be read and re-read for the semester, all to be re-thought and re-interpreted for the 16-year-old mind and set into patterns of thought which can be understood and expressions of emotion which can be identified.

Beyond this required reading is that terrible and nebulous monstrosity, euphemistically called "laboratory." This difficulty is not so much in the selection of material to be covered as it is in the ordering of the material into forms which are capable of being specifically interpreted.

As an English teacher, I have my own peculiar resources for lesson planning. Fowler's Modern English Usage, Campbell's Form and Style, the Scott Foreman Writer's Guide and Crowell's Reader's Encyclopedia have all become well-used additions to my private reference library. The English Journal have proven to be worth its weight in U-235 in informing me of various approaches to particular difficulties. Even the Scholastic has on a few occasions provided especially well-presented material.

But the richest "curricular research resources" are my colleagues, the faculty — the teachers, novice and veteran, who upon hearing the cry, "How the am I going to do this?" will rush in with a wealth of materials and advise on how to proceed.

Last is the ultimate satisfaction and reward of the educator — the act of teaching. Perhaps it will be considered maudlin sentimentalism to say that working with a classroom full of kids is a genuine and profound joy. But I cannot honestly think of any other purpose in being a teacher. To be with a class questioning, answering, explaining, probing, expanding ideas, structuring thoughts, giving direction and discipline to the activity of young minds — it is for this that I have worked and studied so long and so hard. This is for it I have become a teacher.

Do your contact lenses lead a clean life?

Contact lenses can be heaven . . . or hell. They may be a wonder of modern science but just the slightest bit of dirt under the lens can make them unbearable. In order to keep your contact lenses comfortable and convenient as they were designed to be, you have to take care of them.

Until now you needed two or more separate solutions to properly prepare and maintain your contacts. You would think that such drastic measures should be as convenient as wearing them.

It can be! Lenise is an "isotonic" solution, which means that it blends with the natural fluids of the eye. Cleaning your contacts with Lenise retards the buildup of foreign deposits on the lenses. And soaking your contacts in Lenise between wearing periods assures you of proper lens hygiene.

but you get a free soaking case on the bottom of every bottle of Lenise. It has been demonstrated that improper storage between wearings may result in the growth of bacteria on the lenses.

This is a potential cause of eye irritation and in some cases can endanger your vision. Bacteria cannot grow in Lenise which is sterile, self-sanitizing, and antiseptic.

Let your contacts be the Lenise they were meant to be. Get some Lenise, from the Munroe Company. Inc.
THE TIME IS RIPE

The recent wave of vandalism at the college is inane and demands attention. This action must be started immediately to discover the culprit(s) so that future miscreants will be corrected. In order to prevent future more costly occurrences, we urge that the administration be more careful surveillance after hours of those persons entering and leaving the buildings.

Failing to correct this perversion of the campus is virtually impossible, something must be done now to apprehend potential vandals before the problem becomes more widespread. It will not be enough to do nothing.

The problem is not peculiar to this campus, but extends to the Montclair community itself. Whether outside agents or campus, but extends to the Montclair community, this act was done independently from and without the knowledge of any college administration. The location of the car, however, gave implication that this vehicle was either a station wagon sponsored by CLUB was to feature the Magnificent Men who first appeared as a campus group.

No member of the audience was aware that the Magnificent Men were not to appear until 9:05 p.m, when according to all advertising the concert was to begin at 8 p.m.

Annoyance rose as the audience heard song after song by this unannounced group. The students of MSC had paid to hear the Magnificent Men, not a campus group.

If it is MSC's policy to present a second group along with the featured group, let it then be publicized that two groups will appear. It is felt that such performances belong in Alley Club not in Panzer Gym.

THE BEST EVER

"The best ever" — Once again this comment was applied to the college Homecoming festivities. However, this year this statement was based on fact, not just on the opinions of the Homecoming committee. The overflow crowd at Saturday's concert, the packed bleachers at Saturday's football game, the better-than-average crowd viewing the better-than-ever floats in the parade competition — all depict the tremendous amount of spirit and cooperation given to the annual event by both students of the college and members of the Montclair community.

On behalf of the college community, we wish to extend our sincere appreciation of the union of the Distinctive Shops of Montclair for their sponsorship of the band and of the various contests which awarded valuable prizes to MSC students.

Thanks and congratulations must also go to all those organizations which devoted time and energy to the construction of floats and also to the Homecoming committee for its engineering and publicity of the event. Homecoming '68 was truly "the best ever."

TWO FOR THE PRICE OF ONE

According to the advertising and posters, the Friday night Homecoming concert sponsored by CLUB was to feature the Magnificent Men.

However, when the audience arrived at Panzer Gymnasium and the concert began it was not the Magnificent Men who first appeared but a campus group.

No member of the audience was aware that the Magnificent Men were not to appear until 9:05 p.m. when according to all advertising the concert was to begin at 8 p.m.

Annoyance rose as the audience heard songs after song by this unannounced group. The students of MSC had paid to hear the Magnificent Men, not a campus group.

If it is MSC's policy to present a second group along with the featured group, let it then be publicized that two groups will appear. It is felt that such performances belong in Alley Club not in Panzer Gym.

The Election

The higher education community in the United States has never been more involved in the pre-election activities and the national election campaigns than in this year 1968. College students and faculty members were conspicuous in their voting and trying to get candidates nominated at the National Convention and in many other instances, loud in their expressions of disappointment when some of these candidates did door-to-door canvassing also to become even larger. The federal government's legislation which will inevitably affect us, and react to become even larger. The federal government's legislation which will inevitably affect us, and react.
Racial turmoil at Montclair
High develops over state law

Black student union was reportedly segregated.

By KARYN BYKOWSKY
Metropolitan Staff

After more than two weeks of relative calm at Montclair High School, school officials maintain that the 10 days of racial turbulence and turmoil were a direct result of the non-violent evidence had been discovered to indicate that external factions were actively involved.

Reportedly, the situation developed quite suddenly when black students learned that the faculty adviser of the BSU, Mrs. Jeanne Heningburg, had been dropped.

On Thursday, Sept. 26 about 300 of the school's 2,300 students organized in the amphitheatre at 8:15 a.m. in an attempt to reinstate her.

By 1 p.m. Principal Kenneth Fish had conceded to continue Mrs. Heningburg as adviser, however he told the BSU that it would have to amend its constitution, which limits membership to blacks.

He said that this was against both school and state law, forbidding any segregated organizations.

Although the students agreed to return to class, discontent was rampant.

At a pep rally held the next day, Friday, a group of black youths were allegedly described as unruly by the school administration. The disturbance took over, resulting in fist-fights and name-calling between black and white factions.

Fighting continued sporadically throughout three lunch periods which ran from 10:45 a.m. through 1 p.m.

Numerous Rumors

"Rumors started coming faster than facts," Payne said. "There were many, many incidents but we tend to believe that they were isolated incidents, not related to the racial tension. After all, high schools average about one fist-fight a day."

As everything from sex assaults to false fire alarms were reported, police, firemen and administrators tightened control and supervision hoping to stifle incidents. The school day was shortened with lunch periods and homeroom cut, supposedly eliminating problem gatherings.

Rumors of white militias groups were being spread by students. One of the groups which organized in opposition to black students called itself the Golden Guineas.

After several days of incidents, over 500 parents swarmed into the PTA meeting on Wednesday night, Oct. 2. The meeting proved Payne's point when he said, "the kids in the high school were calmer than the parents."

"Of course there is no excuse for the disturbance," Payne added. "But a lot of it has to do with the times. With unrest so popular it was inevitable that it would effect high school kids."

After 10 days of blustering over the smoke has risen leaving 40 students, black and white, suspended or excluded, five students to be recommended for expulsion, and one student under psychiatric care.

However, according to Mr. Alan Buechler, acting director of admissions, college boards do provide a fairly good indication of possible academic success. Those with high college boards tend to do well with those low college boards tend to do poorly.

If used by itself, the Scholastic Aptitude Test has a validity of about 53 per cent. That is, if the SAT score indicated probable success, there is a better than average chance that that person will succeed academically. When combined with class rank the probability of academic success increases to approximately 59 per cent. The high school record alone is a better predictor than the SAT by itself.

As board scores are lower so is prediction for academic success. However, despite low scores, some students do well. Probably because of the motivation factor, which is the reason why those with low average boards but good marks tend to be accepted over those with high boards and low marks. Those with high boards and low marks tend to get low marks in college too.

Ambitious Biafra has plans

by DON PENDLEY
Features Staff Reporter

"the life at MSC is just like that of the United Nations. There is equal opportunity for everybody, irrespective of color, race or creed," so says Sylvester O. Anyanwu, a Biafran by birth, now a biology major at Montclair State.

Sylvester, who graduated high school in Lagos, the capital city of Nigeria, came to the U.S. two years ago. He is working at St. Mary's Hospital in his spare time, where he hopes to become a doctor - his ambition.

Hopes to return

Later on, says Sylvester, "I hope to return to Biafra and help my people." Speaking about his native Biafra, Sylvester looks at the current situation with optimism: "Many native Biafrans will return to our country and rebuild our society. I feel that I must return also."

"Profs friendly"

On Montclair State, Sylvester asserts "the professors at MSC are prepared to help students at any time, even at their own expense. "As a result of this, there is a very cordial relationship between the students and faculty."

Future clear-cut

So the future for Sylvester is clear-cut - he hopes to return to his native nation, bringing with him a bit of American education, coupled with his sincere desire to aid in building a new African society.

POOR MR. GREGORY
Comedian Dick Gregory's name was on New Jersey's ballot last Tuesday. And while he didn't make that astonishing victory as he predicted, Mr. Gregory will long be remembered by his supporters as the man whose picture was on a one-dollar bill.

A week before the election, the Secret Service confiscated these "Gregory Bucks" claiming that they feel and look too much like the real thing. This buck, courtesy The Asbury Park Sunday Press, depicts Mr. Gregory with a grin on his face flanked by the peace symbol and signed by Dick Gregory and Mark Lane, his erstwhile running mate.

Gregory hopes to continue in his "old job" as comedian.

Montclair High looks peaceful now, but it was the recent scene of racial turmoil. (Photo by Murey Antebi.)

'Not accurate' educators claim Evidence mounts against those college board exams

by MICHAEL HEANEY
Education Reporter

Statistical evidence indicates that college boards are good predictors of academic success. But no matter how subjective or qualitative, evidence points out that they are not yet quite accurate in assessing the individual's total intelligence that is, his ability to deal effectively with the environment.

This is perhaps the agonizing problem that besots those who administer the tests and those who take them. Many of those who use the tests feel that their value lies only within a given area and context. But, as often happens, there are those educators who become too intoxicated with the nice even rows of test scores.

The anxiety over college boards that plagues students is usually quite justified. High school guidance counselors sometimes create monstrous images in the minds of students as to what the tests mean.

Aptitude Test has a validity of about 53 per cent. That is, if the SAT score indicated probable success, there is a better than average chance that that person will succeed academically. When combined with class rank the probability of academic success increases to approximately 59 per cent. The high school record alone is a better predictor than the SAT by itself.

Those with high boards and low marks tend to get low marks in college too.
Montclair Features Editor

When you walk into the lobby of Essex County College’s “new” building on 31 Clinton Street, Newark, you automatically come to the realization that somehow this is a different type of college. In fact, everything you thought you’ve ever known about modern higher education seems to crumble.

Amidst the pushing and shoving on a couple of functioning elevators, an observer can quickly spot a few students dashing off to the next card game on the eighth floor, and even fewer to classes in the college’s dingy rooms that once housed the Newark branch of Seton Hall University.

But repairs are going on. The clanging of carpenters’ tools, the sound of new paint and the outright carelessness of students will all add up to the Essex County College scene.

Checking the facts

“Right now,” stated Director of Student Personnel George M. Barton, “we’re fortunate. We have many programs offered at our school which are not available at many other college.”

Since ECC is a two-year school, “the programs are projected so that a student can plan his career or select his major after graduation,” added the dean.

Most courses offered at ECC are “pre-professional” programs, like pre-business, pre-engineering and pre-science. The career-minded student finds programs in secretarial science, cashiering, key punch operation and nursing available.

Eager fresh

“We have a very diverse and industrious group here,” said Mr. Joseph Burns, director of student activities for the college.

We had students come here this past summer to work on the establishment of clubs, a student newspaper and a fraternity.

“And shortly the students will be holding elections for a student government,” he proudly added.

Picture Pose: A group of new Essex County College students pose for Montclarion photographer. They’re on their way to finish a stirring conversation on Vietnam and school politics.

Essex County College: Some say it’s the Parsons of the East

By DAVID M. LEVINE

As one business-major claimed: “The courses and teachers are really easy here. It’s like the Parsons of the East,” he added.

Looking to the future: By 1971, Essex County College officials hope to accommodate 8000 students on an ultramodern campus to be built on slum-cleared land in Newark.

At your convenience

The scheduling of classes at Essex County College is done for the convenience of students.

For instance, a typical school-day for one student starts at 7:30 a.m. and ends 11:10 a.m., with only some 60-minute classes carried each day.

Should a student be unable to attend school at 7:50 to 11:10 a.m., the “Mid-Day block” of hours allows students to attend classes from 11:30 a.m. to 2:40 p.m.

And if that’s inconvenient, the “Afternoon block” of hours would allow a student to take classes starting at 2:50 and end at 6:10 p.m.

Easy entrance

“This is really a great place,” said student Cheryl Garraman.

“I decided to go to college at the last minute, so I was accepted to Essex County right away,” said J.W. Vandellas.

“T h e courses and teachers here are ‘pre-professional’ programs, like pre-business, pre-engineering and pre-science. The career-minded student finds programs in secretarial science, cashiering, key punch operation and nursing available.

We had students come here this past summer to work on the establishment of clubs, a student newspaper and a fraternity.

“And shortly the students will be holding elections for a student government,” he proudly added.

“Next month Martha and the Vandellas are coming here. We’re also working on getting a soccer team organized and some important people may come to speak at ECC,” stated Gacy Luciano, a candidate for the vice presidency of the Student Government Association.

So for a new-born college, the swift progress in the non-academic areas are obvious.

Every student has a gripe about the school, about your best friend, about the world. We can’t make it any better, but we can try to get some answers. Send your gripe (by mail, please) to Cindy LaManna, Montclair Features Editor.

SDS CAN DESTROY ITSELF

In journalism, the best way to glorify your opposition is to continually look for his faults and publish them. In this manner, your opposition agrees to a sort of publicity that he becomes the subject of every conversation dealing with the philosophy he represents.

And so it is with Rich Insley, unofficial "father" of the projected Montclair SDS venture. Yes, we know that Mr. Insley doesn't like the term "father," but that's the label this column suggests till proven otherwise. You see, dear reader, it just so happens that the SDS, based on previous experience, is made up of campus hating agitators. Granted, the SDS has their brand of democracy, and that brand of democracy leads to all types of protest, even bombings, confrontations at campuses, New York, Boston, Berkeley, etc.

So to Mr. Insley I apologize for being so... distant. I believe that title "father" will prove useful as Richard Insley, the mentor and rallying point for the "democratic" left wing on our campus, proclaims himself a Capable propagandist... but indeed Mr. Insley just happens to be a very capable propagandist whose wild use of the English language puts Radio Moscow to shame. We all love the terms "twisted truth," "participatory democracy" and "revolutionary violence" found in his current column appearing on this page. It makes me feel that the past events at Columbia were inspired by moon men, and, heavens, never the sincere, sweet SDS. It could be wrong, however. And this column is certainly open to comments from knowledgable folks.

Prove it!

The point at hand, however, is not really Mr. Insley, but the future of the projected SDS. If those fools in the GSA Legislature really believe in participatory democracy, prove it! This column suggests to the GSA Legislature that in view of the current controversy over the SDS formation on our campus, a referendum be put up to the students. In this way "participatory democracy" would actually take place. I believe that the individual Montclair State student must search his conscience and decide for himself if he'd like to see the SDS as a permanent fixture on our campus.

Hence, the SDS in its philosophical sense would really improve its position on our campus and organize itself. Which will it be? It's up to the individual student to understand the situation and then act by pressing for GSA for a swift course of action.

Comment anyone?

ITS YOUR S.G.A.

Controversial book given o.k.

The N.J. Education Association today commended the West Milford Board of Education for purchasing the textbook VPVIOWNTS: USA to use in West Milford High School.

An organization which contains "Communist writings," the school board supposedly found no objection to the book and ordered a faculty study into complaints. West Milford's current SGA, headed by the high school principal, and seven teachers declared "Viewpoints" worthy of continued use, and the school board restored the text to good standing late September.

The text examines American history by printing opinions of various writers on both sides of controversies that have occurred during the nation's existence. For example, both Harry S. Truman and Gen. Douglas MacArthur are quoted on MacArthur's 1951 dismissal from command of American forces in Korea, and both Martin Luther King Jr., and Arizona Gov. Orville Faubus are quoted on the civil-rights movement.

Creative writers and artists are encouraged to submit and evaluate the material. A period: Oct. 28 through Nov. 15.

I WAS GOING TO DO THAT ONCE

You know it's your school. Remember it's your school. I think I could be wrong, however. And this column is certainly open to comments from knowledgeable folks.

I AM NOT REALLY CERTAIN WHAT IS MEANT BY "GROGGY LITTLE HANGOUT" WHICH SDS SUPPOSEDLY INTENDS TO MAKE OF MONTCLAIR STATE. IF IT IS IMPLIES THAT THE ORGANIZATION REPRESENTS A GROUP OF PEOPLE OUTSIDE OUR STUDENT BODY WHO PLAN TO RESIDE ON OUR CAMPUS BECAUSE OF THE GREAT ADVANTAGES HERE FOR SUCH PEOPLE, THEN NOT ONLY IS THIS WRONG BUT IT IS VAGRANT ON THE SURFACE.

The inability of the writer to find "less than a handful of political conservatives" here is hardly a valid estimate of the political situation at MSC as was claimed in the most recent "VIEWS" column. The writer himself seems to agree as he refers to myself. I would prefer to ascribe this particular instance of bad taste to an inadequacy of vocabulary. Is it possible that I was purposely ascribed the title held by Hitler in an irreparable attempt to diminish myself and my associates by equating the New Left with Fascism?

SDS Montclair is not SDS Columbia. Each organization forms its own policies. If students must oppose this organization, opposition must be determined by what exactly what the organization represents rather than assigning it arbitrary labels and condemning it without a realistic appraisal of the potential for improvement of this institution inherent in SDS. There is no "father" in the SDS structure. Rather, the organization operates as a participative democracy and the opinion of each individual has equal weight. Since all of the people who have been working on the formation of SDS are also believers in the principle of non-violence the nature of the potential SDS here will be far from the violent force that has been described.

COMING

NOV. 19
Homecoming: A Weekend to Remember

The beautiful belle of MSC — Homecoming Queen '68 — Sharon Meadows, posing with expert kicker Danny Rodgers.

Upper Montclair prepared for MSC's Homecoming. Many thanks for the support.

"Hear the Sounds of Yesterday, Today, and Tomorrow." WVMS took first place for organizations.

KEP's "On the Right Track" won first place for sororities. "Our smashed fingers, stubbed toes and impaired limbs were well worth it," commented KEP's president Rosanne Bostonian.

Culminating a fun-filled week-end, GARY PUCKETT AND THE UNION GAP performed in a packed gym to an enthusiastic crowd of MSC students.

"Happy Birthday MSC" — The junior class saluted our college's 60th year and won first place in class competition.

Buddy King of the MAGNIFICENT MEN, singing the lead of MISTY at Friday night's concert. The ZINC BAND also performed.

Phi Sig's "Upward to New Horizons" captured two consecutive wins by taking first place for fraternities again this year.

Did You Pick Up Your Envelope At The Student Activities office, The Fishbowl or the TUB??
Kloza Asserts That European Study And Travel Are Inexpensive

Mr. Joseph Kloza, who has traveled in Europe and is now in the education department, said, "There is no reason why any student desiring foreign travel should be denied that opportunity. The expressiveness of Europe is only a myth. The people in Europe go out of their way to make things inexpensive to college students."

The financial problem seems to be the biggest drawback students desiring foreign travel. Mr. Kloza suggested that the existing foreign education programs should be coordinated and should try to enlist funds from outside groups, such as the Polish-Americans, German-Americans, etc. These groups probably would be interested in sponsoring funds for students to travel in their European countries. Interested students would be worth the cooperation and generosity of the student bodies of these groups. One foreign student and one from MSC. Language Abroad is sponsored by the language department and it sends eligible language students to Europe for first-hand experience in their language field. The University of Copenhagen program enables students to study in a foreign university.

In closing, Mr. Kloza urged any interested student to contact him through the education office or to contact any of the foreign travel programs.
The Cannibals, the first offering of the APT season, is really nothing new in its intellectual aspects. It has been there, and narrated by two Jews, the only survivors of that famous massacre. Yet one cannot but agree, if in a small way, that “everybody is a murderer” when genocide runs rampant in the 20th century. Perhaps man is only terminally cannibalistic today, whatever that means. Still man can sink to his lowest levels if he must. The Cannibals unabashedly tells when must.

The music is rather strange as it drifts from the blues of Paul Butterfield to the indescribable sound of the Mothers of Invention to the organ of Cream. The filming by Barry Feinstein is almost documentary style. With no color, no sound, he is able to capture the humor and insanity that characterizes the hippie generation.

As Peter Yarrow says, “we must free ourselves from our own tyranny of words.” By living a life of total experience, one can find a world of beauty that others may never know. The following students were reviewed by Jan Kott:

Doubleday Publishes
Jan Kott Journal

By JEAN E. TAIT

As a springboard to stimulating and somewhat off-beat plays that have been around for some time, Jan Kott’s Theatre Notebook: 1947-1967 is definitely a book to interest play buffs. Mr. Kott’s idea seems to have a rather wide-ranging knowledge of theatre, especially that of his own country.

His penchant for comparing every possible aspect of American theatre to Shakespearean works is reassuringly human and hardly irritating. His opinions are well presented. He is neither pedantic nor didactic. Reading his book is really skin in sitting on one’s living room floor and listening to an enthusiastic friend’s lengthy discussion of plays which he found personally stimulating.

Festival Preview: "The Concept" At Sherman Square

By JIM JOHNSON

Staff Reporter

I have been looking for so long for that great mainstay in theatre, and it finally happened. It happened so strong, so powerful, so moving and so real that I left the theatre with my heart in my throat. The Concept is the perfect play, theatre, art and most of all, life.

Though performed by non-professional artists, the Village players do an exceptional job. There are points within the performance when the actors falter but that is unimportant here. If one of the girls looks up at the camera with truth and hope, and sincerity and a genuine concern for the audience, and says “Will you stop the chocolate?” it means something to the audience. The rehabilitation of the young is an overdue subject but it is finally done in The Concept.

The play reaches into life, it exposes life and people leaves people with a sense of hope—love. See The Concept.
"Catholic Church Spends Too Much Time In The Bedroom . . ."

BY MAURICE MORAN

"The trouble with the Church is that it spends too much time in the bedroom and not enough in the ghetto . . ."

"But you don't give a damn!"

"Why don't we just abolish the Pope?"

These are just a few of the unconventional, if not controversial, ideas from the latest edition of seminars sponsored by the Newman Community of Montclair State College. These seminars, "designed to inform, not to preach," completed their six-week run last Thursday evening. They were all held at the Newman House on Valley Road on Monday through Thursday nights.

Monday's discussion, led by Rev. Thomas Davis, concerned "Catching Up With the Church." This topic included ideas of a democratic pope, a "congress" of laymen and priests, changes in the Liturgy and many others.

Tuesday evening's "Modern Marriage," sponsored by the Family Life Apostolate of Newark, was a series of two-hour treatment by a doctor and dialogue between married couples and single students, emotional and psychological as well as physical aspects of marriage were examined. It was topped by a presentation of Humanum Vitae, the pope's controversial encyclical on human life by Rev. Dominic Marcellino.

In an effort to initiate an active social-conscious student body, Newman sponsored "Know Your Ghetto" on Wednesday evening. It was conducted through the efforts of Ms. Pat Boyd, members of SPURT and other programs concerned with urban life. Among others, BOSS, TRY, Upward Bound and programs from Newark and Paterson State were presented. Parents, faculty and administrators from the Bergen Street School in Newark explained the function of education in the ghetto. One comment: "I'm tired of that word 'ghetto' — all that means is an enclosed place. If we can get rid of the ghetto mentality, we'll have taken the first step toward understanding."

Lasty, Rev. Joseph Ryan of Newman's 'Dorm Prices' (Continued from Page 1) meeting made three proposals in regard to the dorm rise. They wanted 1) a minimum rise; 2) student representation on committees which decide on dorm prices; and 3) ample warning of any rise in rates. Mr. Calabrese assured the audience that these proposals would be met.

The bids for the new women's dormitory went out Nov. 1. This new, 600-bed dorm is needed to reduce the number of students who are turned away 50 per cent of those who now apply to the women's dorms cannot be accommodated.

Newark conducted a series to see if the church could "catch up" with life, where does the Christian "fit in" in the 20th century? Should we differentiate between religious sects?

Projects of Newman

On Halloween, an overwhelming number of students came to Newman House so that orphans, unable to "trick or treat" on their own, could go with supervision. In the near future a theater trip to 2001: A Space Odyssey is planned with discussion of its meaning and relevance to us.

Plans are already in motion for next semester. Dave Kane, educational chairman, has announced plans for a seminar on the theologian philosopher Teilhard deChardin. Also, a film festival of box office controversies will be presented. Hopefully, a speaker sponsored by the religious organizations and CLUB will be able to appear in the spring.

The term "Community" was added to the Newman Apostolate's title by means of charter renewal by the SGA. The one word symbolizes the hopes of the Newman spirit: to cease being a ghetto of its own on campus and to reach out and become a viable force in every aspect with little or no relation to race or religion.

'Melee'

(Continued from Page 1)

The park they were attacked by outside people. As this happened the police moved into action. They charged the student group on motorcycles and horseback, swinging clubs indiscriminately as they went. The total number of students injured in this attack is not yet known but blood was everywhere.

Later, as students tried to reach their cars small groups of hoodlums attacked them as police looked on. The students from Montclair who attended this demonstration had a lesson in American democracy they will not soon forget.

Details of the demonstration had a lesson in American democracy they will not soon forget.

Fencers Up For ECAC Season
As Gaylor Begins Team Practice

By JOHN ANESON
Fencing practice has begun with a new coach, a new league, some blood and an increased schedule.

During the 1967-68 season the freshmen of Montclair State formed one of the top teams in New Jersey with a 9-1 record. The Indians' lone defeat came at the hands of NCE, 16-11.

The backbone of the 1967-68 team was the sabre squad. It was led by Captain Dale Rodgers and Dave Bryer, two of the top fencers in the East. Dale, now a junior, had a record of 22-2 while Dave had a perfect 24-0 mark as a freshman and was subsequently cleared out by Jordan Denner, (15-1) now a junior.

The epee team was composed of freshman Bruce Kinter (11-10), junior Dan Ehrgott (9-5) and Jim Zurich and Jim had posted a 13-8 record.

The foil squad did not fare as well and that it will carry with it all statistician, and Ron Philips, MSC's sports information director.
