Today's Earth Day — Save Our World
Here's Hopeing Earth Day Will Avoid Doomsday

By Donald S. Rosser
Special To The Montclarion.

Some people think man is on the brink of exterminating himself. Because few people would welcome human extinction, today has been designated "Earth day" — to make certain that "doomsday" never comes.

Technology has made America great, but it is also polluting and depleting the three major components of the Earth's environment — air, land, and water. In schools thruout the land, Earth day "teach-ins" will alert the nation to the growing danger all living things face from man-made pollution.

Pollution may especially injure the young, but it affects us all. To live, we need water and air that do not poison us. But pollution levels continue to rise.

"To get the key to survival," says U.S. Education Commissioner Jesse A. White, "you must look into the lives of the children. Everybody is interested in something; we must find this interest and not use it as an excuse to drag a student into any activity — a brother of Psi Chi fraternity.

"We must be aware of the true facts. People must become aware of "how man affects and is affected by his environment." People must not only be aware, they must act to remove them.

In a throwaway society, human activity affects the non-human population. We live in an age of statistics. Industry pours man-made wastes into fresh water. Oil, chemicals, manure, sewage, antibiotics, and many other substances are leaking from offshore wells and influencing marine life. Oil and oil products,12 percent a year in the United States.

Air pollution harms more than vegetation. It can directly affect human health. Interest in air pollution killed numbers of people in Donora, Pa., in 1948, as well as in London and Los Angeles in 1952. Air pollution can also damage the health of man. The incidence of the crippling lung disorder called emphysema, for example, has reportedly been increasing by 12 percent a year in California.

Our writer is being polluting on many fronts. Industry pours wastes into fresh water. Oil leakage and oil spills is spreaing over the ocean's surface. Even the average housewife does her share. Phosphates — found in many household products — cause algae to multiply in lakes and streams, killing other forms of aquatic life.

In a throwaway society, land pollution is the most serious form of pollution. Papers quickly rot, but other litter does not. Beer cans, pop bottles, plastics, ties and junk are spread all over and are not picked up by anyone.

The business education major plans to get his masters degree "right away. When I get here I wanted to teach," he explained, but now my thoughts have started to drift towards personnel work.

Benitz, who worked last summer for the department of sanitation, admited that he "enjoyed the job. I saw the sun rise every day last summer," he remarked. "I started at 5 a.m. and sometimes finished the day's route by mid-morning."

President Richard H. Kuehl attended the Association of Student Government conference last Thanksgiving, in Atlanta. "When I came home I was sent to Chicago for an Inter-Fraternity Conference convention, where I met students from all type of schools," he said.

In his new office, Benitz hopes to broaden the base of interested student by writing a column in the MONTCLARION every few weeks. With an emphasis on personal student involvement, he was decisive in saying "suggestions and activities of students are only good reminders for those already involved. They are of little use in getting new people participating. The people in SGA now can only be spread so thin,'" he pointed out, stressing the need for new blood.

Classes Off Today, 11 Thru 2

President Richardson and the Board of Trustees have declared that Earth day at Montclair State College. All classes will be cancelled between 11 a.m. and 2 p.m. on today, to permit attendance and participation in the numerous observances planned around the campus.

THURSDAY, APRIL 23.
CONCERT BANK. Paterson State College, Shea Center for the Performing Arts, 8:30 a.m. WEST SIDE STORY. Players' production. Montclair State College, Memorial auditorium, 8:30 p.m. April 24 and 25.
A FUNNY THING HAPPENED ON THE WAY TO THE FORUM. Musical by the Curtain Line Players. Drew University, Belfort hall quadrangles, 7:30 p.m. April 25 and 26.
FRIDAY, APRIL 24.
ROTTERTDAM PHILHARMONIC. Unity Concert series. Montclair High School, 7:45-8:45. Tickets $6.50, $2.50, 8:30 p.m.
WATER SIDE STORY. See Thursday.
SATURDAY, APRIL 25.
WATER SIDE. The Drew Synch. Drew University, Baldwin gymnasium pool. 8 a.m. April 24 and 25.
WATER SIDE. See Thursday.
SUNDAY, APRIL 26.
BLACK MOTION: Fashion-lecture-slide show. Centenary College for Women. Reeves building, Hackettstown, 8:30 p.m.
JAZZ CONCERT. Paterson State College, Shea Center for the Performing Arts. 4 p.m.
UPPSALA SINGERS. Christmas Lutheran.
West Side Story
It's So Professional That You'll Smell the Big Town
By Roberta Kuehl
Staff Reviewer
Players and friends have done it again. When you see Jerome Robbins' "West Side Story," produced by MSC, you believe in it. The School of Fine and Performing Arts in Memorial auditorium, it won't be just any niche. It will be a special niche for the participants, performing proficiently and quite professionally.
Several actors were outstanding: Wendy Simon as Maria, particularly in dancing the lively "America" and in singing the bitter "A Boy Like That" with Maria, played sweetly and sung with beautiful, clarion quality by Pamela Behnke. Steve Insolera's Riff is strongly sung and toughly acted. With laticine power and grace Dennis Zehorian is Bernardo. Kevin Gilmartin as Tony convinces with his acting ability, but needs more volume and support while singing. Perhaps this defect has improved since opening night.
FEW FAULTS
Speaking of faults, this production is not free of them. Some of the Jets' dancing could use more coordination, and several of the songs need better synchronization between singers and orchestra. And sure, the Jets were trying to be cool, but could they try a little harder? A few members of that gang are terribly miscast (but I won't mention names).
A few names that do deserve mention are Faye Elizabeth Witcher for her rendition of "Somewhere," and several of the songs need more coordination, among them the Jets' singing of "America." T R E N T O N — Clayton R. Brower, dean of educational services at Trenton State College (TSC), has been named interim executive by a special committee of faculty, students and trustees. Due to pressure from both faculty and students, TSC President Robert Heussler had resigned last Feb. 13.

According to Peggy Maro, editor of TSC's paper, the State Signal, the college was in a "precarious state" while Heussler was president. Last July, she explained, the administration and faculty acknowledged a lack of communication among themselves. Tension was mounting and, in December, students listed 26 grievances to the president. However, vague replies were given and about 300 TSC students later picketed the administration building. At this time, students as well as faculty members began calling for Heussler's resignation.

After the two-day strike, Brower was selected as mediator between the petitioners and Board of Trustees. It was his job "to keep communications going."

Stating what she believes to have been Heussler's overall problem as president, the editor said "no administrator's ability was shown for the VA years he was president."

On the other hand, Brower has taken up his new post with a needed "optimistic attitude." Described as a "plan personality," Brower has stated in his press conference that his main objective will be for the college to open up as a family."

Commenting on general student opinion of Brower, Miss Maro described it as favorable. Before Easter, the Signal conducted a poll on who they preferred as acting president. Although only 200 students voted, Brower received the majority of votes.

MSC Teach-In

Presents Case

On Air Pollution

By Maurice J. Moran Jr.

The culmination of many weeks of hard work, meetings and letter-writing will be seen today beginning at 11 a.m. The MSC version of the national teach-in will begin with a short address by Dr. Edward Ambry, director of the New Jersey State Council for Environmental Education and former faculty member at MSC. The planning committee also plans for President Thomas Richardson to address the assembly in the studio theater (K-300) at that time.

KEYNOTE ADDRESS

The keynote address will be delivered by Sen. Clifford Case. He will concern himself mainly with the legislative end of pollution control. There are already state laws that prohibit certain forms of pollution, but large corporations have been able to find loopholes in the laws and so, pollution continues. Case and other federal legislators have been concerning themselves with federal controls on these factories. Another concern is for greater control by the individual who does not cause pollution, but suffers because of it.

After the senator's speech, the town of Montclair will be represented by Mayor Matthew Carter. Montclair held its annual clean-up week last week and several schools and civic groups in the community have been involved in their own educational efforts of Earth day.

Then, beginning just before noon, Dr. Philip Cohen, history department chairman, will moderate a panel discussion on pollution, with several knowledgeable participants. Mrs. Kooslyn Kane, biology assistant professor, will address herself to the biological effects of pollution. This will include some facts that are well known due to exposure by the media, but also others that have not received ample time to be known by all. Dr. Sidney J. Kronish, economics professor, will speak on the economic effects of pollution, especially noting the rise in taxes in order to cart away all the garbage.

Dr. Ernest F. incher, environmental studies professor, will finish the discussion of the social effects, by considering how politics might be influenced by pollution.

Mr. William Anderson of the American Cyanimid Co. will begin the discussion of the role of industry itself. He will speak on the problems and contributions of industry in this regard. The technical problems of waste treatment will be treated by Mr. Al Steffen of the Ralph B. Carter Co., a manufacturer of sewage disposal equipment.

The panel will be completed by Mr. John Galandek, a consultant engineer, speaking on his role in controlling pollution. The floor will then be open to questions and reactions from the students and faculty assembled. In order to feature those interested students attend, the SGA has asked they be excused from classes, or perhaps for professor to use this teach-in as a substitute for class on that day.

Mrs. Vera Brenton, secretary of the social science department was in charge of the panel discussion, while Ambry was responsible for Case's appearance. Janis Lynch, president of the Conservation Club and student chairman of the Earth day steering committee, correlated the activities and announced that films from the Office for National Environmental Education and the Sierra Club would be shown if time permits.

What the Magazines Are Saying

It's Purely Ecology, Mademoiselle

Special to the Montclarion.

Today is Earth day. But it will be a long time before the United States is able to wish itself a "Happy Earth day."

When Sen. Gaylord Nelson originally began the idea of Earth day, it was intended as a means of educating the masses of the dangers of pollution.

It is the widespread belief of the environmental teach-in supporters that this purpose has been accomplished. In the recent months, magazines of the likes of Time, Newsweek, Life and even Mademoiselle have been informing the populace of the American continent of their impending doom due to garbage in the skies, in the rivers and on the highways.

CLEAR FACTS

Mademoiselle is one of the latest. In its April issue, Dr. Paul Ehrlich, ecologist, comments on one of the most horrifying problems facing the earth: people pollution. "Anything that is done to correct the wrongs of pollution is meaningless without population control," he commented in an interview. The facts are clear.

While it took over 4000 years to manufacture the first billion people, it has only taken two centuries to reach three billion. And, in the next 30 years, the world's population may rise over seven billion people.

In an issue that is dedicated to ecological awareness, Mademoiselle went on to offer "40 Different Ways to Depopulate the Earth." In it, the editors list ways that the everyday citizen can help stop the endless pollution that endangers our life. This would include staying away from such chemicals as the new "enzyme-active" detergents since their ingredients do not dissolve in water.

The last portion of the magazine is devoted to those who might want to become ecologists, or dedicate their lives to the saving of the earth's environment. One of the interesting sidelights of the magazine suggests how to live in an urban area. "Smile..." is one comment, while it finishes up with "Care: talk to street kids, help people, get involved in something. Stay human."

A recent issue of Time magazine brought to light the facts of noise pollution as well. "Constant exposure to the 140-plus decibels of an ordinary subway train can cause deafness." One can easily see why, in the city, it is difficult to be human.
Since You Asked Me...

By Celeste Faunce
Editorial Assistant
What are your plans for Earth Day?
Luz Quintana, sophomore, French major: I plan to participate in all activities being held on campus, but would also like to continue working for conservation of our natural resources and stopping air and water pollution.

Don't 'Let It Be'

By Richard Oxman
(Editor's note: Mr. Oxman is an instructor in the speech department.)

I rarely find myself agreeing with Richard Nixon, but his recent statement that "something is wrong with higher education itself when curricula are often irrelevant, structure is often illogical, and there is an imbalance between teaching and research and too often an atmosphere of brilliance on a number of campuses which is not translated into the touch of a person with a current focus on the environmental issues. Earth day only accentuates the fact that the specialists and "relevance" is still an unknown quantity, that our educational institutions have produced have either contributed to or have not contributed to (as a part of solution, you're part of the problem)."

Our colleges and universities are presently in the process of making everyone aware that crises exist, but not doing very much to adapt their curricula or structure to confront them except to offer a "relevant" or course two (very fashionable) and/or to ask increasingly oral to relate course content to environmental issues whenever possible. This is clearly shown in the face of the insincere attention given to the problem by governmental bodies and industries. The articles leading up to, and the films and speeches on, Earth day should make that clear. At the same time that we encourage and support the same procedures for meeting the real crises of the world must be dealt with as soon as possible. At the risk of sounding like the crazed old man who carries the sign which reads "The End is Near." Let me remind you that the end is near when New Jersey natural scientists (or other Jersey colleges) meet for six hours (as they did on April 11 at MSC) and devote the entire time to making one another "aware" of the "crisis." Not only were there a mere handful of faculty, but practically no representatives from the sciences (a contingent which will be needed if any meaningful change is to occur in New Jersey curricula to prepare students for the environmental crises, among others, which lies ahead), and even less students.

It seems distressingly odd that the very people who are crying that "we've only got 10 years left," aren't requiring attendance of others, and haven't sufficiently publicized their "crucial" meetings. Even I found out about the symposium by accident. If we are in a crisis situation, they shouldn't be able to advertise such gatherings in an MSC newsletter. We are in a crisis situation and I think we should do something about it. Don't let "it be." Please contact me immediately.

Opinion Left

Remembering A.J. Muste

By Barbara Fischer

After Chicago and the indifference to injustice in Washington, I think we all began to evaluate the tone and direction of the movement. It's growth among both young and old has increased; the young turning increasingly political, the old content to watch.

It is during April, when the spring mobilization takes place, the month of my first real commitment to activism, that I remember A.J. Muste. A.J. born in 1885, touched and guided the peace movement for a majority of his 82 years. His career was varied and unusual. It encompassed being a minister, a pacifist, a labor leader, an initiator of CORE, a Marxist-Leninist, and finally a leader to an unorthodox Christian pacifist.

FROM MAO TO SANE

Dean of the developing peace movement, it was A.J. alone who could deal with the broad spectrum of the movement from the Maoists to SANE. Only A.J. was able to bring the old left and the new to propel liberal housewives in Women Strike for Peace to their first demonstration. Not even David Dellinger in his role as chairman of the National Mobilization Committee and unlike the New Mobilization Committee could succeed as A.J. had done. Perhaps this has to do with the nature of the movement. Looking through the more defined activities of all organizations within the movement the nature of the movement has changed. Both A.J. and Dellinger had a common belief in pacifism, some organizations and individuals do not. I'm not sure if A.J. would have been able to deal with the movement today. Dellinger has been unable to. Dellinger has relinquished the role of the movement to the new left and the Yippies. He has not been able to unify and coordinate the movement.

LOVE A HUMAN BEING

A.J. had a faith and an interest in every individual. He once said, "If I can't love Hitler, I can't love at all." However, he was full of love. "Love". His definition can be best stated by this quote.

"We are to love them, but I do not take this to mean that we have to work with them politically or be sentimental and naive about certain aspects of their behavior and strategy. To love a fellow man does not require that one support him in lying or exploiting others or some other evil thing. It requires that we do not let him live, if he is not living, under the delusion that these things are good. It means that we love him even when he does evil, believe that he is capable of redemption, try to call on that God in him. To love, to be truly loving, means to love others on the basis of reality.

A.J.'s message is important today. We can only graphically imagine the best way to first look at each individual other than as a human being. The key to anything we attempt to do is in grassroots organizing, and this can only be done if we look at each individual as an individual.

MiniReview

"The Environmental Handbook" Garrett Debell, ed., Aballantine/Friends of the Earth Book NO. 84

The Environmental Handbook might well be called, "What Every Earth-dweller Should Know." This very informative and often frightening book is an anthology of ecological essays by environmental experts from many fields.

Air, land and water pollution are examined in their proper perspective, as real threats to human existence. The population book is examined in terrifying numerical terms. And the vital statistics of chemical industries and pesticides are finally brought thru the smog of false advertising to

PREPARED FOR TODAY

This book, which was prepared for the first national environmental teach-in being held today, not only tells themultitude of facts about pollution but also offers practical solutions on every level. Suggestions which range from the very personal to the very civic; how every one of us can execute influence over the big offenders, like Texaco, General Motors, as well as methods of halting pollution at your own campus and at home communities.

The Friends of the Earth, who organized this year's handbook, plan to publish a new book each year to tell what has or has not been done to curb the pollution which is being poured into the air we breathe. But this is not the kind of book you can just sit back and read. It is a book which truly drives home the message that "the 1970's are the last chance for a future that makes ecological sense."
SUPPORT EARTH DAY TODAY!

Letters to the Editor

Nobody Really Fits the Category

To the Editor:

In reference to your editorial (April 15), I don't believe anyone would fit into the anti-environmentalist category. I'm sure everyone realizes the pressing dangers being caused by pollution. What some of us don't agree with are the tactics being used to "combat" pollution. I think that teach-ins and demonstrations are only going to hurt this cause.

A lot of people are so fed up with demonstrations that they are just going to ignore any cause, no matter how important. And the demonstrators themselves are probably going to get so frustrated because of lack of action that they too will soon be ignoring this cause. This can be seen by just looking at the results of the civil rights demonstrations and the recent war moratoriums.

If Nixon and the rest of the administration feel that this is an important issue, why don't they enact legislation to stop the pollution of our air and water instead of simply backing these planned demonstrations.

Along the lines of your own editorial, it is more than possible, it is a fact that about 100 Americans a week are being denied the right to breathe even polluted air because they are being sent to die in an unconstitutional war.

Eugene Mahler, '72.

Sardines Stink

To the Editor:

May I be so bold and brutally frank as to tell you that a person of your ability and intellect has the audacity to publish a column that positively stinks. Since I know you so well and the type of columns that you do write, your April 15th Observer column about the sardines made my stomach turn.

Here's hoping that your future columns will not smell so bad.

(Mrs.) Fai D. Levine,

Newark.

Change of Address

To the Editor:

In order that you will not be inconvenienced, La Campana will be distributed in September, long after the seniors have graduated. The book is arriving on this new publication date so that such activities as Carnival, Spring Weekend, spring sports and graduation can be covered.

In order that you will not be inconvenienced, La Campana 1969-1970 will be sent to all seniors and Chico-exchange students.

If your name or address will be changed by Sept. 10, 1970, please come to the La Campana office, second floor, Life Hall and fill out the change forms.

Your cooperation is most appreciated.

Nikki Rola, Greg Studers, Editors, La Campana.

Big Plans for Mother Earth

Students throughout New Jersey are observing Earth Day today with demonstrations, lectures and teach-ins. Below is a brief rundown of the day's events on college campuses around the state.

BLOOMFIELD COLLEGE, Bloomfield - Panel discussion covering oil, air, nuclear, garbage, noise, sewage and water pollutants at 11 a.m.

Caldwell College, Caldwell - Student-sponsored teach-in featuring Mrs. Roberta Halligan, health inspector for the borough.

CENTENARY COLLEGE, Hackettstown - Senate candidate Nelson Gross will highlight discussions on government and ecology.

FAIRLeigh Dickenson, Rutherford - Students plan eulogy of Pacisic river.

MONMOUTH COLLEGE, West Long Branch - Students will walk along the beach to pick up litter.

NEW JERSEY COLLEGE OF MEDICINE AND DENTISTRY, Newark - Faculty members will talk on contaminants in the environment.

PATERSON STATE COLLEGE, Wayne - Students are excused from classes to take part in discussions and lectures.

PRINCETON UNIVERSITY, Princeton - Students will partake in town and campus cleanup campaign and will deposit debris at a local railroad station.

A Roundup of Statewide Activities Set for Colleges

RUTGERS, Newark - Richard Sullivan, director of the state division of Water and Air Control, will speak at the law school at 2:30 p.m.

RUTGERS, New Brunswick - Dr. Paul R. Ehrlich, author of "Population Bomb," will speak at the gym, 8 p.m.

ST. PETERS COLLEGE, Jersey City - Showing of Jersey City smokestack films.

STEVENS INSTITUTE OF TECHNOLOGY, Hoboken - Students will distribute handbills to commuters at the Erie-Lackawanna railroad terminal urging government controls on pollution.

SETON HALL UNIVERSITY, South Orange - Sen. Clifford Case will address students; faculty will demonstrate effects of pollution.

TRENTON STATE COLLEGE, Ewing - College cancels classes; lecture by several faculty members.

UNION COLLEGE, Cranford - Photographs of streams, marshes and other local polluted areas.

UPsala COLLEGE, East Orange - Students for an Ecologically-Aware Society presenting speeches throughout; will bury two turtles and read a list of animals about to become extinct. Also an evening program, 7:30 p.m.
"Borstal Boy" looks at revolution
By Mauries J. Moran Jr.
STAFF REVIEWER
NEW YORK -- James Joyce and Bernard Shaw left Ireland by choice. Brendan de- ported from the Emerald Isle forcibly because of his "leftist" leanings; he lived a free Ireland.
"Borstal Boy," winner of the Best Play Tony Award, is the story of a Behan's first attempt at terrorism for the Irish Republican army. It follows his personal improvement, when the 'play's bloodiest scenes evolve, to his three-year-reform at a boy's borstal at Hutleyeay, England. "Borstal" says that there is actually two characters in the play, which was adapted from his autobiography.

Frank McMahon. One is the elderly disabled character. "When the audience first sees Frank," notes bur. "it is only a weak kid with a tin can and a newspaper. He has beaten his mother and father and has been sentenced to borstal."

Toibin, who serves as the narrator, is the reincarnation of the character. He has been caught in a borstal the second time and his mother has left him. He serves a two-year sentence and learns to play the flute at the same time.

The album is live, and the listener does not allow his inclusion here. They can knock out an army and a song on the relative worth of Hitler's sexual organs.

While the day drags slightly in the first act, the overall power of the few words makes it all worthwhile. Remembering an Ireland that is still not united, we hear a stranger say to young Behan: "It must be great to be free." "Yes," he sighs, "it must be so fascinating."

'Isaac' flows happily
By Hal Plain
STAFF REVIEWER
Rock musicals seem to be the wave of the future in theater and in albums, to follow the tide, many shows miss the boat entirely. The new musical, "The League of Gentlemen," not only catches the tide but creates some new ripples of its own in the theatrical ocean. This happy new show is being performed at the Eastside Playhouse, 234 E. 74th St., and is directed by Word Baker and Fredricka Weber.

The rock music is provided by a group called, "Zeitgeist." The show consists of two short musicals: "AND ALL THAT JAZZ" and "Dear Janet Rosenberg, Dear Mr. Kubelik."

Kirk: Master of reeds and miscellaneous music
By Russ Layne
STAFF REVIEWER
Rahaan Roland Kirk, winner of the "miscellaneous instrument" category in Downbeat's first annual jazz festival entitled "And all that jazz. . . ."

The album by Rahaan Roland Kirk is a good cross-section of paintings. By Frank Sulich

The painting styles range from various glazes, he has remarked, "I incorporate a sense of humor, to the word "Y es" will surely fascinate. What matters here is the freaky, floaty, vibrant young girl, called "The League of Gentlemen." To present the great Irish tenor, Gary Figgis, as the narrator-conscience of the play's end (but I won't tell). If you enjoy hard work while watching a play, then rather than have a support "Dear Janet Rosenberg, Dear Mr. Kubelik" will be a delight.

Atto the above-mentioned plan, may be a change, "Juke Fat Boy" is highly entertaining, and more than makes up for any problems encountered in the first. What matters here is the wonderful imagination interplay between the play's end (but I won't tell). If you enjoy hard work while watching a play, then rather than have a support "Dear Janet Rosenberg, Dear Mr. Kubelik" will be a delight.

Stylistic survey accompanies painting, pottery
By Fred Sukich
STAFF REVIEWER
"And now, live and in color..."

The announcer on Steppenwolf's live album, "Steppenwolf Live," begins the two records. The group, one with a great deal of down and high riding excitement. Steppenwolf, consisting of John Kay, Jerry Edwards, Larry Byrnn, Nick St. Nicholas, and Goldy McJohn, are a tight knit, full blown, electric group with a message; and they set it off well. They're the tongue and the group, the words and the music, the response. The aggressively electric "Step On The Grass, Sam." Also included is their newest single, "Hey Lawdy Mama."

The album is already number 39 on the cash box survey and it's still climbing. And rightly so. Following the explosive sales of this record, Steppenwolf will undoubtedly be rated as high on the list with the tops as anyone. If a listener has seen the group live, this album will serve to accent the memories of the performance. The album is live, and the listener lives the life of Steppenwolf.
Ken Traynor's Accomplishment: SGA Respect

By Susan Dominski
Staff Writer

“If the officers don’t work for you, demand changes.” That’s how the current SGA President Kenneth Traynor feels about the duties of the SGA executive officers elected yesterday. “They owe (the changes) to you. This is the only way students can make progress in the college.”

On the eve of SGA elections, Traynor summarized the accomplishments of his administration. “There was more involvement and interest in SGA on the part of students,” he began. “From the lowest point of respect that students held for SGA during the last administration, we have accomplished our main objective of gaining their respect. Students now feel we are working for them,” he explained.

Traynor named his efforts to create a student delegate on the MSC board of trustees as one of this year’s undertakings. Although this has not yet been accomplished, the president said there is a favorable attitude towards this move on the part of the board.

The referendum held by students for the unlimited cut policy was another innovative task cited by Traynor. “It is unfortunate that the faculty have so much to say,” he remarked regretfully, adding that they do play an important role. The policy has since been okd by the Faculty Council.

The project of getting liquor on campus was begun under Traynor’s office and he hopes to have it accomplished “next year, because time ran out.”

Two new SGA offices have been created under Traynor: the vice-president of external affairs, “keeping a pulse on national student movements and funding; and the vice-president of academic affairs, answering academic questions for students.”

“The creation of the all-college Senate was another step forward,” commented the departing chief. “And students became involved in the faculty evaluation program.”

Traynor pointed out that SGA “routine has run smoothly this year, and we have created the necessary interest and trust of students.”

Serving as attorney general to SGA next year, the president mentioned plans “to become involved on various committees and remain as active as possible.”

He emphasized the necessity for electing “somebody who will put himself on the chopping block.” The president of SGA must “work for the welfare of all students.”
Kevin McGrath — Guy With the Lunch Bag

By Carol Sakowitz
Sports Writer

The day was warm and above the sky was a clear blue. Students at Montclair State College were sitting on the grass in front of Life Hall. A guy with dark curly hair sat talking, with a brown lunch bag placed next to him. The big difference between him and the others around him was that he is Kevin McGrath and lately he’s been winning a lot of races for MSC’s track team.

At first he apologized about what he would thought be a “dull interview.” The truth is he doesn’t know why I got interested in running,” reflected McGrath, “I tried running in my freshman year in high school and I liked it.” McGrath, who runs the half-mile, mile and two-mile, as well as cross-country, doesn’t hesitate when it comes to picking his favorite sport. “It’s definitely cross-country.”

“For me, it’s more enjoyable — less monotonous,” stated McGrath. “We run on Garrett Mountain and there are trees all around, you’re not going around in circles.”

The 20-year-old junior didn’t begin college at MSC. For one year he attended St. Leo’s in Florida. He transferred to MSC last year and for one year, the physical education major was ineligible to run for MSC.

He started running for the Indian cross-country team last fall and was the third man on the team, following captain Dale Rodgers and Vic Mizzone. McGrath cited his teammates as one of the main reasons for his interest in running. “The people you meet have a lot to do with it,” explained the runner. “The coach also has a lot to do with it,” he added.

“I get bored easily,” admitted McGrath. To compensate for the monotony of running he keeps his mind on other things. “You have to have your race thought out. You should have an idea what you’re going to do. It’s like baking a cake.”

At other times he “thinks what George (track coach Dr. George Horn) is going to say after the race.” “You can’t think left foot, right foot, left foot, or you’d go nuts.”

It was at this point that Kevin McGrath noticed that the sun was above his head and that it was close to noon. Excusing himself, he picked himself off of the ground, wiped the grass from his pants, grabbed his brown lunch bag and walked to the TUB to meet his friends for lunch.

OFFER BRITISH TRIP
A field trip to the British Isles July 9 thru 30 will be offered by Montclair State College. Flights may be taken for two graduate or undergraduate credits will present a comprehensive survey of England, Ireland, Scotland and Wales. Highlights include a medieval banquet at Bunratty Castle in Ireland, visits to Stonehenge, English and Scotch lake districts, Windsor Castle, Stratford-on-Avon and a performance at the Royal Shakespeare Theatre.

Edgar Bye, director of field studies will conduct the $1095 tour. Costs include all expenses except lunches and dinners in London.

ROLE OF JEWISH EDUCATION UNDER DISCUSSION
The question of Jewish education will be presented by three panelists at the laymen’s conference of the Jewish Education Association of Essex county on Sun., May 3, at 1 p.m., at Congregation Oheb Shalom, 170 Scotland Rd., South Orange.

The panel of speakers will consist of a college student who is critical of the Jewish educational status quo, a young rabbi with ideas on communication with Jewish youth. The program will commence with a luncheon, the presentation will follow, and then the conference will be opened up for questions from the floor.

The luncheon and registration cost will be $3.50. For further information call JEA office at 678-7550.

ALUMN DAY SETS ACTIVITIES
The dedication of Partridge Hall is among the events planned for Alumni day, according to its chairman, Anthony Guttaboda, 1962 MSC graduate.

Named in honor of E. DeAlton Partridge, former MSC president, the new building houses the School of Humanities.

Scheduled events include a campus tour, reunion classes, or luncheon, showing the film, “Salesman” and presentation of the Alumni Association’s 1970 Citation Awards.

They Bounce Indians, 9-0

By Richard Davison
Sports Writer

Montclair State College’s varsity tennis team completed this past weekend with a 1-1 record. Friday saw the Indians bounced out of their first match of the season, 9-0, by Fairleigh Dickinson University.

On Saturday, they downed Dowsboro State College, 8-3, for their first conference win.

Saturday, MSC took four of the six singles matches and two of the doubles matches. Klaus Nemetz, Dan Sullivan, Captain Bob Hemmel and Walter Klein each won their singles matches. Later on Nemetz and Sullivan combined to defeat their opponents in a doubles match. Hemmel teamed with Chuck Maranaciano to defeat their opponents.

Fred, the Indians went down to their first defeat of the season. The going was tough for the whole team as MSC lost all six singles and also were defeated in all three of the doubles matches. The Indians are now 2-1 on the season. They defeated Seton Hall University, 7-2, for their first win of the season. Glassboro is now 4-1 while Fairleigh Dickinson is 5-0 on the season.

The varsity goes back into action this week facing St. Peters College, Jersey City and Bloomfield College.

PART TIME EVENINGS
Alcoa Subsidary; six men; $3.84 per hour; full time in summer. Merit increases, scholarships. Apply in person; Alcoa Subsidiary; six men; $3.84 per hour; full time in summer. Merit increases, scholarships. Apply in person; 3 p.m. Thursday, April 23.
**Montclair State College's track team upset its season record to 2-1 Wednesday by defeating Paterson State College, 87-58. And on Saturday, Coach George Horn's relay team and his high jump and discus entries failed to place in the Iona-Queens relay.**

**Kevn McGrath continued his winning ways by taking the 880-yard dash and placing second in the two-mile run. Trailing PSC's Fred Ross by 15 yards, McGrath overtook Ross in the final leg of the run and finished by 15 yards. The Indians' Rich D'Andrea and Jim Thomas were the only athletes to take two firsts. D'Andrea took the shot put with a 475" throw and the discus with a 151'8". Thomas won the high jump and the triple jump.**

On Saturday, the Indians failed to do anything worthwhile in the relay. The meet, held at Randall's Island in New York, attracted more contestants than spectators. The public turnout was poor, the relay had 25 teams entered, the furthest colleges coming from Puerto Rico.

Thomas, entered in the high jump, failed to make it over the bar at 6'2" and was disqualified early in the meet. D'Andrea made the semifinals but his 14'11½" throw in the discus was one inch shy of the finals. The sprint medley team of McGrath, Staudinger, Glen Hadden and Alex Kaplanovich won their heat but the 3:38.3 time wasn't low enough to qualify for the finals.

**Y'OUR PUTTING ME ON: Sophomore Lou Tuccillo puts during the match between MSC and Newark-Rutgers. The Indians racked up their fourth victory of the season when they defeated Newark-Rutgers 41-0. In earlier action last week the golfers upset Upsala 12-2.**

**Indians Win 2nd — Trip in Relays**

**M S C's Loss To Glassboro: 'Little League'?**

In a game which looked more like little league than college baseball Montclair State College's pitchers gave up 13 hits and 12 walks while Indian fielders committed 11 errors in losing Glassboro State with a 21-10 victory on Saturday.

The loss was the second straight Saturday setback for the Indians' fine diamond record this season. It dropped the Indians' 141'2" throw in the discus was one inch shy of the finals. The sprint medley team of McGrath, Staudinger, Glen Hadden and Alex Kaplanovich won their heat but the 3:38.3 time wasn't low enough to qualify for the finals.

**You Don't Have to Practice If You've Got the Skill**

Practice doesn't always make perfect. Altho for years people have believed that in order to be good at a sport, a person had to spend long hours practicing it, at Montclair State College there is a baseball player who, by his play, is doing much to prove this idea wrong. His name is Joe Baker and his batting average and timely hitting are two main reasons for the Indians' fine diamond record this season. The remarkable thing about the hitting ability Baker has demonstrated is the fact that this is his comeback season after a two-year respite from the diamond.

**Better Than 400**

A second-team all state and first team Group IV all-stater in 1966 while handling the first base chores for Weequahic High in Newark, the 6'3", 190-pound years found him returning to Newark to become a member of the Teacher Corps. In the Corps, Baker spent much of his time back in his home city, teaching, working with children and trying to make it possible for some people to get the same chances to prove themselves that he did.

During his vacation from sports, all of Baker's time wasn't spent at work. On New Year's day, 1969, Joe was married and is now the proud father of Joseph IV.

This year, Joe got the urge to return to sports and was a starter on the football team until his Teacher Corps and family obligations forced him to give it up.

Now, Baker is back on the diamond pounding the ball as if he never was away. Coach Clary Anderson feels that the layoff has hurt his fielding somewhat, and therefore has moved Baker from his first base spot to the outfield, but the .479 average Baker had in Florida as a first baseman hasn't dropped much because of the transition.

**Another Joe Baker?**

Who knows? Maybe someday in the future there'll be another Joe Baker playing baseball for Montclair State. His path to college may have been made easier by his father's work. And maybe by then MSC may make it a requirement to take a few years off during an athletic career.

If it worked for Joe Baker, maybe it can work for everyone.
