UNIVERSITY

The Doctoral Program in Environmental Science & Management  
and MSU Sustainability Seminar Series Present:

## Primate Conservation & Endangered Species Hunting in Madagascar

WHEN: March 8, 3:45 pm WHERE: Online via Zoom

**Dr. Cortni Borgerson**

**Montclair State University, Department of Anthropology**

Cortni Borgerson is an Assistant Professor of Anthropology at Montclair State University, a National Geographic Explorer, and a commission member for the IUCN Primate Specialist Group, who has worked at numerous international conservation NGOs.

Ever wonder, “Who hunts endangered species and why?” Borgerson’s research demonstrates the importance of understanding human incentives when designing conservation action. Dr. Cortni Borgerson is excited to share with us her efforts working with local communities to better understand and improve food security in areas of high biodiversity, so that we may simultaneously support forests and the people who live within them.
