Candidates Skipped Over Significant SGA Issues

In two days the MSC student body will elect the four people who will be responsible for running our Student Government Association for 1969-1970. Although the executive officers and their legislature will not officially take office until July 1, for the next four months the newly elected officers will be working very closely with the present SGA administration to become familiar with the workings of MSC government.

Presently the candidates are offering their suggestions for the coming year. Both candidates have stressed an "academic" campaign. While they present themselves to the student body, the MONTCLAIRION would like to give its proposals for next year.

The MONTCLAIRION believes that the SGA should delve into academic and social areas relevant to the student body that have never been touched or fully expanded before. These areas would include:

- **Evening SGA meetings**: SGA legislature meetings should be held in the evening to avoid conflicts with classes and dinner hours. More students could then observe the SGA including evening undergraduates.
- **Student participation in campus coordination**: The expansion of Montclair State College to Montclair State University involves the addition of departments and the grouping of these departments into schools. Student organization as now found in the form of one student government association will undoubtedly prove fatal for coordinating a campus which is enlarging both physically and in the number of students it serves. New forms of student groupings, eliminating the need for the class structure, will have to be developed.
- **Expanded student involvement in curriculum changes**: In developing new schools for Montclair State University, new courses will have to be developed and many old ones will have to be discarded or revised. The SGA should plan communication sessions to involve faculty, students and administration for this purpose.
- **Expanded foreign travel**: The proposal by Joseph Kloza, graduate assistant, for an expanded Bureau of Field Studies for maintaining information on foreign travel should be further enlarged. One central student organization should be set up to coordinate all MSC foreign travel programs, including the Experiment in International Living and semester studies abroad. Increased opportunities should be made available for MSC students to partake in studying outside the United States.
- **Finally as a representative group of students, the SGA should begin taking firm stands for and against policies of both the college administration and state of New Jersey decisions regarding higher education and specifically those decisions affecting the state colleges. The MONTCLAIRION hopes the candidates for position of SGA president are fully aware of the new directions upon which college students are embarking. To channel this surge of student power, the 1969-1970 SGA president will be faced with many more problems than previous administrations have faced.**

Both candidates have stated their platforms. Both show strengths and weaknesses and for this reason neither stands out as a candidate that the MONTCLAIRION would like to endorse.

With the SGA elections this Friday, the campaign is down to its last three days. The candidates will present their platforms to the student body personally this afternoon. Ken Traynor and Russ Layne, presidential aspirants, along with all other candidates will speak on Memorial Auditorium at 4 p.m. On Friday, the polls will open at 9 a.m. in Memorial Auditorium lobby, and will remain open to 5 p.m. The results will be announced shortly thereafter as soon as they are tabulated.

**Seven Candidates**

There are a total of seven students running for four offices, with two candidates running unopposed. Heading the list are Traynor, a distributive education major and Layne, from the speech department, both dormitory students. Another speech major, Greg Doucette, is running unopposed for the position of vice-president.

This year there is a three way race for treasurer with Dawn Sova, Marlene Manela and Anita Hutton, math, French and English majors respectively. Joanne Hodde runs uncontested in her bid for secretary.

Evansville Action

Luther Bowen hooks for two in last Wednesday's action against Southwest Missouri State in the NCAA small college division quarter finals held in Evansville, Indiana. Southwest Missouri later lost to Kentucky Wesleyan in the finals.
Booher Calls for End Of Campus Violence, Assistance to Poor

By Richard Kameneck
News Editor

The Chairman of the Board of Higher Education, Edward E. Booher, commented in a recent memorandum on the nature of Conklin Hall by black students at Rutgers-Newark three weeks ago. Booher believes the seizure focuses attention on problems which have been of continuing concern to the Board of Higher Education.

According to Booher, these problems can be divided into three areas: one, the need for providing better opportunities for students who, through no fault of their own, are effectively barred from higher education because they are poor or lack adequate academic preparation; two, the maintenance of an atmosphere free of any form of intellectual or physical coercion on our public college campuses; and three, the necessity to keep under constant scrutiny admissions policies and practices to insure that students who can really benefit from higher education are not denied the opportunity because of excessively rigid or artificial standards.

Booher also called upon the trustees and administrators of the several public institutions in New Jersey to re-examine their current regulations regarding the procedures which certain private groups are being adhered to. These principles include free expression and a reasonable expectation that such expression can result in effective action, where action is justified and within the power of the institution.

Booher also stresses that every public college should have a joint student-faculty administration forum to discuss and resolve any questions or grievances. There should be regular meetings of such a group and provision should be made for representation of the occasion may require. The procedures of such a group should provide for full argument and airing of the issues and for presentation of unresolved issues, if necessary, to the governing board of the institution.

Since attendance at a public institution of higher education is necessary for the training of fine art majors.

Booher expressed that much of the arts is patronized by a less than enthusiastic state machine which holds the belief that arts equals hobby. Far from a hobby, art will always survive because the humanist spirit in the arts cannot be stifled.

Booher continued by saying, "Basically, the art department is moving into more intense involvement in particular areas, with opportunity for both the generalist and specialist to control.

Booher feels "optimistic" towards the school of fine arts, but is discouraged that he will not be able to meet with his students where there is a mutual regard and interest.

Facility administrators noted that teaching vacancies will exist next semester in the areas of theatre arts and art history. It was decided that there was less of a need for painting instruction, and a "more urgent demand for "specialists" who can demand for the two vacancies.

Booher's Follies, a variety of skits performed by the sororities and fraternities to accommodate a large capacity crowd. The show will start promptly at 7 p.m. on Fri., Mar. 21.

All performances are limited to six minutes, and cannot consist of more than 12 people on stage. This year, 10 sororities and 14 fraternities will participate. Trophies will be given to the first, second and third place sorority and fraternity.

One of the major criteria is adherence to time limit. Another important factor is the originality of the skit. Stage presentation and organization round out the list of major considerations for the awards.

This year there will be four judges. They include Mr. Robert Ruzinski, audio-visual department, Mr. Albert Rosseti, business department, Mr. Jon McKnight, administration staff and Mr. Paul Ferguson, registrar's office.

Tickets will be available in Life Hall lobby. Donation is $1.

Booher's Follies Create Friendly Spirit Among Greeks

By Arlene Dues
Staff Reporter

Pi's Follies, a variety of skits performed by the sororities and fraternities to accommodate a larger capacity crowd. The show will start promptly at 7 p.m. on Fri., Mar. 21.

The original work of several students will be heard at this year's annual QUARTERLY poetry reading. Some of the works read will be heard for the first time, while others have been published in the QUARTERLY and other publications.

The students who will participate are: Robert Monda, Diane Wald, Ben Goldberg, Donald Campbell, Robert Demko, Susan Guattelli and Paul Larsen. The readings will cover various subjects and each author will express his feelings about the poetry.

Booher also urges departments to consider the possibility of having the painting teachers "fill in" these openings only raised more problems. Mr. Brian Watkins, a fine arts professor, stated that the new school of fine and performing arts requires more specialization on a higher level.

Failure to renew one-year teaching contracts of new faculty members is not peculiar to only the fine arts department. Other departments have had faculty cutbacks also.

The QUARTERLY staff hopes that the poetry reading will stimulate literary interest and promote the atmosphere of the literary community which they feel has died at Montclair State. The reading will illustrate some of the aspects of the QUARTERLY's literary workshops.

These workshops, which are held at night, provide a place for students to present and discuss their work in any area of the fine and performing arts. The QUARTERLY poetry reading will be held on Thurs., March 30 at 7:30 p.m. in the fine arts building auditorium, room L-135.

Original Student Work in Quarterly Reading

All-State College Committee Formed; Dorm Rent Rise Alternative Studied

By George Gonos

A bill to increase the dormitory rent at state colleges has been passed by the New Jersey State Board of Higher Education, but it is subject to an investigation by a student committee. The bill also included the approval of new dormitories to be built at Montclair and Trenton State. For this reason rent hikes might be applicable at these two schools only.

A committee consisting of representatives from the six New Jersey state colleges is now studying alternatives to this plan that would raise dormitory rent $2.00 a year. Representing Montclair State are Jesse Young and Mike Hogan, both residents of Webster Hall. The committee members have made their complaints known to legislators and the Joint Appropriations Committee in Trenton. The students believe that a $200 increase is too much. They do not see the raise as benefiting the dormitories. Rather, they feel that the funds will be general. The state's negligence, they say, is the reason for the sudden need.

One of the suggested alternatives of the committee reflects a system now in practice in the New York state colleges. There, the students' rent only pays for the actual residential part of the dorm. The lounges and hallways are subsidized by the state. The committee also suggests that the state handle the cost of operation and maintenance.

The state might also make more money available to students. The committee has noted that interest on loans has risen. MSC representative Mike Hogan said that "The increase apparently is needed to build dorms but the cost of building them shouldn't be presented for the students to absorb. The state is putting more financial responsibility on the already strained pockets of the students." He feels that so far the State College Coalition has been rather effective but "we're playing a waiting game." Already several committees and individuals have cancelled meetings with the Coalition.

Students Get Vetover Power Over Antioch Governors

Antioch College's top governing body under the board of trustees recently gave veto power over its decisions to the students and faculty who comprise its college community.

The college's Administrative Council of five faculty, three students, president and dean of faculty were responding to pressure here, as on campuses throughout the country, from those who wish to control, rather than be controlled by, their governments.

It also met head on what Antioch President James P. Dixon called "one of the principal evils in our culture and in our own community - the evil of mistrust." Dr. Dixon said new referendum procedures adopted "should help us here to be more sensitive to human needs of people and to allow us to continue to be a small experiment of a people's withdrawal of council action on behalf of larger problems" abroad in the country.

Antioch set a precedent a quarter-century ago when it acted on behalf of larger problems to prevent council action from being controlled by a referendum.

Students demand that the council's right to make decisions that a significant minority might oppose be challenged.

Under newly adopted procedures, the Antioch community can in the future consider the community's right to make decisions that a significant minority might oppose. Under a referendum, the Antioch community can in the future consider the community's right to make decisions that a significant minority might oppose.

Rules require the council to reconsider an action if more than one-sixth of total eligible voters oppose it in a referendum. If a majority of eligible voters oppose an action, it is rescinded and the council may not repass it. Amended action to deal with the topic also may be challenged by the process.

---

Why does a perfect size 7 look perfect only 21 days every month?

It has nothing to do with calories. It's a special female weight gain...caused by temporary water-weight build-up.

Oh, you know...that uncomfortable full feeling that sneaks up on you the week before your menstrual period. This fluid retention not only plays havoc with your looks but how you feel as well.

It puts pressure on delicate nerves and tissues, which can lead to pre-menstrual cramps and headaches, leaves emotions on edge.

That's why so many women take PAMPRIN®.

It gently relieves water-weight gain to help prevent pre-menstrual puffiness, tension, and pressure-caused cramps.

PAMPRIN makes sure a perfect size 7 never looks less than perfect. Nor feels less than perfect, either.

Additional Space for Ad

Space Theme Explored By Moppets

A special exhibition, entitled "Moppets and the Moon," will be on display in the lobby of Memorial Auditorium through March 31. It features 38 paintings by children, depicting in bold color and composition such themes as blast-off, rendezvous, exploration of other planets, and re-entry.

The students, all born after America's entry in space, represent school systems in three widely separated areas, which were invited to participate in the art program by Dr. Lester Cooke, curator of painting at the National Gallery of Art in Washington and art adviser to the National Aeronautics and Space Administration. Pictures on view were chosen from hundreds done by children in Brevard County, Fla., Peoria, Ill.; and Washington, D.C.
Four Year ‘Phase Out’

The Montclair State College Board of Trustees and administration have decided to phase out College High School over a four-year period. Various proposals for effective phasing out procedures were submitted to the college administration by a parents committee. After closed-door consultations, the current policy was reached.

The present eight, ninth, 10th and 11th graders will be allowed to complete four more years allowing for the last College High graduation to take place in 1973.

The present seventh graders will return to hometown schools for their remaining years. Five years. The decision to have the seventh graders leave College High at the end of this year was based on curriculum offerings and requirements of the local high schools as well as the desire of the college to regain the classroom space. Adjusting to new school surroundings was also considered.

The MSC Board of Trustees has made what seems to be a more than fair decision since Paterson and Jersey City state colleges will close their demonstration schools in June. It appears that the MSC policy has taken the needs of both the College High students and the college into consideration in the development of the four-year phase out program.

Open-Door Admissions

The recent demands by black students to alter admissions policies at Rutgers University were met by President Mason Gross and other Rutgers officials. Demands by militants several weeks ago had called for Negro students to be admitted to the University with a high school diploma only.

The Rutgers administration accepted this demand: however, the university’s faculty voted against this policy. To keep peace in the college community an “open door” policy was formed.

Rutgers officials, however, recognize that the job of accepting many additional students cannot be accomplished by one school alone. Community and state colleges will have to absorb some of the burden.

Ralph Dungan, chancellor of higher education, has assured the Rutgers administration that the other state colleges will adopt similar admissions policies.

Dungan feels that state and county colleges should be giving the highest priority to urban and rural disadvantaged students regarding admission procedures.

In a recent State Ledger article it was noted that Dungan had sent a memorandum to the state’s county colleges requesting them to break “with the traditional ways of doing things,” specifically regarding admissions and curriculum development.

A partial way for the state colleges to fulfill the wishes of Dungan regarding the admissions of disadvantaged students is through the power of local autonomy. Through localized financial control, the individual colleges can channel funds into projects affecting the disadvantaged student. However, funding is not enough.

Although admissions policies will definitely be lowered by accepting less qualified students into the college, the individual colleges must retain the high quality of education they now deliver.

The answer to educating the inner-city student is not by admitting him with only a high school diploma. The answer is to provide adequate post-high school and pre-college preparation for the disadvantaged students.

Preferably federal or state funded projects should be instituted by the urban university and college to prepare the ghetto student to more adequately meet the challenge of higher education before he is actually admitted to a college on a full time undergraduate basis.

"We don’t want to be the old lady of Threadneedle street," states Neiman.

Neiman feels that with the change in format, young people will come running to WQXR’s position on the dial just to hear Judy Collins, Pete Seeger and Tom Paxton scream and sing. Ha! De la has known that I have personally written a letter to every young person in the metropolitan area and told them not to listen to WQXR anymore. That ought to fit Neiman and his "mod" businessmanship.

Frankly the management of WQXR should know that they will be losing some very good friends because of their hot pursuit of advertising revenue. Me for one, and MONTCLARION editor Pat Hanahan, for another.

TWO ALTERNATIVES

There are two alternatives to remedy the entire situation. One, I have just filed a petition with the FCC that Montclair State’s campus radio station, WABC, be put on the air 24 hours a day with a total power of 50,000 watts. The only binding thing I ask for in my petition is that Ruth Goldstein and Alan De Augustine play Beethoven and Bach whenever they’re on the air.

The possibilities for my request to the FCC seem very good. Joe Smith, who runs the FCC in Washington, used to be a janitor at Montclair State — he learned the possibilities for my request to the FCC seem very good. Joe Smith, who runs the FCC in Washington, used to be a janitor at Montclair State — he learned everything he knew about broadcasting from Charlie the janitor, who cleans the second floor of Life Hall.

But if that alternative doesn’t work, I vow that I’ll never have anything to do with The New York Times again. Instead, I’ll become an avid fan of Radio 77, WABC.
Lack of students on dept. groups

By Jane Conforth
Staff Reporter

There is a definite and strong desire on the part of several department chairmen to have the students of MSC represented in the administrative functions of their department. In the words of Dr. Harold C. Bohn, "It is beneficial in that the student observes and realizes the concern of the professors in regard to academic and business affairs of the department. This concern is not limited to the department, but also takes into its scope the entire college. I think that the English department has responsive and reliable student representation, which has worked well with the faculty in our department." General agreement was found in Dr. Katherine Hall, chairman of the home economics department, "I am very much in favor of student representatives elected by the faculty. Not only would the "students gain a great deal of knowledge in the administrative processes of the department, but they would also, as elected representatives, gain self-confidence and a sense of responsibility.

Lack of students

The Department of Physical and Earth Sciences represented its views through Dr. Stephen W. Kowalski. "There is no question about it. It would be most beneficial for students and faculty to have student representatives in the department. It would give the students contact with decision making and would serve as a sounding board — liaison — for the faculty and administration. We do not have any departmental representatives as yet. But we do have an open-door policy and science major representatives in the SGA."

In agreement with these views are those of Mr. Karl R. Moll of the speech department. "We have no student departmental representatives at present, nor have we any plans for such a move, mainly because there has been no desire expressed by the students for such representation. But, we do have a Student Advisory Council, which meets weekly with the department head, serving as an identical purpose."

Moll further explained that he felt definitely beneficial to faculty and students to have some form of student representation. Not only does this policy benefit the student in gaining valuable experience in the problems of being a professional educator, but also educates the educators. The professional barriers which often exist between student and teacher are broken in this atmosphere of communicating minds. No matter what the issue may be, the student's view of it is normally different from that of the teacher. Rational discussion will result in a consolidation of issues and opinions with both sides mutually absorbing knowledge and experiences from each other.

Students say 

cafe service inadequate

By Martin J. Fusio
Education Editor

Cafeterias, whether they are in
schools, department stores or hospitals, appear to be unpopular
places. Complaints come fast and
thick. ABC-Gladieux, which became MSC’s food service in
June, replacing ARA Slater, is not immune to that criticism.

Commuter, dorm and off-campus
students feel the service is inadequate. It should be noted
that many students, when asked
about the food service, either
denied comment, acted
childishly or refused to give their
names. The following comments are by people who did give their
names.

“What service!” asked Maureen
Bergen, ’70. Bonnie Miller, ’71, complained of a repetition of
tomato sauce, and added that the
food comes hot. The quality of the food
“depends on what day you’re asking,” said Dawn Sova, ’71. “On
Friday nights it’s terrible,” complained Mindy Mahoney, ’71. Miss Mahoney added that
“lunches are on the decline.”

The food “is good for a while, then
bad for a while. They’re not consistent,” claimed John Burke.
’70. Jan Domokos, ’72, said that
“It’s improving, but too slowly.”

The food is too greasy.” “The
cook seems to forget how to
season his corned beef,” said Richard
Bergen, ’70. Bonnie Miller, ’71, added,
“it’s too expensive.” “Me, too!”

A student commented, “I don’t know of anyone
on campus who could ruin Jello.”

Harry Trewin, ’71, complained of the
“lack of flavor.” Ray Michaux, ’72, described the
prices and the quality of food as
“disgusting.”

In view of this heavy criticism,
the cafe committee felt it necessary to
summarize all the complaints to
date. The most common complaints
were:

- The price of snack bar 
  food, and how to avoid being ripped
  off. “The price of snack bar food,
  according to Cripps. ‘72, is too expensive,”
  said Mike

Lieberman, ’69. However, Lieberman added that the regular
night meals are “very good.”

- “Terrible service and over-priced,” claimed Mike
  Dimaulo, ’69. “Prices are too much for what we get,”
  stated Stan Grajewski, ’71. Wayne
  Trettauer, ’71, and I can’t see
  waiting in line for such
  standards.”

- “The food is too greasy.” “The
  cook seems to forget how to
  season his corned beef,” said Richard
  Bergen, ’70. Bonnie Miller, ’71, added,
  “it’s too expensive.” “Me, too!”

The committee in December have been
meeting to discuss the complaints
filed by the food committee.

The next meeting will take place
on Monday, March 25th, at
2:00 p.m. in Life Hall.

An outgrowth of the International Relations Club, the
Council of International and
National Affairs was formed in
December, 1968. As an a
n
in associative organization for

the college community. Besides
its library, maintained by Ann
Sheriffs serves as SGA
affair coordinator of the International
Living program.

A minor party
minor party seeking entrance
to the college are the cause of a
committee headed by Gary
Pazienza. Bob Stickel is in charge of
public relations and Jim
Sheriffs serves as SGA
representative.

A little known aspect of
CINA is its library, maintained by Ann
Wronka. The CINA office, located
in Memorial Auditorium lobby,
boasts books "from every political
and economic spectrum,"
according to Cripps.

A social science major, Cripps
is the first chairman of the
council, having taken office last
February. Other members of the
executive council are Ruth
Goldstein, vice-chairman; Bonnie
Miller, executive secretary; and
Barbara Michalk, treasurer. Dr.
Philip Cohen, chairman of the
social science department, is
county adviser.

Seymour Rothman has been
at MSC for a year and a half, and
has served with Slater before coming
to ABC. He stated that
ABC’s food service has been
having some very hard to satisfy
the students as much as possible.”

To fulfill his promise that
ABC employs 103 students and company
personnel at Montclair, ABC
awarded its contract after
submitting the lowest bid at
Trenton. This is standard
procedure for New Jersey state
contracts.

In answer to the student
complaint of poor weekend food,
Rothman pointed out that every
Saturday the main entree is either
a roast or a beef or
steak. “Bread or
stufford beef or
cream cheese,”

In addition, there is a
student can have as much as he
wishes. On weekdays students
can go back for seconds on both
ten.

Another student complaint was
that there is not enough milk at
lunch time. Rothman has been
trying to get more milk machines
and has a student employee available solely for the purpose
of filling the machines.

The price of snack bar
sandwiches has gone up since
last year. The price of sandwich
includes labor, profit for ABC,
and the percentage the college
gets on all cash sales. Rothman
mentioned that sandwiches are
more expensive on the outside.

Rothman pointed out that
each Wednesday, a meatless day for
Catholics, resulted in two entrees
of fish in one week. There are
both fish and meat dishes on
Fridays.

Rothman feels that in the past
six months many causes of
complaints have been eliminated.
There is now a blue plate
special in TUB. A menu sign has
been posted in Life Hall. More
silverware has been purchased,
and Saturday breakfast now opens
on time.

Rothman has been unable to
solve as yet that student campus
pour syrup on their breakfast foods.

The food service has had a
number of problems, but they are
all.

Upcoming is a group, chaired by
Barbara J. Cima, the
Deputy in International
Living.

Minor parties seeking entrance
to the college are the cause of a
committee headed by Gary
Pazienza. Bob Stickel is in charge of
public relations and Jim
Sheriffs serves as SGA
representative.
Factors are many but status quo remains

By Fred Buchholz

The admission process is really a selection based on several factors which include: (1) the recommendation from the previous school; (2) the recommendation from the previous school; (3) the individual's potential contribution to the college; (4) The degree of certainty of the individual's completing the entire four years.

Mr. Alan Buchholz, director of admissions, supervises the decision making process which so completely controls the future education of thousands of young men and women. In order to justify his position and the college's admission policy, he seeks to know the complete individual perspective of each applicant.

One of the long standing policies of the admissions office is to give "special consideration" in the admission of students who are the offspring of such Negroes, veterans, foreign students or students of foreign background in the lower middle class. Project TRY (Talent Research for Youth), as one example, was initiated under the direction of Dr. George King, the former director of admissions, as an attempt to account for the disadvantaged individual.

One other "special consideration" group, which has recently materialized as MSC's new major requirement, is the college football coach. Dr. Beckwith, university president, intends to improve the football team by recruiting the better players directly from high school. Buchholz, although assured that, "Andersen does not have the power to accept any student. The athletic applicant must go through the same screening procedures as other applicants, and he will not be given any more "special consideration" than that which is given to the other applicants in this category." He further assured us that no matter how much "special consideration" is given to an individual, "all applicants are qualified.

The screening procedure for all applicants consists of "every application being read and evaluated by at least two people. We have tried mechanical selection but found that machines cannot be programmed to make the final decision. This must be made by a human being." According to Buchholz, a machine cannot analyze and interpret, "It can only compare mathematical scores, and our decisions are based on much more than just scores.

Mrs. Mary Wilkins, an assistant director of admissions in charge of transfer admissions, agrees that the screening procedure is what a student has done, not what he can discuss any subject.

An alumni of MSC, class of 1942, Beckwith enjoys the close-knit structure of the college. A former full-time member of the faculty of Columbia University, where he received his A. M. and Ph. D., degrees, he still teaches there during the summer months for "a change of pace.

He feels that MSC was always a "good, solid school" which now shows signs of great potential, equal if not superior to English major expansion. In the sciences, the college has an equal number of students in all the major fields.

Beckwith, with the help of the English major, is currently teaching English literature within its time period and in relation to arts and sciences.

One project he is currently involved in is the removal of the required freshman course in world civilization. He would like to replace it with a history program for majors designed to "make English majors as excited about history as historians.” This insight, he feels, would make future courses more interesting and not merely a "rehash" of high school subjects. His enthusiasm stems from his philosophy that "History is not merely information – it's what you do with the information that counts."

He has done quite a bit with his own. In addition to spending two years in Holland on a Fulbright Grant, Beckwith involves himself with educational projects in Africa. While teaching at the University of East Africa, he supervised American and British secondary school teachers in that area and was so successful that it was later taken over by the Peace Corps.

He has also been a member of a committee which selects 200 competitive students for the Operation Crossroads Africa project. Peace Corps training programs at Columbia and Lincoln University in Pennsylvania also occupy his time. The nature of his work has been to work with one of his colleagues to do his "people picker.”

Gawley_bullet_point: He has definitely communicated his enthusiasm to his oldest son, who is involved in "American studies at the University of Jacksonville, Florida."

On those rare occasions when he is not communicating with people, Dr. Beckwith communes with nature via fishing and gardening. But people and their history are his first loves.

Professor Irwin H. Gawley, Ed. D., chairman of the chemistry department, and listed in the Student Directory, is the "A" on the wall of the chemistry department. He is not the least bit sensitive. In fact, one of his most prized possessions is an over-sized gag bow-tie which he keeps on the coat rack in his office. A gift from student admirers, it lists many of the professors who have made the department famous.

Another is a personalized lab coat which occupies a place of honor on the coat rack in his office. A gift from student admirers, it lists many of the professors who have made the department famous.

A recent change in the admission procedure was explained by Buchholz. "Until this year, we have been working under the system which is called the "precipice method, which involves a kind of "cliff hanging" technique whereby we wait until the week of March 15 to send out all the notices of acceptance and denial. Our present method is that of "rolling admission" whereby we inform the applicant of his status as soon as our decision has been made. As soon as the freshman "roll" is completed, we will start on the transfer applications."
Two of the many "Faces." 

The Lion In Winter 

There is such a thing as "too much of a good thing." Today with the likes of "Theresa and Isabelle" and "The Fox," we have too much on the one-time delicate subject of feminism and homosexuality. But all of this leads to this film, a remake of Broadway's black comedy and a must for viewers.

The Good and Bad of '68

And now, here are some of the best recordings:

1968 will go down as the year of the album. Since Sgt. Pepper and 1967, a long playing record has been made a work of art. Some of the better ones this year are:

- Cheap Thrills — by Big Brother and the Holding Company featuring the big sexy voice of Janis Joplin, this year's greatest new voice.
- The Beatles — the group from England sold over four million of this album which features everything — swing, folk, classical and down-to-earth rock.
- Boppin' Banquet — in this year of the cover photo battle, the Rolling Stones featured this album of blues and acid rock.
- Waiting For The Sun — the West Coast Doves, with Jim Morrison, gave their very best with this one, hosting the "Celebration of the Beard.
- Shine On brightly — the Poco Harum returned with an excellent presentation of blues and jazz, synthesized with rock.
- Petulia — Judy Collins had her first hit single with "Both Sides Now," featured on this, her fifth best-selling album.
- Wildflowers — Judy Collins had her first hit single with "Both Sides Now," featured on this, her fifth best-selling album.
- Blood, Sweat and Tears — presented the all new "big band sound," first with Al Kooper on the album, Child is Father to the Man, but now with this album, a fine presentation of blues and jazz, synthesized with rock.

HONORABLE MENTIONS: 

- Electric Ladyland with Jimi Hendrix Experience; Love Is . . . by Eric Burdon and the Animals; Rotaly Connection; In a gadda da vida by Iron Butterfly; Renaissance by Vanilla Fudge and Steppenwolf II; PLUS:

The many albums of Glen Campbell, the Temptations and the 1910 Fruit-Gum Company deserve something, we just can't figure out what.
College Papers Face Censorship Charges

The use of four-letter words in campus publications, and a strong reaction against them, seem to be growing at colleges and universities. This fall, more than 100 college newspapers have been or are in the process of being censored. At Purdue University, William R. Smoot II, editor of The Purdue Exponent, was dismissed after the newspaper published a poem that referred to the use of four-letter words.

SQA Investigates Montclair

The SQA investigated the use of four-letter words in the Montclair State College newspaper, The Daily Cardinal. The investigation was prompted by complaints from a number of faculty members, who were concerned about the use of such language in student publications.

SGA Investigates Montclair

The SQA investigated the use of four-letter words in the Montclair State College newspaper, The Daily Cardinal. The investigation was prompted by complaints from a number of faculty members, who were concerned about the use of such language in student publications.

The SQA assumes much power in campus affairs, but it does not utilize this power to its greatest extent. We fool ourselves if we believe that the SQA uses its power to take action on important issues such as the parking situation, the cut policy, etc. The processes are slow only because the SQA committees make them slow; the SQA resists itself to procrastinating committees. The individual committees must be coordinated to make hardworking, aggressive students so that action is not delayed.

Russell M. Layne

Traynor on Autonomy

The food service, dormitory increases, curricular changes, construction, and positions for faculty members are just a few of the decisions that are made in a manner that affect our campus and our lives as students. These decisions are made with few if any students interested in their outcome, and future decision-makers should voice their opinion.

We are very fortunate at our college to have an administration and faculty who are willing to listen to student wants and needs. This rapport among the three groups is vital in creating a new and progressive school that will represent the creative growth, both social and academic of the entire community.

At present, our hands are tied. We, as members of a growing and progressive intellectual community have the qualifications to make the decisions that affect our growth, but we do not have the power. This power is local autonomy. Without the power of local autonomy, we cannot implement the necessary changes that give us the individuality and the freedom we need to grow.

Students, faculty, and the administration must band together in a mutual goal to obtain local autonomy. Without the power to make decisions, the excellent channels of decision-making between student, faculty, and the administration that we have created and will strengthen in the future are wasted. We are forced to fight the OK from that far-off land, Trenton. Set us free.

Kenneth Traynor

Dissenting View

It seems that every year the election of the president of the SQA centers upon congeniality, popularity, etc., rather than clear-cut issues. But there are some important issues to be addressed. We believe that the character of the SQA should not be changed so that the SQA assumes the role of a bargaining agent for the students of this campus.

We think that the SQA should become a forum for the presentation of dynamic ideas in the academic, social, and cultural areas of the life of this campus, with the emphasis on the academic areas. It is imperative that peaceful, the cut policy, independent study, student review of faculty and student participation in curriculum decisions be discussed thoroughly in the legislature and in the committees of the SQA.

Further, since this institution plans to evolve into a multi-purpose university, student leadership must be headed by someone with the sufficient imagination, energy and ability to ensure adequate student participation in this college's planning processes.

This year the students of this campus are offered the choice of R. Smoot II, editor of The Purdue Daily Cardinal, or Kenneth Traynor, for the office of SQA President. We support Layne because he makes us reflect on the inability of SQA to meet the demands of this institution.

Layne has been an enthusiastic participant in the extracurricular life of this campus. He has worked as a broadcaster for our radio station, WVMS. He has written for both the Montclairian and the Daily Cardinal, and he is an active participant in the organization and administration of student activities.

The students' choice for SQA President should be carefully weighed with the future of MSC as an institution of higher learning always a paramount consideration. We wish the students of this campus to consider our evaluation as one of many diverse possible opinions. What is essential in this election is that you, the student, choose. Both candidates are worthy of your serious consideration. Cast your vote! -

Virginia M. Saunders, ""The Dowsbodkin,"" news editor; Richard L. Sandmich, typewriter editor; Mory Antebi, picture editor; Anne Wang, makeup editor; Curt DeGroot, Maurice Moran, drama and arts editor; Roberta Kass, assistant business manager.
Students and Administrators Decide Residence Guidelines

By Joanna Schneider
Staff Reporter

Guidelines for determining acceptance to the residence halls for the academic year 1969-70 have been announced. Commuting distance has been a major factor in the assignment of freshmen and priority has been given to New Jersey residents. Students and administrators met to suggest the framework within which housing officials will operate to determine who will live in the residence halls.

Freshmen students will make up 35 to 45 per cent of the residence hall population. Sophomores will be given 25 to 35 per cent of the space in the residence halls. Upperclassmen (juniors and seniors) will occupy 30 to 40 per cent of the rooms in the residence halls.

Upperclassmen will be provided with two-person rooms by the residence halls committee in order to continue the tradition of the dormitories. These rooms are provided exclusively for men or women.

Assignments will be given to transfer and readmitted students in their first semester if their acceptance to the college comes before housing assignments are made. Assignments will be made in keeping with the allotments for each class. Transfer and readmitted students accepted after assignments are made are entitled to the same "wait list" considerations as non-transfer students.

Special Consideration

The Housing Policy Committee recommends that special consideration for assignments be given to students participating in college-sponsored programs (such as TRY and SPURT) even though they may be committed to the residence halls by virtue of their pursuit of academic or personal need. Assignments will be granted "early admission" priority for freshmen who will live in the counties of Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Hunterdon, Mercer, Monmouth, Ocean, Salem, Sussex or Warren. Space in the residence halls cannot be guaranteed to freshmen from the other remaining counties. Dormitory Council members, resident assistants and desk assistants are given priority for readmission to the residence hall.

Assignments and/or distance of the student's home will be taken into consideration when housing arrangements are made for sophomores, juniors and seniors and transfers.

Changes of address during the school year should be reported to the Housing Office as soon as they occur. Women students who are married, seniors or over 21 years of age may live in apartments with private entrances. Other women with the written consent of their parents, may live in apartments with private entrances.

The college recommends that all rental accommodations in any one unit except apartment buildings be rented exclusively either to men or to women.

Women students living off-campus are encouraged to remain in one residence throughout the year in exceptional cases due to physical or personal need. The college observes the New Jersey law against discrimination by cooperating to protect all persons in their civil rights.

The college recommends that all requests for readmission due to personal need be reviewed by the college in cooperation with the coordinator of parking.

Gillespie and that Jimmy Owens, Chris White, who plays the drum and piano. The fact that White once played with Dizzy Gillespie and that Jimmy Owens, trumpet and flugel horn, plays extended individual improvisation of chord progressions and type are rather intricate variations which gives each soloist more time to "swing out." As other kinds of jazz, a pronounced rhythm provided for by piano, bass and drums is an essential part that furnishes a background for the soloing sax and trumpet.

Spontaneous vocal reactions by the band members is another element found in various jazz bands. Musicians who play in the progressive manner are Sonny Rollins, Miles Davis, and John Coltrane during the mid-50's period of their development.
Bowen and Company Eliminated in First Round

By Ken Tecza
Asst. Sports Editor

EVANSTON, ILL—The dreams of a national title abruptly ended as the Indians of Montclair State dropped a 97-76 decision to the Southwest Missouri State Bears in the first round of the National Collegiate Athletic Association Division Tournament here, last week.

During the pre-game warmups, a major catastrophe was narrowly averted when the 900 pound Roberts Municipal Stadium scoreboard crashed down from the girders above to the center circle of the court below.

The defeat also stopped Montclair’s consecutive winning streak at 14 games. In spite of this, the Indians closed out their most successful season in their 41 year history on the hard courts, finishing with a 24-3 record.

The first half told the story of the game as the locals managed only eight field goals in 25 attempts for a 32.0 percentage.

The tall and talented Bears jumped off to a quick start behind by Chuck Williams and Curtis Perry. Bobby Sienkewicz hit on a jumper to put the score at 4-2. At this point the Bears hit for 10 straight points with Perry and Williams garnering four each in the spree.

Rebounding told the story for the smaller Indians. The superior board strength of 6-7 forwards Curtis Perry and Mert Bankroft proved too powerful for the MSC contingent.

Sienkewicz found the range on two straight jumpers to come within eight points, 14-6. The streaking Bears put together a 10-point lead, 30-20, on the strength of fast shooting. Mert Bankroft chipped in with 12 points in each half to lead the Missourians with 24 markers. The Bears scored eight point burst with 2:50 left in the first half put the Bears up, 38-20.

Coming out for the second half the Bears put the first six points on the scoreboard here (actually in the scorebook in absence of a scoreboard) to take a 22 point 46-24 lead.

The Indians stayed with the Bears in the second half as both clubs hit for 52 points. But the board strength, 68-49 rebounds, told much of the story. Luther Bowen who led the Indians with 22 points played a fine game in bowing out as an Indian cage performer.

Final statistics showed Southwest Missouri hitting on 40 field goals in 83 attempts for a .482 percentage while Montana shot only 29 of 71.

At the charity line they were a bit better in hitting 18 of 31 compared with 12 of 31 for the Bears.

Southwest Missouri beat NIT bound Southern Illinois twice during the season en route to its fourth appearance in this NCAA College Division tournament.

In finishing out a brilliant career, captain Luther Bowen tallied 1,858 points in four seasons on the varsity. Bob Lester who had already past the 1,000 mark in rebounds missed that same amount in scoring by nine points finishing up with 991.

When asked about his teams performance against Montclair coach Bill Thomas said, “We were really happy with the win but we were sorely and had some bad streaks.” Coach Ollie Gelston in

Frosted with his own teams effort by not giving up felt Missouri was “a fine basketball team and the toughest physically of any club we played.”

A number of NBA scouts were here to watch for some future prospects. Among them Dick McGuire of the Knicks, Hank Aiken of Seattle and K.C. Jones of the Boston Celtics.

A large number of Montclair fans drove in for the contest travelling some 20 hours by car. Altogether about 150 made the cross-country journey.

The game was broadcast back to Montclair by WVMS, the school station, with Al Friedman handling the play-by-play back to the Montclair contingent was really impressed with both the facilities and the fine treatment by the city of Evanston and the tourney directors.

Local writers were amazed at

The tourney was held in Roberts Municipal Stadium which seats 13,000 and plays host to the Evanston University squad along with the state high school tourneys. Ideal for basketball, the Montclair contingent was really impressed with both the facilities and the fine treatment by the city of Evanston and the tourney directors.

Well written stories were at

Are you out for contact sports?

Contact lenses were designed to a convenience. And they are up to a point. They are convenient enough to wear once you get used to them, but, until recently, you had to use two or more different lens solutions to properly prepare and maintain contacts. You needed two or three different bottles, lens cases, and you went through more than enough daily rituals to make even the most steadfast individuals consider dropping out.

But now caring for your contacts can be as convenient as wearing them. Now there’s Lensine from the makers of Murine. Lensine is an “isotonic” solution. That means it’s just like your eye natural fluids. So a simple drop or two into your eyes, morning, noon and night, will keep your vision. Bacteria cannot grow in Lensine. Lensine makes your lens pre-
Gymnasts Win North Atlantic Conference Championships

By John Aneson
Sports Editor

One of the top college division gymnasts in the East, Rick Schwartz, led Montclair State College's gymnastic squad to the team title in the North Atlantic Conference championship meet held at Panzer Gym last Saturday.

MSC accounted for 137.66 points followed by West Chester State (Pa.) with 132.15, Long Island University (N.Y.) with 122.29 and the U.S. Coast Guard Academy with 112.58. Cortland State (N.Y.) entered in only three events while Queens College failed to compete.

Schwartz took first place in the long horse, floor exercise and the parallel bars. He also placed third in the high bar.

Dave Green took a first in the high bar, a second in the long horse and a fourth in floor exercise. A surprise performer, Nets Poling, fifth on the still rings; Spencer, third on the p-bars; Ron Guenther took eight firsts and Jensen managed a second in the parallel bars and a second in the high bar.

The ringmaster, Jon Guenther, placed second in his specialty. Guenther took eight firsts and four seconds in the 12 dual-meets this year.

Others who placed were Russ Spencer, third on the p-bars; Ron Poling, fifth on the still rings; Ralph Cucia, sixth on the rings; and Roger Brown, sixth in floor exercise.

Spring Concert

By Mike Galos

Montclair State College. Although plagued by painful injuries in the last two years, Green has developed into one of the top small college gymnasts in the East. A graduate of Snyder High School in Jersey City, the 6-2, 160 pound junior has competed in the all around for the Indians.

Green's development in the still rings and parallel bars, has been slowed by injuries. A

Women Gymnasts

Fall to Nassau

By Gail Christyline

MSC's Women Gymnastics Team participated in a Quadrangular Gymnastics Meet with Nassau Community College, Suffolk College and Hofstra University. The peak of the competition was between MSC and Nassau with Nassau nipping MSC, 52.90 to 51.84.

Linda Monaco swept first places in floor exercise and on the balance beam, and took a third place on the uneven bars. Pauline Schokel captured third place on the balance beam and vaulting. Joann Coleman took a third in the floor exercise. All three girls received medals for their outstanding performances.

Along with Coach Virginia Crouseman, others who supported the team were Sharon Towey, Jane Cowell, Pat Rossetti, Lyn Cross, Margaret Boland, Bev Price, Mary De Frank, Gay Petermann, Donna Ezzi and Gail Chrysaline.

A Portrait of Dedication

And Drive in a Champion

By Mike Galos

Special to the Montclarion

In athletics, injuries often prove the downfall of many promising individuals. This is especially true in the sport of gymnastics where athletes have developed a fear of a piece of equipment or of an event and have quit the sport entirely because of it.

One man who isn't so bothered by injuries is Dave Green of Montclair State College. Although plagued by painful injuries in the last two years, Green has developed into one of the top small college gymnasts in the East. A graduate of Snyder High School in Jersey City, the 6-2, 160 pound junior has competed in the all around for the Indians.
