Students React to Ruling On Possible Faculty Dismissal

By Roger White and Dino Efftychou

A speech department student committee has been organized to protest the decision that the services of a speech department faculty member will not be needed next year.

The decision affecting Mrs. Phoebe Schlanger, who has been teaching at MSC since September 1967, was reached by department chairman Dr. Howard Fox and a faculty committee consisting of Mr. K. Moll, chairman, Dr. H. Scholl, Mr. W. MacConnell, Mr. G. Carraciolino and Mr. W. Ballare.

Dr. Fox explained that the speech department will split into two separate concentrations - speech arts and speech science - and therefore departmental needs for teaching positions will change.

He further explained that although Mrs. Schlanger is a very good teacher she would not fit into the future plans of the department.

Dr. Fox said other factors taken into considerations for the evaluation of a teacher were affect, experience, degree, and liberal arts background.

Concerned about the increasing number of missing cars, McGinty has instituted a program to keep tabs on possible tamperings with automobiles.

Ward Nelson, a senior, became interested in the program when he heard of several students being requested to identify themselves.

"The new plan should be quite effective," he commented. "Almost any method of stealing a car involves some sort of tampering with the mechanisms. If there is constant checking of license and registrations, cars will be much more secure on campus."

Nelson went on to discuss the main methods of stealing cars. The first, using a car off campus, would be stopped by investigating ownership papers. The second, jump-starting, requires the hood to be opened, and therefore an efficient checking system would stop it. But the third method, using a master key, can only be stopped as easily. But the report comes in, "We're still working on it."

Fine Arts Students Show Dismay With 12 Hour Load

By Richard Lupo

Over 40 students from the fine arts department presented themselves with petition in hand to Dr. Richardson last December, regarding their dismay with the proposed "12 hour teaching load." 

Hopkin, to "clear the air," the students commenced to discuss their plight with the President.

The "12 hour load" will basically result in an eventual reduction in semester teaching credit. It is agreed upon by the administration that there was to be a load cutback, but no added faculty needed.

Dr. Richardson said that the way the students dumped the problems was "fabulous." He added that, "The students came in with the attitude that something was being done to them. The students were fair and eloquent, and the President was interested in the program when he heard of several students being requested to identify themselves."

License Check Will Curb Car Thefts

By Karen Bykowski

Involved in a new, all-out drive to end car thefts, Mr. Joseph McGinty has introduced a new procedure of checking the license and registration of anyone seen working under the hood or jacking up a car on campus.

Concerned about the increasing number of missing cars, McGinty has instituted a program to keep tabs on possible tamperings with automobiles.

EDITOR'S OPINION

‘Phasing Out’ Supported

After strong protests on the part of College High students, parents and some faculty members, Montclair State College’s Board of Trustees voted last December to halt plans to “phasing out” the campus demonstration school until the views of more faculty members and parents are obtained.

Nearly 200 people attended the board’s open meeting Dec. 17 and apparently they all had strong opinions favoring the school’s retention. Unfortunately, many of the arguments presented were seemingly unrealistic relating to the future needs of Montclair State. The misquoting of laws, giving groundless statistics and emotional arguing on the part of many audience participants added to the board’s herculean task.

After the measure postponing the “phasing out” of College High was passed, Dr. W. Lincoln Hawkins, board chairman, emphatically asserted: “We will make our decision on Jan. 21 — and that will be final.”

Indeed, the Board of Trustees is bending over backwards to hear the opinions of all sides before reaching a final decision. Back in 1964 the State Board of Education wanted the College High closed. But strong objections from a few faculty members, alumni and parents kept the school going.

Sometimes democracy does not work in the best interests of the people. The future of Montclair State should be growing with the needs of society, rather than catering to the needs of a vocal few supporting the intellectual elite existing at College High.

Montclair State’s teacher-education students can best serve America’s perplexing society by working with disadvantaged children, teaching in Newark’s ghetto and gaining an insight into today’s educational needs.

As of January 1, we are still awaiting materials and supplies which were requisitioned during the summer. Materials, services and equipment purchased by the central New Jersey State Purchase Division, and delays of two to six months, depending on the complexity of the item, are not uncommon. At other times, the colleges do not receive the equipment specified by college faculty and staff. The local Board of Trustees should have the power to award contracts within the same manner permitted by the local school districts.

Budgeting should be recognized as being a tool to implement both academic and administrative programs. The budget is inextricably tied to top level personnel policies and local administrative procedures. The present system does not provide for enough flexibility in the use of money within the approved budget. Great quantities of time and energy are wasted as a result. The local Board of Trustees and college president must be given the opportunity to present the departmental budget with the Board of Higher Education, and then, as provided by statute, to jointly and concurrently present the budget to the governor and legislature.

Construction

There is a long history regarding the adequacy of present construction procedures. The authorization of the local state college is so limited that at present construction is always paid without the approval of college administrators. The present construction procedures are cumbersome and have caused extensive delays. Construction on a state college campus takes almost twice as long as it does in the private sector of society.

An urgent project to provide an effective fire alarm system for Montclair State College has been in the Construction Bureau for over three years.

Reforms Won’t Satisfy

I was appalled and disgusted by the ignorance and arrogance displayed in your recent magazine section on student revolt. You demonstrated a complete lack of understanding of the situation behind the related unrest in colleges, the inner-city and around the world.

Reforms instituted by the administration — no matter how enlightened and benevolent — will not null the students who have committed themselves to fighting the great injustices fostered by the political and economic system under which we live. Only the most superficial analysis possible (such as that which seems to have been agreed upon by the editors of the MONTCLARION) could conclude differently.

The heart of the battle is not pass-fail or dorm hours or a cut in the budget. The heart, the root cause if you will, is the fact that our country is a racist, imperialist society where the few rational abnormal while all the insanities of the system are accepted because they are “authority.” Nothing is right simply because someone says so. Illegitimate authority must be rejected and strongly if we are to ever achieve the ideals upon which this country was founded.

R.H. Indley

College Needs $$$$ Control

A united effort has been shown by four New Jersey state college presidents in their demands for sorely needed fiscal autonomy for the six state colleges. At present all money coming into the state colleges is deposited in the governor’s office and the state legislature. Delays undoubtedly result from these massive red tape procedures.

Montclair State College needs fiscal autonomy. This campus, led by its administration and its Board of Trustees, undoubtedly results from these massive red tape procedures. The State Colleges Need $$ Control

‘Phasing Out’ Supported

In my last article in the MONTCLARION, I wrote about the need for fiscal autonomy. The following statement came from one of the other colleges and I thought it would be of interest to you. Some parenthetical comments have been added to add perspective and relevance of the remarks for Montclair.

The Need For More Local Autonomy At The State Colleges

We are moving into an era where we will see even more involved in the decisions which affect education at the college level. Moreover, the college faculty, staff and president of the college have legal power to make important decisions, then there are no decisions for the faculty and students to participate in making. This academic health of the entire college system is dependent upon that more autonomy be granted to the local campus. The following specific improvements are needed:

1. Purchasing and Procurement

The budget is inextricably tied to top level personnel policies and local administrative procedures. The present system does not provide for enough flexibility in the use of money within the approved budget. Great quantities of time and energy are wasted as a result. The local Board of Trustees and college president must be given the opportunity to present the departmental budget with the Board of Higher Education, and then, as provided by statute, to jointly and concurrently present the budget to the governor and legislature.

2. Budgeting

Budgeting should be recognized as being a tool to implement both academic and administrative programs. The budget is inextricably tied to top level personnel policies and local administrative procedures. The present system does not provide for enough flexibility in the use of money within the approved budget. Great quantities of time and energy are wasted as a result. The local Board of Trustees and college president must be given the opportunity to present the departmental budget with the Board of Higher Education, and then, as provided by statute, to jointly and concurrently present the budget to the governor and legislature.

3. Construction

There is a long history regarding the adequacy of present construction procedures. The authority of the local state college is so limited that at present construction is always paid without the approval of college administrators. The present construction procedures are cumbersome and have caused extensive delays. Construction on a state college campus takes almost twice as long as it does in the private sector of society.

A project to provide an effective fire alarm system for Montclair State College has been in the Construction Bureau for over three years.

At present the college is required to refer repair projects to the central Construction Bureau. This is a perfect example of the unworkability of the present system. The college has been trying to get that building adequately insulated for years.

5. Personnel

The local Board of Trustees should have the power to hire and fire faculty and staff members in accordance with the approved budget. Four months have occurred even with positions already authorized by the legislature, Budget Bureau and oddly enough, by the Civil Service Department. Although the Board of Trustees approved the appointment of a number of college officials in September, the request has been to be unapproved by the Civil Service and final approval has not been received.

CONCLUSION

It should not be necessary to recapitulate the need for college autonomy. The college president and university president and college president must be given the responsibility for those areas of control over which they can be held accountable. The college must be able to make important decisions, then there is no need for the local Board of Trustees and the president of the college. Unless the local Board of Trustees and the president of the college. If you really want to make an effective fire alarm system for Montclair State College, you must wait for the Board of Trustees and the president of the college to make the decision.

Webster Hall is a perfect example of the unworkability of the present system. The college has been trying to get that building adequately insulated for years. The State Colleges Need $$ Control

Footnote the TRUTH or Pay the CONSEQUENCES

By Mike Andrea

"It’s not a direct quote, so why should I bother footnoting?" A question many a student has heard towards the end of a semester when just about everyone has a term paper due soon and the footnote pages are being typed out feverishly. Because of this, the College Allan Morehead and Mr. Richard Davis of the dean’s office thought now would be the prime time for a clarification of the college’s policy towards plagiarism.

According to the statement recommended by the committee on examinations and academic standards, plagiarism is: “...the copying or imitating the language, ideas and thoughts of another person, whether by oral, written or mechanical means, without giving the author the proper credit, whether the passage is directly quoted, paraphrased or expanded.” This definition includes a direct appropriation of the student’s work. The student will be suspended or expelled. The action...taken will be recorded on the student’s permanent record Card.”

THEATRE

Bech at Gate

Rochelle Owens’ Bech at Gate

is an exciting theatre piece which combines raw and natural dialogue with modern techniques. Set in the jungles of Africa – the theatre is well-decorated in green brush – Bech stresses the perverse elements of man. Though "we must not alter nature" we are told that "nature’s order is a dirty deal."

In her rise to power, Bech reduces man and everything around to their animal surroundings. She herself is crude, callous and unfeling until she succumbs to the ruthless desire. Ultimately, her emotions destroy her. Jean David is powerful as the wretched Bech but the rest of the cast leaves much to be desired. Though often dramatically poetic the play would be more palatable if it were more clearly written.

"WP" will be assigned in any case of literary dishonesty and "WR" on the exam. Any or all of the following actions may be taken: 1. The student will be suspended or expelled. The action...taken will be recorded on the student’s permanent record Card.”

Playtex invents the first-day tampon™

(We took the inside out to show you how different it is.)

Outside: it's softer and silky (not cardboardy).

Inside: it's so extra absorbent...it even protects on your first day. Your worst day!

In every lab test against the old cardboardy kind...the Playtex tampon was always more absorbent. Actually 45% more absorbent on the average than the leading regular tampon.

Because it's different. Actually adjusts to you.

It flowers out. Fluffs out. Designed to protect every inch of you. So the chance of a mishap is almost zero!

Try it fast.

Why live in the past?

Kornegay Leads Hawks Over Indians, 77-64

By John Dantoni

A tough second half zone and hot hand of All-American Ron Kornegay helped Monmouth College open up a close game as the Hawks trimmed Montclair State, 77-64, in the championship game of the New Jersey Kiwanis classic before a capacity crowd in Panzer Gym.

The Montclair defeat was the first for the Indians in nine games. It also marked the first setback ever in Kiwanis play for Montclair State after two straight championship wins.

Both teams were slow off the mark in the beginning as tightness caused sloppy play and many turnovers.

Despite this start the game developed in a nip and tuck affair in the first half, with the score being knotted 10 times. Ed Hallock's field goal with three seconds left in the half gave the Hawks the halftime edge at 32-31.

The teams traded baskets and the lead during the early going of the second half, until John Barone hit for two quick baskets and Ron Kornegay added a foul at 11:57 for a five point Monmouth spread, 51-46.

Montclair got the lead down to three at 57-54 on Bob Sienkiewicz's goal but Ron Kornegay made a foul shot and after Bob Kornegay was called for a foul Ron Coveney hit a basket.

The Indians received some consolation in their defeat with the second place trophy for the Classic and they also placed two men on the All-Star team.

Bob Lester and Harry James of the Indians were named to the honor squad along with two-time tournament Most Valuable Player Ron Kornegay and John Baron of Monmouth, and Paul Dolinoy of Upalda.

Gymnastic Meet Opens Tomorrow

Tomorrow the MSC gymnastics team will open its season against the United States Coast Guard Academy in New London, Conn. The gymnasts are preparing for a tough opener, the first of 13 meets this season culminating in the conference championships to be held here in March.

The students of Montclair will have their first opportunity to see the team in competition on Tues., Jan. 14 at 8 p.m. in Panzer Gym against arch-rival Trenton State. Coach Terry Orlick will make his first appearance at MSC in a gymnastics meet.
