State Board Votes $200 Increase; Students Will Study Alternatives

By Don Pendley
Editorial Assistant

TRENTON – A bill to increase the room and board fees for the coming academic year has been passed by the New Jersey State Board of Higher Education. Included in the passage of the bill, however, was an agreement that the price raise to $1000 would be investigated by a committee of students from the state colleges.

A group of Montclair State students, headed by Jesse J. Young, chairman of the Joint Dormitories and Off-Campus Students’ Committee, went to the public meeting of the Board of Higher Education in Trenton last Friday to convince the Board to postpone their decision on raising the rates until all the alternatives could be looked into.

Young cited that the students at the various state colleges were not consulted upon the raising of the rates, and stated that any raise in the dorm rates would also affect the off-campus rates.

Included in the bill is the approval of the lease for the new dormitory to be built at MSC.

Believe It or Not . . .

Although the dormitory room fees are scheduled to rise for the coming year, facilities such as this Stone Hall study room will not feel the additional funds in the way of improvements. Increased fees do not mean improved facilities.

Social Science Dept. Prepares for Division

By Jane Conforth
Staff Reporter

The social science department is preparing for a division which will become effective in September.

School of Social and Behavioral Sciences is the working name which has been tagged to the new social science department. With the name comes additional changes in course and major offerings.

Five different majors will be available in the social sciences: history, political science, sociology, economics and transcultural studies. The last named is a disciplinary science which will incorporate history, anthropology and geography, and emphasize studies of Asia and Africa.

Anthropology and geography will have their own departments but will not be offered as majors.

In a recent interview, Dr. Phillip Cohen, chairman of the social science department, said of the new program, “I’ve worked on it and I’m very enthusiastic about it. We want to be as relevant as anybody. We want to meet the needs of those who want to go on to graduate school or government or industry, as well as teaching. If we make a mistake or two, that’s to our advantage too, because you can’t find out what’s right unless you make changes.”

One of these is that most freshmen at MSC will probably be liberal arts students. They will have some time to look around and then will choose their major in the sophomore year.

Freshmen will no longer be required to take World Civilization I and II. Instead they will elect six semester hours from a series of courses in the School of Social and Behavioral Sciences. Some of these courses are African Civilization and Contemporary Europe from 1914 to the Present.

Webster Welcomes Coeds

By George Gonos
Staff Reporter

The Visitation Committee of Webster Hall met with President Richardson last Wednesday to present him with the final draft of a proposal for a closed door visitation policy. After evaluating the proposal, President Richardson permitted the initiation of the program last Saturday as an experiment, pending additional consideration. Also attending the meeting were Dean Blanton, Mr. Richard Taubald, coordinator of men’s housing and Mr. Richards, director of Webster Hall.

Before a permanent policy is accepted, however, legal points must be clearer in the final document.

The decision permitting visitation last weekend was based on figures that showed MSC in relation to other colleges in the United States. Taubald presented research done by the Association of College and University Housing Officers. Of 285 schools studied, 108 allowed room visitation at regular hours each week, 58 per cent of these institutions permitted the door to be closed.

Of colleges that do not allow regular visitation, many practiced “open house” or visitation on an infrequent schedule.

In northern New Jersey, the following three colleges presently have closed door policies: Fairleigh Dickinson University, Drew University and Rutgers University.

Bob Moller, president of Webster Hall commenting on the meeting said, “Although President Richardson found some slight discrepancies in the policy, he was very receptive to the idea.” He added that, “the visitation committee . . . was in total

Open House

The invitation is given to Daria Katz, sophomore French major, to take part in the closed door policy initiated by Webster Hall last weekend.

Hastiness of Trustees’ Act
Protested by CHS Parents

By Roberta Kueh
Asst’d News Editor

“The whole group is boiling because of inadequate hearing by the trustees” is Mr. Charles Burkeley’s view of the proposed phasing out of College High. As a leader of the College High parents, Mr. Burkeley expressed concern for the academic future of those students presently attending this demonstration school.

“Legislative before legal measures” is the action Mr. Burkeley advocates to determine why all four state demonstration schools are simultaneously designated for closing. To investigate this and other issues, such as financial aid from the state, an association of all the involved schools was recently formed.

The assembly chambers of the Trenton State House will be the site of a public hearing on the proposed closing of the demonstration school for interested parties on March 6 at 10 a.m. At this time spokesman from the College High parents and faculty, the MSC Board of Trustees, and the State Commission will present their proposed testimony, which must be reduced to writing by March 4 in order to be heard.

The State Commission was newly created by the state legislature and is composed mainly of assemblies. One of its members, Assemblyman John J. Fekety (D-Hudson County) refused to state his position on the College High issue at this time, since throughout this situation he hopes to maintain an open mind and listen to all sides.

Miss MSC Finalists:
’Talent . . . Personality’

By Arlene Petty
Staff Reporter

For the first time, the women of Delta Theta Pi will assist the men of Phi Lambda Pi as they jointly sponsor the Miss Montclair State Pageant, one of the preliminaries for the Miss New Jersey Pageant. A total of 45 applicants were judged on talent, poise and personality and narrowed down to 10 finalists last week in Memorial Auditorium. The girls will go on to the final competition on March 7, and will be judged by three faculty members, Dr. George Horn, Dr. Schleede and Dr. Astero. The 10 finalists are Jeanne Brown, Ellen Fitzpatrick, Carol Tintle, Doris Lee, Faye Horn, Tricia L. L. L., Karen Tullo and Pat Waage. The student who wins the title of Miss Montclair State will also receive a $150 scholarship, as well as a trophy. The first runner-up is given a $50 scholarship, and the girl voted Miss Congeniality will be presented with a trophy.

Miss Montclair State will also become the representative to the Miss New Jersey Pageant with all expenses paid. She will have the added honor of being the Homecoming Queen.

The pageant will be held in Memorial Auditorium at 8 p.m. Tickets may be obtained from any member of the sponsoring organizations for $1. Tickets will be available at the door for $1.25.

During intermission at the pageant, entertainment will be provided by the women of Kappa Sigma Rho (winners of the Greek Sing) and the Good Life Trio, one female and two male students from MSC.

‘She Stoops to Conquer’
Semi-Finalist in Festival

Jeanne Schneider
Staff Reporter

The cast of SHE STOOPS TO CONQUER has been part of the nation-wide American College Theatre Festival. MSC’s Players were chosen as one of 30 semi-finalist from nearly 300 campus drama groups. The Festival is the first of its kind to be held in the United States. Ten outstanding plays have been chosen to be presented at the American College Theatre Festival in Washington D.C. from April 28 through May 12, 1969.

Dr. Clyde W. McElroy, adviser to Players and director of SHE STOOPS TO CONQUER, regrets that the cast has not been chosen to perform at the festival. Nevertheless, he is proud of the cast and the recognition they have received for their production.

American Airlines, the Friends of the Kennedy Center and the Smithsonian Institution have cosponsored the event. The American Educational Theatre Association (AETA) and the American National Theatre and Academy have worked together to arrange productions. These groups are interested in presenting evidence of the progress being made in theatre arts throughout the nation’s universities.

Further aims of AETA are to stimulate young actors and to form a bridge between college and professional theatre. Recognition will be given to the theatre as a part of the nation’s cultural resources, and visitors from other countries will be made aware of this part of the culture of the United States. It is hoped that, in the future, similar festivals will be held to continue the development of these goals.
Players Excited with New School of Creative Arts

By Ed Musto

The proposed School of the Creative Arts, which would unify the speech arts, fine arts and music departments has stirred a great deal of excitement, particularly among Players. The prospect of added faculty members in the theatre department and new courses dealing with more advanced aspects of the theatre brings with it the possibilities of fresh ideas and innovations that will give the theatre at MSC unlimited possibilities. Perhaps even for the theatre in general.

Consider the facts. The academic theatre does not have the financial obligations and considerations that play have, with and at times seem to dominate, the professional theatre. The first purpose, and sometimes the only purpose of the professional theatre is for those involved to make some money. Altrium and theatrical deviation aside, an actor cannot eat a script the landlord with a compliment. Broadway producers are usually men who are fairly well off and they are also men who plan to stay that way. “Art” does not get them a Cadillac, “Hello Dolly” will. A play must look like it will sell if it is to be produced. Few plays of true quality make Broadway, it is hard to sell intellectualism and the true theatrical experience. Since the average Broadway show costs well over $200,000 to produce, it is difficult to put on plays with limited appeal.

As a result of this, over the last 10 years there has been a huge movement to what is known as off-Broadway, or anywhere in New York that is not on Broadway. One can put on a good play off-Broadway with 10,000 dollars or less such as The Boys in the Band and the Fantastics. The chances of great financial loss are much less off-Broadway and more risks can be taken. As of this moment, intellectual and experimental theatre are alive and well and living a good deal away from Mr. Cohen.

Prices for sets are skyrocketing, actors want more money, writers will want more royalties and ticket prices will continue to go up. Experimental play will have trouble being produced and many profound attempts may wind up sighted. When this begins to happen the true rise of the university theatre will begin. Authors will choose some colleges with adequate facilities to debut their plays. The academic theatre will start doing first run shows like never before. The financial security inherent on the campus and the decreased expenses involved in production will give the academic theatre freedom.

Professional theatrics will be left to musicals. The serious, thoughtful drama, both classical and contemporary, will remain for the colleges to put on.

Relating these theories to the projects events at MSC, it is obvious how important it will be to support the College of the Arts concept as a vital one for the improvement of an already fine theatre at MSC. Perhaps by the next generation; it will be more meaningful to see theatre at MSC than on that famous street in New York, you know, whatisthename where the theatre used to be king but where died a slow and painful death.
The Price of Education

(Miriam Taub, managing editor)

(Montclair State College)

The Price of Education is the second of a four-part series on today's underground press, written by David M. Levine, Managing Editor.

The underground press, according to California publisher Leon Fulton is a "significant, impact-making force in the United States today." And across the country underground publications—some handprinted and others merely mimeographed—have been springing up in college towns and metropolitan areas for the past 10 years.

According to Fulton, underground papers are now seventy million copies each week. And they're read mostly by college students.

But the underground press is entering a new era in its phase of success. High school students in many metropolitan areas have banded together issuing underground papers attacking the administration of local high schools.

Tribune and Bronx Science's "Mama" are recent examples of New York high school underground journalism.

In their escapades, the high school papers have printed stories critical of school administrations, usually filled with four-letter words, oftentimes papers have been confiscated by state authorities and the students distributing the papers have been suspended.

New York's largest underground high school paper is The High School Free Press. According to Marianna Milbert, an editor of the "Freep," the paper was established in January 1968 and has a 20,000-city-wide circulation.

Recently the Freep ran a series of exposés on city high schools. Jamaica High School principal Louis Schuker was depicted in the exposés as an autocrat "keeping an iron grip" on the school. The article revolved around numerous instances of censorship in the high school paper due to "King Louis" Schuker.

(It was Schuker last Jan. 24 that suspended senior Jeffrey Schwartz for distributing the Freep. Thereafter, the N.Y. Civil Liberties Union filed a suit in federal court seeking the right of students to distribute literature "not disruptive to the education process.""

The Freep, obviously opposed to "the establishment," is a 12-page tabloid newspaper selling for "15 cents on newsstands, 5 cents in schools." "OFF, by and for liberated high school students" is the motto of the paper, but apparently the Freep is not all that untamable. The current edition carries six large advertisements for Columbia records.

Early in January Brandeis high school student John Segall, 16, was suspended for distributing copies of Brandeis Brief. Described by school officials as "obscene and scurrilous," Segall was informed that he would be transferred to the Freep is not all that untamable.

Defending Segall's right, Civil Liberties director Ira Glaser stated: "The Times is sold in schools. If the distinction between it and the student papers doesn't hold, the Freep is not all that untamable."

Apparently the problem of underground papers is developing into a question of a free press versus the rights of a minor. "You can't run the schools on the basis of legalism in adult life," asserted New York school superintendent Nathan Jacobson. "We're dealing with young people, with violation of the First Amendment."

New York school officials as "libelous and libelous," and as "libelous and defamatory," and the Board of Education is considering legal action. According to Nathan Jacobson, "We're dealing with young people, with publication of high school underground papers as long as they're "not obscene... and... not disrupting people to uncommittee acts."

But Principal C.C. McCormick of (The) High School recently asserted: In the underground papers "there are articles and advertisements that... are profane, immoral...and could be disruptive to the character of some people.

Next Week: 

Liberation—The Underground Press Service.

The following is the second of a four-part series on today's underground press.

Andy Patera, ’69, to Joan Opiowiz, ’70, Delta Delta Phi.

NSA Fights CAB Ruling

Against Youth Fare Halt

WASHINGTON, D.C. — The United States National Student Association (NSA) will fight the recommendations of a Civil Aeronautics Board (CAB) examining the issue of youth fares as “unjustly discriminatory,” and has retained legal counsel to prepare briefs and oral arguments for presentation by the association.

The announcement of NSA’s action came from Services Division director, Alan C. Handel, who noted that at present the Association is the only group representing students users of the airline youth fare which will make arguments before the Federal Court.

Abolition of youth fares is being sought by a number of bus companies. NSA will argue that the fares are discriminatory because they are not “graced” with an SGA charter.

The $150 Scholarship

By Chris MacMurray

Staff Reporter

The women of Kappa Sigma Rho are now accepting applications for their annual Diane Schmidt scholarship. The scholarship funds were raised from various money-making activities sponsored by the sorority.

The $150 scholarship is in memory of Diane Schmidt, a sorority sister who was killed in a car accident in August of 1966. Any single sophomore or junior girl currently attending Montclair State College is eligible for the scholarship providing her cumulative average is 2.5 or above.

Kappa Sigma Rho scholarship is not eligible.

The scholarship, now in its second year, was originally suggested by Diane’s parents. A donation of $150 towards the first award was made by Mr. Schmidt.

Applications for the award are judged by the sisters of Kappa Sigma Rho. Application forms are available at the office of financial need, scholarship and participation in extracurricular activities.

It is the sorority’s desire to obtain more of a response to the highest standards. Any girl eligible is encouraged by the sorority to apply.

Applications are available at Mr. Neuner’s office which is located in College Hall. The award will be presented at a May assembly.

Letters to the Editor

Can’t Happen Here

To the Editor:

In the Feb. 19 issue of the MONTCLARION, in bold, black type on page 3, you made a statement — the grim declaration: “Campus Security Inadequate.” This article, supported by the findings of a committee of seven — only two are identified — suggests “better cooperation” with the local police departments. A question which the student may have is: who authorized the committee that is, who specifically, is interested in bringing more police on campus?

In Berkcliff U. at Uppesdal, N.J., a similar suggestion appeared in the “student” newspaper. Many authoritative agencies were then established on campus and when protest finally began, the administration could point to the newspaper and state: “It wasn’t us. The students asked for it.”

Some found this difficult to believe; but after all, there it was — print and newspapers don’t lie.

One might consider that, after disturbances in colleges across the nation, somebody or another might be alarmed that his turn to “hit the wall” is coming. If I may indulge in under-statement, Montclair State is not Columbia or Berkeley or San Francisco State... it’s not even the University of Wisconsin. Then again, maybe someone or another want to be second to call in the National Guard.

Ellen Mignone, 1971.

Further Reductions for Groups —
Registration

Confusing or Consoling?

By Martin J. Fucio
Education Editor

"Mr. Foley bent over backwards to accommodate students," declared Andy Paterna, '69, who worked on registration. "Registration is "not geared to students' needs," claimed Christa Spitzbart, '70.

The above statement are examples of the varied opinions students and professors hold about the registration held at the beginning of February.

Last September, the registrar's office instituted computerized registration for the entire school. The computer, rather than the students, would pick class time and section. It was hoped that this system would give students what they needed and eliminate long waiting lines for courses.

However, registration and course changes remain a confusing process for many people.

Tony Fazio, '72, said that the schedules are so erratic that students, especially cut waiters, cannot get past time jobs. Judy Wenner, '70, complained that she did not "know the time or the professor" for her courses. "Impossible schedule" was the comment of Mona Smith, '70. Mrs. Smith has classes from 8 a.m. to 6:40 p.m. four days a week.

Robert Smith, '70, observed that the "last people to know (class time and size) were the professors." Smith had a course which kept changing hours until it was finally dropped. Helene Posey, '70, has "seven hours straight" of classes. She could not get her schedule changed. John Schneider, '70, refused to go through the "red tape" and did not bother to change his schedule.

"Sometimes it came from faculty circles. "Something has to be done" declared James Keenan, social science major. Keenan said that elective courses are situated at awkward hours for students, thus causing overload and imbalance of sections as students try to get better hours.

"Our problem is classroom accommodations," stated Raymond Jump, education. One of Jump's courses meets three times a week in three different places. Maynard Rich, social science, said that there are no class lists, so that a student does not know for sure what course he is in, and a professor does not know how many are in his classes. Rich complained that there is no way to determine class size, the result being that a professor cannot properly plan his courses.

Although criticism of registration was strong, present registration practices have a number of supporters. "Very systematic" was the description of Charles Boyes, '72. "Mr. Foley handled it very well," stated Robert Monda, '69. Barbara Michalki, '71, explained. "For once it was right for me!" Richard Bennett, '70, had no trouble changing five courses. "Everything worked fine for me," he said. Sue Kotulak, '72, who worked on registration, thought it "went smoothly" considering the large number being served.

Registration also had faculty support. Dr. Morris McGee, English professor and adviser, stated. "Most of my juniors had very little trouble." Dr. Howard Fox, former chairman of the speech department, feels that advanced registration makes it easier to establish class sections, especially for electives.

The math department, stated chairman Paul Clifford, had advanced schedules out in December. This enabled math majors to iron out their courses ahead of time. However, non-math majors got 5 p.m. classes and were unable to get section changes.

Robert Foley, associate registrar, explained registration problems in a short interview. His office handles 9,000 changes each semester, 8,000 of these "convenience changes," i.e., changes for no other reason than the students' convenience. All of these changes were made with "no questions asked." Foley claimed that students got what they wanted, and the large number of changes resulted in class lists being held up two weeks after classes started.

Foley stated that part of the difficulty of registration and course changes was that a "significant" number of students were not careful enough when filling out their pre-registration forms and following directions. Many students did not come for their course changes at the hour and day assigned. Foley claimed that freshmen and seniors came at their assigned times, but sophomores and juniors did not. Resulting in crowding and long lines. There was no waiting for course changes when time schedules were followed.

No major registration changes are planned for next semester. However, work for change is going on. The college is studying the whole registration procedure. Foley is trying to get student choice of course time and professor. An SGA committee is working on the same problem.

Foley believes that student and faculty time should be spent in learning and teaching. "Registration should inconvenience the college community as little as possible," he said.

The research projects presented by the four students will deal with four patterns in today's society, the revolutionary, the social change leader, the activist supporter of the established norm and criminal-defiant.

A good cry cleanses the soul

Independent Study

By Susan Johnson
Staff Reporter

Independent study, a relatively new approach to courses in most departments at MSC, is being taken by four of Dr. Samuel Pratt's sociology students. Their course is entitled Introduction to Sociology 200. The four boys are all freshmen.

In the Independent Study approach to a course, the student is responsible for all the material required in the regular course of the same name, but studies the material in a sequence relevant to his interest area. Subjects are covered in greater depth during free time and are discussed at the meeting time.

The students of Pratt's course are expected to create their own form of study and to submit a tentative idea of what they hope to accomplish during the semester. They select their own text, a dictionary of their course and a library research manual. They choose their own topic in the library. The topics chosen are presented in any way the student feels will be most meaningful.

The research projects presented by the four students will deal with four patterns in today's society, the revolutionary, the social change leader, the activist supporter of the established norm and criminal-defiant.

The research will not be a rehash of already published ideas, but will be presentations of new ideas based on gathered data.

The Montclair State fencing team flashed to three brilliant victories over the weekend, bringing their record to 8-2 for the year. On Friday night, the winners, the Lower Lounge S & A old and last year's two league champions, duelled Hobart College and took a second by the scores of 15-12 and 16-11, respectively.

As usual, Coach Walter Gaynor's swashbucklers were led by the vaunted sabre squad as captain Dale Rodgers and Dave Bryer won 9 bouts apiece, three in each match. Jordan Denner chipped in with seven wins, going 3-0 against R.I.T. and Hobart. The team had a superb three-meet record of 25-2.

Todd Boepple led the foilsmen with six victories. He also went 3-0 against R.I.T. Ken Zucker, Jim Robertson and Bob Critchley all contributed to a fine foil showing with 13 wins.

The epee squad, although facing the strongest squad of each of the three teams, fared well enough to make the total of 11 victories. Mike Dawson, in his first year of fencing, had five victories to his credit and with able assistance from Dan Ehrgott, Bruce Kinter and Mark Ehrhart.

The qualifying preliminaries for the Mid-Atlantic Fencing Championship were held on Sunday as Rodgers and Bryer qualified in the two-match-sabre squad event. They are the defending champions. In addition, they are entered in the individual category.

Rodgers also qualified in the epee. He is expected to have three weapons; he uses this particular one for the fencing aspect of the pentathlon which incorporates running, swimming, shooting, fencing and riding.

Fencers Bring '69 Record to 8-2

By Wayne Potente

Montclair Hoopers
Nab 20th Victory

By Mike Galos
Special to the Montclarion
Led by head coach Luther Bowen and Bob Lester, the Montclair State Hoopsters rolled to their 20th victory of the season Saturday night with a 94-72 victory over Queens College at the Montclair State Gymnasium.

Luther Bowen led all scorers with 33 points, his high point output of the season. Lester grabbed 25 rebounds and finished behind Bowen with 21 points.

Three Steals
The Indians were cold shooting at the start and trailed 17-12. Three straight baskets by Bowen, two coming on steals, and a basket by Mike Oakes after another Bowen steal put them ahead for good, 20-17.

The win marked the third straight season in which the Indians have won 20 games, a feat accomplished only once before in New Jersey college basketball history by Montmouth.

Approaching 1000
Lester’s 21 points gave him a total of 918 for his career and an outside chance for 1000 career points. He already has gone over the 1000 mark in career rebounds. Bowen, Lester and Oakes will all be honored in ceremonies before the final home game tomorrow night against Jersey City State. The three seniors will be playing in their final regular season game for the Indians.

SPORTSQUIZ

1. Who was the Yankee leftfielder in 1961, the year of the famous Maris-Mantle homerun contest?
2. He ran back the opening kickoff for the New York Giants in their famous 47-7 romp over the Chicago Bears in the 1956 NFL championship game.
3. He was Barry Kramer’s backcourt partner for NYU in Kramer’s senior year.
4. Name the two men to wear the uniforms of the Brooklyn Dodgers and Boston Celtics.
5. He was the first Boston Red Sox “Bonus Baby” in the mid-50’s.
6. What is Wilt Chamberlain’s middle name?
7. He took over for Lou Gehrig at first base when the “iron-horse” ended his consecutive game string in 1939.
8. He was the only New York Met pitcher with a winning record in 1962, their first year in the National League.
9. At what New Jersey High School was Louie Ver Lombardi once coach football?
10. Who hit the first homerun at Shea Stadium?

By Ken Teeza

The sports staff of the MONTCLARION has compiled a number of sports questions and “defies” the students and faculty to come up with the answers. The questions will vary and deal with the past and present. Here are this week’s “stumpers.”

1. Who was the Yankee leftfielder in 1961, the year of the famous Maris-Mantle homerun contest?
2. He ran back the opening kickoff for the New York Giants in their famous 47-7 romp over the Chicago Bears in the 1956 NFL championship game.
3. He was Barry Kramer’s backcourt partner for NYU in Kramer’s senior year.

By John Aneson and Tom Benn

The wrestlers of Montclair State had an up-and-down week as they first crushed C.W. Post in a score of 26-13 and were then soundly beaten by a powerful NY Maritime, 27-5. Maritime is rated in the top 20 of all small-college teams in the nation.

Captain Jim Greico, Roy Genatt and Dave Cornilise all won against Post, Mike Nuzzo and John Sutton won by decision while John Bellavia won by forfeit.

Against Maritime, a mental error cost Jim Greico his first defeat in dual-meet competition. Figuring that he was ahead by a score, he took a calculated risk in their famous 47-7 romp over the Chicago Bears in the 1956 NFL championship game.

The Montclair State gymnastics team traveled to Queens College last Wednesday to score their most decisive victory of the season handling Queens a 131.71 to 128.85 score. Rick Schwarz again stood out with two victories, high bar, Schwarz (first), Jensen (second), and Green (third).

There are many factors that contribute to the playing of football games. Good ball handling, a wide open pass offense, the pass defense, avoiding of penalties and injuries, and sound strategy are all important factors. However, effective blocking and tackling will still be the keynote to the winning of games. We are hoping that our football program for the coming season will be particularly helpful and cooperative. Hopefully Montclair State College will succeed in obtaining high caliber players.

The Recruiting Time

“Recruiting” means taking inventory, inspecting and preparing for next year. We hope some will be about Montclair. We are screening prospective students and sound strategy are all important factors. However, effective blocking and tackling will still be the keynote to the winning of games. We are hoping that our football program for the coming season will be particularly helpful and cooperative. Hopefully Montclair State College will succeed in obtaining high caliber players.
