Of the 299 students responding to the MONTCLARION parking and security petition thru Wednesday, two felt that there was nothing wrong with the current parking situation. One of the two commented that “I am of the silent minority.” The other remarked that “My opinion is not valid. I am a Montclair reject.”

The MONTCLARION published an editorial last week calling for student reaction to the current parking and security situation. Students were asked to return a coupon identical to the one elsewhere on this page. Of the 299 returned coupons, 252 thought that the “mudflats,” between Finley Hall and the fine arts building remain open at least, until the end of the semester. Paving the gravel lots was advocated by 29 MSCers.

Improvement of the road between Webster Hall and the music building was checked by 262 students. A more regular patrolling of the campus by security guards was called for by 247 responding. Adequate lighting in the Webster Hall lot and the quarry was requested by 262 students, and pothole-filling around campus was endorsed by 286.

Actually, the response might have been much larger — but one of the boxes in which students placed their coupons was missing when the boxes were collected Wednesday morning.

Various suggestions were voiced by those responding. Elimination of faculty spaces was recommended by 78 students. Improvement of security, improved snow removal, transportation to the quarry and elimination of parking tickets also received moderate support.

And, of course, the humorous — but potentially serious — responses came in. One student suggested to “throw Benitz in the quarry.” SGA President Thomas Benitz — a dorm student — is one of three regular student members of the all-college parking committee. One student wrote to us that he was lost in a pothole. Another suggested auction of parking spaces to the highest bidder. Still another merely pleaded: “Do something!”

When we feel that the MONTCLARION has received sufficient answers to the petition, we’ll attempt to meet the parking committee and get some of your problems solved.

By M.J. Smith
Master Plan Correspondent

“It may seem like Alice in Wonderland but our graduate school may be terminated in six months,” said Dr. Thomas H. Richardson, MONTCLARION and the campus bigwigs who make the decisions.

Discussion of Phase Two of the state board of Higher Education’s Master Plan was the major topic at the meeting. Phase Two proposes, among other items, that all existing state college graduate programs be eliminated and a Graduate University of New Jersey be formed. It also suggests a 7500-student maximum enrollment at each state college.

The Master Plan’s Phase Two has received strong criticism from New Jersey educators. In order to involve the faculty, a panel of Montclair State VIP’s, who have researched into the background of the plan presented their statements at the meeting.

Dr. Walter Heilbronner, MSC Vice-President for Instruction, deplored the idea that state college faculties were asked to develop concrete suggestions on the Master Plan in four weeks, when the Board of Higher Education has had three years.”

“There is no rational explanation — indeed, no explanation at all — for the 7500 enrollment ceiling,” he added. Also, Heilbronner pointed out that the data used in the report was compiled in 1968, although more recent figures were available.

Commenting on what is seen by many as an arbitrary maximum enrollment figure, Heilbronner said, “It takes $3161 to create space for a new student at an existing college and $7500 at a new college. Perhaps they just dropped the dollar sign and made that the enrollment goal. Anything is possible.

Furthermore, he stated that the document was drawn up by the board’s planning committee, which is staffers only by one professional educator, who had little experience in planning.

Also, Heilbronner said that the only study of existing cooperative university (similar to the proposed Graduate University) made by the board was a 1½-hour interview with the president of City College of New York.

The plan was conceived in a spirit of contempt for everything the state colleges stand for,” stated James Pettigrew, English professor and representative for the faculty. “It is ingenuously contrived to stamp out individualism.”

Ben Penley, MONTCLARION Editor-in-chief, represented student opinion on the panel. The junior English major said that, since the plan called for a high level of specialization in only several fields in each state college courses in non-specialized fields will be limited in number and faculty quality. “This would gravely affect the general education and liberal arts aspects of student course selection,” Penley said.

Dr. Houston G. Elam, Dean of the School of Applied Arts and Sciences, went on to explain the deficiencies in the plan.

“There is one footnote which modifies the enrollment ceiling — Jersey City may not get that large.”

Elam pointed out that there are no quotes, sources, no bibliography and no appendix in the 138-page paper.

In conclusion, Elam commented, “However, if we don’t do something, we’re going to end up with GUNJ. You know, Graduate University of New Jersey — GUNJ.”

College Leaders Knock Master Plan Correspondent

By M.J. Smith

Master Plan for Higher Education

The proposed Master Plan to eliminate existing graduate programs at all state colleges and all campuses of Rutgers University except New Brunswick. Instead, certain graduate programs would be offered at certain colleges, and faculty members concerned would teach part time at a state undergraduate college and part time at the graduate university.

The hearings were held at the Federal building, here, last week.

Dr. William Hazel, Newark College of Engineering president, testified that the plan "proposes amputation of a limb and amputation of a limb poses a ceiling of 7500 students. The sketchiness of her description makes it difficult for the police to apprehend the attacker. Even if they did, Kloza felt, it would do little good. "The suspect would probably be acquitted for lack of evidence," he said. "It would just be her word against his."

SINCE THE attack occurred off-campus, there is little the college can do about it, according to Daly. He said the Montclair police are "aware there is a problem" and are increasing patrols in the campus area. He explained there had been sporadic attacks on women in the town, but the problem had only recently reached this area.

He emphasized that campus security is doing "everything possible" to provide protection for students. According to Daly, the 24-man patrol will be increased to three shifts, 24 hours a day, seven days a week. Because Daly believes "it's an insurance policy, surprise," the patrols are not run on a set schedule.

Dr. Richardson said the new student patrol will be a valuable asset to the force, which he admits is "vulnerable." He explained that an attack under the direction of fellow students Richard Huckel and James Kearney, will form from 10 a.m. to 5 p.m., hopefully a "deterrent" to crime at the college.

"The attacks are being organized as an added deterrent to crime at the college. About 20 young men will be on duty each night, providing security guard in the campus and issuing traffic summonses."

A FOREIGN student was the victim of the latest attack, in front of Mount Hebron cemetery on the night of March 3. An unidentified young man grabbed her and tried to drag her into the cemetery. A passing car frightened the assailant away before he was able to harm her. Despite the girl's screams, several people waiting at a bus stop across the street made no move to help her.

The girl reported the incident to Joe Kloza, international and off-campus learning center director. He notified Daly, who in turn alerted the Montclair police.

"SHE WANTED to see how great America is," Kloza explained. "Now she realizes that this is the American way. People don't care - they don't want to get involved," he pointed out that the car which frightened the attacker away hadn't bothered to actually stop, it had just slowed down, probably out of curiosity. "The girl could have been killed, for all anybody cared," he said.

"He said her case had been brought by the administration, and she had not been included in the proposed graduate university.

"PHASE TWO of the state's master plan is a projection for about 4500 graduate students. It will also handle off-campus learning center and accommodate up to 7500 students. The master plan is a projection for the growth of higher education in New Jersey."

Also expressing her general disapproval at the hearing were: Dr. William Frazell, acting director of the Rutgers University Dr. College of Medicine and Dentistry, Newark; Dr. Richard Schulte, acting director, Rutgers/Newark president; and George T. Potter, Ramapo College. Heilbronner was also asked to speak after being questioned by Mrs. Katherine Neuberger, state Higher Education master planning director. Mrs. Neuberger was asked if her testimony by her comments. Mrs. Neuberger resigned from the board last December to accept her position on the state board.

"Heilbronner: Plan Lacks Consistency"

Dr. Richardson called the plan "controversial." Mrs. Neuberger commented that she didn't understand what heilbronner had been in New Jersey "only since September.

MONTCLAIR, March 2: The lazy, hazy days of spring seem closer than ever today when barefoot gossips and contassas can take to the heather of campus and field. March blared in like a lamb this week instead of the roar of the traditional lion...BULLETIN: Blizzard warnings have been issued for the greater metropolitan area...

SPRING

Has Sprung...

...The Grass Is Riz...

"STUDYING BIOLOGY-FIRSTHAND": A young coed decides to take a break between classes when spring seemed to arrive early on campus as temperatures nearly reached 60.

"LOOK OUT, CHARLIE": Lacrosse fans suffer from spring fever.

"VISIBILITY ZERO": MSC coed is blinded by sudden storm.

"WOULD YOU BELIEVE ICELAND?": The ice and snow transforms Sprague Library and the pedestrian mall into an Arctic wasteland two days after students celebrated an early spring.

"THE GRASS IS RIZ": Pictures in the News
Roselle Catholic Boys Regional High School was only five years old when I entered in 1963. There was an old orphanage on the ground which was used as a Library. We had to change for gym in a classroom. The Charm of our school was that it was all-boys (at our age, who liked girls?) and nearly 75% of its graduates had gone to college (there had only been one senior class).

By the time I entered, the orphanage was gone, we changed in a locker room and nearly 90% of the graduating classes had gone to college. We had seen three principals in four years and it seemed as if 50% of the faculty disappeared each year.

Today, nearly four years later, the scene is much different. There are many obvious, superficial changes... such as the cafeteria jukebox in the cafeteria offering the latest in hits, replacing the gently lilting as you sway thru the everpresent WRFM music later, the scene is much different. It seemed as if 50% of the faculty disappeared each year.

Middle States evaluation was something of an impossible dream when I was in high school. Today, with the building celebrating its 10th year in September, it has become a reality. "Stability in the key," commented Bro. Stephen Martin, principal for four years. "We have a much more stable faculty and a growing curriculum."

Growing is an understatement. In 1966, upon entering senior year, my dislike for folks drove me to the only innovative course offering: "The United States and its International Relations," a course, taught by Franklin Bauer, that became a valuable resource in my understanding of foreign policy.

Today, the senior is given several choices: "Data processing" (albeit the course lacks a computer), "Sociology," "Business Law," "Accounting." "Modern Literature," "Journalism," and an overview of the humanities. Another addition, a sorely missed course when I got my driver's license, is "Behind the Wheel Driver's Education."

The religion course, which I dishonorially failed once in my sophomore year, has undergone drastic alterations. Now the junior and senior, while still concerned with love, faith and other corn (according to one senior), have delved into the philosophies of Nietzsche, Camus, Sartre, Freud and Jung.

"Next year we would like to try an interdisciplinary approach," said Bauer. "Perhaps in social science, we could study Russian history and Solzhenitsyn's novels from a philosophic and literary point of view, all in the same class."

Independent study may also be the wave of the future, according to Bro. Martin. Stephen Beach, senior "guinea pig" for the project, is working on a comparison of solitude and pressure and an outrageous situation made us revert to some rules. Students are allowed sideburns to the bottom of the ear and hair no longer than their shirt collar. This and a regulation on ties -- albeit no jackets -- has the newspaper editors crying for "the rights of individual freedom."

Ah, sweet bird of youth, if you only knew.
PART TWO

Frat Should Change or Die

Are campus fraternities worth saving? Many of the nation's Greek leaders have serious doubts. Potential members cite the lack of real purpose in the social-fraternity concept pointing out obnoxious pledging schemes and lack of any concrete goals. Frats are caught in the currently tight money squeeze and as a result are losing members.

At Montclair State, fraternal leader James Saxon has pointed out that the centuries-old Greek concept is nearing death. And one Newark College of Engineering leader pointed out many of their fraternal organizations have been just existing in name only.

The question now is change or die. Many frats have faded into mere form for the purpose of maintaining a name or a frat house or participating in some event. This obviously has been unattractive to potential members.

The Greek social concept obviously has not been keeping pace with the needs of today's students. This, in our view, is why frats may not survive.

A revitalization process is, without a doubt, necessary. The frat concept in the past has been a vital symbol to countless college students. But changes must be made to make frats attractive to students.

First, the frats should become more involved in campus problems. Not one Montclair State fraternity has ever spoken out on issues confronting students. Social awareness is lacking. As a result, frats are presently useless to students.

Second, the hazardous and obnoxious hazing practices should be abolished or reformed. What purpose does it serve for students to be blindfolded and dumped off somewhere in South Jersey as part of some frat ritual? There is an obvious lack of respect for human dignity when frats have pledges engage in uselessly degrading activity.

Thirdly, frats should develop and maintain standards appropriate to a modern college. They should work cooperatively in social projects. And they should avoid subtle racial or ethnic practices which may favor one group over another.

We believe these steps are absolutely necessary should the fraternity leaders want their organizations to survive the decade.

Reportage

Changing Prisons

By M. J. Smith
Staff Writer

No doubt, the purpose and effectiveness of the Campus Community Scholar Program has been and will continue to be a hot topic for debate. However, one course in this program is, without question, worthy of academic respect and, perhaps even, admiration.

"Crime and Punishment" is another MSC innovation. For the first time on any U.S. campus, ex-convicts will be lecturing on a regular basis. Members of the New York chapter of The Fortune Society, will present the truth about the American penal system as they have experienced it.

David Rothberg, executive secretary of the society, said at the first class, "Prison reform has replaced ecology as this week's chic issue."

The cover story on Time magazine, several documentaries on tv and the rising popularity of prison literature among the young are all indications of America's growing concern for the inmates of its prisons.

It has been said (by George Wallace, as a matter of fact) that the prison system won't change until the caliber of its occupants change.

Well, the occupants are changing — and changing rapidly. Young men convicted of draft evasion, college students arrested on drug charges — they are all there.

SOCIETAL 'DRUGS'

The sons and daughters of American society are being thrown in the same cell with inmates doing time for 20 years for assault and battery. They are now being forced to live with human beings that have previously been referred to as "the dregs of society."

Suddenly the penal system has become a heavy weight on the American conscience. Something must be done and just sending random letters to the governor won't be enough.

Prisons and prison reform are a part of the unpleasant reality of modern life just as a polluted environment, the war in Indochina and racial inequality are.

This is the value of the CCSP course. A small, action-oriented seminar that is designed to let MSC students learn something about an environment that most of them know little or nothing about.

If You Make It, It'll Be Worth Something by 1972!

Campus Whirl

Benitz OKs 'Unknown' for SGA VP Post

The Benitz administration has picked a relatively unknown man to fill the posh political post of vice-president for external affairs. He's William Asdal (son of Mrs. Doris Asdal, head of MSC's Faculty - Student Cooperative Association), sophomore in industrial arts major and SGA IA representative for less than two months. Asdal is a good-looking, sandy-haired conservative who came to the attention of his SGA benefactors thru membership in Senate.

Asdal told Campus Whirl that he's been "running around like mad" in attempt to find out what his new-found responsibilities will be. Since November, Robert Watson manned the post and also unofficially covered as vice-president for academic affairs when Soren Luhrs left. Now in an SGA approved switcheroo Robert has assumed the post of vice-president for academic affairs, by virtue of his past accomplishments — namely, faculty evaluations.

Observers see this cabinet shakeup as Benitz's last-ditch effort to beef up his administration before new elections are called. Asdal has been called a "popular, well-liked figure" by the few who know him and Watson, "the brains behind Benitz."

* * *

BITS & PIECES: RALPH SILAS, SGA business department representative for the past year, considering running for vice-presidential post... PRESIDENT THOMAS RICHARDSON was considering teaching a CCSP course but changed his mind because of time... NEW YORK TIMES considered doing a story about MSC but changed its mind... JOSEPH KLOZA issue settled... REASONS why DR. LAWRENCE BELLAGAMBA resigned still unclear... QUARRY all right...

SST Poses Big
Ecological Hazard

To The Editor:

Approved by the House and voted against by the Senate, the $290 million appropriation bill for the supersonic transport went into a joint House-Senate conference. Conferences then reported out a $210 million bill. Foes of the plane threatened a Senate filibuster, and a compromise was reached whereby the plane will be funded until March 30. The House and Senate will then have the opportunity to consider the appropriation separate from the Transportation Department bill, of which it is a part. It was a simple vote on the SST, with all New Jersey senators voting against the plane. So did all congressmen, with the exception of Rep. Charles Sandman (R-26th Dist.) and Rep. Dominick Daniels (D-14th Dist.). It is too late to let them know of your displeasure.

Conservationists have consistently opposed the SST as an extreme environmental hazard. Since it will fly in the stratosphere, a part of the atmosphere where there is little vertical movement, the pollutants the plane releases will accumulate — probably blocking out sunlight and causing a "global gloom." The noise produced by the planes will be immense - one SST sounding like 50 jumbo jets at take-off. If the plane ever reaches full speed, it will create ear-splitting sonic booms. In addition, one airline executive has testified that the SST does not meet a genuine market demand, and that the airlines are not ready for it. Under Secretary of Transportation James Beene testified that the government may have to spend $1 billion before the planes are finally built. That's a lot of tax dollars for an environmental hazard.

If anyone is interested in campaigning against the SST, please leave your name with Prof. Frank Kelland, Annex Two, Room five. Any assistance will be greatly welcomed.

Conservation Club.

Richard Insley

Trying to Understand RMN

Sometimes it is difficult to believe that President Richard M. Nixon is seeing the same world as the rest of us. Certainly his press conferences over the past week do not deal with the war which I have been reading about. Like some kind of macabre puppet, Nixon spoke of the operation which produced a six-month high in U.S. troop deaths and a two-year high in South Vietnamese troop deaths as "successful in reducing casualties." Nixon insists that the spreading of the war ever further represents sincere attempts to get out of Southeast Asia. If only the Vietnamese wouldn't act in bad faith we'd be out already.

Apart from the obvious nonsense of assuming that the war is getting us out and that having more people killed reduces casualties, Nixon noted a couple of interesting and frightening things about future plans.

**How Does It**

First, when we asked if we would support a South Vietnamese invasion of the north, (instead of denying it as he had before) Nixon only said that there were no plans for such action. This appears to be a significant difference. This is the way Nixon gets us ready for new outrage. Secondly, Nixon stated that we would keep troop's in Vietnam as long as the enemy held Americans prisoner there. He made this statement knowing that the North Vietnamese and the National Liberation Front have made U.S. withdrawal a condition for release of all prisoners.

Thus, we don't leave until the prisoners are released and the prisoners aren't released until we leave. In free of control forever.

**Watching Testimony**

Those really concerned by the treatment of prisoners would do well to learn about the Winter Soldier testimony recently held, where dozens of American Viet Nam vets told about atrocities which they had witnessed and participated in. Altogether the proceedings were果 most entirely ignored by the media, the information which did get out should be enough to make Americans think twice before getting indignant over what the enemy is doing.

Our actions and policies in Viet Nam have been and continue to be inhumane and we have created the atmosphere in which our captured servicemen must suffer. If we want truly to help them we must act to change that atmosphere.

Richard M. Nixon

frightening plans?

CAHILL STaunch

Supporter

Gov. Cahill is a staunch supporter of the plan. He states: "Failure to adopt the Nixon proposal will only lead to financial chaos for the cities of the nation." Altol support of the proposal is widespread among the governors. This situation is another matter. To be specific, Rep. Wilbur Mills (D-Ark.) wants to destroy the plan before it leaves committee.

As chairman of the powerful House Ways and Means Committee, Mills objects to giving funds free of controls. He believes that state and local governments have not progressed past the Boss Tweed era of corruption, thus making revenue sharing wasteful. Such opposition limits hope that the proposal will reach Congress for a vote.

Financial chaos will occur if revenue sharing plan is passed. States and cities will be forced to implement taxes to create revenue sharing which could have come from Washington. This will be bad news to the already overburdened taxpayer. It is tragic that one man can block a plan which is essential to the welfare of the nation. Revenue sharing would have been the first step of returning to the people some of the billions which are poured into the massive federal bureaucracy.

Our America

GENTS ONLY

CHICAGO (UPI) - About 1500 youths marched out of all-male Lane Technical High School Tuesday and marched or roamed to the Chicago Board of Education building because they don't want girls in the school next year.

BELIEF IN YOUTH

Former federal Judge G. Harold Carswell, after his son Scott Simmons Carswell, 20, was arrested for possession of marijuana:

"He did not have any possession of anything of that nature. What I'm saying is what the boy has told me, and I believe him."

EXTRA MASTER PLAN HEARING SET

Mrs. Katherine Neuberger, hearing chairman for Phase Two of the state Master Plan for Higher Education, announced late Wednesday that an additional master plan hearing would be held "for students only" on April 3 in Trenton, exact time and place to be named. The announcement was made at the third Master Plan hearing at Gloucester State College.

Loneliness in a world of illusion

“Journey”

BY THOMAS BABBITT
Staff reviewer

Ruby Keeler is the exception to the rule. She acts as if she were reciting the alphabet, she sings with blank uncertainty, and she dances as well as any third-year teppichorien aspirant. But she is a star, and we all know that a star is a star regardless.

She sings exactly one song (well, almost) and dances twice (well, maybe) in the innumerable revival of the 1925 musical comedy “No, No, Nanette.” But Miss Keeler’s irresistible charm and winsome appeal win us once again and we wholeheartedly forgive her mediocre (or unabashed lack of) talent.

And who says Broadway has no magic?

However, I still maintain that what I saw at the 46th Street theater is available on any television variety show (i.e., empha-

ized and effortlessly conceived period dancing, low, broad humor and a flood of devastatingly ordinary tunes). The effort and expense of attending a Broadway show should offer a little more than “The Hollywood Palace,” live.

NOT MUCH FUN

“No, No, Nanette” isn’t even really all that much fun, since we’re conditioned to its brand of entertainment the way we’re conditioned to commercials. The few real belly-laughs belong to Patry Kelley as the eternal, overworked maid. The one truly exciting musical moment comes when Helen Gallagher and the suavently dressed male chorus belt out the “Where-Has-My-Hubby-Gone-Blues.”

The staging and choreography are period, familiar and “I’ve-seen-it-all-before.” The costumes and sets are lavish and colorful. But is a mere feast for your eyes worth the wall-breaking deflating of 20 or 30 bucks a pair (and upward for scalpers and ticket agencies — remember, this show’s a hit?)

Don’t get me wrong — this is a highly professional show with a splendid polish and top-notch talent in many departments, but so are most Broadway shows.

If overly-mannered movement detracted from the performances of Jack Mageean as the “kept” women provide for some cheap guffaws.

The score, performed by the orchestra with a set of striking projection devices. Costumes of professional quality were designed by Virginia Chapman.

The imposing figure of Paul Wasserman moved well as Liza. Barbara Passafiume in their smaller roles were delightfully drawn to a role, as Chulkaturin whose painstaking devotion to the theme of extreme loneliness and isolation in a world of illusion and semi-reality.

The presentation of the Ronald Rubinstein work is an in-depth study of that theme, fortified by the finest acting and directing one has seen at Montclair State College in the past four seasons.

In this updated edition, Joan, her friends: Grechen Corbett stars in “Journey of the Fifth Horse.”

PROFESSIONAL QUALITY

Designers John Figoas graced the stage of Memorial auditorium with a set of striking devices. Costumes of professional quality were designed by Virginia Chapman.

The work of Jerry Rockwood proved to be flawless. The direction was distinctly Rockwood while “Journey” remained distinctly Rubinstein with a mutual respect and understanding apparent throughout.

One question, however, remains unanswered. What are the responsibilities of the stage manager? The answer to this vital question may have eliminated many embarrassing moments for audience and performers alike in an otherwise dynamically directed and forcefully acted production.

Joan of Arc

Rock survival at stake

BY HAL PLAIN
Staff reviewer

The new Medieval rock opera, “The Survival of St. Joan” at the Anderson Theatre, is one of the current wave of new theatricals which are seeking to entice the young generation back to the paying theater.

It is not an opera, despite what the promoters say, but it definitely is rock and good rock at that. The music is very fine and the acting is uniformly credible; not fantastic but good enough to enjoy.

The show, with book and lyrics by James Lineberger and music by Hank and Gary Ruffin is based on the premise that Joan of Arc was not burned at the stake.

In this updated edition, Joan, aadequately portrayed by Grechen Corbett, is freed by the church and placed in the care, actually the custody, of a deaf-mute shepherd who has just lost his wife. Richard Bright is the only real standout in the cast. As the shepherd, he does not say a word but his skill as an actor shines thus, as he falls in love with Joan.

DRIVEN BY DESIRE

But the saint is driven by her desire to aid France, so she leaves the shepherd and his son to find out what is happening in the countryside. Here, Joan finds only misery and suffering, and of which she has caused by the war she brought thru her visions.

The score, performed by SmokeRise is good solid rock with very intelligible lyrics. The volume does not overshadow the content. The music is so good in fact, that it can stand alone, the album of “Survival” should be a real hit.

The surrealistic sets, lighting and costumes were designed by Peter Harvey and Thomas Skelton. They are exceptionally good, and add much to the show.

This is not an opera and it is not traditional theater, but it is very good entertainment. “The survival of St. Joan” should survive for a long, comfortable engagement.

Joan and her friends: Grechen Corbett stars in “The Survival of St. Joan” at the Anderson Theatre.

Politicians are taking too long to notice and attend to the problems facing our nation.

Our governmental system isn't all bad. It just needs to become more responsive.

*Advertisement*

National problems are getting "band-aid" solutions because of too much pressure too late. Better communications would help to identify problems and offer solutions early, then government could be more responsive.

We're getting response by demonstrating. Isn't the type of pressure which brings about timely constructive change.

There are so many problems which need action now!

Have you heard of National Response?

What is National Response and how can it help?

National Response provides the way for everybody to rap with the government anytime. It offers a card pack and directory.

But I want to do my own thing and rap freely.

National Response Carbon Card packs allow everybody to do his thing freely—both alone and together.

What do we do with them?

You send the original card to whomever you wish. The National Response directory has all the names and addresses.

What happens then?

The cards sent to National Response are collated by subject and are used like a national petition.

Yes. This approach gets early attention to problems. It puts pressure in the right places.

Hey—That's cool! Those dudes in government can't ignore composite points of view.

Right on! This National Response Service uses all the cards received and shows up at congressional committees with them at the right time.

Hey.... That's doing my thing alone?

Yes. For everybody to do his thing together, just send the preaddressed copy of the message to National Response.

What are National Response Carbon Card packs?

They are a set of cards with interleaved carbons. Write on the top card and get three copies. The third copy is preaddressed to National Response.

What do we do with them?

You send the original card to whomever you wish. The National Response directory has all the names and addresses.

Is that doing my thing alone?

Yes, for everybody to do his thing together. Just send the preaddressed copy of the message to National Response.

Hey—That's cool! Those dudes in government can't ignore composite points of view.

Right on! This National Response Service uses all the cards received and shows up at congressional committees with them at the right time.

MSC’s Squaws T-ounce Glassboro for N.J. Title

Atlantic City — Montclair State’s women’s basketball team, not content to let the men get all the glory, romped over Glassboro State, 62-40, for the New Jersey State Women’s Basketball tournament held in Atlantic City High School.

More important than the win over the Pros, something that the men didn’t find so easy this year, is the fact that the Squaws have notched a berth in the Middle Atlantic Women’s Intercollegiate Basketball tournament slated for March 17, 18 and 19 at the University of Delaware.

MSC started the final game on the minus side as the Pros opened the scoring with a foul shot making the score, 1-0. But the Squaws countered with another basket and in the first minute, their score was knotted at 6-All.

At that point, MSC broke loose in the scoring and at the end of the first quarter led, 17-10.

The Pros, battling against MSC for the first time this season, played a man to man defense which was not expected by the Squaws. Montclair adjusted to Glassboro and according to Coach Cathy Paskert their game plan “went beautifully against it.”

Glassboro’s team composed mostly of field hockey players who utilize a running game, didn’t count on MSC’s pick and roll which opened up the game and allowed the Indians to take advantage of the scoring opportunities. By the end of the half, MSC held a 35-19 lead, and GSC was completely out of the contest.

Freshman Mary Hawk lead the tilt with the game-high score of 16. Denise Wood trailed in double figures, scoring 12.

Miss Paskert, extremely pleased on the outcome, stated that it was “one of the better games.” She had great praise for Captain Joan Ficke and Karen Biscaha and noted that the two were greatly responsible for cutting off Glassboro’s fastbreak.

MSC Slashes Caldwell, 13-3

Led by the perfect 4-0 records of Marge Davis and freshman Nancy Murray, Montclair State’s women’s fencing team routed Caldwell College, 13-3.

In the meet, Captain Connie Collins of Long Island University. Collins, who won two

BILL BALOGH’S TOPS

In North Atlantics

NEW LONDON — Bill Balogh of Montclair State College captured the all-around event in the third annual North Atlantic Gymnastics championship held last Saturday at the United States Coast Guard Academy Gym.

The talented junior turned in a score of 46.05 to best Matt Collins of Long Island University. Collins, who won two events, floor exercise and long

horse, posted a score of 44.10.

Ed Kuhn of Montclair State placed fourth in the all-around event with a score of 41.25. Balogh took the still rings event with a score of 16.05, placed third in side horse with a mark of 15.30 and fourth in the horizontal bar with a score of 14.65.

Kuhn was second in parallel bars with a score of 16.15 and fourth in the horizontal bar.

Montclair State placed third in the team standings with a score of 125.1 behind Long Island University at 134.81 and West Chester State at 130.30.
Tau and the Fudge

Top MSC Bowling

Both the Vanilla Fudge and the Tau Sigma Delta intermural bowling team swept 4 games last week to run their records to the Tau Sigma Delta intramural American League race. Paul Awramko led the winners with a 537 series. The losers Snidely’s Snappers 4-0. Larry Nick Pizzulli was high for the league duel. Tom Farley and overall record dropped to 5-7. whose record dropped to 0-12. forfeit over Phi Sigma Epsilon, losers with a 466 series. Linden 12-0. Tau Sigma Delta crushed Tau Lambda Beta whipped 3-1. Zeta Epsilon ped to second place in the 1968 North Atlantic Intercollegiate Sabre competition. In the finals, Bryer REGAINED TITLE: MSC captain Dave Bryer, who had won the 1968 North Atlantic Intercollegiate Sabre championship, came back from Buffalo with this year’s sabre title. In the finals, Bryer lost only 1 bout, while winning 6.

MSC Fencers Cop Second NAIF Title

By Lynda Emery
Sports writer
BUFFALO, N.Y. — For the second consecutive year, Montclair State College clinched the National Intercollegiate Fencing championship. With the exception of one fencer, Roger Marcegiano, the defending team, which registered 56 points, was identical to last year’s winner which scored 52 points. MSC’s fencers also captured the Syracuse Trophy, given to the epee team that accumulates the most wins. WITH 19 points, Montclair came in first in the epee competition. Indian Bruce Kinter, the defending epee champion, placed third individually with a score of 4-3, so losing his title to Russ Fischer of Newark College of Engineering. Todd Boepple, who took first in foil, this year epee, came in fourth place with a record of 3-4. Mustilli also boasted an individual trophy as Dave Bryer, the 1968 sabre champion, topped the field with a score of 6-1, defeating defending champion George Soriano of NCE. Glen MacKay, also fencing sabre, came in sixth place with a score of 2-5. In the first round they brought MSC’s sabre team to second place with a total of 17 points.

After defeating Nick Franz of Rutgers, Indian Frank North Atlantics, the trio is traveling to the Air Force with a score of 5-2. Mustilli lost the fence-off. He explained, “I just couldn’t get up for the match.” MSC’s Marcegiano was third in foil on most touches with a score of 4-3, after tying with Buffalo’s Larry Singer. In the first round of the epee competition Kinter placed first, going undefeated. Boepple won 8 bouts, while losing 3.

Marcegiano went undefeated in the first round of foil competition, winning all 1 bouts. Mustilli lost only 2 of his bouts. But despite the Indian’s efforts, Rutgers took the foil trophy, with a lead of 1 bout.

MAC KAY LOST only 1 bout in the first round of saber competition. Bryer lost 3.

MSC’s coach Dean Cetrulo was unable to accompany the team to the championships, but a friend of the team, Vincent Surdi, went instead. The six Indian fencers all qualified for the finals in the championships. They ended their season with a record of 130, which is, with the exception of the girls basketball team, the most outstanding Indian team record on campus.

MSC Fencers Still Going Strong

Montclair State fencers begin every meet with a cheer originated by last year’s epee champion, Bruce Kinter. The saying goes, “If we don’t win this match, we can’t be undefeated.”

Started last year, the thought has carried them to a 130 record last year and the 1971 North Atlantic Intercollegiate Fencing championship. With the possible exception of the women’s basketball team, MSC’s swabberskippers are the only ones to make it thru the season undefeated.

Altho the team is coached by Dean Cetrulo, one of the real heroes behind the team is sophomore Frank Mustilli. Acting in the Dale Rodgers tradition, Mustilli not only fences for the team, but does as manager.

INTERESTS OF THE TEAM

Many times during the day, the dark Italian with the flashing smile can be seen in the athletic office, arranging dates for practices, seeing about hotel accommodations and just taking care of the interests of the fencing team. But besides managing the team, Mustilli is the number one foil man on the squad. In the North Atlantics, Frank ended one shy of the title. In fact, if a mix-up hadn’t occurred in the pairings, MSC might have had a foil champ as well as a saber champion.

According to Mustilli, he was told by officials that his bout with Nick Franz of Newark Rutgers was not the actual title bout. Consequently, when slated opposite this year’s champ Mark Volpe, also of Newark Rutgers, he went on to defeat. As Frank puts it, “I just wasn’t up for it.”

NCAA FINALS AT AIR FORCE

But Frank, along with saber champion Dave Bryer and Kinter, should be up for what’s going to happen later this month. Due to Montclair’s repeat championship in the National Intercollegiate Fencing competition, it is traveling to the First Air Force Academy for the NCAA fencing tournament. Last year both Mustilli and Bryer went to the finals in Newark. Dave Bryer was knocked out in the first round, but Mustilli made it to the finals thru the consolation route. This year tho, the three should score highly in the meet. After all, they have a North Atlantic champion named Dave Bryer, Indian team to the championships, but a friend of the team, Vincent Surdi, went instead. The six Indian fencers all qualified for the finals in the championships. They ended their season with a record of 130, which is, with the exception of the girls basketball team, the most outstanding Indian team record on campus.

BUFFALO GETS THE NOD

By Jim Dente
Sports Writer

Montclair State College's basketball team begins its second season this weekend when it travels to Buffalo, N.Y., for the start of the National Collegiate Athletic Association's College Division eastern regional semifinals.

The Indians are slated to take on highly touted Buffalo State College Friday night in the first game of a doubleheader. The second contest pits C.W. Post and Hartwick College of Oneonta.

IRONICALLY, MSC must break a 2-game losing skid in order to survive in the tourney. The Indians fell to Jersey City State, costing them an outright league championship, and then to Fairleigh Dickinson University in the season's finale to finish with 17 victories and 5 defeats.

Buffalo State College is no stranger to coach Ollie Gelston's quintet. The Bengals knocked off MSC, 81-72, in last year's version of the championship and, from all indications, are even tougher this year.

BUFFALO State has captured five New York State university championships and hasn't lost in its last 24 conference battles. The Bengals capped their league title in perfect fashion at 10-0 and their overall mark was 18-3.

THE BENGALS are led by forward Randy Smith, who netted 38 points to defeat MSC last year. Smith, a 3-sport All-American in basketball, track, and soccer, has tallied 490 points in 21 tilts this season for an average of 23.3 per game.

His career totals show 1662 markers for 72 games played (23.1), earning him a berth on the All-Conference team for the past two campaigns. Here's how the two arch rivals match up:

FORWARDS
Tod McDougald (6'3", Jr.) vs. Randy Smith (6'6", Sr.)
Last year's tournament scoring leader, Smith manhandled McDougald to tally 38 points. McDougald will have to play both ends of the court tenaciously and look for help from his teammates on defense. The unheralded MSC star is recovering from a bout with bronchitis in addition to a sprained ankle.

Edge: Smith

Phil Bacarella (6'5", Jr.) vs. Glen Henley (6'2", Sr.)
Bacarella, with a 3' height advantage, must be hot from the field to pick up any offensive slack left by McDougald's defensive emphasis. Henley is very capable at getting position underneath for those all-important rebounds.

Edge: Bacarella

CENTERS
Joe Lyons (6'9", So.) vs. Durie Burns (6'6", Jr.)
Burns can really get in the air if his 6'11" leap in the high jump is any indication. Lyons, taller by some 3", is just getting his first year of experience under his belt, but has shown he can do an ample job off the boards.

Edge: Burns

GUARDS
Harry James (6'1", Sr.) vs. Ken Zak (5'11", Jr.)
James is the key to Indian victory hopes. The MSC captain should have little difficulty stopping the pesky Zak and will be looking for the hoop all night. Buffalo may be forced to double-team James should he get hot early. Zak is an excellent ballhandler and driver, but isn't too accurate from outside.

Edge: James

Bruce Davis (5'10", Jr.) vs. George Holt (5'10", Sr.)
Positively the toughest matchup of the contest. Holt is young and only has a year of experience but is capable of holding his own. A mentally prepared Davis should be a tough customer for him.

Edge: Davis

BENCH

Buffalo features 6'7" forward-center Jeff Mc Clemens who can do the job should any of the big men get in foul trouble. MSC's milestones include Tom Dux (6'4"), Don Stewart (6'4"), and Ken Waller (6'2").

Edge: MSC (strictly a homer decision)

COACHES

Ollie Gelston vs. Dan O'Brien: There is no substitute for experience. Gelston has accumulated over 200 career wins while O'Brien has led the Bengals to an 18-3 log in his rookie year after serving as an assistant for a number of seasons.

Edge: Gelston

PREDICTION

MSC has many edges, but Buffalo has the most crucial — a home court advantage. It should prove to be too much for MSC to cope with. Smith will break open a close game in the final 5 minutes and his club will go on to win by 12. However, Buffalo will fail to successfully defend its title, bowing to C.W. Post in the finals.

FDU Downs MSC

By Carol Sakowitz
Sports Writer

They said it couldn't be done. Montclair State's basketball team, which just got the bid to the NCAA eastern regional finals, couldn't defeat Fairleigh Dickinson University nationally ranked number one in defense.

Well they were right, almost. MSC lost their last game of the regular season, 55-50, but FDU didn't romp over the Indians, as everyone expected.

The contest broke into the scoring column early in the first half on a basket by Ken Maxwell. The Indians countered with basket by Bruce Davis, but FDU took the lead when Howie Weinstein hit for two.

The Knights continued to build their lead and at 5:36 left in the first half Weinstein hit on a charity throw to put FDU ahead, 21-15.

But the Indians, led by Captain Harry James, followed with 7 straight and put the score at 21-all with a little less than 4 minutes to go. James tallied 5 big points in the string. On his first shot, James' jumper made it 1000 in his MSC career.

He is the 12th Indian to score 1000, but only the fourth in a three-season career.

Both teams combined for 4 consecutive turnovers before Weinstein's hook shot put FDU temporarily ahead. Davies hit a jumper, which made a 23-23 tie hold until halftime.

Four minutes into the second part of the contest, the Indians took a 26-25 lead on an outside shot by Bob Heck. Davies made it 30-25 on a 2 charity throws and a jumper.

FDU continued to score and finally made it 32-25 on a jumper by Davis. But the Knights took over in the next 3 minutes to make it 34-33 on a shot from the center by Pete Tierney. Eight plays later Shulman took advantage of a one-and-one situation and put FDU ahead, 43-42.

By then the Knights could do no wrong as they went ahead 48-43 with 3:51 left. FDU slowed down the pace and forcing the Indians to foul in order to get possession.

With the clock stopped at 5 seconds Ollie Smith switched 2 foul-shots thru the basket to ice the Knights' win.

INTRAMURAL TOURNAMENT

Applications are now available in the Athletic Office for a male intramural wrestling match and a swim meet.

The deadline for turning in either application is Monday, March 22. The wrestling match is scheduled for 7 p.m. on March 29, while the swim meet is slated for 7 p.m. on March 22.
