Residents relieved as dorm gets hot water

By Jamie McHugh

After weeks of having no hot water, Blanton Hall residents can rest assured that hot water will be flowing from the taps according to Dr. Raymond Stover, director of housing.

One problem which caused the lack of hot water was several defective or incorrectly installed plastic "T" pipes in the dorm's D wing.

The problem was solved last week when the pipes were replaced and a higher grade pipe added. "As of this last replacement, all of the defective connecting pipes have now been removed, so there are no further problems expected in that area," Stover said.

Jerome Quinn, director of institutional planning, said "it is not clear whether the manufacturers or the installers were responsible for the ineffective-ness of the pipes."

Other problems encountered earlier this semester at Blanton also caused hot water shortages. One involved a valve opening in the dorm's heat recovery system. The valve was too small and subsequently had to be enlarged. Another problem concerned the water pump motor which was thought to be satisfactory but was defective. The pump's automatic monitoring system failed to point out any malfunction, but problems were uncovered when the pump was examined.

Residents were relieved that the hot water is back, but were disturbed that these problems had to happen at all.

Noelle Irish, a freshman, said that "It's not to fun to take a cold shower," adding that she's "really glad that the hot water is back."

New proposal and GER's top meeting

By John Papastrat

The "Bold New Vision" proposal and General Education Requirements (GERs) were the main topics of discussion at Wednesday's Faculty Senate meeting.

Dr. Edward Boyno, president of the faculty senate, presented a list of representatives from the faculty senate, board of trustees, and administration. These representatives will meet today in an effort to devise ways of gathering input on the "Bold New Vision" proposal from both the faculty and the students of MSC.

Dr. David W.D. Dickson, president of the college, made the selections for the panel. Included will be Dr. Elliot Minnberg, Dr. Jean Armstrong, and Dr. Roland Garrett from the administration. Edward Boyno, Catherine Becker, and Kay Wilkins from the faculty senate; and Dr. E.M. May, Mrs. M.G. Anisfield, and Dr. R. Birnbaum from the board of trustees.

As for the GERs, members of the faculty senate voiced concerns about the appropriate manner for avoiding course material overlap, and eliminating GER classes which fall into the 300- and 400-level category. These courses were considered to be eliminated as GERs since they are upper level courses and more difficult.

However, Dr. Benediktsson, chairperson of the GER committee, said that the 300- and 400-level courses are not necessarily more difficult than lower level courses; thus, eliminating courses of any level may be detrimental to incoming freshmen since they will be required to take more GER courses in order to graduate.

Another aspect of the GERs which was discussed was the problem of course material overlap. Benediktsson said that the GER committee had not found any courses that duplicated material covered in other courses. If there were similar material covered in different courses, it was presented from a different point of view, said Benediktsson.

The faculty senate did not make any motions or come to any resolution concerning course material overlap or elimination of certain courses as GERs. Further discussion is likely to take place at the next regular business meeting.

Freshman in Clove angered over fee

By Donna Rappoccio

The 1982 fall semester brought an overwhelming increase in roomment, never-ending lines for parking decals, tripling of students in double dorm rooms, and freshmen in the Clove Road apartments. The Clove Road apartments, located on the western edge of the campus, houses roughly 340 students, and as a rule was only allowed to be occupied by upperclassmen. Fifty-four freshmen were selected randomly to be temporarily assigned to these apartments because of an excess number of accepted applications.

The Housing Office said that there was an approximate 150 triple-room situations established on campus at the beginning of September that would be dissolved during the first weeks of the school year. Only a fraction of the triples have been resolled at this time, and this situation still exists throughout all of the dorms. The Housing Office expects that the dramatic increase in rent and the drop-out rate will reduce or demolish the problem before next semester. Dean Raymond Stover, director of housing explained that the over-assignment was due to the abolishment of the freshman speech and communication disorders major. "I feel I've been misguided since the beginning. They say one thing and do another."

Stover said that the freshmen in Clove are getting a $250 rebate in December and could use this money to pay electric bills for the remaining months.

In a previous letter the office had stated that they would pay the utility bill if the freshmen had nowhere to go. However, if the freshman chooses to remain as a permanent resident, he or she must take full responsibility of the payments. Some freshmen in Clove say they feel as if they have no choice because they're trapped with additional expenses. Karen O'Rourke, an undeclared major, said "I never expected to live in an apartment and didn't budget for the extra expenses!" Daisy Perez, a freshman speech and communication disorders major added. "I feel I've been misguided since the beginning. They say one thing and do another."

Stover said that the freshmen in Clove are getting a $250 rebate in December and could use this money to pay electric bills for the remaining months.

SGA news

By Lisa Fochesato and Peter Stankov

At Wednesday's SGA meeting a bill requiring SGA legislators to work in the SGA office for one hour a week failed. Eric Hartman, who proposed the bill, said, "I don't see the difficulty of working one hour a week." Opposition was vehement because the word "mandatory" was used in the bill. Legislators felt insulted that they should be subjected to mandatory hours. They presented arguments that they already spent enough time on committees without being required to be in the SGA office.

Dr. Graydon Tunstall, director of development and external relations, presented to the SGA an Information packet would be sent to all students losing money and potential students. He said that as a result the school was.

The SGA appropriated $200 for a("nuking" Hanoi which was later revealed in Daniel Ellsberg's "Pentagon Papers.

Numerous questions concerning the effects of nuclear war, radiation and a nuclear freeze were addressed by Kaku after his presentation, and audience response was very favorable. Julia Mallieau, one of the organizers of the event, felt the talk by Kaku was very effective. "I only wish we could have gotten more people here," she said.

By Eileen Oleksiak

On September 21 a car was stolen from lot 22. It was the only car theft personal property. On September 22 a car was broken into and a stereo was taken. Another theft occurred on September 24 in lot 17, when parts were stolen from two cars.

SGA news

By Eileen Oleksiak

One burglary and one major theft Hall. Both times the breakins were also took place the week of September 20. On that date, in Annex E, cassette tapes for a research project were taken from an office. On September 26 offices in the Speech and Theater building were broken into and eight typewriters were stolen. Minor thefts of the week included two cases in which personal property was stolen—on September 20 at the Student Center, and on September 26 at Blanton left unattended.

Another incident of criminal mischief occurred on September 24 at the Clove Road Apartments. A stereo was ripped from a phone switchbox. A naked male with a bag over his head made an appearance again this week, this time near the Clove Road Apartments. The subject was not caught.

Women were also two assaults and one brawl in the week of September 20. At the Student Center on Septemver 25 one male hit another during an argument. No complaint was filed. On September 26 there was an aggravated assault at Freeman Hall. A male answered his door and was struck by another male. The victim suffered a broken nose. A complaint is pending.

On September 25, at Bohn Hall, 20 to 30 males from two groups engaged in altercation and assault. The crowd dispersed with the assist of the Montclair police and the Little Falls police.

Nuke physicist speaks on freeze

By Peter Papichak

"If a nuclear weapon were dropped on Manhattan, seven million people in the greater New York area would be vaporized outright," said Dr. Michio Kaku, professor of physics at City College of New York. Kaku spoke in Russ Hall last Wednesday as part of a conference on "A Nuclear War" and "New Jersey Freeze Referendum," sponsored in part by the Students for Social Responsibility (SFSR). Kaku explained that if a nuclear bomb were to be dropped on New York City, temperatures would rise about 50 degrees Fahrenheit within a 20-mile radius and the Atlantic Ocean would begin to boil. Also, fire storms would rage throughout a 40-mile diameter, destroying MSCP and the surrounding area. Kaku added that these deadly effects would kill more people than the nuclear bomb itself.

But Dr. Kaku's concern really begins with U.S. capabilities in this area. He pointed out that Moscow's only defense against these first strike warheads would be "launch on warning." Such a strategy would depend totally on satellites and computers, giving the Soviets the "final cosmic throw of the dice," he said. Under these conditions, Dr. Kaku sees two alternatives. "Either we accept this launch-under-attack scenario and pray that the inevitable never happens, or we strive for a viable nuclear freeze between the two superpowers," he said.

Kaku said the June 12 rally in New York City as a great beginning in the fight for a nuclear freeze, but felt that the movement had to be connected to other issues. He called for the merger of various grassroots organizations to form a multi-issue coalition linking women's issues, the environment, human rights, and organized labor. "If you missed the 60's, welcome to the 80's," he said.

Kaku was also quick to mention the effects of protests on the nuclear policies of the U.S. He cited the effects protesters had during the Nixon administration as an example. "In November of 1969, 200,000 protestors actually prevented the detonation of Hanoi," he said, referring to Nixon's plan to end the war in Vietnam by "nuking" Hanoi which later revealed in Daniel Ellsberg's "Pentagon Papers.

Two superpowers," he said.

Mallieau pointed out that "health and the importance of keeping your gun, your dog, your hair, your job, your health, and the environment." He said that under these conditions, "I only wish we could have gotten more people here," said.

career corner

By Joan Riegel

Dear Joan:

I've been working in a donut shop for the past two years. Now I'm a senior graduate. What can I do?

Panicked

Dear Panicked,

Hold on to your donut job for the time being, but try to fill in the holes in your experience by coming to Career Services to look at our job listings for office and clerical work. Part-time experience related to your career, even at the entry level, can be the key to getting a job after graduation. Sometimes a part-time job can be expanded into a full-time position, especially since employers prefer to hire someone who knows their operation. Also, when you're out in the field you are making precious contacts that can become part of your networking system and can be used for references. Come to Career Services. Sincerely, Joan Riegel

Dear Joan:

I'm a freshman. I don't know what I want to do. I've always been good at selling. I set a record selling Girl Scout Cookies for my troop in the sixth grade, and all the neighborhood kids love me. People say I have a flair for style and my outfits are always well put together. I love sports. I also need to earn some money. Yours truly, Up-in-the-Air

Dear Up-in-the-Air,

It's great that you've made the contact with Career Services so early. You can combine earning with career exploration to narrow down your varied interests. You may turn your Girl Scout Cookie sales experience and flair for clothes into a job in retail sales in a store. Or you may wish to become an independent sales representative and work selling a product on a commission basis. We also have jobs in telephone sales. We have jobs working with children as nursery school assistants, and we have some jobs in the recreation field. Come in to talk. Yours truly, Joan Riegel

Calendar starts a craze

By Kathy Szorentini

A new gift idea is growing among colleges and universities across the country: college calendars. These calendars contain monthly pictures of handsome males from schools throughout the nation.

One company, Epoch Productions, is offering the first full-color calendar entitled "1983 Campus Calendar/The Student Body," featuring 12 college-age males, to be distributed nationally in November for $10 each. Ronald A. Romano, president of Epoch Productions, described the calendar as "a pictorial fantasy of college life as seen by coeds. It isn't pornographic, just a little revealing and clean fun."

In 1984, Epoch will sponsoring a contest for coeds to submit photos of their boyfriends. One sexy young man will be chosen, out of the expected 5000 entries, to appear as one of the calendar's 1984 models. The winner may choose between a Spring Fling Caribbean vacation worth $3000 or $500 in cash. The MSC bookstore carries the 1983 calendar will be sold for $6.95 and is a great gift idea for the upcoming holidays.

College Life Union Board Invites You To Our GENERAL BOARD MEETING

Monday, October 4 at 4:00PM in Meeting Room 2 on the 4th Floor of the Student Center.

*REFRESHMENTS & NEW FRIENDS*

CLUB is a Class One Organization of the SGA
Spotlight

Overseas study offered
By Audrey Davie
Does the thought of being, in the words of Dorothy L. Sayers, “absolutely elsewhere” appeal to you? There is an opportunity for students to travel, meet new people, and take a look at life in a totally different environment without losing any time in their college programs.

There will be an open house with information about study abroad on Thursday, October 7 in Ballroom A of the Student Center from 10 a.m. to 2 p.m. Dr. Curtis M. Jackson, the director of the Intra-Collegiate Academic Programs, and students who have participated in the programs will be available to answer questions about the programs and to discuss the experience of studying abroad. This is a chance to find out more about specific programs and to speak to students who come from, or have been to, countries that you might be interested in visiting. Slides, photographs, and other objects will be displayed. Applications for the programs will be available and refreshments will be served.

The Intra-Collegiate Academic Program allows students to study for a semester at a university in another country. Participants may study in countries such as England, Denmark, Italy, and Australia, to name just a few.

Costs vary according to the country one selects since air fare and the cost of living varies from country to country. Most of the countries offered to students have programs in the $3000 range. This cost includes round trip air fare, living expenses for the length of the semester, and college fees excluding books. Traveling within the country and any other spending such as staying in the country after the semester is finished would be an additional expense.

Courses taken abroad can be transferred to MSC as free electives, general education requirements, or even major courses. Pre-registration materials are sent to the student for the next semester. The credits acquired abroad are considered the same as credits taken at Montclair.

Outlines of the individual programs, applications, and other information are available at the ICAP office, C-306 College Hall, 893-4432. Dr. Jackson will answer “but what about” questions and assist anyone interested in studying abroad.

A visit to the open house or the ICAP office may be all it takes for you to find yourself “absolutely elsewhere” next semester!

Roaches bug Webster Hall
By Peter Stankov
Several residents of Webster Hall have complained of cockroaches in their rooms within the past two weeks. The roaches have been discovered in the kitchen areas on the second floor of the dormitory.

According to Dr. Raymond Stover, director of housing, cockroaches in the dorm will be sprayed in an attempt to eradicate the unwanted tenants. He said, “The dorms are plagued by occasional outbreaks of roaches, but they are very infrequent.” He added, “They are very difficult to eliminate once they get established.” He said that all public areas of the dorms get sprayed once a month, but the private rooms don’t because of the inconvenience to the residents.

A notice dated September 23 was posted informing residents that all rooms, bathrooms, kitchens, and lounges will be sprayed by a professional exterminator. The exterminator will arrive at 9 a.m. on October 2. Students were asked to prepare the rooms by removing or tightly covering food, moving furniture slightly away from baseboards and removing belongings from any closet or drawers which are desired to be sprayed.

Any residents having objections to the spraying for health or other reasons are asked to inform Stover or one of the resident assistants (RAs).

Aerobics popular
cont. from p.3
There was only one male present at Thursday night’s class. Eduardo Vargas, a professor from the Inter-American University of Puerto Rico, felt “kind of funny” about being the only male in an all-female class.

“I’ve never taken a class like this before in my life,” he said. “I’m one of the exchange professors from Puerto Rico and I want to get involved in as many classes offered at the college as possible. I know it (aerobics) is good for my heart but I’ll probably be back in two pieces before the night is over!”

Unfortunately, the SILC budget has no money available for a spring aerobics class. Disbiscigie hopes that if enough attention is given to this aerobic program, however, there will be a spring semester class. Until then, let us continue our support for this program and hope the proper administrators will take heed and the additional funds needed toward this highly popular and successful program.

Album spotlight

‘Nebraska’
-Highway to the heartland

By Timothy Fyfe

The long awaited Bruce Springsteen solo effort, Nebraska, has finally reached area record stores and sales are booming, as expected. Fans are in for quite a surprise when listening to Springsteen’s latest album. Gone is the traditionally hard, driving rock ‘n’ roll rhythms Springsteen fans are accustomed to hearing from Born to Run, and The River. Instead, Springsteen has opted to showcase his unique talents as a story teller—the personification of a road-worn traveler who knows the meaning of life and is not afraid to tell of its winners and losers, through the losers outweighs the winners.

The cover photograph of an unenduring street, a blue and white highway surrounded by a foreboding skyscape sets the appropriate mood for these dark stories which seem to reach out from the vinyl and guide the soul to the heights and depths of emotion. The album requires the complete attention of the listener since the emphasis of each song rests squarely on the lyrics. FM stations have been focusing on the songs “Atlantic City,” “Johnny 99,” and “Open All Night,” which are the more easily recognizable Springsteen tracks and are undoubtedly among the best songs on the album. But the acoustic Springsteen is equally effective on “Highway Patrolman,” “Used Cars,” and “My Father’s House,” songs which distinctly show just how far Springsteen can reach into his own soul for his interpretation of family relationships. The characters that are introduced within Nebraska are not characters at all, but people we know—our friends, even ourselves. Recorded by Springsteen on a four track cassette recorder, Nebraska is as visual an album one could hope for. Instead of a record spinning ‘round and ‘round, a movie, a life story, is unwound before the listener’s eyes and ears. Bruce Springsteen on Nebraska deal directly with New Jersey; its life, people, highways, and heartaches. But this album is not to be dismissed as local fare; since broken dreams, unemployment, and death are indigenous everywhere: everywhere a highway streaks across a state, a nation.

As an artist, Springsteen deserves much credit for breaking the succession of his rock ‘n’ roll albums and putting poetry to music. For this fact, Nebraska might be criticized, but not here.

By CC Ryder

Three huge white cloth letters outlined in red and black hung in front of the stage. No elaborate designs, no revolving stage that graced JFK Stadium exactly one year ago that day when the Stones opened their ‘81 tour. It was plain and simple—The Who began the second date of their farewell tour. The first act, The Whooteis, began the festivities at about 12:30 p.m. After a quick set changing, they hit the stage. The Who have grown tired, naturally, but they looked and sounded like a group who was in the peak of their career. The Who introduced the sound system, the Who played for about 45 minutes. The Who managed to fill, but’s performance last Saturday proved itself capable of the job. He brought to the band an energy and power that has kept The Who strong since the death of Keith Moon. Calling this their farewell tour because the band cannot keep up the endurance of touring seemed a bit unbelievable when Daltry did this thing. Clad in a black and white striped T-shirt, faded jeans and a white jacket, Daltry put out 100 percent to the very end. During Love Reign O’er Me, he stood with his hands stuffed into his pockets making it all look so simple. Townshend’s incredible raw talent was perfectly concentrated when he performed an absolutely memorable version of Drown. His vocals were beyond excellence, as was his guitar playing. It was during We Don’t Get Fooled Again that Townshend displayed his famous 360 degree guitar licks that would be unbelievable had they not been seen. They came back for one encore that began with a “Who sing-along”. Magic Bus, which pleasantly maintains the Bo Diddle beat. But the surprise of the day came when The Who introduced what would be their final song. As the first two chords of Twist and Shout came through the sound system, the entire audience was up on their feet. As The Who stood together and took their bows, one was smiling and so were we. They had done it again. Long Live Rock!
Casale 3 TD tosses make MSC ‘proud’

By Paul Huegel

For the first time in its four-year history, a New Jersey team won the Pride Bowl as MSC put together a second-half rally to edge Kean college 24-16 Saturday at Newark's Schools Stadium. Kean wore the home colors in the annual contest to raise money for Project Pride.

Behind the record-breaking passing of quarterback Mark Casale (MSC's MVP for the second year in a row), the Indians put three second-half touchdowns on the board and held off a late Kean comeback try to remain unbeaten on the year, 2-0-1. Kean's record fell to 0-3.

Before a crowd of 12,832, Casale hit tight end Pierce Frauenheim and tailback Anthony Flemming for touchdowns with just 6:41 gone in the second half to erase Kean's 7-3 halftime lead. Both third quarter scores were set up by interceptions.

On the Squires' first possession on the half, senior defensive end Jim DeRogatis picked off a Dom Lorusso pass at the MSC 41 and carried it 14 yards from the goal line. This time it took Casale just two plays to hit Flemming on an out-pattern for a four-yard score.

Dan Deneher kicked both extra points to go with his 28-yard field goal in the first half as MSC seemed to hold a commanding 17-7 lead.

Kean got on the scoreboard first in the second half when wide receiver/kick returner Rod Dickerson returned an MSC punt 51 yards to the Indians' 20. On the ensuing play, Lorusso went down the middle and found Dickerson open for a 13-yard gain.

After two short running plays put the ball inside the one, Lorusso went over the top for the score. George Martin added the extra point.

Senior linebacker Al Barsdanti was named Kean's MVP but it was Deneher who almost put the lights out for MSC. With MSC ahead 24-10 and just 2:41 on the clock, the 5'11” receiver snared a pass deflected by MSC's Robert Bonavito at the 35-yard and raced untouched into the end zone to cut the Tribe's lead to eight.

The Indian's sophomore linebacker David Larkin, however, blocked the first kick of his career on the extra point try and MSC held on for the victory.

Senior Darrin Small of East Orange caught MSC's final touchdown, a 30-yard strike from Casale, for the Indians' lone fourth quarter score.

Martin booted a 28-yard field goal early in the fourth quarter for Kean.

Poor field position plagued MSC throughout the first half. Three times the Indians were forced to start from inside their own 10-yard line and only once did they start from beyond their own 20. Casale completed 24 of 33 passes on the day for 251 yards, a new Pride Bowl record. Casale set the old mark in last year's game against Central Connecticut State College when he threw for 240 yards.

The 6-foot junior from Union also set a new record for touchdown passes in a Pride Bowl contest with three. The old mark was two, set by Cheyney State College's Tyrone Balkum in 1980.

Lorusso, who lost to MSC last year while with Wagner College, was 10 of 21 for 139 yards.

The win evened MSC's Pride Bowl record at 1-1. The Indians fell 10-3 last year to CCSC for their only regular season setback.

MSC is now 8-0 lifetime versus Kean.

MSC 0 3 14 7 24
Kean 0 7 0 9 16
K-Lorusso 1 run (Martin kick)
M-Deneher 28 FG
M-Frauenheim 15 pass from Casale (Deneher kick)
M-Deneher 4 pass from Casale (Deneher kick)
M-Flemming 4 pass from Casale (Deneher kick)
K-Martin 28 FG
M-Small 30 pass from Casale (Deneher kick)
K-Dickerson 54 pass from Lorusso (kick blocked)

Photos

Kean quarterback Dom Lorusso sneaks over from the line for the game's first score.

Indian Ed Peireno: Lorusso to have a fine career.
M3C's Dan Deneher boots a 28-yard field goal for the Indians' lone first-half score.

MSC's Robert Gross just misses blocking a Kean punt. Darrel Andrews is the punter.

Tribe fullback Jerry Wassel hangs on to the ball despite the effort of Kean linebacker Ralph Marinello to tear it loose.

**"Hour" bill fails vote**

The students who participate in student government tend to be a special breed. For the most part they are dedicated and hard working, willing to give up their time with no complaints and fewer thanks. However, there are also those who are not so willing as witnessed by the SG A meeting last night.

Eric Hartman, a legislator, introduced a bill that would have required each legislator to spend one hour per week working in the SGA office. The bill was simple enough. It didn’t ask them to dedicate large amounts of time or energy, just one hour per week. The bill was overwhelmingly defeated.

Those opposed to it said they were “insulted” by the bill because it made the hour mandatory. Currently, the only “mandatory” time the legislators spend is the hour or two taken up by the weekly SGA meeting. Certainly there are legislators who spend additional time on committee work, but if the committee chairperson’s pleas for members at meetings are any indication, that number is very small.

If the legislators “insulted” by the mandatory hour were to join any Class One organization they would find that most have membership requirements that demand much more than one hour per week.

We commend Eric Hartman and the few legislators selfless enough to vote for the bill. It is ironic, however, that those who voted for the bill’s passage are the same people who devote more than enough time to the student government. They should be proud of their dedication and concern.

We assume that the rest of the legislature did not follow their example. We understand that some of those opposed to the bill also donate a great deal of time to SG A affairs, but for the most part, they are the ones who attend the meetings and do little else.

We ask Hartman to reintroduce the bill with an amendment that would exempt those legislators who already spend time on committee work. We believe the amended bill would both increase the number of people working on committees and decrease the number of people, busy who join the SGA for the affect it lends their resume.

---

**V.D. clinic into testing**

Sexually transmitted diseases (STDs) are a reality for every person who is sexually active. Those who choose multiple partners greatly increase their chances of coming into contact with any of a large variety of possible infectious agents. Because STDs are on the rise, there is new information coming to the surface all the time. The average medical doctor, however, may need your help in diagnosing correctly the type of disease you might have.

Some forms of STDs show no symptoms in their early stages, such diseases are said to be “asymptomatic.” This does not mean that the infection is not there, but it does mean a person can be infected and not know it. Some common symptoms might include: 1) a burning sensation during urination or in the anus, 2) diarrhea, 3) a discharge from the urethra (men only) or the vagina, 4) growths or sores, 5) itchy rashes, or 6) pain in the abdomen, during intercourse, or in the joints or anus.

Any of the symptoms listed above could be due to types of infections or disorders others that an STD, but should receive proper medical testing to determine their origin. If you feel you may have contracted an STD, refrain from sexual relations until you’ve had the proper testing. Perhaps this may be the one perfect time to use the excuse of a headache.

A doctor doesn’t necessarily have to be a specialist to treat STDs, but he should see a large clientele with these diseases and be up to date with current procedures. The treatment of STDs is continuously changing; doctors who treat a large number of patients with STDs will be more aware of what to look for. Public health clinics almost always deal with STDs and are often a good source of free care for college students. They are equipped to test for gonorrhea and treat it; administer blood examinations for syphilis and treat it; and diagnose and treat pelvic inflammatory disease. They offer answers on a large variety of questions.

The National STD Hotline (800/227-8922) can give you information on the public health center nearest you. The College Health Center, located in Blanton Hall, offers blood tests for syphilis and can arrange for further testing if necessary. The Drop-In Center has photographs, literature and a wealth of referrals in the area to suit your specific needs. Feel free to call them 24 hours a day at 893-5271.

**"New" look paper**

The Montclarion has a new look this week as most readers have noticed already.

After years of printing with Janson type face as the main body type, the paper has converted to a new type called Newtext. The decision to change was not reached suddenly, but rather, came at the end of a long process aimed at improving the readability and appearance of the newspaper.

We started looking at different type faces last June, deciding on Newtext in August. We feel that the type is more attractive and easier to read. We hope you agree. Our headline type is also new. In the past The Montclarion has used Bodoni type for its headlines, a type face designed in the 18th century and still widely used by newspapers. We felt that with the change in the body type, the paper should also seek an improved headline type. The type face decided upon was Megaron II, a sans serif type that is easier to read than Bodoni. We feel that Megaron II looks much “cleaner”—more modern—and will improve the overall appearance of the Montclarion.

We have also changed the basic format of The Montclarion from five columns to four columns. Again this was done to improve readability and attractiveness of the newspaper. A wider line length has proven to be easier to work with than the old five column format.

These changes, however, are just the beginning. In the next few weeks The Montclarion will be undergoing some additional changes. Changes not only in cosmetics, but in basic editorial philosophy as well. As any good newspaper should, we are constantly examining our methods or reporting and the type of stories we cover. This examination has turned up some areas of weakness that we are working to correct.

The process is ongoing and we are open to suggestions from our readers. We would appreciate any comments or criticism from students and faculty members. This is not just our newspaper, but yours as well.
Guns on campus

To the editor:

In response to the article in the last issue concerning the Little Falls police incident, I feel that the campus police should be allowed to carry guns. If the campus police had guns they wouldn't have had to call the Little Falls police and in turn could have avoided such an incident. Being that the campus police do know the people of the college community better, the two victims could have been saved the embarrassment that was placed upon them. Maybe the Board of Trustees thought that this would never have occurred, but they are wrong and it could happen again unless they throw out the stupid, old fashioned ideas and realize that these are the 80s, where gun control is an everyday problem. In conclusion, these are the 80s, where gun control is no issue concerning the Little Falls police officer. The issue again unless they throw out the stupid, old fashioned ideas and realize that these are the 80s, where gun control is an everyday problem. In conclusion, these are the 80s, where gun control is no issue concerning the Little Falls police officer. The issue

Mary M. Cuellar

Skin color not issue

To the editor:

I think that in your article of 9/23/82, “Police Draw Shotgun on Innocent Students,” by John Connolly, it was unnecessary to specify the skin color of the Little Falls police officer. The issue here is that of the officer “pulling the gun.” But a racial issue was implied when the police officer’s color was specified. Did it matter if the police officer was black or white?

One of the students, Webb, was quoted as saying, “In 1982 a black man should not have to go through this. He humiliated me.” Well, I have news for Webb. In 1982, no man should have to go through this. It would have been humiliating to anyone, regardless of their color. The point is: let’s not create a racial issue when the issue isn’t racial.

Nancy Hedner

Band blows own horn

To the editor:

This letter is in regard to the Sept-ember 23 issue of The Montclarion. I was greatly disappointed in the paper when it said nothing about the marching band’s first performance at the football game against East Stroudsburg on Saturday, September 18.

Just like the football players, we go through many strenuous hours of rehearsal a week and we would like to receive some credit for it. The band practices for two hours, three days a week, and the majority of us are doing this as an extra-curricular activity and are receiving no credit for it. I am aware that the football team does the same thing, but we must also learn our music; this requires several hours of individual rehearsal. This, unfortunately, is not very easy when you are a music major carrying 18 or 19 credits, plus observations.

The response we received from the stands that night made it obvious to me that we were proudly recognized.

Mary M. Cuellar

Blanton racism

To the editor:

Blanton Hall is separated into what are called “neighborhoods.” If you walk around a little bit, you’ll come across signs telling you this in bold, black print. The print will wear off in a little while, but in the first few weeks of school a sort of syndrome takes over dormitory life—a kind of, well, what you might call “day camp syndrome.” We see the class counselors (RAs) planning campfire cookouts (pizza parties), hikes (volleyball), and other activities. RAs say “you guys” when addressing the “neighborhood” as a whole, as if the floor stands as one, buddy-buddy, ready for some good clean fun.

But, you can’t walk into Blanton today without football strikes out

What do you think about the pro football strike?

By Janet Hirsch and Toni Demarco

“I’m going to drink heavily and go to Histown every Monday night, and if the strike comes to an end you’ll see the Cowboys in the Superbowl.”

Dave Knutsen

“I’m very upset. The players were offered a good deal and they turned it down.”

Henry Rosen

“They should be happy with what they are getting. I might be bored, especially on Monday nights.”

Cathy Evangelista

Without football there is a void in my fall and winter: I was even going to see the Giants on Sundays.”

Toby Kalucki

Kean slips by MSC
in field hockey 1-0

By Glenn Cesa
MSC's women's field hockey team dropped a tough 1-0 decision to Kean college Saturday morning at Sprague Field.

With the game scoreless, Wanda Lewis of Kean broke past Montclair's defense and came in alone on MSC goaltender Sherri Whidden. Lewis' shot slipped between Whidden's pads for the only score of the game at 30:04 of the first half.

"I just wanted to make sure it was on goal," Lewis remarked. "We work the fast break in practice and it paid off today."

MSC Sweeper Dawn Dileo tried desperately to aid the goalie but her effort was in vain. "Our defense got caught out of position. They (Kean) beat us with good stick-work," Dileo said.

At the 15-minute mark of the first half, a Kean goal was scored but was disallowed because the ball was kicked into the goal by a Kean player.

"We had some good opportunities but couldn't capitalize on them," said Nancy Graebener. The main reason for Montclair's inability to score was Kean goalie Lee Ann Pearce, who repeatedly repelled Indian attacks, making six saves.

Montclair's best scoring chance came with about 10 minutes to play when Dawn Grice's shot from about 15 yards out beat Pearce cleanly but hit the left post and bounded away. The team continued to mount a strong last-minute attack but their efforts were continually halted by Pearce and the rest of the Kean defense. Scoops & flicks: Montclair's record dropped to 3-2 with the loss, while Kean up its record to 2-3. Lewis' goal was unassisted. Both teams had 9 shots on goal. No penalty strokes were committed. Strong performances were turned in for MSC by Graebener and Linda Morgan.

Women's Tennis

Taking two of the last three doubles matches, MSC's women's tennis team scored its third win four starts last Saturday downing Rutgers University-Camden, 5-4.

Individual winners for the Indians were Brenda Thomas, Andrea Good- man and Linda Moore.

Tryouts

Tryouts for the cheerleading squad for the 1982-83 basketball season will take place in Panzer Gym Monday, October 4 and Friday October 8 from 4-6 p.m. Men and women are invited to try out. For further information please contact the cheering coach at 693-5264.

SILC is a Class One of SGA.
Women’s victory over East Stroudsburg unprecedented

By Kathy Szorentini

For the first time in its history the women’s cross country team beat East Stroudsburg State College last Thursday, Sept. 30, 24-31.

Patty Leisher once again led the team to victory, finishing first in 18:49, setting a new course record. Teammate Carla Gambill followed in second place with a time of 19:25.

ESSC took third, forth, sixth, and eighth places and MSC’s Pat Salmon finished fourth in 20:01. Dana Caruso and Amy McLaughlin took seventh and ninth places respectively.

Coach Michelle Willis was extremely happy about the win, and that everyone on the team bettered their times by about 20 seconds.

On Sunday the team competed in the Trenton State Invitational and placed sixth out of 16 teams, and second out of the Division III schools.

Westchester won the meet with 48 points. Villanova was second, George Mason was third, MSC rival Trenton State took fourth, Southern Connecticut was fifth and MSC sixth.

Patty Leisher placed seventh overall with a time of 19:25. The rest of the MSC squad was spread out among the 150 or so competitors.

Willis described the team’s performance. “We did well Sunday. Last year we placed seventh in the team standings so we moved up one this year. We should have beaten Southern Connecticut though.”

The times were slow due to problems with the course. Willis explained, “There were about three points in the course where the race practically stopped because the path was so narrow runners had to go through one at a time. It wasn’t a good course for an invitational.”

Golf is team above par

MSC’s golf team, led by a strong performance by Mike Knight, easily defeated Ramapo, the 1982 NCAA Division III national champions this past Friday at Skyview Country Club. In addition, the team finished ahead of twenty other teams from New York, New Jersey, Pennsylvania, and Delaware in the Rider Invitational Tournament.

Montclair’s four-man team total of 296 was seven shots better than the Ramapo team, which posted a score of 303. Towson State and Seton Hall finished tied for third at 310.

Junior lefthander Mike Knight birdied four of the first five holes on the way to 68, winning the individual title by five shots. Following behind Knight were team members Jerry Martino, 74; Dreux Zoeller, 75; captain Jim Schubert, 79; and Mark McCormick, 80.

The College Life Union Board will give you a FREE crystal stem wine glass when you travel with us to The Brotherhood Winery on Sunday, October 17th

A CLASS ONE ORGANIZATION OF THE SGA

Men’s Cross Country

Glassboro State College scored its second straight New Jersey State Athletic Conference cross country victory Saturday, defeating MSC 16-48. The Profs also scored an independent victory over New Jersey Institute of Technology, 15-50.

MSC also defeated NJIT, 15-50. Dan Wiggins was the Indians’ top finisher in fifth place with a time of 25:10. Greg Rapp of Glassboro State College was the individual winner with a clocking of 24:15. MSC is now 2-1 on the season.

Montclair’s four-man team total of 296 was seven shots better than the Ramapo team, which posted a score of 303. Towson State and Seton Hall finished tied for third at 310.

Junior lefthander Mike Knight birdied four of the first five holes on the way to 68, winning the individual title by five shots. Following behind Knight were team members Jerry Martino, 74; Dreux Zoeller, 75; captain Jim Schubert, 79; and Mark McCormick, 80.

Indians split double-header with Monmouth

Cowens stars in win

By Frank DiPietro
MSC lost its first game of the fall season to Monmouth College, 1-0, but came back to win the second game, 6-2. The game was played in Clifton on Saturday at Nash Park.

The story in the first game was Monmouth's ace pitcher Tony Sarno's two-hitter. Sarno, 2-0, threw nothing but smoke and the only two hits were produced by Dave Stanislawczyk and Mike Nicosia, both singles. Besides the two hits, Sarno had six timely strikeouts and gave up four walks.

Monmouth scored the lone run in the third inning on a double by Dan Borgo and singles by Todd DeMatio and John Gregario.

In the second game the Indians connected off Jeff Kriedel for eight hits. The team broke its scoreless drought in smashing fashion on John Cowen's home run over the centerfield fence. A run was added in the fourth starting with a leadoff walk by Cowens and a single by Dan Rossi. A wild pitch to Mike Wadopudja sent Cowens to third. Jody Tobia brought him in with a hit to center.

In the fifth-inning, John Seymour and Bob Yeager both got on on errors by the third baseman (Seymour scored on the second throwing error). Cowens knocked in Yeager with a single and scored on Rossi's hit. Tobia increased the margin by singling in Rossi.

Monmouth's big moment in the second game was Ron Ivanicki's home run in the sixth-inning. Todd Carnevale (2-0) got the win for the Indians (8-1), striking out two, walking one, and allowing four hits and one run in five innings. Greg Bachison picked up his third save, allowing one hit and one run while fanning two and walking none.

On Friday, Yeager's first-inning grand slam home run paced MSC to a 6-0 victory over Rutgers University. Yeager, a sophomore third baseman, collected three hits in four appearances at the plate and had four runs batted in while scoring two.

The Indians added a run in the seventh when Nicosia singled home Wadopudja. The final run was scored in the eighth-inning when designated hitter Stanislawczyk singled home Yeager, who had walked and advanced to second on a wild pitch.

Mike Butler, a junior southpaw, struck out three batters, walked one and surrendered three hits in six innings of play as he improved his record to 3-0.

The Indians play at William Patterson today at 3 p.m., completing a home and home series after having played this same opponent at home on Tuesday. The Indians play home games against Rider College on Saturday, and against St. Peter's College on Sunday (both start at 1 p.m.), and against Bloomfield on Wednesday at 3:45 p.m.
