In two days the MSC student body will elect the four people who will be responsible for running our Student Government Association for 1969-1970. Although the executive officers and their legislature will not officially take office until July 1, for the next four months the newly elected officers will be working very closely with the present SGA administration to become familiar with the workings of MSC government.

Presently the candidates are offering their suggestions for the coming year. Both candidates have stressed an "academic" campaign. While they present their platforms to the student body, the MONTCLAIRON would like to give its proposals for next year.

The MONTCLAIRON believes that the SGA should delve into academic and social areas relevant to the student body that have never been touched or fully expanded before. These areas would include:

**Evening SGA meetings:** SGA legislature meetings should be held in the evening to avoid conflicting with classes and dinner hours. More students could then observe the SGA including evening undergraduates.

**Student participation in campus coordination:** The expansion of Montclair State College to Montclair State University involves the addition of departments and the grouping of these departments into schools. Student organization as now found in the form of one student government association will undoubtedly prove fatal for coordinating a campus which is enlarging both physically and in the number of students it serves. New forms of student groupings, eliminating the need for the class structure, will have to be developed.

**Expanded student involvement in curriculum change:** In developing new schools for Montclair State University, new courses will have to be developed and many old ones will have to be discarded or revised. The SGA should plan communication sessions to involve faculty, students and administration for this purpose.

**Expanded foreign travel:** The proposal by Joseph Kloza, graduate assistant, for an expanded Bureau of Field Studies for maintaining information on foreign travel should be further enlarged. One central student organization should be set up to coordinate all MSC foreign travel programs, including the Experiment in International Living and semester studies abroad. Increased opportunities should be made available for MSC students to partake in studying outside the United States.

**Finally as a representative group of students, the SGA should begin taking firm stands for and against policies of both the college administration and state of New Jersey decisions regarding higher education and specifically those decisions affecting the state colleges.**

The MONTCLAIRON hopes the candidates for SGA president are fully aware of the new directions upon which college students are embarking. To channel this surge of student power, the 1969-1970 SGA president will be faced with many more problems than previous administrations have faced.

Both candidates have stated their platforms. Both show strengths and weaknesses and for this reason neither stands out as a candidate that the MONTCLAIRON would like to endorse.

Therefore, judgment will be withheld until the new president is elected and the 1969-1970 SGA administration proves or disproves itself.

Regarding the executive positions of vice-president and secretary there is not much to say. For treasurer the MONTCLAIRON supports Dawn Sova, Marlene Manela and Anita Hutton, math, French and English majors respectively. Joanne Hodde runs uncontested in her bid for secretary.

Newly elected candidates will work closely with the present SGA officers in the next four months to become better acquainted with SGA procedures. They will be sworn in on July 4 and will preside for the following year.

**Evansville Action**

Luther Bowen hooks for two in last Wednesday's action against Southwest Missouri State in the NCAA small college division quarter finals held in Evansville, Indiana.

Southwest Missouri later lost to Kentucky Wesleyan in the finals.
Art Students and Faculty Meet
To Prevent Faculty Dismissal

By Ronald Weaver
Specialization necessary

Suggesting the possibility of having the painting teachers "fill in" these openings only raised more problems. Mr. Brian Watkins, a fine arts professor, stated that the new school of fine and performing arts requires more specialization on a higher level.

Failure to renew one-year teaching contracts of new faculty members is not peculiar to only the fine arts department. Other departments have had faculty cutbacks also.

The QUARTERLY staff hopes that the poetry reading will stimulate literary interest and promote the atmosphere of the literary community which they feel has died at Montclair State. The reading will illustrate some of the aspects of the QUARTERLY's literary workshops.

These workshops, which are held at night, provide a place for students to present and discuss their work in any area of the fine and performing arts. The QUARTERLY poetry reading will be held on Thurs., March 20 at 7:30 p.m. in the fine arts building auditorium, room L-135.

Your Psychology professor lives with his mother?

Art Students and Faculty Meet
To Prevent Faculty Dismissal

By Richard Lupo
Staff Reporter

Three professors in the fine arts department have been informed that they will not be renewed for the next fall due to contract termination. The professors involved are: Mr. Ronald Weaver, Mr. Jeff O'Connell and Miss Ruth Cohn, all painting instructors.

A meeting reacting to the cut-back was held between some 60 fine arts students and the faculty. The main issue was what could be done to prevent the three professors' contract termination.

The crucial problem has been the department's need to release people which they did not want to do.

Weaver commented on some extent on his feelings about the situation. He remarked, "It appears that the art department in total, charted on our campus, has faced incredible hardships for many years to accommodate state machinery which has little conception of the environment necessary for the training of fine art majors."

Weaver expressed that much of the art is patronized by a less than enthusiastic state machine which holds the belief that art equal equals hobby. Far from a hobby, art will always survive because the human spirit in the arts cannot be stilled.

Weaver continued by saying, "Basiclly, the art department is moving into a more intensive involvement in particular areas, with opportunity for both the generalist and specialist to consult."

Weaver feels "optimistic" towards the school of fine arts, but is discouraged that he will not be able to meet with his students where there is a mutual regard and interest.

Faculty administrators noted that teaching vacancies will exist next semester in the areas of theatre arts and art history. It was decided that there was less of a need for painting instruction, and a "more urgent demand for specialists" which can fill the two vacancies.

Weaver also called upon the trustees and administrators of the several public institutions in New Jersey to re-examine their current regulations and practices, that certain principles are being adhered to.

These principles include free expression and a reasonable expectation that such expression can result in effective action, where action is justified and within the power of the institution.

Booher also stresses that every public college should have a joint student-faculty administration forum to discuss and resolve any questions or grievances. There should be regular meetings of such a group and provision should be made for special meetings when the occasion may require.

The procedures of such a group should provide for full argument and airing of the issues and for presentation of unresolved issues, if necessary, to the governing board of the institution.

Since attendance at a public institution of higher education in New Jersey is voluntary, Booher feels certain obligations of behavior are not expected of students. University and college regulations should clearly state the standards of conduct and behavior which are properly expected.

College regulations should be explicit that infractions of conduct will involve discipline including suspension, expulsion or the application of civil remedies as appropriate. Specifically, Booher said, "College regulations should forbid any actions or activities designed to or having the effect of interrupting the normal activity of the institution, including the occupation of buildings, obstruction of traffic or any act of trespass or vandalism."

But Booher reiterated that the presence of persons not associated with the college or university should be welcome if such persons comply with college or university regulations.

Booher concluded his memorandum by stating, "I am convinced that if the colleges and universities of this state are to make available real opportunity to all citizens, including those who have the misfortune of poor academic preparation, we must stand ready to modify where necessary our traditional way of doing things..."

"It is not the prime function of the Board of Higher Education to initiate, or to plan in detail, program, curricula or other functions which belong to the faculties and administrations of our colleges. However, I do think that we have a responsibility to suggest that the colleges and universities examine their own thinking and redirect some of their resources according to social as well as academic priorities.
All-State College Committee Formed; Dorm Rent Rise Alternative Studied

By George Gonos

A bill to increase the dormitory rent at state colleges has been passed by the New Jersey State Board of Higher Education, but it is subject to an investigation by a student committee. The bill also included the approval of new dormitories to be built at Montclair and Trenton State. For this reason rent hikes might be applicable at these two schools only.

A committee consisting of representatives from the six New Jersey state colleges is now studying alternatives to the plan that would raise dormitory rent $2.00 a year. Representing Montclair State are Jesse Young and Mike Hogan, both residents of Webster Hall. The committee members have made their complaints known to legislators and the Joint Appropriations Committee in Trenton. The students believe that a $200 increase is too much. They do not see the raise as benefiting the dormitories. Rather, they feel that the funds will be general. The state's negligence, they say, is the reason for the sudden need.

One of the suggested alternatives of the committee reflects a system now in practice in the New York state colleges. There, the students' rent only pays for the actual residential part of the dorm. The lounges and hallways are subsidized by the state. The committee also suggests that the state handle the cost of operation and maintenance.

The state might also make more money available to students. The committee has noted that interest on loans has risen. MSC representative Mike Hogan said that "The increase apparently is needed to build dorms but the cost of building them shouldn't be presented for the students to absorb. The state is putting more financial responsibility on the already strained pockets of the students."

He feels that so far the State College Coalition has been rather effective but "we're playing a waiting game." Already several committees and individuals have cancelled meetings with the Coalition.
Four Year ‘Phase Out’

The Montclair State College Board of Trustees and administration have decided to phase out College High School over a four-year period. Various proposals for effective phasing out procedures were submitted to the college administration by a parents committee. After closed-door consultations, the current policy was reached.

The present eighth, ninth, 10th and 11th graders will be allowed to complete four years more allowing for the last College High graduation to take place in 1973.

The present seventh graders will return to hometown schools for their remaining five years. The decision to have the seventh graders leave College High at the end of this year was based on curriculum offerings and requirements of the local high schools as well as the desire of the college to regain the classroom space. Adjusting to new school surroundings was also considered.

The MSC Board of Trustees has made what seems to be a more than fair decision since Paterson and Jersey City state colleges will close their demonstration schools in June. It appears that the MSC policy has taken the needs of both the College High students and the college into consideration in the development of the four-year phase out program.

Open-Door Admissions

The recent demands by black students to alter admissions policies at Rutgers University were met by President Maxon Gross and other Rutgers officials. Demands by militants several weeks ago had called for Negro students to be admitted to the University with a high school diploma only.

The Rutgers administration accepted this demand: however, the university's faculty voted against this policy. To keep peace in the college community an "open door" policy was formed.

Rutgers officials, however, recognize that the job of accepting many additional students cannot be accomplished by one school alone. Community and state colleges will have to absorb some of the burden.

Ralph Dungan, chancellor of higher education, has assured the Rutgers administration that the other state colleges will adopt similar admissions policies.

Dungan feels that state and county colleges should be giving the highest priority to urban and rural disadvantaged students regarding admission procedures.

In a recent Star Ledger article it was noted that Dungan had sent a memorandum to the state and county colleges requesting them to break "with the traditional ways of doing things," specifically regarding admissions and curriculum development.

A partial way for the state colleges to fulfill the wishes of Dungan regarding the admissions of disadvantaged students is through the power of local autonomy. Through localized financial control, the individual colleges can channel funds into projects affecting the disadvantaged student.

Although admissions policies will definitely be lowered by accepting less qualified students into the college intellectual community, the colleges must retain the high quality of education they now deliver.

The answer to educating the inner-city student is not by admitting him with only a high school diploma. That ought to fix Neiman and his "mod businessmen."
There is a definite and strong desire on the part of several department chairmen to have the students of MSC represented in the administrative functions of the department. In the words of Dr. Harold C. Bohn, "I am of opinion that the student observes and realizes the concern of the professors in regard to academic and business affairs of the department. This concern is not limited to the department, but also takes into its scope the entire college. I think that the English department has responsible and reliable student representation, which has worked well with the faculty in our department." General agreement was found in Dr. Katherine Hall, chairman of the home economics department, "I am very much in favor of student representatives being elected by the student body. Not only would the "students gain a great deal of knowledge in the administrative processes of the department, but they would also, as elected representatives, gain self-confidence and a sense of responsibility."

The Department of Physical and Earth Sciences represented its views through Dr. Stephen W. Kowalski. "There is no question about it. It would be most beneficial for students and faculty to have student representatives in the department. It would give the students contact with decision making and would serve as a sounding board liaison for the faculty and administration. We do not have any departmental representatives as yet. But we do have an open-door policy and science major representatives in the SGA."

In agreement with these views are those of Mr. Karl R. Moll of the speech department. "We have no student departmental representatives at present, nor have we any plans for such a move, mainly because there has been no desire expressed by the students for such representation. But, we do have a Student Advisory Council, which meets weekly with the department head, serving an identical purpose." Moll further explained that he felt it definitely beneficial to faculty and students to have some form of student representation. Not only does this policy benefit the student in gaining valuable experience in the problems of being a professional educator, but also educates the educators. The professional barriers which often exist between student and teacher are broken in this atmosphere of communicating minds. No matter what the issue may be, the student's view of it is normally different from that of the teacher. Rational discussion will result in a consolidation of issues and opinions with both sides mutually absorbing knowledge and experience from each other.

**Computer mapping**

By Jane Conforth

"As far as I know, this is the only school in New Jersey doing computer mapping." So spoke Mr. Bertrand Boucher, MSC geography professor, in a recent interview.

Seated in his office amid hundreds of books on urban geography, land use and related subjects, Boucher was very enthusiastic about the computer mapping course which he teaches. The course was first offered this semester, and it is proving successful.

The system of computer mapping was developed at Northwestern University by H. T. Fisher. Within only two years ago, the system is not widespread, and only a relatively small number of institutions of higher learning offer a course in computer mapping. Besides Montclair, Northwestern, Michigan and Harvard are some of the institutions that have such a course.

Computer mapping uses circles, dots and dashes. The machine is able to display data in flat-tone and contour mapping. For both, the computer produces a bar graph.

Maps made by a computer can be extremely helpful to the police. They can use them to show crime areas. They can be used for zoning, school and voting districts, and anything else which can be put on a map. As Boucher said, "The computer is a stupid machine, but if you spell everything out to the nth degree, the computer's usefulness has no limits."

"A hand-drawn map is not as accurate as a computer map, and it can cost $200 or more to produce since a skilled cartographer must be hired. Once a computer is purchased, each map costs only $2. Also, the latter is much quicker — it takes only one minute to make a map."

Boucher said, "Most data is mapable. The computer can carry out many manipulations and it does it accurately. The students are getting training in accuracy and precision."

The MSC mapping course, based on Harvard's program, begins with training the student how to code maps. After they know the techniques, the class makes a map of the Bankers National Life Insurance Company in Clifton. Here, Mr. Anthony Boucher operates a computer which can print the students' maps.

After the class has one map printed, they begin individual and group research. While doing this, the class does not meet for about five weeks. During the time, Boucher meets with the students individually and helps them to put their research into computer language.

**Toward the end of the course, each student prints a map of his own on the computer. The maps can help the students in other subjects. For example, a business education major is doing a map on marketing research. Others are investigating rapid transit and employment services.**

One of Boucher's ideas is to make a data bank of information about New Jersey. This would include information on populations, age, race, education and other factors. The data be fed into a computer and could be used by people doing research.

---

**Lack of students on dept. groups**

Dr. Harold C. Bohn

"Department Administration could be shared with educators, but also educates the educators. The professional barriers which often exist between student and teacher are broken in this atmosphere of communicating minds. No matter what the issue may be, the student’s view of it is normally different from that of the teacher. Rational discussion will result in a consolidation of issues and opinions with both sides mutually absorbing knowledge and experience from each other."

Dr. Stephen Kowalski

"MSC is a world renowned school. This concept, as stated by Bohn, reads as follows: "Part of the professional service of a college is to educate people to assume responsibility. A university is a place for a meeting of minds, exchanging ideas, moving ahead. An efficient and cosmopolitan college, "should always be able to refine and reform to improve" its efficacy. As a 40-year professional educator, on the verge of retirement, Bohn feels that he has "learned more from students than books. . . . there is no teacher like teaching."

"How much will the students voice be worth? If the final decision is in the hands of department heads anyway, is the representatives’ purpose defeated? What justifies this limitation of the students’ power? In the words of Hall, "there are some decisions which cannot be made by students.” One of the requirements proposed by Hall is that "the students are to be present during the entire faculty meetings and have the complete picture of any problem before their decisions and opinions will be accepted.” Similar views are expressed by her fellow departmental chairmen. When the students' feelings are expressed in this manner, "the students deserve an answer and often are not accepted.”

But, he feels that "the student is transient and may not have the right or the power to make decisions of the nature of hiring and firing of faculty." Boucher feels that there are too many factors involved of which the transient student is not aware. Kowalski also believes that "the final decision will have to be by the administrative or departmental head because the student is naturally lacking in background, training and experience” to handle decisions on this level. It appears then that the student is important enough to be seen, heard and appreciated. But, he will always be the student that he is. It seems that he must first prove himself qualified as a sound and realistic individual, longer acting or thinking emotionally. Once the student meets these qualifications, his voice will be taken into consideration. Meanwhile at administrative headquarters, his curriculum is planned and set up to give him the gigantic freedom of choosing his electives from a limited offering.

Granted that many decisions must be left to the professional administrators; but when their decisions affect the student, it is only fair and just for the student to have authority in that decision. The composite MSc. student does not consist of an irrational or highly emotional nature; instead, he is of reasonable and sensible composition. The same, if not more so, holds true for the composite faculty member or department head or administrator. This is then the line of communication at MSC between student and faculty are suspended. This also is the reason for an organized and progressive college. When it is recognized that the student is a dynamic force, the advancement of the institution of learning and that the faculty are the conductors of this dynamic force, one then has a true university, upholding all the ideals of education."

Kowalski attributes the college's success to the fact that the students are involved in their college's affairs before the popularity of demonstrations and are presently just as involved if not more so." He also stated that the student seem to be content with the decision making body of the SGA. "On the whole,” concludes Kowalski, "the MSC students are a sensible group, composing an impressive student body and faculty, which is world renowned as a teachers college."
Students say "Caf" service inadequate

By Martin J. Fusio
Education Editor

Cafeterias, whether they are in schools, department stores or hospitals, appear to be unpopular places. Complaints come fast and thick. ABC-Gladiolus, which became MSC's food service in June, replacingARA Slater, is not immune to that criticism.

Commuter, dorm and off-campus students feel the service is inadequate. It should be noted that many students, when asked about the food service, either declined comment, acted childishly or refused to give their names. The following comments are by people who did give their names.

"What service?" asked Maureen Bergen, '70. Bonnie Miller, '71, complained of a repetition of tomato sauce, and added that the cook seems to forget how to cook. The quality of the food "depends on what day you're asking," said Dawn Sova, '71. "On Friday nights it's terrible," complained Mindy Mahony, '71. Miss Mahony added that "lunches are on the decline."

The food is "good for a while, then bad for a while. They're not consistent," claimed John Burke, '70. June Dominick, '72, said that "it's improving, but too slowly."

"The vegetable are meh," stated Linda Silberman, '71. "The ice cream is soft," claimed Dave Evans, '71, blaming this problem on a poor freezer. Richard Trewin, '71, complained of the absence of kosher food. Harry Walsh, '70, said there is too much starch. "The hamburgers and French fries are terrible," stated Ken Spon, '70. Campus food is "one of the reasons I moved off campus," commented Robert Brewer, '70. "Food either raw or too well done," said Ed Rausch, '70. "Then Kahl Othman, '70, said that "the students as much as we wish."

On weekdays students can go back for seconds on both
ABC AT WORK: A typical dinner.

ABC food committee, said there was student dissatisfaction with the food service at the beginning of the year. The reason for these "rumblings" was due to the attitude of the two food managers who preceded Rothman. Sullivan mentioned "insincerity" on the part of Bob Eddington and "lack of cooperation" on the part of Joe Maggio. The emergence of Rothman as new director of dining services was "received very warmly" by students because Rothman had always been cooperative.

Sullivan, according to Bernard, "believes in action rather than in words."

Sullivan pointed to the Washington Day special, in which everything was half price, as an example of Rothman's action.

Seymour Rothman, the new director of dining services, has been at MSC for a year and a half, having earned with Slater before coming to ABC. He stated that "ABC-Gladiolus has been trying very hard to satisfy the students as much as possible."

"To fulfill his commitment to 103 students and company personnel at Montclair, ABC was awarded its contract after submitting the lowest bid at Trenton's Standard procedure for New Jersey state contracts.

In answer to the student complaint of poor weekend food, Rothman pointed out that every Saturday the main entree is either a 10 oz. bone and steak, or stuffed breast of chicken or cornish hen. In addition, there is a secondary beef of which the student can have as much as he wishes. On weekdays students can go back for seconds on both entries.

Another student complaint was that there is not enough milk at meal times. Rothman has been trying to get more milk machines and has hired a student employee available solely for the purpose of filling the machines.

The price of snack bar sandwiches has not gone up since last year. The price of sandwich includes labor, profit for ABC and the percentage the college gets on all cash sales. Rothman mentioned that sandwiches are more expensive on the outside.

Rothman pointed out that Ash Wednesday, a meatless day for Catholics, resulted in two entrees of fish in one week. There are both fish and meat dishes on Friday.

Rothman feels that in the past six months many causes of complaints have been eliminated. There is now a blue plate special in TUB. A menu sign has been posted in Life Hall. More silverware has been purchased, and Saturday breakfast now opens on time.

"Institutional food is never liked by everyone," stated Lois Redd, coordinator of housing services and a member of the SGA food committee. Mrs. Redd said that the food service has had a "very difficult fall." These have been three managers at MSC since December 1 1967. As an organization, it sought to involve more people in personal responsibility, he feels, "If a committee doesn't do its job, it just doesn't get done."

This personal responsibility, he feels, "involves more people in decision-making."

Chartered and financed by the Student Government Association, CINA's main purpose is service to the college community. Besides bringing nationally and internationally well-known speakers to the campus, CINA sponsors student delegates to conventions and is an extension of the Experiment in International Living. CINA's program committee, headed by Violet Lawson, Patrick Sullivan, and Barbara Catoni and Jim Hoyt, deals with the Student Government Association.

"A little-known aspect of CINA is its library, maintained by Anne Wronka. The CINA office, located in Memorial Auditorium lobby, boasts books "from every political and economic spectrum," according to Cripps.

A social science major, Cripps is the first chairman of CINA, the council having taken office last February. Other members of the executive council are Ruth Goldstein, vice-chairman; Bonnie Miller, executive secretary; and Barbara Michalk, treasurer. Dr. Philip Cohen, chairman of the social science department, is faculty adviser.

ANC INVOLVES ALL in decision making

By Ellen Drobuck

ABC involved all in decision making

By Ellen Drobuck
Staff Reporter

An outgrowth of the International Relations Club, the Council of International and National Affairs was formed in December 1967. As an administrative service organization, it sought to eliminate the unwieldy bulk of general membership clubs.

Upon joining, every member is assigned to a committee. These groups are directly responsible for their own segment of the organization.

As Frank Cripps, chairman, put it, "If a committee doesn't do its job, it just doesn't get done."

This personal responsibility, he feels, "involves more people in decision-making."

Chartered and financed by the Student Government Association, CINA's main purpose is service to the college community. Admissions

Factors are many but status quo remains

By Fred Buchholz
Staff Reporter

The admission process is recommended selection based on several factors which include: (1) the certainty of the individual's school record; (2) A recommendation from the high school principal; (3) The degree of education of thousands of young men and women. In order to justify his position, the college's admission policy, he seeks to know the complete individual perspective of each applicant.

One of the long standing policies of the admission office is to give "special consideration" in the admission process to Negroes, women, foreign students or students of foreign background in the direction of Dr. George King, the former director of admissions, as an attempt to account for the disadvantaged individual.

One other "special consideration" group, which has been involved in is the removal of the required freshman course in world civilization. Beckwith feels that replacing it with a history program for majors designed to "make majors more interested in history". This insight, he feels, would make future courses more interesting and not merely a "rahrah" of high school subjects. His enthusiastic views stem from his philosophy that "History is not merely information - it's what you do with the information that counts."

He has done quite a bit with his own. In addition to spending two years in Holland on a Fulbright Grant, Beckwith involves himself with educational projects in Africa. While teaching at the University of East Africa, he supervised American and British secondary school teachers in that area and it was so successful that it was later taken over by the Peace Corps.

He has been a member of a committee which selects 200 foreign students for operation Crosslands Africa project. Peace Corps training programs at Columbia and Lincoln University in Pennsylvania also occupy his time. The nature of his work has been to deftly communicate his enthusiasm to the oldest son, who is involved in "American studies". Beckwith, a second son is a student at the University of Jacksonville, Florida. On those rare occasions when he is not communicating with people, Dr. Beckwith communes with nature via fishing and gardening. But people and their history are his first loves.

Professor Irwin H. Gawley, Ed. D., chairman of the chemistry department and listed in both Who's Who in American Education and American Men of Science, sees a place for both the educator and the scholar on the college campus and he considers a combination of the two ideal and necessary. At Montclair State, he feels that this "perfect balance" exists.

"The changing nature of the college," he maintains, "includes the trend toward subject matter emphasis," but should not take away from the educational training, but supplement it. A concentration must exist between the two, "In much the same way the introduction of liberal arts students has strengthened the background of the education major."

As a result of his own experience and that of his students, Gawley feels that a teacher is generally influenced most by those in his major field, rather than those he has instructed him in the methods of teaching. Having received his B. A. and M.A. degrees from M.S.C. Gawley is particularly interested in the expansion of the college. One of his short term goals for the chemistry department is additional lab space for individual experimentation. His individual program of study for the past six years has been "involved with analytical chemistry, which he has pursued at Cornell (Iowa) College. He currently teaches a sophomore course in this field, as well as a senior course in atomic structure and another in radioactive chemistry on the graduate level. He has done some work in the area of modern physical and chemical instruments at Union College on a fellowship from the General Electric Co.

Gawley formerly taught in West Africa and states, "He has deftly communicated his enthusiasm to the oldest son, who is involved in "American studies". Beckwith, a second son is a student at the University of Jacksonville. Florida. On those rare occasions when he is not communicating with people, Dr. Beckwith communes with nature via fishing and gardening. But people and their history are his first loves.

...
To the Editor:

affairs within the administration have formulated the crux of my concern in relation to SGA committees, I Richardson concerning student committees appointed by the administrative officials. Although both faculty members and students are members of these committees, as the majority of the college community, should exceed the number of faculty members, but in many cases, only one student can be found on certain committees as cited by the administrative officials themselves. I feel it is the responsibility of the SGA to correct this situation.

Richardson

Traynor on Autonomy

To the Editor:
The food service, dormitory services, and student government have been areas of concern. Although the committee members are aware of the problems, the administration has not been informed of the same.

SGA Investigates

The SGA Legislature called for an investigation of the MONTCLARION, the student newspaper at Montclair State College. The motion was introduced by Robert Stickle, English department faculty member, and seconded by Robert Travers. The investigation was due to a controversy regarding the publication of an article about the college newspaper -- The News -- which included the following statement: "The SGA has not been set and committee membership has been closed to open the doors to any member of the MONTCLARION community of MSC is offered the opportunity to participate in the SGA in a meaningful way."

Richardson

It seems that every year the election of the president of the SGA centers upon congeniality, popularity, etc., rather than clear-cut issues. But there is something wrong in this. We believe that the character of the SGA should be changed so that the SGA assumes the role of a bargaining agent for the students of this campus.

Richardson

We think that the SGA should become a forum for the presentation of dynamic ideas in the academic, social, and cultural areas of the life of this campus, with the emphasis on the academic areas. It is imperative that painful, the cut policy, independent study, student review of faculty and student participation in curriculum decisions be discussed thoroughly in the legislature and in the committees of the SGA.

Richardson

Further, since this institution plans to evolve into a multi-purpose university, student leadership must be headed by someone with the sufficient imagination, energy and ability to ensure adequate student participation in this college's planning processes.

Richardson

This year the student community of MSC is offered the choice of Robert Layne and Ken Traynor for the office of SGA President. We support Layne because his activities reflect the needs of MSC's future lead us to the conclusion that Layne can better serve the campus, a service his candidacy assures us he wishes to make. We know that Layne is not the hack of any particular organization.

Richardson

The students' choice for SGA President should be carefully weighed with the future of MSC as an institution of higher learning always a paramount consideration. We wish the students of this campus to consider our evaluation as one of many diverse possible opinions. What is essential in this election is that you, the student, choose. Both candidates are worthy of your serious consideration. Cast your vote!

Richardson

March 19, 1969

MONTCLARION – March 19, 1969

To the Editor:

Students, faculty and the administration must band together in a mutual goal to obtain local autonomy. Without the power to make decisions, the channels of decision-making between student, faculty and the administration that we have created and will strengthen in the future are wasted. We want an OK from that far-off land, Trenton. Set us free.

Richardson

It is the responsibility of the SGA to study the status of the campus newspaper -- The News -- which included the following controversy, including photographs of students.

Richardson

Associate Collegiate Press

The use of four-letter words in campus publications, and a strong reaction against them, seem to be growing at colleges and universities this fall. More than 10 earthy terms.

Richardson

Richardson

To the Editor:

The SGA assumes much power in campus affairs, but it does not utilize this power to its greatest extent. We fool ourselves if we believe that the SGA uses its power to take action on important issues such as the parking situation, the cut policy, etc. The processes are slow only because the SGA committees make them slow; the SGA resists itself to procrastinating committees. The individual committees must be coordinated by hardworking, aggressive students so that action is not delayed.

Richardson

Ms. Smoot and other senior students are members of these committees. After the incident, the regents asked the university administration to develop policies for the future in such cases. Later in the Michigan State University News reprinted parts of The Daily Colgate's letter to the editor. The senior staff members were threatened with salary cuts by the paper's faculty advisor, and a student-faculty judiciary committee was named to conduct hearings on the issue.

Richardson

If it were not for the newspaper, a poem that referred to perversions, and a column in the Ann Arbor (Mich.) Daily, it is possible that the situation might have been ignored. We are convinced of the necessity of this investigation of the MONTCLARION's involvement in printing a CPS story about an SDS leader's kills.

Richardson

At the University of Wisconsin in Madison, The Daily Cardinal was criticized, especially by regents and legislators, after it printed a CPS story about an SDS leader.

Great figure' 8’

but nobody noticed

And aren't you happy? You can wear the briefest skirts, the slip-on shoes, anything you want, without ever worrying about noticeable bulges or the possibility of odor forming. You use Tampax tampons. Wear internally, they eliminate the bother of belts, pins and pads. Whenever you want, anytime you want, without three absorbency-sizes: Regular, Sport and Super. Worn internally, they eliminate chafing and rubbing. Try Tampax tampons and see how great it is when nobody notices. Not even you.

Students and Administrators Decide Residence Guidelines

By Joanne Schneider

Staff Reporter

Guidelines for determining acceptance to the residence halls for the academic year 1969-70 have been announced. Commuting distance has been a major factor in the assignment of freshmen and priority has been given to New Jersey residents. Students and administrators met to suggest the framework within which housing officials will operate to determine who will live in the residence halls.

Freshmen students will make up 35 to 45 per cent of the residence hall population. Sophomores will be given 25 to 35 per cent of the spaces in the residence halls. Upperclassmen are allowed up to one per cent of the rooms as are out-of-state new students.

Assignments will be given to transfer and readmitted students in their first semester if their acceptance to the college comes before housing assignments are made. Assignments will be made in keeping with the allotments for each class. Transfer and readmitted students accepted after assignments are made are entitled to the same "wait list" considerations as non-transfer students.

Special Consideration

The Housing Policy Committee recommends that special consideration for assignments be given to students participating in college-sponsored programs (such as TRY and SPURT) even though these students may live in commuting distance. Approximately 20 per cent of the freshman class allotment will be reserved for this purpose. Rooms in the residence halls are guaranteed to freshmen who are granted "early admission" and live in the counties of Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Hunterdon, Mercer, Monmouth, Ocean, Salem, Sussex or Warren. Space in the residence halls cannot be guaranteed to freshmen from the other remaining counties. Dormitory Council members, resident assistants and desk assistants are given priority for readmission to the residence halls.

Commuting problems and/or distance of the student's home will be taken into consideration when housing arrangements for sophomores, juniors and seniors are made.

Student teaching assignments that will interrupt residence will be judged as a basis for housing on campus. Generally, residence hall students will not be permitted to house automobiles on campus because of the limited parking facilities. Exceptions may be made at the discretion of the housing officials in cooperation with the coordinator of parking.

Off-Campus Policy

The college reserves the right to inspect and approve rooms and apartments before they are occupied by students and on a case of emergency. Students living in rooms and apartments off-campus are required to notify the college of their addresses for the student directory and for emergency purposes.

Changes of address during the school year should be reported to the Housing Office as soon as they occur.

Women students who are married, seniors or over 21 years of age may live in apartments with private entrances. Other women with the written consent of their parents, may live in apartments with private entrances.

The college recommends that all rental accommodations in any one unit except apartment buildings should be rented exclusively either to men or to women.

Students living off-campus are encouraged to remain in residence throughout the year and to move into the residence halls during the school year only in exceptional cases due to physical or personal need.

The colleges observes the New Jersey law against discrimination by cooperating to protect all persons in their civil rights. The college will make a determined effort to assist students to find housing but cannot be held responsible for placement of all students who make requests.

Progressive Jazz Lecture

By Roberta Kuehl

Features Chris White Group

The Chris White Quintet will select a jazz concert and lecture next week as part of the CLUB lecture series. It will take place Wed., March 27 at 8 p.m. in Memorial Auditorium.

Chris White, who plays the bass, will lecture and lead his group which is composed of tenor sax, trumpet and flugel horn, drum and piano. The fact that White once played with Dizzy Gillespie and that Jimmy Owens, trumpet and flugel horn, frequently with the Clark Terry band and as a member of a group called A New Christmas, indicates the quality of the band.

The kind of music this group is known for is progressive jazz, a style that originated in the mid-50's. Characteristic elements of progressive jazz include what Russ Layne, a sophomore who was responsible for contacting Chris White, calls a "hard core," a "good beat," usually in 4/4 time.

Associated also with this jazz type are rather intricate variations of chord progressions and extended individual improvisation which gives each soloist more time to "unwind." As other kinds of jazz, a pronounced rhythm provided for by piano, bass and drummer is an essential part that furnishes a background for the soloing sax and trumpet.

Spontaneous vocal reactions by the band members is another element found in various jazz bands. Musicians who play in the progressive manner are Sonny Rollins, Miles Davis, and John Coltrane during the late 50's and early 60's period of their development.

Asst. Sports Editor

EVANSVILLE, IND.—The dreams of a national title ended abruptly for the Montclair State Bears in the first round of the NCAA College Division tourney here, actually in the scoreboard in Indiana. A 22 point defeat stopped Montclair's consecutive winning streak at 14 games. In spite of this, the Indians closed out their most successful season in their 41 year history on the hard courts, finishing with a 24-3 record. The first half told the story of the game as the locals managed only eight field goals in 25 attempts for a .320 percentage. The tall and talented Bears jumped off to a quick start on baskets by Chuck Williams and Curtis Perry. Bobby Sienkiewicz hit a jumper to put the score at 4-2. At this point the Bears hit for 10 straight points with Perry and Williams garnering four each in the spree.

Rebounding told the story for the smaller Indians. The superior board strength of 6-7 forwards Curtis Perry and Merr Bankroft proved too powerful for the MSC contingent. Sienkiewicz found the range on two straight jumpers to come within eight points, 14-6. The Indians stayed with the Bears in the second half as both clubs hit for 52 points. But the board strength, 56-49 rebounds, told much of the story. Luther Bowen who led the Indians with 32 points played a fine game in bowing out as an Indian cage performer.

Final statistics showed Southwest Missouri hitting on 40 field goals in 83 attempts for a .482 percentage while Montclair shot only 29 of 71.

At the charity line they were a bit better in hitting 18 of 31 compared to 12 of 31 for the Bears.

Southwest Missouri beat NIT-bound Southern Illinois twice during the season en route to its fourth appearance in this NCAA College Division tourney. In finishing out a brilliant career, captain Luther Bowen totaled 1,858 points in four seasons on the varsity. Bob Lester who had already past the 1,000 mark in rebounds missed that same amount in scoring by nine points finishing up with 991.

When asked about his teams performance against Montclair coach Bill Thomas said, "We were really happy with the win but we were sorry and had some bad streaks." Coach Ollie Gelston in

Bowen 7-17 8-11 22
Lester 5-16 0-0 10
Oakes 3-11 2-5 8
Perry 5-14 1-4 14
Sienkiewicz 6-12 5-7 19
Bankroft 6-10 2-3 14
Conroy 6-6 0-0 12
Watkins 5-6 0-0 10

29-71 18-31 92

March 19, 1969 — MONTCLAIRON — Page 7

Montclair's consecutive winning streak ended abruptly in the first round of the National Collegiate Athletic Association Division Tourney here, last week.

During the pre-game warmups, a major catastrophe was narrowly averted when the 900 pound Roberts Municipal Stadium scoreboard crashed down from the girders above to the center circle of the court below.

The defeat also stopped Montclair's consecutive winning streak at 14 games. In spite of this, the Indians closed out their most successful season in their 41 year history on the hard courts, finishing with a 24-3 record. The first half told the story of the game as the locals managed only eight field goals in 25 attempts for a .320 percentage. The tall and talented Bears jumped off to a quick start on baskets by Chuck Williams and Curtis Perry. Bobby Sienkiewicz hit a jumper to put the score at 4-2. When asked about his teams performance against Montclair coach Bill Thomas said, "We were really happy with the win but we were sorry and had some bad streaks." Coach Ollie Gelston in faring his own team's effort by not giving up felt Missouri was "a fine basketball team and the toughest physically of any club we've played."

A number of NBA scouts were here to watch for some future prospects. Among them Dick McGuire of the Knicks, Hank Aiken of Seattle and K.C. Jones of the Boston Celtics.

A large number of Montclair fans drove in from the coast travelling some 20 hours by car. Altogether about 150 made the cross-country journey.

The game was broadcast back to Montclair by WVMS, the school station, with Al Friedman handling the play-by-play back to the fact that Montclair gives no basketball scholarships as such a team's prospects. Among them Dick McGuire of the Knicks, Hank Aiken of Seattle and K.C. Jones of the Boston Celtics.

Gymnasts Win North Atlantic Conference Championships

By John Aneson
Sports Editor

One of the top college division gymnasts in the East, Rick Schwartz, led Montclair State College's gymnastic squad to the team title in the North Atlantic Conference championship meet held at Panzer Gym last Saturday.

MSC accounted for 137.68 points followed by West Chester State (Pa.) with 123.15, Long Island University (N.Y.) with 122.29 and the U.S. Coast Guard Academy with 112.58. Cortland State (N.Y.) entered in only three events while Queens College failed to compete.

Schwartz took first place in the long horse, floor exercise and the parallel bars. He also placed third in the high bar.

Dave Green took a first in the high bar, a second in the long horse and a fourth in floor exercise.

A surprise performer, Nets Johnson managed a second in the parallel bars and a second in the high bar.

The ringmaster, Jon Guenther, placed second in his specialty. Guenther took eight firsts and four seconds in the 12 dual-meets this year.

Others who placed were Russ Spencer, third on the p-bars; Ron Poling, fifth on the still rings; Ralph Cuscia, sixth on the rings; and Roger Brown, sixth in floor exercise.

Women Gymnasts
Fall to Nassau

By Gail Cristalino

MSC's Woman Gymnastics Team participated in a Quadrangular Gymnastics Meet with Nassau Community College, Suffolk College and Hofstra University. The peak of the competition was between MSC and Nassau with Nassau nipping MSC, 52.90 to 51.84.

Linda Monaco swept first places in floor exercise and on the balance beam, and took a third place on the uneven bars. Pauline Scholz captured third place on the balance beam and vaulting. Joann Coleman took a third in the floor exercise. All three girls received medals for their outstanding performances.

Along with Coach Virginia Crouseman, others who supported the team were Sharon Trasybey, Jane Cowell, Pat Rossetti, Lyn Cross, Margaret Boland, Bev Price, Mary De Frank, Gay Petersmann, Donna Ezzi and Gail Cristaline.

Montclair State College. Although plagued by painful injuries in the last two years, Green has developed into one of the top small college gymnasts in the East. A graduate of Snyder High School in Jersey City, the 6-2, 160-pound junior has competed in the all around for the Indians.

Green's development in the still rings and parallel bars has been slowed by injuries. A fractured sternum before this season, which greatly restricted upper body movement, was supposed to finish him for the season, but he came back and became one of the top point scorers this year.

With such success with these injuries, the future, hopefully free from any other hurts, seems to be bright for Dave Green.

Montclair State College's Ollie Gelston has been chosen New Jersey State College Conference basketball "Coach of the Year." The honor, accorded Gelston by a vote of the conference coaches, is a tribute to his efforts which saw Montclair State win its second straight N.J.S.C.C. championship while posting a regular season mark of 22 wins and only 2 losses. For the first time in the history of the conference Montclair State breezed through an entire conference schedule of 10 games without a single defeat. The conference was formed in 1957.

The 1969 honor is the second "Coach of the Year" award that Gelston has won, having taken the past honor in 1965 at Jersey City State.

A graduate of Panzer College (now Montclair State), Gelston has coached the last two seasons at Montclair State and turned in a record of 42 wins and only 10 losses. In 11 seasons on the college level, Gelston has a mark of 109 wins and 72 losses. Before entering the collegiate ranks, Gelston coached at Stevem Academy in Hoboken, New Jersey. His overall record was 62-26.

The Indians, under Gelston's direction, became the first New Jersey school to win a National Collegiate Athletic Association Division taking the Eastern Regional crown at Syracuse, New York by downing LeMoyne, 81-77 and downing Wagner in the championship contest, 101-78.

In 1968-69 Montclair State has turned in the best overall record in the school's history dating back to 1927-28.

Gelston, a native of Jersey City, now lives in Upper Montclair and is married to the former Audrey Daniels. The Gelstons are the parents of three sons, Paul 13, Gary 11 and Craig 9.
