## TETD801
### Title
Policy Perspectives on Teaching and Teacher Education.

### Prerequisites
Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.

### Number and type of credits
3 hours lecture.

### Course Description
This course brings together policy-related theories and practices regarding teacher education and teacher development. It provides teacher educators with the habits of mind, skills, tools, and resources to analyze and evaluate: social, political, and economic arguments for increasing the quality of the teaching force; the competing agendas for the reform of teacher education (including professionalization, deregulation, and social justice); and the competing conceptions of teacher quality that accompany different theoretical perspectives. Teacher educators study a variety of teacher education and development issues, including teacher supply and demand, recruitment, initial preparation, certification, induction, continuing professional development, and program accreditation. They consider the impact of existing policies on teacher quality and teacher distribution and critique policies derived from current local, state, and federal legislation. They also explore their roles as advocates for teachers, students and families. Using data from the Schools and Staffing Survey (NCES), participants investigate a policy-related issue relevant to teacher education and teacher development.

## TETD802
### Title
Teaching and Teacher Education in a Diverse Society.

### Prerequisites
Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.

### Number and type of credits
3 hours lecture.

### Course Description
In this course, future teacher educators examine the intellectual, moral, and practical dimensions of teaching and of learning to teach in contexts characterized by diversity related to such socio-cultural dimensions as race, ethnicity, language, gender, (dis)ability, and social class. They explore theories and research related to preparing prospective teachers and supporting the continuing education of practicing teachers to successfully educate students of diverse backgrounds. They learn about the elements of culturally responsive teaching and approaches to preparing culturally responsive
teachers. They examine issues such as teacher orientations to teaching students of diverse backgrounds, teacher knowledge and beliefs, teacher socialization and development, contextual influences on teaching and teacher education, and programmatic elements of teacher education. They explore different ways to apply what they learn in the contexts of teacher education and teacher professional development.

<th>Teacher Learning Across the Professional Continuum.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prerequisites</td>
<td>Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.</td>
<td></td>
</tr>
<tr>
<td>Number and type of credits</td>
<td>3 hours lecture.</td>
<td></td>
</tr>
<tr>
<td>Course Description</td>
<td>This course examines teacher learning across the professional continuum - from pre-service through the advanced years of teaching. Future teacher educators will develop a framework and tools for thinking about teacher learning over time and different levels of expertise. Attention will be given to what teachers need to know at different stages in their careers and how they can best learn it. Conventional and alternative approaches to teacher preparation, induction, and professional development will be studied. A central premise of the course is that pre-service and practicing teachers need more powerful learning opportunities in order to produce more powerful learning among a diverse student population in elementary and secondary schools.</td>

<th>TETD804</th>
<th>Title</th>
<th>Educational Equity and School Change.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prerequisites</td>
<td>TETD 802. Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.</td>
<td></td>
</tr>
<tr>
<td>Course Description</td>
<td>This course provides teacher educators an opportunity to examine how they can support practicing teachers in engaging in personal, classroom, and school transformation. Future teacher educators examine the dynamics of inequality at the individual, institutional, and socio-cultural levels and the ways in which teachers, individually and collectively, combat these inequalities through school change and social transformation. The course provides a theoretical framework for understanding the moral and ethical dimensions of school change and social inequality based on such factors as race, ethnicity, social class, (dis)ability, and gender. Future teacher educators are asked to apply this framework in investigations of various educational settings.</td>
<td></td>
</tr>
</tbody>
</table>
Participants discuss such core concepts as social power, privilege, dominance and subordination, prejudice, discrimination, liberation, democracy, change-in-action, agency, and teacher leadership.

<tr>
<td></td>
<td>Course Description</td>
<td>Because language is the medium through which education occurs, it is essential that teachers and teacher educators understand the nature of language and the role language plays in teaching and learning. The significance of language for schooling is especially salient with regard to the large number of students in U.S. schools who speak home languages other than English and who speak social and regional dialects of English. In this course, future teacher educators learn to see schooling through a linguistic lens. Issues they examine include the role of language in thinking, learning, and schooling; connections between language, culture, and identity; language variation; principles of first and second language learning; the nature of academic English; and educational practices that promote the success of students of diverse linguistic backgrounds. They develop skills for preparing pre-service and in-service teachers to adapt instruction for students of diverse language backgrounds.</td>

|         | Course Description | This course focuses on the role, structure, and impact of programs of pre-service teacher education, induction, and professional development on the growth and development of culturally responsive teachers. Future teacher educators examine theory, research and practice related to such topics as selecting pre-service candidates; supporting teacher learning in pre-service programs; assessing pre-service teacher candidates; approaches and issues related to the induction of novice teachers; and promoting the formal and
informal development and growth of experienced teachers. Participants use various theoretical, empirical, and political lenses to understand the ways in which teacher education and professional development program curriculum and pedagogy collectively shape teachers' learning opportunities in pre-service and in-service contexts. They also consider the traditions through which curriculum planning and practices are organized and evaluated in university and school district context.

TETD807  Title  Studying Teacher Quality.
Prerequisites  Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.
Number and type of credits  3 hours lecture.
Course Description  There is general agreement that the quality of the classroom teacher is the single most important school-based determinant of student achievement. However, definitions and methods for assessing teacher quality vary greatly. This course examines different conceptions of teacher quality and critically inspects the values, assumptions, theories, and research upon which they build. Future teacher educators explore and use a variety of tools and approaches for assessing teacher quality.

TETD808  Title  Practicum in Teaching and Teacher Education.
Prerequisites  TETD 801, TETD 802 and TETD 803. Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.
Number and type of credits  3 hours lecture.
Course Description  This course provides participants the opportunity to intern as teacher educators and reflect on their apprenticeship experiences. With approval of the instructor, course participants select their type of practicum based on their interests and needs. Examples of practicum experiences include serving as a graduate teaching assistant for a professor of education, planning and conducting a series of professional development workshops in a school or district, or facilitating a teacher study group in a school. Participants must complete a minimum of 30 hours during their practicum. They also attend a weekly seminar where, using frameworks discussed in their pedagogy and curriculum courses, they reflect on their experiences and adapt their practices accordingly.
TETD809  Title  Language and Literacy in Sociocultural Context.
Prerequisites  Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.
Course Description  This course examines language & literacy as sociocultural practices. It is designed to help students become familiar with various sociocultural theories that currently frame language & literacy studies & to develop an informed, theorized position from which to understand and examine language & literacy practices. The course includes an historical overview of literacy research in order to better understand developments within the field today, and examination of sociocultural research orientations, designs & methods. This course also engages with the ideological nature of language & literacy; the ways in which teachers' & students' preferred ways of speaking and being literate can clash within the classroom; sociolinguistic variation and social identities; the dominance of reading over other literacy modes within US education; the ways in which classroom discourses shape student identities and literacy learning; in- & out-of-school literacy practices; and new literacies and their impact on education. This course prepares students to work with in- and pre-service teachers within a range of contexts.

TETD810  Title  Literacy and Digital Technologies in Schools and Teacher Education.
Prerequisites  Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.
Number and type of credits  3 hours lecture.
Course Description  This course provides a context for future teacher educators to develop the knowledge and skills needed for supporting pre-service and in-service teachers as they explore a range of 'new' literacies. As a part of this, students engage with theories about the relationships among literacy, digital technologies, and learning; examine changing conceptions of effective literacy practices in everyday settings; and consider the relationship between new literacies and school-based literacy education. They develop practical know-how to make efficacious use of digital technologies in literacy teaching (and other areas of the curriculum). They develop criteria for evaluating and critiquing new literacies programs and for making judgments about how and when to use different aspects of new literacies of classroom-based educational
purposes. They explore strategies for working with teachers and teacher education students in a range of settings - including more and less resource-rich classrooms.

TETD812  
**Title**  
History of Teacher Education.  
**Prerequisites**  
Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.  
**Number and type of credits**  
3 hours lecture.  
**Course Description**  
This course examines the history of teacher education and its relationship to schools and society from the 19th century to the present in the United States. It concludes study of institutions, organizations, and politics as contexts that shape teachers, teaching and teacher education. Students explore historical and contemporary analyses of curriculum and pedagogy in normal schools, teachers' colleges, school districts, state colleges, elite universities, and alternate routes to teaching. They engage in an analysis of the enduring dilemmas of teacher education practices and policies and the impact of race, ethnicity, language, social class, gender, and (dis)ability on the structures, processes, and outcomes of teacher education.

TETD813  
**Title**  
Learning Connections: The Link Between Schools and Universities.  
**Number and type of credits**  
3 hours lecture.  
**Course Description**  
This course explores the practical and theoretical links between P-12 schools and universities that enable the ongoing development of curriculum, introduction of pre-service teachers to the field of education, induction of new teachers, and sustained professional development for practicing educators. Topics include significant historical events that impacted curricular efforts; the role of collaborative efforts between universities and schools in preparing effective teachers for a diverse society beginning with the Holmes Partnership; the simultaneous renewal of P-12 schools and programs of teacher education at institutions of higher education; research about professional development schools and other cooperative ventures; and the role of collaboratives such as the National Network for Educational Renewal and the League of Professional Schools.

TETD816  
**Title**  
Selected Topics in Teacher Education and Teacher Development.
Prerequisites
Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.

Number and type of credits
3 hours lecture.

Course Description
The selected topics seminar invites students and professors to critically examine, discuss, and analyze current research on issues of concern in culturally responsive teaching and teacher education. Topics will be determined prior to course offering and publicized. Students will be required to engage in in-depth study of the identified topic. This course may be repeated for a maximum of 9 credits.

TETD817
Title
Research in Teacher Education.

Prerequisites
Admission to Teacher Education and Teacher Development (TETD) program or departmental approval.

Number and type of credits
3 hours lecture.

Course Description
This course engages future teacher educators in an in-depth examination of the empirical research and theoretical literature on a teacher education topic of their choice. Participants write a coherent, integrated review of the literature on that topic, with the goal of developing a conceptual and theoretical framework for their dissertation research. The review critically examines research that has already been done related to the topic, highlights gaps in that research, and provides a focus for dissertation research.

TETD818
Title
Research Practicum in Teaching and Teacher Education.

Prerequisites
EDFD 820 and EDFD 821.

Number and type of credits
3 hours lecture.

Course Description
This course provides future teacher educators hands-on experience conducting research that gives attention to diverse student populations and social contexts. With approval of the instructor, each participant carries out a supervised research project focused on some area of pre-service teacher education or teacher professional development. The research practicum may draw on work begun in the qualitative and/or quantitative research methods courses, may be related to a larger research project being conducted by a faculty member, or may be a newly developed project. Depending on the project, the student may participate in only some phases of a larger study or may carry out a smaller study from beginning to end. The primary supervisor for a research project may be the course instructor or another faculty member.
who is carrying out the study. The course instructor will provide primary or secondary supervision of all students in the course. The instructor will make at least one visit to observe and mentor students who conduct field-based research project. Students attend a weekly seminar in which they examine the application of different approaches to research in teacher education and teacher development.

<th>Analytic Review of Empirical Literature.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prerequisites</td>
<td>TETD 803.</td>
<td></td>
</tr>
<tr>
<td>Number and type of credits</td>
<td>3 hours lecture.</td>
<td></td>
</tr>
<tr>
<td>Course Description</td>
<td>In this course, students produce an exhaustive review of the empirical literature in their field of specialization. They conduct database searches to generate a pool of published empirical studies across a specified period of time and systematically analyze the resulting corpus to identify patterns and trends, and, more importantly, to uncover gaps in the research that may inform and shape their subsequent dissertation research. At the same time, students engage in processes and practices associated with academic publishing (e.g., peer review processes, writing to a specific journal's author guidelines, evaluating publishing venues for their work).</td>

discipline-specific culturally relevant pedagogy, and high-leverage practices in science and mathematics. As an elective, this course approaches math and science teacher education from the frameworks for teacher learning developed in foundational doctoral courses.

**TETD828**  
**Title**  
School Culture, Leadership, and Teacher Development.  
**Number and type of credits**  
3 hours lecture.  
**Course Description**  
This course focuses on the practical and theoretical links between school culture and climate, student achievement, and teacher learning, including the mechanisms that shape powerful school cultures. School culture is examined through multiple lenses, including historical, social, and philosophical. Particular areas of emphasis include how school leaders and teachers shape school climate and culture to either promote or inhibit teacher learning, development, and collaboration; the nature and diversity of adult learners; the historical context of the culture of schools; ways in which a school's culture is shaped by and shapes its' participants; the roles of formal and informal leaders in developing and sustaining a school culture; and how cultural change and resistance to it is fostered and maintained. To support doctoral students in their research development, the methods by which school culture has been studied is highlighted throughout the course.

**Title**  
Dissertation Advisement.  
**Prerequisites**  
Matriculation in the Ed.D. Teacher Education and Teacher Development (TETD) Program; Advancement to Candidacy.  
**Course Description**  
This department requires 12 credits of TETD 900. While enrolled in TETD 900, students will work with their Dissertation Chair and their Dissertation Committee. Credits are reported as IP (In Progress) while the dissertation is being written. At the conclusion of the dissertation defense, a final grade of Pass or Fail will be recorded.

**TETD901**  
**Title**  
Dissertation Extension.  
**Prerequisites**  
12 credits of Dissertation Advisement.  
**Course Description**  
Once students have acquired 12 credits of TETD 900 Dissertation Advisement, they must enroll in 1 credit of TETD 901 in every semester in which they intend to work on the dissertation, up to and including the semester of the defense. Credits are reported as IP (In Progress) while the dissertation is being written. At the conclusion of the dissertation defense, a final grade
