Classes On for 2-Day Moratorium

By Roberta Kuehl
News Editor

Classes will be held as usual Nov. 13 and 14 during the two days of the moratorium to protest the war in Vietnam, according to President Thomas H. Richardson. His statement came after a faculty meeting held last week to determine the views of faculty members.

By a vote of 127 to 86 the faculty chose the following policy from six proposals - "Classes will be held as usual Nov. 13 and 14. Attendance for students and faculty to be voluntary with no penalty for those who decide to attend or stay away." However, after Richardson presented this stand to the Board of Trustees, they adopted the following policy - "Regular college sessions will be conducted but with the recommendation to the faculty that mid-term examinations be postponed so as not to penalize students who are absent. Those faculty members who feel constrained to absent themselves from classes are requested to discuss this with their department chairman to arrange for coverage of their classes."

Richardson explained his reason for calling the faculty meeting, "The Administrative Council was unable to reach a clear majority attendance for students and faculty to be voluntary with no penalty for those who decide to attend or stay away."

However, after Richardson presented this stand to the Board of Trustees, they adopted the following policy - "Regular college sessions will be conducted but with the recommendation to the faculty that mid-term examinations be postponed so as not to penalize students who are absent. Those faculty members who feel constrained to absent themselves from classes are requested to discuss this with their department chairman to arrange for coverage of their classes."

Richardson explained his reason for calling the faculty meeting, "The Administrative Council was unable to reach a clear majority on the moratorium issue. It is important for me to know where the faculty stands on this question." He went on to say, "I'm disappointed that SGA didn't take a stand. . . . they could have been a little more decisive." In response Ken Traynor, president of SGA pointed out that it was not a "no comment" decision.

Before voting on their proposal the faculty expressed their various views concerning the moratorium and what actions should occur then. Dr. Robert Beckwith, history professor, believed "our function as an academic community is to educate." The faculty would be doing the students a great disservice if full expression and active participation were not allowed. "It is not enough to simply teach in a classroom."

Dr. Ernest B. Fincher, political science professor, has "discovered a new climate on campus" and feels that "what will happen Thursday, Friday and Saturday is of great importance to the future of the college and promises much for the future of the nation." He went on to say that "the moratorium is equally as important as what goes on in class."

Mr. Percy Johnston, a member of English dept., was disturbed last month when the faculty could not express its feelings. He continued, "It's the faculty's responsibility not to mislead students into thinking they'll receive amnesty for anarchy."

"The search for truth is our primary reason for existence," according to Dr. Daniel Brower, chairman of the psychology dept. He continued, "Montclair State can't hide from the Vietnam intervention. If U.S. campuses fail to keep open the channels of controversy, the channels will be closed." Regarding Montclair's policy he said, "The issue is not whether, but how to implement the decision."

Last week eight students staged a sit-in in President Richardson's office to express their dissatisfaction with the Board of Trustees policy. "The whole machinery has been by the President and Board of Trustees since they are ignoring student and faculty rights." When asked what they thought would result from their action, Pat O'Keefe, member of Student Peace Union said "no reason for optimism."

Later that day Richardson came out of his office and further clarified the Board of Trustees policy: the students will not be penalized for a cut and will be allowed to make up missed work, including exams; faculty members who wish to observe the moratorium would go to their dept. chairmen and will be assisted in finding a substitute for or some other method of handling their classes.

Nominations Up for Group On Phys. Ed. - Athletics

By Helene Zuckerbrod
Asst. News Editor

"Complex and involved "issues surrounding the health and physical education department and athletic program, are, in the opinion of Dr. Harry H. Hoitsma, assistant professor of health and physical education, the reasons behind the formation of the committee for the study of athletics. Hoitsma, chairman of that committee, said the committee for the study of athletics will attempt to deal with the rationale behind both sides in the athletic dispute and will make recommendations regarding a split in athletics at MSC as a result of its findings.

In answer to charges of stacking, Hoitsma replied that the Montclair Athletic Commission, the Student Government Association, and the Women's Recreational Association, faculty, and students will all be represented in the committee. MAC, SGA, and WRA will each have one representative on the committee, he said. They will be chosen at the prerogative of each organization. The health and physical education department will choose its representatives by way of the department/student council. Two men and one woman selected at random from lists supplied by Dr. Joan Schleede, associate professor of health and physical education, and Mr. William P. Dioguardi, director of athletics and associate professor of health and physical education, will represent the varsity teams.

In order to have the academic departments represented, Hoitsma continued, a letter stating the purpose and importance according to the four man committee formulated to plan the larger committee was sent to all department chairmen and to previously interested faculty members. The department heads were asked to find additional interested faculty members. All lists and individual replies were to have been received by Hoitsma by Nov. 7.

Three students, chosen at random, will represent the rest of the student body in the committee, he continued. Both sexes will be represented and no more than one student will come from any one department. All students interested in joining the committee should send an application containing their name and major to: Dr. Harry H. Hoitsma, Box 542 by Nov. 17.

Palm Analysis
Doneby Gypsy

By Maureen Nichols
Staff Reporter

On the boardwalk during the summer an old gypsy woman can be seen sitting in a tiny booth over which hangs a sign announcing "Palm Read — One Dollar." For this small fee one can supposedly "foresee" his future as revealed through the lines and shape of his hand which are "read" by this woman.

Considered an important art in ancient times, the validity of palmistry as a means of foretelling future events is in dispute today, and is more or less a form of entertainment.

Palmistry, or chiromancy, is a system of divination in which the structure of the hand is interpreted as being associated with the psychology and future of the person. The art deals with the "seven mounts" of the hand, their lines and the interlacings of the fingers. The mounts are: Jupiter, Saturn, Apollo, Mercury, Venus, Mars and the Moon. Situated at the base of the fingers and at the wrist, these mounts connect palmistry with the art of divination that is carried on by studying the stars.

Chiro-mancy supposedly existed in India as early as 1000 B.C. and was also used in Europe, India and Egypt in ancient times. The art was probably originated in the ceremonies of the medicine men, diviners, and priests of primitive ages to determine good and bad omens. From a priestly institution it reached a position where it was considered a science studied by many intelligent, educated men of the highest rank. In the Middle Ages it was taught in schools and colleges.

In later years the art of palmistry degenerated into fortune-telling when some men of the profession took over the role of the pagan priests, and exploited a willing public by claims that they could foretell the future through the reading of palms.

In Syria and Egypt the palmist can still be seen in cafes and among Arabs and is consulted as to the future success of enterprises. But in most modern countries, palmistry has little popular acceptance or influence.

Newark's Guru — Love and Money
By Patricia M. Romanish
Staff Reporter

This is truly the age of Aquarius, and the ring of cash registers means the days of dealers of the occult are over.

However, is traffic in occult products quite so profitable? Is the "sacred" really becoming mundane?

This question was recently posed to a local guru, Gage Gayle Wamba Chamba (the loving one) in downtown Newark at an exclusive interview.

"What do you mean," the Guru quizzed, by contorted face? "To put it more bluntly, can a person make a living at being a guru?"

"What do you mean by a living?" he questioned. "I live only on vegetables; I eat no meat."

Guru, do you make any money in this shop? "Money?" he puzzled. "Money has no meaning for me. Well then, what do you sell here?"

"I have talismans," he replied. His long fingers painted black, the guru's slender hands slowly opened an intricately carved pointy wooden box.

"Here is a talisman blessed by the Pope," he offered. A tiny carved, hand-like figure which is half-inch high with a tiny gold necklace and painted red heart.

Is this carved ivory? "No," he replied. "That one is plastic. It sells for $30. Oh yes, and this is a root shaped like a hand from the Balouba (a witch cult) in Africa. As you can see, this root is about one inch high. It sells for $75. I sold three of them this week. This is my last one."

Located on the other side of the shop were red and black candles in the image of Satan. "People burn these candles to chase away evil spirits," he said. "I cannot remember the meanings of all the candles, but it is all explained in this little book... $2.25!"

He also showed a small book entitled "White Magic" printed in 1919. "Because I am in a good mood today," he chuckled, "I will sell this book for only $1.50."

Among his services, the Guru mixes snake oil from real snakes to dispel evil spirits. He will draw personal astrological charts, either a natal chart from the client's instant of birth or a progressive chart beginning the day the chart is drawn up. "Natal charts," he stated, "are naturally more expensive."

Also for sale were love soap from the Patchouli root, astrology oil (a fast seller), "Success Bath," a so-called attraction powder, "Seven African Powers Spray," and "La Madama," and aerosol spray to help create an atmosphere conducive to concentration. (This one, no doubt, is popular at final exam time.)

Upon leaving the store, I was presented with a free sample of incense, which, I was told, is properly burned was likely to make an eligible young man fall madly in love with me. "Try it out," the Guru suggested. "You may come back for a whole box of it!"

The OCCULT ARTS
Numerology Examines Future

By Don Pendley
News Editor

1. 2. 3. 4. 5. 6. 7. 8. 9
A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

It helps, while adding up the numbers, to list vowels and consonants. The numbers reflect the inner qualities of individuals, the consonants reflect outer characteristics (those that are visible to others), and the total "name number" shows that individual as a whole — the combination of personal and public personalities.

For example, John Doe would be added: vowels: O=6; O=6; E=5. Total, 1+1+7+8; consonants: J=1, H=8, N=5, D=4. Total, 18. 1 + 1 + 8 = 10. (Consonants) = 35, 3 + 5 = 8. Name number: 8. Vowel number: 18. 1 + 8 = 9.

After finding the name number, vowel number and consonant number, the numerologist consults a chart listing characteristics of each of the numbers. The number one signifies singularity and an individual event or event that stands by itself, apart from anything that is happening to others. It may, understandably, take good or bad aspects. The vowel, or inner number of any name, is the focus (of "Bonne and Clyde" fame) and songwriter Paul Simon (half of Simon and Garfunkel) are one.

Two is the number of common sense and adaptability, although it sometimes take on the characteristic of moodiness.

There are two sides to every number: three is emotional, five signifies ambition and independence and freedom and love. Five is also the number of masculine sex.

Six is a quiet number. Among its characteristics are patience, conservatism and reserve, although it can lead to excess and be ostentatious.

Seven is the mystical number. Many numerologists and astrologers use seven as a theme in their personal life. Jeanne Dixon's name number is seven.

The science of astrology is eight. Originality, tolerance and perseverance are inherent in the nature of eight.

Spiritualists and theologians find comfort with nine. It is the number of self-sacrifice and religion, of linking with God and the eternal.

Another use of numerology is the discovery of the date of, or birthdate, number. The system used in finding this number is the same as that used for finding the name number: The date, Nov. 12, 1969, would be added: 1 + 2 (the second month of the year) + 9 + 6 + 9 = 30. 3 + 0 = 3. Three is one of the numbers that has two distinct characteristics: the day can be one for positive feelings — competition and accomplishment, or one for negative feelings — pride, and ambition.

Today (a "three" day) is also a day for completion of tasks. There is one number of reality, a day of the truth. She states in her book "Numerology" that "truth, like the knowledge of God, starts within yourself. Numerology may enable you to discover both."

Future Seen in Tarot Cards
By Kathy Kayne
Staff Reporter

The room is the size of a small apartment. A young attractive woman sits at her table and asks you to carefully shuffle a deck of 78 oblong cards. Concentrating on the question you want answered, you shuffle. Finally you stop and the young woman turns over the top card.

Interpretation of character, and the problems of people can be revealed from the tarot cards when they are laid out for a reading. An understanding of their symbolic meaning gives us an opportunity to master the art of occult wisdom. The reader, or interpreter of the cards, may not always understand the meanings but that is where the reader's own personal wisdom comes into play.

Anybody can play with the tarot cards, but the wise guru uses the cards to reveal the person's true nature. This is a type of test. The person "shuffles" the cards, the meaning of the cards are then read and an indication of what it means to the person is given.
**Two Dozen Enroll**

**Police Science Course Begins**

By Mary Jean Strzycharz Staff Reporter

Beginning in February, 24 policemen will participate in the police science program, a new series being offered by Montclair State's sociology department, for the purpose of training officers in municipal departments.

The program is in accordance with the Law Enforcement Education Program (LEEP) which has already begun to take effect at Montclair.

LEEP, part of the state's educational plan, offers a full tuition grant from the government for four years to any student planning a career in law enforcement or police sciences.

The program is designed to upgrade the officers in municipal departments and provide more experienced and more capable policemen to serve the community.

**Jefferson Sets Cafeteria Aid**

By Jeanne Schneider Staff Reporter

Mr. Dale Jefferson, food service manager at MSC, is well aware of the problems and inconveniences which plague boarding students.

At last week's food committee meeting, Jefferson announced his proposals for making cafeteria dining more enjoyable. Several of the round tables from Freeman cafeteria will be exchanged for oblong tables in Life Hall cafeteria. Jefferson hopes to eliminate the "barracks" atmosphere of the dining area.

Before this move is made however, fraternities and sororities will be consulted. Since each fraternity and sorority has its "own" table where brothers and sisters gather, Jefferson does not wish to disrupt this communal atmosphere.

Partitions are expected to be set up to divide the scraping and dish-washing area from the eating area in Life Hall's cafeteria.

Vending machine attendants may be happy to hear that a full time vending machine serviceman is being hired. With the help of a part-time helper on weekdays, the servicemen will see that machines are filled and function properly.

New vending machines are expected to arrive on campus within six weeks. These include frozen dessert and combination machines.

Plans are being made to give TUB a face-lifting in an effort to eliminate what Jefferson considers a "white tower" atmosphere. These plans include softer lighting and personality tables. Jefferson will be recruiting student help in this project.

November's dinner "special" will be an "American Heritage" buffet. Menus will be planned by a student committee. In order to facilitate service and reduce congestion, both the Freeman cafeteria and the Life Hall cafeteria will serve dinner that evening.

Students will be asked to state where they wish to eat the night of the special a few days before the special is held.

**Foley Leaves For Middlesex**

By Barbara Jean Minor Staff Reporter

"I like MSC very much, but I have been given an opportunity to advance myself," said Mr. Robert J. Foley, assistant registrar at Montclair State College. At an interview in his office on the second floor of College Hall, Foley explained that his application for the position of registrar at Middlesex County College, Edison, has been accepted. He commented that "lots of jobs come along, but 1 feel that this one is occurring at a suitable time in my career." Foley will begin his job as registrar at Middlesex on Nov. 24. He explained that though his work there will be basically the same as at MSC it will involve more responsibility. He said that the registrar's office at Middlesex has a larger staff, and is responsible for the master schedule and evaluation for graduation.

Foley will begin his job as registrar at Middlesex County College on Nov. 24. He explained that though his work there will be basically the same as at MSC it will involve more responsibility. He said that the registrar's office at Middlesex has a larger staff, and is responsible for the master schedule and evaluation for graduation.

He added that he was "very much impressed" by Middlesex, a two-year liberal arts college with approximately 2400 full-time students. "Students who have transferred from Middlesex to MSC have done quite well, and I believe that Middlesex is a very good institution," commented Foley.

**Help Wanted For Kennedy**

Dropouts and potential dropouts in the Montclair community can now receive counseling, job placement and social work under the Kennedy Human Relations Project for Youth Inc.

Founded by Mrs. Lillie M. Connor, a Montclair resident, the project was expanded to audio-visual activities, arts and crafts, a tutoring program. A non-profit, nonpolitical organization, the project has met with considerable success.

All members of the project are volunteers and there are no professionals, such as social workers, involved. The project is presently operating from Mrs. Connor's home on Valley road south of a permanent project center can be found.

**ON HIS WAY**: Robert Foley, associate registrar at MSC, will be leaving for Middlesex County College to become registrar for the 2400 undergraduates at Middlesex.
Montclair State faculty members voted 126 to 87 in favor of the Princeton plan regarding a recommended faculty policy that should rule during November's two-day observance of the nationwide moratorium to protest the war in Vietnam.

However, after reviewing the above recommendation made by the Faculty Council, the MSC Board of Trustees chose to institute a less expansive policy. Gone is the do-your-own-thing setup exhibited here on Oct. 15 where both students and faculty members were guided by their consciences as to class attendance.

Rather, November's policy statement reads that faculty are recommended to postpone midterms and "faculty members who feel constrained to absent themselves from classes are requested to discuss this with their department chairman to arrange for coverage of their classes."

However much protection is being given to those students and faculty who wish to protest the war yet remain in classes or to those who do not wish to protest the war at all, the fact remains that the policy which will prevail tomorrow and Friday is not a majority policy. Since approximately 60% of the voting faculty members preferred the Princeton plan as the accepted policy, it seems that this is the policy which should have prevailed.

It is recognized that in its statement, the board has been representative of "the interests of the citizens of New Jersey, the students, and the faculty of Montclair State College." And although the board has apparently set policy as the citizens of New Jersey would want to run the college, we ask who is this college being run for?

A Great Opportunity

Last week's landslide victory for William T. Cahill brought with it a great opportunity for the state of New Jersey.

The governor-elect wasted little time in calling upon his old friend Richard Nixon for some "new federalism" - a plan aimed at giving the states more control over federal programs. And Cahill has already conferred with Gov. Richard Hughes about future state business.

Seems that with all these factors working out well, plus a Republican-controlled legislature, we can look forward to four progressive years of state leadership under Cahill. Our best wishes are extended to him.

Minority Representation

Leaders from black and Puerto Rican communities of Newark will meet this weekend at Clinton Place junior high school to formulate plans for the prospective election of a minority-group candidate as mayor of Newark in 1970.

As far as we understand, the conference will be controlled by capable representatives of Newark's minority communities, therefore, militant factions will probably shun the convention.

Since charges of malfeasance and corruption have been leveled against the current Newark administration, we see a strong need to reorganize and revise Newark's current political machine, especially for the benefit of minority representation.

Typical, Isn't It?

The biggest job facing the delegates is the selection of candidates and defining policy. For that purpose, the planning committee has engaged a unit of the American Arbitration Association to resolve any disputes.

There are presently two declared candidates ready to face the minority delegates: Kenneth Gibson, a civil engineer, and Harry Wheeler, a former teacher and community organizer.

The candidates, according to Curvin, must pledge support to the convention and its adopted platform. But there is presently feedback from certain Newark city factions.

MILITANT CONVENTION

Last year's convention was dominated by militant leaders of the Newark community, including the United Brothers, headed by playwright Leroi Jones. The 1968 convention attempted to support blackmen for the Newark city council. Turnout to the convention was light and all candidates supported by the militants lost.

"The leadership of the convention is different this year...the voting delegates will represent a broader and more politically-experienced constituency," Curvin has remarked.

The convention has a budget of $20,000 for equipment, food, printing and other expenses. Most of the money has been received from donations, largely from churches and businesses.

The convention-participants will also hear speeches by Dick Gregory, comedian; Julian Bond, Georgia state legislator, and Leroi Jones.

Curvin said that there is no organized opposition to the convention and added that more people would support it publicly, but do not because of their ties to City Hall.
TRIBUTE TO A DECADE

1963

The Spirit Still Lives

By Susan Dominski

The spirit of '63 lives! Though the external aspects may have altered, many of the major problems facing the nation in 1963 are still troubling it today. Civil rights, the Vietnam war, economic instability and the population explosion— all present serious issues in 1963—are still erupting in the U.S. today.

1963 was the year for civil rights. A widespread battle against racial discrimination was being fought in Congress and the courts as well as on the streets. Despite constant harassment, racial discrimination was being fought in Congress and the courts. In the second semester at "Ole Miss"投票, two Negro students enrolled in the University of Mississippi, an action blocked earlier by Gov. George Wallace.

President John F. Kennedy drafted and Congress passed, the civil rights act that year, a major problem facing the U.S., especially in urban areas. While many of the student protesters were killed or wounded in the six days in '63 have not been granted, in some areas the black man remains a second class citizen. Desegregation in the South is still in its infancy. Despite the turbulent activity by blacks and whites that year, a survey published by the American Jewish Council in December concluded "a positive gain in civil rights during '63, primarily because of the determination and dignity of the Negro community."

Today, in 1969, the black man still does not have racial equality. Racial unrest continues to be a major problem facing the U.S., especially in urban areas. While many of the student protesters were killed or wounded in the six days in '63, the black man remains a second class citizen. In southern school systems is not enforced and job discrimination has not ended. Demonstrations and ghetto uprisings in 1969 testify to the fact that blacks are still fighting in Congress and the courts.

The climax to the racial turmoil came with the Aug. 28 March on Washington led by Rev. Martin Luther King. 200,000 people gathered peacefully to focus attention on Negro job demands.

If we will decide if we will participate, and how. This question plagues the college administration in October, faces it now, and will face it in December.

In the past three days in Alabama, an action blocked earlier by Gov. George Wallace. Kennedy sent National Guard troops to Cambridge, Md., after anti-segregation demonstrations and to four cities in Alabama, to desegregate schools.

Desegregation of public facilities and employment opportunities began in Birmingham on May 9; and three Negro leaders were killed by a bomb thrown into a church in that city

No longer do we have to look back to the year 1963 to find the roots of today's problems and the solutions to these problems in the past. The tragic events of the past have shaped the course of the future, and the problems we face today are the result of the actions of the past.

Now when tens of thousands have died, angry voices of outraged citizens have risen in dissent. The Vietnam war and racial tensions, major problems in the country today, are not the only ones that have been around for six years. International birth control studies were conducted by the National Academy of Science on April 17, 1963. The report concluded: "Other than the search for peace, no other problem is more urgent than the one of excessive population."

Another domestic problem in existence during the last six years is that of illegal drug importation and distribution. In 1963 an attack against distributors and importers of narcotics was launched by the Advisory Commission on Narcotics Drug Abuse.

A special task force was set up in the Mexican border in 1969 to concentrate a major effort to combat the growing Mexican - U.S. drug traffic.

In the past three days in Alabama, an action blocked earlier by Gov. George Wallace. Kennedy sent National Guard troops to Cambridge, Md., after anti-segregation demonstrations.

School of Humanities Discusses Governance
By Roberta Kuehl
News Editor
Student and faculty members present at Monday's School of Humanities Congress voted for a dean, along with his duties and a faculty-student senate as part of the governing structure.

Cheryl Brocking and Martha Henry, members of the committee on governance and administration, presented their tentative plans for organizing the school which were then followed by faculty and student alternate proposals. At this time, after a clear majority vote, the dean "will act as the administrator and the liaison to the Vice-President of Instruction of the college, who in turn is responsible to the state and the Board of Trustees.

Part of the Dean's duties is to meet with department chairs, advisory committee and Senate whenever necessary. The dean has the power of veto over the Senate.

Discussion then turned to the faculty-student senate. A unanimous vote decided that such a body will exist. After much debate on the method of representation, those present voted 38-26 in favor of the following proposal, "This governing group will consist of 40 members. One student and one faculty member will be elected from each of the seven departments every two years. Thirteen students and 13 faculty members will be elected at large proportionately based on the number of majors in the department annually in January." The seven departments in the School of Humanities are English, philosophy-religion, classics, French, Spanish-Italian, German-Slavic, and linguistics.

Since much remains to be discussed and voted upon, another congress will be held in the near future. The date has not as yet been decided.

The Graduate Is Coming.

Math and Science
Prescheduling Is Question

Proposals concerning prescheduling and governance for the School of Mathematics and Sciences were voted on at the Central Planning Committee (CPC) by the faculty member and the governance and administration committee, according to Dr. Samuel Pratt, chairman of the CPC.

Pratt said that the faculty member committee proposed some changes which would have a body of faculty and departments, thus enabling professors to select the hours they wished to teach. It would also enable students to know before selecting a course who would be teaching it and what time it would be held. Pratt said that this idea of prescheduling would give "more information to both professor and student."

Two proposals for the school were made by the governance and administration committee. The first proposal, according to Pratt, stated that the school shall have a dean; the second stated that the primary decision-making apparatus rests with the department. Pratt said that this second proposal would probably rule out any legislation setup such as the current governmental structure of the school. Pratt stated that the school shall have a dean; the second stated that the primary decision-making apparatus rests with the department. Pratt said that this second proposal would probably rule out any legislation setup such as the current governmental structure of the school.

Pratt emphasized the fact that none of these proposals are final. He stressed that the committees just initiate proposals and that the CPC decide on the final decision. The final decision rests in the Congress, which consists of all students and faculty who are members of the math-science departments. Pratt said that the Congress will meet in December to decide on the governance proposals.

Players, Montclair State College’s dramatic organization presents “The Persecution and Assassination of Jean-Paul Marat as Performed by the Inmates of the Asylum of Charenton under the Direction of Marquis De Sade.” The play will be presented Nov. 12 and 15 at 8:30 p.m. with a matinee performance on Nov. 14 at 2:30 in Memorial auditorium.

The play is under the direction of Dr. Jerome Rockwood, professor of speech.

Principal roles in order of importance include Tom Lesko as Sade and Jim Johnson as Marat. Barbara Sholz will portray Simonne and Corday is played by Wendy Simon. Also on stage will be Dupperet-Scott Watson; Roux-Frank Skinner; Herald-Tony Gianm; Coulmier-Greg Doucet; Koko-Jill Higbie.

Polpeck is portrayed by Brian Muhoney; Cucurucu by Pat L’Arabah and Russignol by Betty Passafiume complete the principal roles of the Players fall production.

Rockwood stressed, however, that Marat/Sade is an “ensemble production in which every member has a vital part.”

Marat/Sade, English version by Geoffrey Skelton with verse adaption by Adrian Mitchell has as its theme revolution. According to its director, “as soon as you begin to explain the theme you lose the groove.”

Drawing personnel for the production from approximately a dozen departments within the college, Rockwood commented that “if you must understand a work of art, it is unfortunate. What you should do, is groove on it.”

TECHNICAL CREW MEMBERS: Mike Smanko and Jackie Isherwood are both light operators during Marat/Sade.

ON GUARD: Prepared to stab Marat (Jim Johnson) is asylum inmate Charlette Corday (Wendy Simon).

Wayne's characterization because
of his vocalization of Franklin. He
does not sound as one would
expect a man of Franklin's stature
and creativity to sound. And, as
Wayne assumes other voices, like
those of Franklin's common-law
wife, Deborah, and his illegitimate
son, Bitty, he achieves little but
empathy for himself. Becoming
fascinated to Wayne's voice, it is
the middle of the first act before
Ben Franklin is assumed into the
man Fred Wayne.

An Editorial

There's a Playboy
in the Penthouse

In the past few months, a new
publication has hit the newsstands
of America. It is called Penthouse,
the international magazine for
men. It is published and edited by
Bob Guccione, who says he would
like to topple the market now
led by Playboy. "In Britain... we outsell
Playboy three to one. We'd like to do
something like that here."

If that's where the American
magazine reader is at, then,
Guccione should have no sweat
topping the Hefner stronghold.

CARBON COPY

Actually, if there was a possibility of outselling a
competitor by giving a carbon
copy of it, then Penthouse might have a
small battle on its hands. Penthouse is, upon close
examination, a British version of
Playboy, with more pictures and
more obscenity.

But, the problem is that it is so
much like Playboy. A glance at its
contents reveals: The Penthouse
Forum, The Penthouse Interview,
The Penthouse Pet of the Month-
which I mention "A Fable of Our
Time" that closely resembles the
Rhiald Classics.

There are other problems:
Penthouse's photographs are not
as good in quality as Playboy, nor
are the poses of its nude nymphs
original or better than its
competitor, although the
appendix scars and sagging breasts
make them more real. In short,
Penthouse may be out rabbit
hunting, but it won't catch much
until it out-thinks the bunny.

M. J. Moran

DO YOU WEAR A MOUSTACHE OF THIS
TYPE? Or do you know someone who does? If you do,
you should know that it
represents a 'socially
acceptable substitute for
masturbation.' At least, that's
the opinion of two writers in
the November issue of
Penthouse, the new
international magazine for
men.

Players proudly presents the debut of "The Persecution
and Assassination of Jean-Paul Marat, as performed by
the Inmates of the Asylum of Charenton under the
direction of the Marquis de Sade," a play by German
author Peter Weiss, this evening at 8:30 p.m. PLEASE
BE PROMPT. Those arriving late will be seated at the
discretion of the management.

What is a grook?

"What in the world is a grook?"

"A grook is a short, aphoristic poem, accompanied by an
appropriate drawing, revealing in a minimum of words and with
a minimum of lines some basic truth about the human condition."

To get the Nasty Nazi
shock
The Danes designed
to scribble grooks

In English
and in Scandia
the grooks take life in hand
and help
to take a laugh and look
from man to man.

The sense of grooks
is easily seen
Just take the lines
and read between.

Perhaps you'll read these
little books
to learn the language
that is Grooks.

But, at last, a grook is like love, and, in the words of Piet
Hein:

What Love is Like
Love is like
a pineapple,
sweet and
undefinable.

(drawing and poem used by permission from 'Grooks II.' c. 1968
by Piet Hein, Doubleday & Co., Inc.)
Student Attendance Is Documented

Montclair State students, joining with thousands of other students across the country, participated, or perhaps did not participate, in the nation’s Oct. 15 moratorium to protest the war in Vietnam.

In an attempt to help MSC students evaluate the effectiveness and personal relevance of the moratorium at this college, Mrs. Helen Olive, assistant professor of psychology, conducted an anonymous student poll on the campus following the moratorium.

Four classes of students were asked to respond as honestly and completely as possible to the following stimulus: “On Wed., Oct. 15, I spent the day doing the following.”

The purpose of the poll was threefold: 1) to help assess the degree of participation in the moratorium day among the students; 2) to help the students assess the day’s activities on an individual basis by writing about it; and 3) to help the entire student population to discover with some degree of objectivity how a small sample of them spent the day.

The students who were polled are primarily freshman and sophomores with a sprinkling of juniors. Although the total number of students responding was 218, responses were tallied more than once if the student participated in a variety of activities during the day.

The data was analyzed by Kathy Monaghan, student assistant in the psychology department, and was presented by Mrs' Olive as a reflection of the students to themselves without value decisions or interpretation and in the spirit of scientific inquiry about a current social problem.

The results of the poll are as follows:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. Participated in a peace-related protest</td>
<td></td>

Approximately 40 Japanese flowering crab trees, Norway maples and other trees were planted in the area near Sprague field on Halloween. “The flowering trees will probably be in bloom during graduation exercises,” stated Galos.

Galos explained that this year the committee used the Carnival '69 proceeds to purchase about $700 worth of trees.

About 10 trees, six to seven feet tall, were planted at the edge of the parking lot near Sprague field. “These trees will not only help beautify the area during graduation and throughout the year, but they will also provide shade,” commented Galos.

The fund distribution committee suggested planting the trees near Sprague Field, Galos said. He added that Mr. Joseph McGinty, superintendent of buildings and grounds at MSC, agreed that this area would be a suitable site for the trees. The trees were planted by the Cedar Grove Nursery, through the supervision of McGinty.
Calling for an investigation of the Montclair Athletic Commission, Joe Macaluso, senior class president, focused attention on the class I organization when he claimed that there are "too many unanswered questions" regarding the way MAC spends its money. In an attempt to get some answers to student inquiries SGA held an open forum on athletics where . . .

Traynor Says MAC's Legal

By Michael Traylor
Staff Reporter

"Montclair Athletic Commission (MAC) is a perfectly legal organization," stated Ken Traynor, SGA president.

Concerning the recent controversy which arose at an athletic forum held on Oct. 21 where complaints of MAC's illegality were issued by two SGA representatives, Traynor said, "there was a conflict which still exists, but there is no illegality existing on the MAC." He added in confirmation that each organization, when forming, is asked to submit a constitution to SGA. A constitution makes MAC a legal organization.

"This is where the conflict is," Traynor stated. According to the bylaws of SGA, a class I organization such as MAC, shall be composed entirely of students. Traynor added that a bill can be brought up at any meeting and be voted on by the legislature. According to Traynor, students do not have the time to work on the budget. When asked what the procedure would be to amend the bylaws to avoid this conflict, Traynor stated that he would have to bring up a bill, read it at the following meeting and then it would be voted on by the legislature. According to Traynor, no such action has been started.

Traynor added that he would have the bylaws changed so that MAC is too complex for students to handle. Traynor said: $88,000 is the annual budget for MAC which is used for all sports including football, basketball, baseball and many others. "With that much money, students need faculty members to advise them. Students lack the expertise," Traynor added.

There have been many complaints in the past about this conflict of the bylaws of SGA and the constitution of MAC. "This apparently stems out of curiosity to see where the budget is being spent," Traynor said. He said that students do not have the time to handle the budget.

For '70 Season

Gymnasts Anticipate Success

Coming off the most successful season in the history of the college – capturing the North Atlantic Gymnastic Conference crown and qualifying for the NCAA College Nationals – the 1968-1969 Indian gymnasts set a precedent which will be very difficult to duplicate or improve.

Coach Terrance Orlick, entering his second season at the helm of the ISC gymnastics, has an optimistic outlook for the 1969-70 season. The team is highly spirited and is determined not only to better last year's record, but to make a good showing in the NCAA College Nationals.

Orlick has expanded his competitive schedule to what is now the largest and toughest schedule the team has ever had. The gymnastics open against Southern Connecticut, ranked second in the nation last year.

This year's team is well balanced but lacks depth, especially on the high-bar. The competing in six events. Soph standout Bill Balogh will also be an all-around performer and will be a big point-getter. Senior Neil Jensen will be a top notch performer on parallel bars and high-bar, and should go a long way this year.

Ron Poling, also a senior, will be an outstanding competitor on both rings and parallel bars. Senior Bob Day and junior Joe Garreffa will excel on the side-horse. Junior Roger Brown is developing into a powerful three piece performer, while junior Russ Spencer is strong on two pieces.

Soph ring specialist Tom Fiorentino is expected to fill the shoes of last year's standout, Jon Kuhn, will be back as assistant coach.

Senior captain, Dave Green, c o w n i n e r of the most valuable gymnast award for 1969, will be heading up the varsity line-up, with many of last year's key players returning. Soph ring specialist Tom Fiorentino is expected to fill the shoes of last year's standout, Jon Kuhn, who will compete in floor exercise and long horse, is expected to be a top-notch performer. Junior John Moller will be working floor exercises and also serving as trainer. Mark Rudnick will be working with the gymnastics exhibitions team, and Rodger Phillips is working to make the varsity line-up in long horse and floor exercises.

Most of the members of the gymnastics team worked out all summer for at least two days a week. As Orlick stated: "If you want to be really good, you have to work-out all year round. We want to be really good, and that's why we had practice during the summer, and that's why we work-out on the weekends. We have a tough schedule this year, and we have to be ready for it."

Orlick went on to say that he has "a fine group of individuals on this year's team, and a lot of talent. I enjoy working with these young men, and if they are willing to put out 100%, I think we can go a long way this year."
A crowd of 5413 fans saw the Indians of Montclair State College defeat Jersey City State, 24-2, last Saturday night at Sprague Field. The win was Montclair's third in a row and brings their over all season record to six wins and two losses. The win assured the Indians of their first winning season since 1964.

In a sloppily played first quarter, neither team's offense showed much of an attack. Jersey City scored their two lone points early in the first period on a Montclair punt attempt. Tom Kelleher, Montclair's center on the punting unit, snapped the ball over the head of punter Ken Tecca and the ball rolled out of the end zone for an automatic safety. The first quarter ended with Jersey City on the top end of a 2-0 score.

In the second quarter Montclair's offense came to life. The Indians drove 47 yards in nine plays to put their first six points on the scoreboard. The touchdown play was a quarterback keeper, run by Bill Kulikowski around his own right end, from eight yards out. The next time the Indians got possession of the ball they stormed Jersey City by a score of 14-2. Montclair came back in the third period and Jersey City found they could not stop the new exploding offense. As soon as the Indians got their hands on the ball they drove to within field goal position. Bob Brewster added three points to the Montclair score on a 13 yard field goal.

Both Nuzzo and Sullivan feel this year's team will better last years due to better and more experienced personnel in the lower weight classes. "Last year we were behind in many meets because of the weak lower weights," Nuzzo stated. He went on to say, "the middle and heavier weight wrestlers had to win their matches in order to win the meet." Although this year's team is expected to be better, the schedule is also much tougher. With the addition of NYU, LIU, and Seton Hall, the MSC grapplingists will face six universities. Montclair will also have to handle East Stroudsburg, Wilkes, and N.Y. Maritime, teams rated within the top five in the nation.

Montclair opens its season in Panzer Gym on Tues., Dec. 2, at 8 p.m., against a powerful East Stroudsburg squad.

Wrestling Coach Tim Sullivan looks to Mike Nuzzo, senior physical education major and team captain, to lead his squad to a national appearance. Nuzzo has more pins than any wrestler in Montclair State history. Nuzzo has gone to the Metropolitan Tournaments in each of his three years, was Met champ during his freshman year and placed second his sophomore and junior years.

Both Nuzzo and Sullivan feel this year's team will be better than last years. Montclair's winning ways have come about due to the nucleus of senior wrestlers in the men's room. Joe Cocker and the Byrds

Sports Commentary: Super Joe Computerized

Science has developed an IBM computer that can be programmed to give lengthy, multi-language horoscopes. The computer that does this is called Astroflash II.

On its second day of operation, Astroflash II evaluated football's most outstanding quarterback, Joe Namath. The computer gave Namath’s day, month, year, time and place of birth, without telling the machine of the subject’s famous identity.

Astroflash II produced 17 pages of opinions on the unidentified subject. Some of the opinions are as follows. All quotes are taken from the October, 1969 issue of “Sport” magazine.

"You feel fulfilled in an occupation in which you use your hands, especially those where your hands can improve and enhance an object.” The computer was right about the hands, but I don’t think Namath would agree with what the computer suggested he do for a living: interior decorator, hairdresser, or magician. Doesn’t the computer follow sports?

The computer then went on to state: “You cooperate well with a team and remain faithful to it, though you have your own way of organizing the job. You love to juggle with ideas, and here an inherent danger is to make a wrong assumption to start with and then build an entire intellectual argument based on this false premise...Because of your attitude toward money and possessions, you will be a winner, sometimes bitterly so...You may not attain security without a fight, or even without litigation...You have great trouble extracting yourself from associates...You do not really know the meaning of leisure and at times may find yourself in hot water.”

The computer appears to have figured out Super Joe’s problems with Pete Rozelle and his retirement, before he even knew about them. The computer also gave its unidentified subject some advice, such as “You should beware of unleashing vital forces you might have trouble controlling...There is risk of shocks, friction and even serious conflicts. Your associates, your family and your neighbors seem beligerent, but actually the source of friction is likely to be buried deep within you.”

The computer seems to be predicting Namath’s future for him. If this is so, I feel sorry for all the girls who have visions of someday running off with Joe Namath. Astroflash has reflected that: “There is a real danger of retreating into yourself where you can be content with imaginary loves. Such an attitude can produce bachelorhood. This would be very bad for your future.”

Horn Hopes for Good Season

Horn also noted that Rich DeAndrea, an outstanding weightman who just won the discus event at an AAU meet in Rutgers, and a few of his frosh teammates should round out this year’s indoor team.

Horn also mentioned that there will be an organizational meeting for all prospective indoor and outdoor track candidates. The meeting will be held in P-5, tomorrow, Nov. 13 at 4 p.m.
