<td>INBS581</td>
<td>International Marketing Management</td>
<td>MKTG 501 or MKTG 561; MBA degree students only.</td>
<td>Special fee.</td>
<td>1.5 credits lecture.</td>
<td>This course focuses on international marketing environments, functions, strategies and elements of the marketing mix. The course provides tools for identifying, assessing and exploiting international marketing opportunities and dealing with the challenges of marketing in foreign countries. Particular attention is given to the impact of social, cultural, economic, and political/legal forces on international marketing of goods and services. Contemporary issues and trends in international marketing are examined.</td>
</tr>
<tr>
<td>INFO101</td>
<td>Contemporary Business</td>
<td>Can not be used for degree credit by Business Administration majors with more than 60 credits completed toward degree.</td>
<td>Special fee.</td>
<td>3 hours lecture.</td>
<td>The organization and operation of contemporary business are explored. Students study the operation of the free enterprise system, alternative economic systems, and the various functional areas of business: finance, management, production, and marketing.</td>

</table>
the basis for managerial decision support through the analysis of contemporary business case problems. Students will apply the appropriate functions and features of Excel to solve business cases. The course will also emphasize oral presentation and written reports on business processes used in case solutions in order to further strengthen students' communication skills.

Starting Summer 2016: This course emphasizes the development of Microsoft Excel skills and applications. In addition to basic skill building strong emphasis will be placed on business problem analysis and solution development through spreadsheet modeling. Students will also develop skill in presenting models in visual, written, and oral form.

INFO209  Title  Personal Finance.
Special Fee  Special fee.
Number and type of credits  3 hours lecture.
Course Description  This course introduces students to the principles of personal financial management. Using a life cycle view of the role(s) of money at various stages of life, students discover principles underlying decisions such as how to budget, managing consumer credit, managing taxes, selecting investments, planning for retirement, and estate planning.

INFO230  Title  Introduction to Business Co-Op Work Exp.
Prerequisites  Sophomore level status (45+ semester hours completed) with a 2.25 minimum grade point average. Major within School of Business. Starting Fall 2016: Sophomore level status (45+ semester hours completed) with a 2.25 minimum grade point average; Business Administration major.
Special Fee  Special fee.
Course Description  This is an introductory cooperative education course which integrates formal classroom study and assignments with a supervised full-time or part-time off-campus employment experience. The purpose of this course is to develop self-awareness and to explore educational and occupational alternatives.

INFO240  Title  Statistical Methods in Business.
Prerequisites  MATH 100 or Placement Through MSU Placement Test.
Special Fee  Special fee.
Number and type of credits  3 hours lecture.
Course Description  This course is a comprehensive introduction to the application of modern statistical methods used in enumerative and analytic studies in business.
Topics covered include: use of percentages, proportions, rates, ratios and indices; descriptive statistical methods of data analysis; probability; an introduction to discrete and continuous probability distributions; the normal distribution; classical statistical inference - sampling distributions, confidence interval estimation and hypothesis testing for the mean and the proportion and for differences in two means and differences in two proportions; an introduction to control charts. Spreadsheet software is integrated in all topics.

Course Description

INFO271: Analytic statistics which focuses on tools and methods for improving quality. Topics include Demings’s fourteen points, descriptive statistics, summary statistical measures, probability and probability distributions, control charts, regression and design of experiments.

INFO290: This course provides an introduction to the impacts of information systems on business. The course focuses on business processes and information needs in organizations, the roles of information systems in addressing these needs, and ultimately, providing support for the tactical and strategic directions of the business. The building blocks of information systems (hardware, software, networking, Internet, cloud computing, systems analysis, security, e-business, database systems, enterprise systems, etc.) are presented with an emphasis on how each of these components impacts business processes.

INFO300: Integrated Core: Operations Management.
Special Fee  
Number and type of credits  
Course Description  

Special fee.  
3 hours lecture.  
This course is an intro to managerial concepts & quantitative tools required in the design, operation, and control of processes & systems needed to deliver a product or service in a business. Clearly, this material must be integrated with all of the other functional areas of an organization. In addition to examining the operational concepts, theories and tools, the course will include discussions of the interrelationships of these topics and their usefulness in the areas of marketing, management, finance & business strategy. The course will present methods that ensure that business operations are efficient in using as few resources as needed, & effective in meeting customer requirements. Focus will be on managing the processes that convert inputs (in the forms of materials, labor, and energy) into outputs (in the form of goods and/or services). This course incorporates mathematical, statistical, & decision making methods in the analysis of specific business processes & systems. The topics covered include operations strategy, process optimization & management, inventory control, production planning & scheduling, queuing, supply chain management, quality control, decision making, & project management. Computers are used to solve problems involving complex systems. 1 of 4 courses within the Integrated Semester of the undergraduate program.

INFO301  
Title  
Business Decision Making.  
Prerequisites  
INFO 173 or CMPT 109; and MATH 106 or 109 or 114 or 116 or 122 or 221; or departmental approval. For Business minors only.  
Special Fee  
Number and type of credits  
Course Description  
The underlying theme of the course is business problem solving. This course engages students in employing tools from operations management and management information systems in the solution of business problems. Analysis of quantitative decision-making and information systems from the management point of view will be covered.

INFO306  
Title  
Introduction to Web Development.  
Prerequisites  
INFO 310; Business Administration major.  
Special Fee  
Number and type of credits  
3 hours lecture.
Course Description: This course is designed to increase awareness and understanding of the movement to Web-based applications and enterprise-level management information systems as well as electronic commerce. This is a hands-on, lab-based Web page design course with significant exposure to the tools and requirements for the production of such systems. Students will learn to use a variety of development tools such as MS-Front Page, scripting languages such as JavaScript, VBScript and Perl and programming styles to develop both individually and in teams applications that simulate the realities of today's information systems and environment.

INFO306
Title: Course Description
Prerequisites: INFO 290. Major within School of Business. Starting Fall 2016: INFO 290; Business Administration major.
Special Fee: Special fee.
Number and type of credits: 3 hours lecture.
Course Description: This course provides students an overview of the development, applications and management of database systems in business. Students are given a series of hands-on exercises and projects to practice skills in data analysis, database design, database queries and applications. This course also introduces concepts of database administration and Web based database applications. Previous course INFO 410 effective through Summer 2014.

INFO310
Title: Database Management Systems.
Prerequisites: INFO 290. Major within School of Business. Starting Fall 2016: INFO 290; Business Administration major.
Special Fee: Special fee.
Number and type of credits: 3 hours lecture.
Course Description: This course is mainly designed to expose students to production aspects of industries. It will develop theories and applications in the areas of location of facilities, capacity planning, facilities design and layout, designing assembly line production systems, facilities maintenance and materials handling, purchasing, inventory control systems, forecasting demand for products, master scheduling and MRP, scheduling and control systems, and quality and statistical quality control.

INFO315
Title: Production and Industrial Analysis.
Prerequisites: INFO 240 or INFO 271 and MGMT 231; Business Administration majors.
Special Fee: Special fee.
Number and type of credits: 3 hours lecture.
Course Description: This course is mainly designed to expose students to production aspects of industries. It will develop theories and applications in the areas of location of facilities, capacity planning, facilities design and layout, designing assembly line production systems, facilities maintenance and materials handling, purchasing, inventory control systems, forecasting demand for products, master scheduling and MRP, scheduling and control systems, and quality and statistical quality control.

INFO342  Title  Information Technology Infrastructure.
Prerequisites  INFO 290.  Major within School of Business.  Starting Fall 2016: INFO 290; Business Administration major.
Special Fee  Special fee.
Number and type of credits  3 hours lecture.
Course Description  This course is a survey of the many and varied hardware, software, service, and human resources that comprise the core of the information technology organization in the enterprise. The major resources are explained and their chief characteristics elaborated. Emphasis throughout the course is placed on the enterprise requirements for IT infrastructure and how each of these resources addresses each requirement. The infrastructure components are presented through the life cycle of resources: planning, selection, acquisition, implementation, operation, evaluation, and refresh. Previous course INFO 282 effective through Summer 2014.

INFO350  Title  Quality Improvement.
Prerequisites  INFO 240 or INFO 271; Business Administration majors.
Special Fee  Special fee.
Number and type of credits  3 hours lecture.
Course Description  A comprehensive approach to quality in organizations is essential to maintaining competitive position. This course explores current thinking as well as the tools and techniques necessary to implement quality programs.

INFO351  Title  Fundamentals of Project Management.
Prerequisites  INFO 290.  Major within School of Business.  Starting Fall 2016: INFO 290; Business Administration major.
Special Fee  Special fee.
Number and type of credits  3 hours lecture.
Course Description  This course provides an overview of the tools, techniques, and methods used to manage business problems. The entire project life cycle-planning, implementation, control, and evaluation is addressed. Students are required to take the CAPM exam.

INFO357  Title  Business Computer Programming.
Prerequisites  INFO 342; major within School of Business, Information Technology.  Starting Fall 2016: INFO 342; Business Administration major, Information Technology.
| Special Fee | Special fee. |
| Number and type of credits | 3 hours lecture. |
| Course Description | This course enhances students' ability to use computer programming to solve business problems. Students are introduced to the concepts of object-oriented programming in business applications. |

**INFO360**  
**Title**  
**Prerequisites**  
INFO 351 and; INFO 310 or INFO 342. Major within School of Business.  
Starting Fall 2016: INFO 351 and; INFO 310 or INFO 342; Business Administration major.  
| Special Fee | Special fee. |
| Number and type of credits | 3 hours cooperative education. |
| Course Description | This is an introductory cooperative education course for students studying Management Information Systems. This course will integrate formal classroom study with a supervised full-time, or part-time off-campus employment experience. The purpose of this course is to develop self-awareness and to explore educational and occupational alternatives. |

**INFO361**  
**Title**  
Information Technology Special Projects.  
**Prerequisites**  
INFO 351 and; INFO 310 or INFO 342. Major within School of Business.  
Starting Fall 2016: INFO 351 and; INFO 310 or INFO 342; Business Administration major.  
| Special Fee | Special fee. |
| Number and type of credits | 3 hours lecture. |
| Course Description | This course provides students with the ability to use their accumulated information systems technology skills and knowledge to complete a real-world project. These projects will be identified by the school or department and must include a major information systems component with an external organization. |

**INFO365**  
**Title**  
Foundations of Business Analytics.  
**Prerequisites**  
INFO 240.  
| Special Fee | Special fee. |
| Number and type of credits | 3 hours lecture. |
| Course Description | This is the first course in the business analytics concentration and provides |
a comprehensive overview of the fundamental concepts and tools of business analytics for improving business decision making and organization performance. The major topics discussed are: (i) the process of business intelligence and business analytics, (ii) the core concepts of "big data" management, (iii) the principles of data visualization and dashboard design, and (iv) the techniques of predictive analytics. Spreadsheet or commercial software is integrated in all topics.

<tr>
<td>INFO366</td>
<td>Managing Big Data.</td>
<td>INFO 310 and INFO 365.</td>
<td>Special fee.</td>
<td>3 hours lecture.</td>
<td>This course focuses on the management of &quot;big data,&quot; the term given to the huge amounts of data that are routinely captured today as byproducts of business operations, transactions, and interactions on social networks. This data is warehoused in various forms in various databases, and designing the process by which data is extracted, transformed, and presented for analysis is key to successful and efficient analysis. Infrastructure choices including cloud computing, ELT vs ETL, and choice of language for distributed processing (Hadoop vs ECL/HPCC etc.) are discussed.</td>
</tr>
<tr>
<td>INFO367</td>
<td>Structured Data Analytics.</td>
<td>INFO 365; and INFO 366 may be taken as prerequisite or corequisite.</td>
<td>Special fee.</td>
<td>3 hours lecture.</td>
<td>This is the first of two courses focusing on the techniques of data analytics. In this course students are introduced to analytical techniques for business decision making that are suitable for structured data. Training data, validation data, and out-of-sample validation data for model development and validation are discussed. Popular data mining techniques like decision trees, neural networks, and cluster detection are introduced. Students will use datamining software to analyze realistically large datasets to gain experience with these techniques.</td>
</tr>
<tr>
<td>INFO368</td>
<td>Unstructured Data Analytics.</td>
<td>INFO 367.</td>
<td>Special fee.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
INFO368  Course Description of the analytical techniques is on text-mining, but related issues like natural language processing, context analysis, and situational awareness are also discussed. Students will use appropriate data-mining software to analyze realistically large datasets to gain experience with these techniques.

INFO372  Title Management Science.
Prerequisites INFO 240, INFO 375 and MGMT 231; Business Administration majors.
Special Fee Special fee.
Number and type of credits 3 hours lecture.
Course Description Applied mathematical techniques used to solve a wide variety of problems with special attention to issues, management, and production control. Topics include linear programming, transportation, and assignment algorithms, other optimization techniques, decision theory, simulation, and queuing theory.

INFO375  Title Operations Analysis.
Prerequisites INFO 240 or INFO 271; Business Administration majors.
Special Fee Special fee.
Number and type of credits 3 hours lecture.
Course Description An introduction to managerial concepts and quantitative tools required in the design, operation, and control of business systems. This course incorporates mathematical and statistical methods in the analysis of specific business systems and industrial production activities, inventory control, production planning and scheduling, and capital management. Computers are used to solve problems involving complex systems.

INFO380  Title Computer Networks in Business.
Prerequisites INFO 342 or departmental approval. Major within School of Business. Starting Fall 2016: INFO 342; departmental approval; Business Administration major.
Special Fee Special fee.
3 hours lecture.

This course enhances students' knowledge of data communications, network design, administrations, and distributed information systems. The concepts essential to the design and application of both communication hardware and software are examined. Emphasis is on the analysis and design of networking applications in business. Management of networks, networking security, cost-benefit analysis, introduction of major emerging networking technologies, and evaluation of connectivity options are also covered.

INFO386 Title
Supply Chain Management.

Prerequisites
INFO 375; Business Administration majors.

Special Fee
Special fee.

3 hours lecture.

This course involves the flow of materials and information among all of the firms that contribute value to a product from the source of raw materials to end customers. Relationships among supply chain components and the interface of supply chain activities and other functional areas of business are examined.

INFO400 Title
Business Analytics Capstone Practicum.

Prerequisites
INFO 368 may be taken as prerequisite or corequisite.

Special Fee
Special fee.

This is the final requirement of the business analytics curriculum. In this capstone practicum students will work on a collaborative group project that addresses, ideally, a live business problem using the analytical techniques learned in the other courses comprising this major. Students will clearly articulate the business problem and the goals of their chosen analytical approach. They will have access to realistically big data, and an opportunity to appreciate, through application, the possibilities and limitations of these analytical techniques. Students will be expected to understand and communicate the business implications of their analysis to interested stakeholders.

<td>INFO470</td>
<td>Electronic Commerce: Creating Business Value Using Information Technology.</td>
<td>INFO 290. Major within the School of Business and Information Technology (INFT) majors only.</td>
<td>Special fee.</td>
<td>3 hours lecture.</td>
<td>This course is designed to provide the student an understanding of the consequences of the introduction of the Internet and the World Wide Web in the way business is conducted. The electronic commerce world is viewed primarily from the point-of-view of MIS. That is, the managerial issues related to the information infrastructure requirements are mainly attended to. Both individuals and organizations have been profoundly affected by related network technologies that have since permutated in form ever since the convergence of advanced communications and information infrastructure and the cable,</td>
</tr>
</tbody>
</table>
telephone, television, and telecommunications industries. The student will learn about new forms of business practices in business-to-business, consumer-to-business, and intraorganizational transactions. Specifically, activities in the areas of electronic shopping, publishing, distribution, and collaboration will be explored. The following issues that have arisen as a result of electronic commerce (EC) will be explored: security, authentication, privacy, data encryption, intellectual property rights, freedom of expression using electronic media, fair use policies, legal liabilities, etc. Students will also learn about new organizational forms such as the “virtual” firm that are emerging as a result of EC.

### INFO474
**Title**: Business Forecasting  
**Prerequisites**: INFO 240 or INFO 271; Business Administration majors.  
**Special Fee**: Special fee.  
**Number and type of credits**: 3 hours lecture.  
**Course Description**: Mathematical and econometric models for short- and long-range business forecasting. Models are evaluated for accuracy and relevance. The computer is used as a tool in developing an automated system.

### INFO475
**Title**: Quantitative Decision Making for Business  
**Prerequisites**: INFO 372 and INFO 463; Business Administration majors.  
**Special Fee**: Special fee.  
**Number and type of credits**: 3 hours lecture.  
**Course Description**: This course is a capstone course for the Quantitative Methods concentrations and is aimed at applying the quantitative methods learned in the prerequisite courses to solve some real world business problems. It will be a project-oriented course. The class time will be used to discuss the problems and their solution strategies rather than learning more techniques. Computerized tools will be used to solve the problems.

### INFO476
**Title**: Data Mining for Business  
**Prerequisites**: INFO 240 or departmental approval. Major within School of Business. Starting Fall 2016: INFO 240 or departmental approval; Business Administration major.  
**Special Fee**: Special fee.  
**Number and type of credits**: 3 hours lecture.  
**Course Description**: This course is concerned with data mining concepts and techniques and is designed as a practical introduction to the growing field of Data Mining.
This powerful set of analytic techniques is becoming increasingly popular as an information management tool designed to guide decisions under conditions of limited certainty across such diverse fields as marketing, finance, economics, education, epidemiology, psychology, sociology, as well as many others.

INFO488  Title  Business Application with Artificial Intelligent (AI) Systems.
Prerequisites  INFO 290; Business Administration major.
Special Fee  Special fee.

INFO488  Number and type of credits  3 hours lecture.
Course Description  The course will cover the following topics: knowledge acquisition techniques, knowledge representation, inferencing, case-based reasoning, industrial application, uncertainty issues.

INFO490  Title  Decision Support Systems for Business.
Prerequisites  INFO 290; Business Administration major.
Special Fee  Special fee.
Number and type of credits  3 hours lecture.
Course Description  The course will cover the following topics: decision types and models, heuristics in decision making, the role of data and its collection, group decision making, design of DSS and GDSS, neural computing/learning, uncertainty issues.

INFO491  Title  Independent Study in Information Systems.
Prerequisites  Departmental approval; and INFO 290. Major within School of Business. Starting Fall 2016: INFO 290; Departmental approval; and INFO 290; Business Administration major.
Special Fee  Special fee.
Course Description  A student, under the guidance of a faculty advisor, will conduct an in-depth study on a current topic in information systems. A project report or a research paper will be produced after this study. May be repeated once for a maximum of 6.0 credits as long as the topic is different.

INFO492  Title  Special Topics in Information Systems.
Prerequisites  INFO 290 and departmental approval. Major within School of Business. Starting Fall 2016: INFO 290 and departmental approval; Business Administration major.
Special Fee

Course Description
This course covers the topics in the design, implementation, and applications of information systems. The topics also include various information technologies and their applications. The course may be repeated for credit as long as the "special topic" in each course differs from topics previously taken. May be repeated once for a maximum of 6.0 credits as long as the topic is different.

INFO496
Title
Advanced Systems Analysis and Design.

Prerequisites
INFO 351 and INFO 416 and INFO 440. Major within School of Business.
Starting Fall 2016: INFO 351 and INFO 416 and INFO 440; Business Administration major.

Special Fee
Special fee.

Number and type of credits
3 hours lecture.

Course Description
This course is an advanced (capstone) project-oriented exposition of the MIS knowledge to application system development process. Emphasis is placed on information analysis and the logical specification of the system and project management. SDLC, systems development process and systems development tools, etc., are covered. The student is guided to develop a formal design document as a project.

INFO501
Title
Statistical Methods.

Prerequisites
Course in undergraduate calculus; M.B.A. degree students only.

Special Fee
Special fee.

Number and type of credits
3 hours lecture.

Course Description
Introduction to statistical techniques with applications in business decision making and problem solving. Topics include methods of descriptive data analysis, probability and probability distributions, methods of inferential data analysis including estimation and hypothesis testing and an introduction to experimental design principles, correlation, regression model building and an introduction to time series forecasting.

INFO502

Course Description
This is an advanced course in quantitative approaches to managerial decision making. The emphasis will be on simulation models and techniques with applications in finance, production, inventory, and queuing analysis. Computer-based simulation systems will be discussed and tested on the computer.

INFO532
Title
Statistical Inference for Business.
Prerequisites
INFO 501.
Special Fee
Special fee.
Number and type of credits
3 hours lecture.
Course Description
An exploration of intermediate statistical methodologies used for decision making. The theoretical bases for various techniques are presented to create a framework for understanding the assumptions and limitations of inferences made from data. Topics covered will include multivariate probability functions, moment generating functions, sampling distributions; estimation, Neyman-Pearson Lemma, parametric and non-parametric hypothesis tests, and analysis of variance.

INFO533
Title
Stochastic Models.
Prerequisites
INFO 502.
Special Fee
Special fee.
Number and type of credits
3 hours lecture.
Course Description
Stochastic models are descriptions of systems which change in accordance with probabilistic laws. The course focuses on construction rather than solution of models. Simulation solutions and statistical analysis of data from stochastic processes. Applications to business problems are stressed.

INFO534
Title
Multivariate Analysis.
Prerequisites
INFO 502, 532.
Special Fee
Special fee.
Number and type of credits
3 hours lecture.
Course Description
An introduction to multivariate analysis with an emphasis on the practical application of these techniques. After introducing the multivariate distribution, the following statistical procedures are explored: multiple regression, discriminant analysis, multivariate tests of significance,
canonical analysis, factor analysis, and multidimensional scaling. Use of
these procedures as managerial tools is fully explored.

Course Description

This course provides students with a fundamental understanding of manufacturing and service operations and their role in the organization and in the supply chain. Surveys a wide range of operations and supply chain management topics, including process flow analysis, capacity planning, inventory management, facilities location, and total quality management. The course deals with these topics through a managerial, applications-oriented perspective. The course is integrative in nature, emphasizing the fit and relationship of operations with other functions of the firm.

INFO571
Title
Discovering and Leveraging Emerging Technologies.
Prerequisites
INFO 563 or INFO 503. MBA degree students only.
Special Fee
Special fee.
Number and type of credits
1.5 hours lecture.
Course Description
Technological innovation are a primary source of competitive advantage for firms and impact the way we live and work. Over the past few decades we have seen various technologies revolutionize the business world - from the introduction of the personal computer, to the Internet revolution, and more recently mobile computing and hybrid cars. These revolutions are obvious in hindsight, but it often difficult to determine which technologies will take off and become successful and which have the potential to completely change industries. This course will examine the current state of the high technology field and introduce various methods and frameworks, in order to help determine which technologies are likely to succeed, which will probably fail, and which may lead to radical changes in the business world and in our everyday lives.

INFO572
Title
Business Analysis.
Prerequisites
INFO 563 or MGMT 565 or by permission of the MBA Office. MBA degree students only.
Special Fee
Special fee.
Number and type of credits
1.5 hours lecture.
Course Description
The focus of this course is on how to convert the business needs of a customer into the systems requirements that can be further taken into the design and implementation phases in the development cycle of a software system.

INFO572
Course Description
Conducting a feasibility analysis (business case) for the proposed information
systems or enhancements to an existing information system is the essential part of this course. This is done with the help of tools and techniques of systems analysis. Current Systems Analysis methodologies such as SDLC and Agile will be covered. Change management concepts, processes, and techniques are presented in the context of systems development projects. Pointers to managerial and organizational aspects of information technology projects are provided throughout the course. This course is for individuals aspiring to be analysts or better informed end users of information systems in business.
