**Faculty and staff evaluate MSC for Middle States accreditation**

By Linda DeCaro

The MSC faculty and staff are evaluating the college preparation for a 1987 Middle States Association Accreditation. Accreditation, given every ten years, is the approval of a college's educational quality and gives a college prestige, thus increasing enrollment.

A steering committee, comprised of faculty, staff, and students, have organized six task forces. Each task force will evaluate a different branch of the college, including academic programs and student services. Their evaluations will be based on questionnaires and direct observation, will be submitted to the steering committee in May, 1986.

The steering committee will write a final document based on the research results of the task forces. Copies of this 200-page document will be available to students and faculty in September before it is submitted to the Middle States Association of College and Schools. The Middle States Association, based in Philadelphia, judges colleges from eight states applying for accreditation.

A team of visiting professors, randomly selected by the Middle States Association, will visit MSC in March of 1987 to observe daily activities and to verify Montclair's self-evaluation report. The visiting team will then decide whether to accredit MSC. Non-accreditation would make all graduate degrees from MSC invalid. Dr. Max Sobel, professor of mathematics/computer science and chairman of the steering committee, is confident that MSC will receive the college's excellent reputation, he stated.

Greg Waters, assistant to the vice president of academic affairs, and steering committee member, looks forward to MSC's evaluation with a positive attitude. He is one out of a thousand students.
Open to any senior interested in singing the National Anthem and Alma Mater at graduation.

Thursday, April 3 from 1:00-3:00
Room 13 Music Building

Seniors interested in trying out please sign up in the SGA Office by Wednesday, April 2 in Room 103 Student Center Annex.

(Copies of the Alma Mater Available at the SGA Office)

Tuesday-Friday 12-3

CLUB IS A CLASS I ORGANIZATION OF THE SGA
893-5232
By Janine Myatt

Our last article focused on illegal questions and presented appropriate responses. Below we have selected eight of the more challenging questions typically asked and given suggestions on how to respond.

Question: Tell me about yourself.
Reply Hints: This common opener which is a "sell me" invitation throws many unprepared interviewees. You should 1) mention how you learned about the position and organization, 2) express your interest in and desire to work for the organization, 3) present three or four of your top functional selling points relating to the position.
Question: Why should I hire you?
Reply Hints: Throughout the interview this is of the uppermost in the interviewer’s mind. A direct "sell me" invitation. You must 1) relate all your past experiences, educational background, and skills to the job and/or department and 2) support your skills with evidence.
Question: What is your greatest weakness?
Reply Hints: "This qualifies to be the suicide question" for even the most qualified candidate. Your response can either 1) point to a non-job related area that needs some improvement and state what you are presently doing or plan for the future to improve, 2) Use a past weakness and show how you have improved upon it, or 3) Present the fact that you lack related experience but state that you are a hard worker: quick learner. It's important to remember that your reply should always turn the negative into a positive and communicate self-confidence.
Question: Career wise, where do you expect to be in one year, three years, and ten years? What is your plan of action for achieving these goals?
Reply Hints: As you research the career field determine which positions you can realistically reach in three years and in ten years. Read about and talk to people who have successfully advanced within your career field and if possible the particular company. In your answer state that you possess the knowledge and desire, have the potential and capability, and will acquire the necessary skills for growth within the organization.
Question: Describe a past failure of yours and how you handled it?
Reply Hints: Remember, always turn anything negative around to the positive. As you present a past failure focus on the problem solving skills you developed and the knowledge gained from the experience.
Tell me a story!
Reply Hints: Have fun! Allow your creative juices to flow! This is an opportunity to demonstrate your creativity and ability to think on your feet.
Question: What are your financial requirements for this position?
Reply Hints: Prior to your interviews you should read about and talk to people in the field to determine a realistic salary range. Your interest in the company and present opportunities. If asked for a dollar value, present a salary range. When asked for a specific figure, state the top of the range and the fact that you are qualified and capable of producing quality work.
Question: What can you tell me about our company, products, and plans for the future?
Reply Hints: Emphasize that you are very interested in working for the company, have been for a while, and your decision to seek employment is based on sound reasons. As you talk about the company, their products, and plans for the future, cite the various resources you used to obtain the facts. (Pick up the handout on "Research a Company" in Career Services office)

Some general reply hints to remember:

1. Always present yourself in a positive light. Patting yourself on the back, if done professionally, comes across as confidence and not conceit.
2. Anything negative that comes up in the interview, turn around to the positive.
3. Support all your skills with evidence which clarifies and substantiates your claims.

Lambo discusses difference between real and sexual love

By Regina Slavinski

"Women who want love may seek it through sex because they hope a physical connection will lead to the emotional intimacy of love," said Debra Lambo, at a Women's Center lecture Wed., March 12.

"There is a distinction between physical and emotional needs and the satisfaction for both is found in different spheres," said Lambo, a private counselor. "Sex is a physiological, biological need while love is a spiritual, emotional need. Both are ways of connecting to another person to form a union," she said.

"Women lose perspective in their search for Mr. Right," said Lambo.

Pilgrim policy investigated

By Oren Zeve

Responding to student concern over the new policies of Pilgrim State Bank, the SGA legislature passed a resolution "requesting an investigation into the procedures, as well as research into alternative banking institutions." The bank, located in the Student Center, has monopolistic right to the bank services on campus through the Faculty Student Co-operative Association.

Wendy P. Shultz, a co-sponsor of the bill, noted that,"It isn't just the fee, but whether the bank is really serving the students and campus community." Aleyah Mubarak, the main sponsor of the bank, has been researching the situation and setting up appointments with the parties involved. She expects that the support of the legislature will create a stronger basis for the investigation and further action.

In an attempt to inform the legislature of the current actions of the Faculty Senate, Dr. Judith A. Shillcock of the biology department told the members of the SGA that the Faculty Senate opposes the use of the Pass/Fail option and that it should be limited to free electives, not General Education Requirement courses.

The legislature approved the charters for a number of new and old organizations. Class One Concerts has "more diverse programming than in the past," according to Bunny Behring, legislator and executive producer of the organization. This year's concerts have included a "Battle of the Bands," Marshall Crenshaw, and upcoming concerts with Stevie Ray Vaughan and jazz artist Stanley Jordan. HRQ, which seeks to assist students in their personal growth, recently completed another "Weekend" and will continue its workshops and Likwid Theatre.

La Campana, the yearbook, whose name means "the bell" in Spanish, was also discussed for Class One renewal, but questions concerning a proposed name-change created questions regarding the book's future identity and the process which was used to select the name.

The Weekend College Student Association received a renewal of its Class Two charter and Kappa Alpha Psi received a renewal of its Class One charter. Class One Concerts has "more diverse programming than in the past," according to Bunny Behring, legislator and executive producer of the organization.

"Weekend" and will continue its workshops and Likwid Theatre.

"Weekend" and will continue its workshops and Likwid Theatre.

THE JOB???

Are you interested in making money? Are you enthusiastic? Are you outgoing?

WOULD YOU LIKE TO ACQUIRE

Professional Training
Improved Communication Skills?

REQUIREMENTS
Enthusiasm, good communication skills and a quick mind.
You must be able to work 2 to 4 nights Monday through Thursday, 6-10 p.m.

THE JOB???

Telephone fundraising for:
A major university
An international animal welfare organization
A local Jesuit college
A national public library

BENEFITS
You will earn up to $8.00 per hour!
There will be bonuses and incentives!
You will receive paid professional training!

Supermarket survival: the quest for food

By MaryEllen MacIsaac

Mary Macki turns her head. Bam! "I have the right of way," a crass woman says. Mary proceeds down the aisle with a shopping cart that has one dormant wheel. "Where's the tuna?" she asks a clerk. "Uh, aisle eight or ten or six," Aisle eight is frozen foods; ten is household items. The overhead speaker announces, "Special this week, 10 oz. crackers $1.69 with triple coupon." Aisle six is junk food.

Frustration, confusion. Will Mary ever find the tuna? Will she ever get out of here? Will she survive the world of the supermarket?

As she attempts to take the last "normal" shopping cart, a tiny woman scoots ahead and grabs it. "I saw the supermarket. I have the right of way." Mary passes on the lettuce. Her list consists of seven items: tomatoes, lettuce, cheese, milk, bread, chicken and tuna fish.

Mary's Dodge creeps slowly to the only available parking spot. However, she has to screech on the roadway. Battered shopping carts block the roadway. Shoppers block the roadway. Honks! "Special-$1.29 per head." Mary selects her favorite loaf of seedless rye bread. "You should really choose white bread, dear. It's much better for you," says the tiny shopping cart thief Mary met earlier.

Mary selects the last "normal" shopping cart, a tiny woman scoots ahead and grabs it. "I have the right of way." Mary passes on the lettuce. Her list consists of seven items: tomatoes, lettuce, cheese, milk, bread, chicken and tuna fish.

Mary smiles a thank you. As the thief leaves, Mary sees the "Special-49¢ a piece. Mary picks the "special" red colored one.

The lettuce is also not its traditional green color. In fact, it resembles a yellow-beige boxie ball. "Special-$1.29 per head." Mary passes on the lettuce.

The thief drops a loaf of white bread into Mary's cart. Mary selects her favorite loaf of seedless rye bread. "You should really choose white bread, dear. It's much better for you," says the tiny shopping cart thief Mary met earlier.

The lettuce is also not its traditional green color. In fact, it resembles a yellow-beige boxie ball. "Special-$1.29 per head." Mary passes on the lettuce.

Next on the list is cheese. A crowd of curler-haired women and half-shaven men swarm the deli counter. Serving number 27. Mary's slip reads 39. Number 27 is confused. "Sir, would you like white or yellow American cheese?" the red-lei deli man asks. Number 27 asks what the Swiss cheese looks like today. "Beautiful. Would you like some sir?" No answer. "Sir?"

Mary smiles a thank you. As the thief leaves, Mary sees the "Special-49¢ a piece. Mary picks the "special" red colored one.

The only reason he didn't want me to go to college was because he couldn't stand to see someone close to him doing what he couldn't. Why wish someone else good luck?

I dropped out of college because I was engaged to be married. We needed money and you can't earn much while in school. He wasn't willing to wait until I graduated and I didn't know any better. That was five years ago, I was 18 at the time. I was very vulnerable when I was younger.

I was pressured into dropping out. I was made to believe by my boyfriend that being married to him was more important than doing what I wanted to do. I went to work as a secretary because I had to come to YOU!" Now I know that's ridiculous. College saved me.
Enjoy the spring break; but the best is yet to come

Once again it's the time of year when we think of Frisbees and softballs instead of ice and snowballs. Yes indeed, spring is here! As a matter of fact, today is the official start of spring.

With the first week of nice weather, we are beginning to see the symptoms of spring fever: MSC students lounging in the quad, tossing footballs, playing volleyball, and generally enjoying the sunshine.

This editorial could implore students to ignore the weather and "keep their noses to the grindstone." Think again.

After a long, cold winter and eight weeks of academic toll, the time has arrived to loosen up and enjoy spring break.

MSC students in the next nine days will have the opportunity to take their lives easy and engage in more of their favorite activities. Some may take a holiday (perhaps in Florida), some may "hang out," or some may take advantage of their free time to catch up on the school work which they have put off all semester.

Whatever their motivations, spring break will give all students the chance to relax—to take a breather.

Having overcome the trials of mid-terms, a little rest and relaxation will leave everyone less irritable. Returning to classes and other activities, students will be more easygoing.

We can all look forward to the nice weather and the SGA sponsored festivities of Spring Week. From April 22-27, the campus will come alive with assorted events, including the chance to set the Guinness world record for the most people playing Twister.

Also, the usual variety of games, concerts and carnival rides which will surely make campus life exciting.

The Montclarion editors and staff would like to wish everyone a happy and safe spring break. Knock yourselves out!

And when you get back, keep your eyes open. There will be plenty of good times ahead. So get involved!!

viewpoint

New scientific breakthrough may end the abortion debate

Boston: Ever since Roe took on Wade before the Supreme Court, abortion has been a great debate for the ambidextrous. Americans have argued the issue with two hands and two minds until they arrived at a stalemate. To put it succinctly, they don't really like abortion, and they don't want it outlawed.

The basic public opinion polls on this haven't changed in several years, although a huge percent of Americans collected from both sides are uncomfortable with their own position. We seem stuck in an endless ideological mud season.

But while we are spinning our wheels in one place, there is a new technology heading down the road that pushes the old arguments in a ditch. RU-486, a drug developed in France and being tested here and in California, may be more to close down abortion clinics than all the pro-killers have done, but not in the way they expected. It may make early abortions a totally private matter.

The French doctor who discovered RU-486, named for the drug company Roussel Uclaf and its own molecular structure, calls it a "contraceptive," something between a contraceptive and an abortifacent. What it does is to prevent the cells in the lining of the uterus from getting progesterone. Without progesterone the wall of the uterus breaks down just the way it does for menstruation.

But while we are spinning our wheels in one place, there is a new technology heading down the road that pushes the old arguments in a ditch. RU-486, a drug developed in France and being tested here and in California, may be more to close down abortion clinics than all the pro-killers have done, but not in the way they expected. It may make early abortions a totally private matter.

The French doctor who discovered RU-486, named for the drug company Roussel Uclaf and its own molecular structure, calls it a "contraceptive," something between a contraceptive and an abortifacent. What it does is to prevent the cells in the lining of the uterus from getting progesterone. Without progesterone the wall of the uterus breaks down just the way it does for menstruation.

RU-486 can prevent a fertilized egg from implanting in the uterus, making the drug more like birth control. It can also ensure that an implanted egg sloughs off, making it more like a chemical abortion. A woman can use it either as a once-a-month pill or as an early abortion pill.

This is not something you'll find at the pharmacist this week. It will be five years before any form of RU-486 is available for the U.S. marketplace. Unlike the so-called "morning-after pill," RU-486 doesn't contain any estrogen, or estrogen side effects, but there is much research to be done. A public that has been through pill scares and IUD horror stories is and should be highly skeptical about the safety of any new drug.

It's much too early to assess the medical questions. But it's not too early to start thinking about political and moral side effects.

Today the ethical dilemma of abortion is focused most sharply on second-semester abortions, and particularly on those weeks when it is legal to abort the same fetus that might be saved by neo-natal intensive care. As Sandra O'Connor wrote in a recent Supreme Court decision, abortion law is on "a collision course" with medical technology.

This newer technology could derail the collision. RU-486 works in the first six weeks, before the doctors perform surgical abortions, and when the support of the public is much greater. There are no "silent screams" at two or four or six weeks. There are no abortion clinics to picket or bomb when the procedure is chemical. It is an alarming prospect for pro-killers.

But that doesn't mean that RU-486 would be unequivocally cheered by pro-choice supporters. A safe and nearly painless abortion would benefit patients, yet only a hard-core few are comfortable with the notion of using abortion for birth control. RU-486 would surely increase that use. Pro-choice people have tried to keep the line between birth control and abortion clear. This chemical by its very nature mixes the usage.

Pro-choice people also believe in just that, choices. At their best, clinics and counselors encourage women to make decisions, to take responsibility. Abortion ought not to be traumatic, but should be serious. Yet, a woman can take RU-486 without knowing whether she is getting an abortion. The moral questions would be easy, perhaps too easy, to avoid.

There is an irony in all this. In 1972, the Supreme Court ruled that abortion was a private matter. Since then it has been a most public debate. In and out of Washington, opponents are locked into the trenches of permanent conflict.

Yet in the distance, a new invention of medical technology may simply and irrevocably moot the whole controversy. Abortion may become as private in fact as it is in law, as private as taking a pill in your own home.

Ellen Goodman is a syndicated columnist.
Soviet diplomat to speak at MSC

To the editor:

On Sunday March 16, President Reagan once again appealed to Congress in a televised speech, and consequently to the American public, for additional aid for the "contras" in Nicaragua. The President is requesting that $100 million be diverted from other lines in the defence budget to aid the "freedom fighters to eliminate (the) communist menace at its source. Will we permit the Soviet Union to put a second Cuba, a second Libya, right on the doorstep of the United States?"

The following day, reports and transcripts of the address were printed in newspapers across the country and were reemphasized on the nightly news programs. All these sources, including the President's tend to give a biased view of the situation and overall Soviet—American relations. While this is unfortunate, the press generally does attem pt to provide accurate accounts. The real problem surfaces, however, when one realizes that nobody ever bothers to pay attention to these reports, no matter how good they may be.

People do not seem to take an interest in the government they elect or bad they may be. To these reports, no matter how good, the press generally provides a second Cuba, a second Libya, right on the doorstep of the United States?"

It seems that our opinions concerning the Soviet Union are too often formed through extremely unreliable social avenues. Regardless of whether the portrayals are accurate, Mikhail Gor-bachev, Secretary General of the Soviet Union, was correct when he indicated that most Americans get their information from Wendy's hamburger commercials and "Rocky IV." While these methods are entertaining, they are often based more upon artistic license than reality.

The students here at MSC have a chance to receive information firsthand from a Soviet source, however. On Monday, March 31 (the Monday we return from Spring break), Mikhail G. Antioukhine, First Secretary of the Permanent Mission of the U.S.S.R. to the United Nations, will be giving a lecture/forum in Richardson Hall at 7:30 p.m.

Born in Moscow in 1947, Mr. Antioukhine went to the State University in Moscow to study of international relations. From 1971 - 1983 he worked at the Ministry for Foreign Affairs in Moscow; and since 1983, Mr. Antioukhine has held the position of First Secretary.

His duties include working with international conferences and attending all the sessions of the U.N.’s General Assembly. Additionally, Mr. Antioukhine takes an active role in the disarmament conference in Geneva, Switzerland where numerous countries gather to discuss all types of weapons including chemical and nuclear arms. He refers to himself as a "career diplomat."

This program is sponsored by the Council on International and National Affairs (CINA), a Class One Organization of the SGA in conjunction with myself as a Resident Assistant project. There is no charge for this program.

It is your chance to ask intelligent questions concerning Soviet-American relations. Remember to keep an open yet analytical mind toward the issues involved.

CIC A CLASS ONE ORGANIZATION OF THE S.G.A.
Jackson Browne makes sense out of political chaos

By Mary Ellen Maciasac

Upon first listening to Jackson Browne's new album, Lives in the Balance (Asylum), I was surprised and at first, not overly impressed. This didn't seem to be the same simple artist whose songs about the hardships of love and relationships made you cry, and whose descriptions of hatred and the horrors of war made you wonder exactly what are the priorities of the human race.

In his previous seven albums, Browne was always searching for an answer to why people behave the way they do, both in love and hate. His lyrics held a poetic, profound quality, while the music usually lingered in the background so the words would stand out and stick.

Although Running on Empty is said to be Browne's "rock" album, the rock was soft and the lyrics were questioning. In other "rock and roll" tunes like "Boulevard" and "For a Rocker," the music was upbeat and the lyrics not so profound but still very thoughtful.

Now, after three years of experimentation, Browne has combined sharp, fast-moving tunes with haunting poetic "what's wrong with the world" lyrics. This is what initially confused me.

After a second listen, it was clear that this is the same artist, but one who has grown both musically and lyrically. He's discovered that synthesizers are an effective way of enhancing his words and his message. Although his disillusionment about the world is still present, Browne believes there's more wrong than in his country, yet, this wrong lies not so much in the country as a whole, but in the American people's ignorance of the destruction taking place around them.

In the line, "who are "the young soldiers that this world is not your toy!" long on hunger, short on joy," Browne speaks of the young men as fighters for freedom. His words are more direct, his melodies slightly more upbeat.

"Terry really encouraged me to do my best," Murphy said. "Despite the competition, I never thought I'd be chosen. This was the first contest I had ever entered. I never thought I'd be sure I was reading it right!"

Murphy's unique rendition of "Lawsless Avenues." In this slightly upbeat tune, Browne incorporates Spanish lyrics and a soft, melodic sound to express the sadness of "another war without reason." On the title track, members of the anti-contra Sangre Machauela, an L.A. Nueva Cancion group, appear to help Browne articulate that people we call our friends are "these governments killing their own."

Jackson Browne

Jackson Browne is waiting for a decision. Some 12 scholarships are up for grabs. Murphy's work to the Society of Illustrators and outtakes, mechanicals and illustrations. His full-time student and part-time freelancer, has just about "done his time" at MSC. He works for a Gizmo, a small printing shop, doing layout, mechanics and illustrations. Murphy recently sent slides of his work to a number of illustrators and is waiting for a decision. Some 12 scholarships are up for grabs. Murphy's got his sights set on a photography degree or his hopeful eye to his future as an artist.

**Benedict Family is victorious in SILC basketball**

cont. from p. 18

The semi-finals were played on Monday, March 17, at Panzer Gym. In the first game of the evening, DAK was matched up against Bunker's Boys. At halftime the score was 30-26 in favor of the Bunker's Boys. DAK tied the score at 30-30 to open the second half, but was unable to take a lead. Bunker's Boys escaped with a 55-48 win. The second game saw the Benedict Family take on Order on the court. Joe Spagnola led the Family scoring 28 points in the Family's 53-48 win.

On Tuesday, March 18, Benedict Family and Bunker's Boys played for the championship. At halftime Bunker's Boys led by a score of 36-18. Benedict Family came back strong in the second half and was able to hold the Boys to a 39-39 tie at the end of regulation play. The game continued into two overtime periods with each team sinking one basket during the first three minutes. Benedict Family was able to hold onto a one point lead to win the game 46-45. High scorers for the game were Gary Nichols of Bunker's Boys with 28 and Joe Spagnola of Benedict Family with 18.

Congratulations to the Benedict Family and all those teams that participated in the men's basketball league. A special thanks to Judy DeFrancisci, Craig Rogers, Jay Jones, Toney Fleming and Tony Eddle for helping to make this a successful and enjoyable season.

**Final league standings:**

**Mon./Wed.**
- Crash Crew: 4-0
- Order on the Court: 4-0
- Thunders Cats: 3-1
- Benedict Family: 2-2
- Run MSC: 1-3
- Monistat 7: 0-4
- Bad to the Bone: 0-4

**Tues./Thur.**
- Bunker's Boys: 4-0
- Me Phi Me: 4-0
- DAK: 3-1
- Invaders: 2-2
- All Stars: 2-2
- Running Rebels: 1-3
- TKE: 1-3
- Zoo Crew: 1-3
- Flintstones: 0-4

Men's tennis team looking forward to successful year

By Patty Jones

The Indian tennis team opened the '86 season with an 8-1 win over Seton Hall Tuesday.

The match served as a preview of what the team hopes to accomplish this season.

"We're looking for a conference championship and perhaps the best season MSC has ever had in men's tennis," said Head Coach Chet Mazula. Mazula explained that the longest-standing record at MSC is a 10-4 season standing record at St. John's and Villanova (both Division I schools) and East Stroudsburg (Division III).

The official line-up has not been set yet, but against Seton Hall, Russell won at first singles, 6-4, 6-3, Caci took second singles, 6-4, 6-3; Martinez lost in three sets, 4-6, 6-4, 7-5; Trinity won at the fourth position, 6-3, 6-4; Sygro took fifth, 6-2, 6-0; and Caputo won at sixth singles, 7-5, 6-4.

All three doubles teams won their matches. At first doubles, Sygro and Martinez won 8-7 (all matches in pro sets), Caci and Trinity took second, with an 8-2 win and Staunton and Schambrom won 8-3 at third doubles.

The next match is against FDU on March 22.

Hockey club stuns Wagner, wins MCHC championship

By Barb Hinkle

SILC's men's 5-on-5 basketball season wrapped up this week with the championship game held on Tuesday, March 18.

This year's competition was very tough with all the captains submitting talented teams. Crash Crew, of the Rock, Benedict Family, Run MSC, Thunder Cats, Order on the Court, Bad to the Bone, and Monistat 7 comprised the Mon./Wed. tournament, while the Tues./Thurs. league consisted of the Invaders, Running Rebels, All Stars, DAK, Zoo Crew, Flinn Johns, TKE, Bunker's Boys, and Me Phi Me. Each team played four regular season games and then seeded into a single elimination tournament.

In the Mon./Wed. league quarterfinals, the Silcs were Benedict Family vs. Crash Crew and Thunder Cats vs. Order on the Court. If the Benedict Family was remembering their loss to the crew during the regular season (61-34), they didn't let it affect their play. It was a close game all the way. Benedict Family's ability to contain the scoring efforts of Bryan Gabriel and Mitch Gillard combined with the scoring of Tom Schultz and Tom Carey gave the Family a 45-36 win.

The Thunder Cats had their hands full, taking on last year's champion, Order on the Court. If the Benedict Family was remembering their loss to the crew during the regular season (61-34), they didn't let it affect their play. It was a close game all the way. Benedict Family's ability to contain the scoring efforts of Bryan Gabriel and Mitch Gillard combined with the scoring of Tom Schultz and Tom Carey gave the Family a 45-36 win.

Bryan Gabriel trades in his uniform for playbook

By Perry Schwarz

The hardest thing for any athlete to accept, no matter what level one competes on, is the fact that his or her career has ended.

Former MSC guard Bryan Gabriel, ended his basketball career in 1985. The four-year Indian averaged well into double-figures and was a consistent assist leader during his career. Although his college playing days are over, Gabriel is still involved with the program, via the coaching aspect.

"Many people asked me why I wasn't playing," Gabriel said. "I had to accept the fact that my college playing days were over and I had to move on. I coached the JV team this year and I loved it. I want to stay near the game. Helping the other players by relating my experiences to what they're going through gives me a good feeling."

After a state championship season at Neptune High School, "Gab" played his freshman year on the MSC junior varsity team. The next three seasons, he was a member of the varsity team. It wasn't until his junior year that he matured physically and fully, Gabriel didn't start until his senior year.

"My junior year I began to understand the coaching philosophy and most of what I believed in," he said. "That year we won the Metro Atlantic Regional championship and, looking back, I know we could have won the whole tournament."

The MSC senior's career is over and national championship as a player is no longer possible, but as a coach the dream is still alive. The coaching field opened his eyes and made him a more aware and concerned person about the sport and people in general. During his college career, Gabriel took a lot for granted, but he sees things differently now that he is on the sidelines.

"When I entered Montclair I didn't care about anything except basketball," Gabriel said. "I was quiet and didn't concern myself with any outside activities on campus. Now my attitude is changed and I have taken a different perspective and gotten involved with the activities and interact more with the students."

Gabriel established himself as a premiere guard at Montclair. Many of the coaches still refer to Gabriel in that sense. However, his roles have changed from student athlete, to student, coach, high school recruiter and a career-oriented senior.

Four years went fast for the Economics major and he is soon to be out in the working world as a coach or in the banking field. Gabriel is working on his degree in physical education and coaching. Gabriel learned there is more to the game than bouncing the ball and running up and down the court. It takes a team effort to play the game and the same pertains to life in general.

"I miss the game, but I do what I can to stay with it," Gabriel said. "I have accepted my new role as a coach which is to help, advise, and relate my experiences to the younger players. They make the job worth it for me."
Big things in store for MSC baseball in ’86?

By Jim Nicosia
The MSC baseball team began its season last week in Normandy, and despite talk of how powerful the MSC team is this year, (ranked second in the nation in a pre-season poll) the Indians still must face a few challenges before they can get a chance to participate in the NCAA Division III World Series again.

Challenge number one: their schedule. MSC, a potent Division III school, will be up against such quality Division I schools as Maine, Michigan State (twice), Rider, St. Joseph’s (Pa.), Temple, and La Salle. These games are aside from the perennial challenges the Indians meet in conference foes Ramapo and William Peterson.

MSC Head Coach Kevin Cooney tries to give his team the biggest challenge they can handle during the regular season. Last week, the Indians surprised the MCHC by defeating Southern Connecticut (a 17-3 team) in the first round of the playoffs. They did this with the uncomfortable task of taking on defending champion Manhattan. The Indians boasted an 18-2 record. The Indians were 9-10.

The upstart Indians then went into Mennen Arena on Thursday and promptly disposed of the former champions, 6-5, placing them in the finals against Wagner. Wagner had defeated MSC, 18-1 in their first meeting (no, that’s not a typographical error). What transpired in the final was an 8-1 MSC swamping of Wagner in a game that saw Wagner disqualified after two periods for fighting. The Indians had taken away Wagner’s pride, their composure, and the MCHC title.

Challenge number three: leadership. The Indians lost a great deal of talent to graduation, and a new breed of leaders must emerge to ensure a successful 1986 season. All-American shortstop Jim Fasano is the player who’s taken over the thunder away from established powerhouse schools such as Manhattan and Wagner. The Indians now own the title of conference champions while Manhattan and Wagner will spend their long off-season wondering how the Indians came from nowhere to steal their hockey glory away from them.

The Hockey Club began its season by going 2-5, then made a mad rush to qualify for the conference playoffs. They won six of their last ten regular season games to qualify ninth out of the ten teams in the playoffs. That’s a noteworthy accomplishment for a first-year program that wasn’t even recognized by its school as a team. Expecting them to win a game in the playoffs was another story, however.

Last week, the Indians surprised the MCHC by defeating Southern Connecticut (a 17-3 team) in the first round of the playoffs. They did this with the uncomfortable task of taking on defending champion Manhattan. The Indians boasted an 18-2 record. The Indians were 9-10.

The Indians’ much-improved defense was instrumental in bringing the Metropolitan Collegiate Hockey Conference title to MSC for the first time. By Jim Nicosia

By Jim Nicosia
Who would’ve believed it? The MSC Hockey Club is the new Metropolitan Collegiate Hockey Conference Champion in its first year of existence.

As little as two weeks ago, few people on campus even knew MSC sported a hockey club. With the Indians’ play the last two weeks, though, they’re sure to grab a lot of attention.

In their debut year, the Indians stole the thunder away from established powerhouse schools such as Manhattan and Wagner. The Indians now own the title of conference champions while Manhattan and Wagner will spend their long off-season wondering how the Indians came from nowhere to steal their hockey glory away from them.

The Hockey Club began its season by going 2-5, then made a mad rush to qualify for the conference playoffs. They won six of their last ten regular season games to qualify ninth out of the ten teams in the playoffs. That’s a noteworthy accomplishment for a first-year program that wasn’t even recognized by its school as a team. Expecting them to win a game in the playoffs was another story, however.

Last week, the Indians surprised the MCHC by defeating Southern Connecticut (a 17-3 team) in the first round of the playoffs. They did this with the uncomfortable task of taking on defending champion Manhattan. The Indians boasted an 18-2 record. The Indians were 9-10.

The upstart Indians then went into Mennen Arena on Thursday and promptly disposed of the former champions, 6-5, placing them in the finals against Wagner. Wagner had defeated MSC, 18-1 in their first meeting (no, that’s not a typographical error). What transpired in the final was an 8-1 MSC swamping of Wagner in a game that saw Wagner disqualified after two periods for fighting. The Indians had taken away Wagner’s pride, their composure, and the MCHC title.

Challenge number two: the departure of top-notch players John Cowan, Bob Yeager, Dave Stanslawczyk, pitcher Dan Olsson, Jody Tobia and Mike Ashton.

Ashton was the victim of a clerical error on the part of the MSC athletic department. By participating in the fall baseball program, Ashton unknowingly used up his last semester of eligibility. He and the team are both left out in the cold.

Cooney did a bit of shopping over the winter, though, and brought back four transfer students to MSC. Third baseman Joe DelSol, from Fairleigh Dickinson, will be looked upon to fill the shoes of the hitting phenomenon Yeager. DelSol is just a sophomore, and he drove in 42 runs for FDU last season.

Anthony Foti is a transfer from St. John’s, is the player who’s taken over for Ashton behind the plate. Blanco, the Big East tournament MVP last season, boasts a great throwing arm and a solid bat.

Challenge number three: leadership. The Indians lost a great deal of talent and motivation to graduation, and a new breed of leaders must emerge to ensure a successful 1986 season. All-American shortstop Jim Fasano is the player who’s taken over the thunder away from established powerhouse schools such as Manhattan and Wagner. The Indians now own the title of conference champions while Manhattan and Wagner will spend their long off-season wondering how the Indians came from nowhere to steal their hockey glory away from them.

The Indians’ much-improved defense was instrumental in bringing the Metropolitan Collegiate Hockey Conference title to MSC for the first time.
