By Tom Boud

An official strike authorization vote was announced at yesterday’s Faculty Senate meeting.

According to Faculty Senate Member James Keenen, the strike was approved by a 90 percent majority. However, no definite strike date has been set.

Keenen said that the state of New Jersey has been reluctant to negotiate. “The state is induct,” he said. “They want to stand by and wait to see how the institutional autonomy package comes out in the legislature before they take any position.”

Keenen said. Nonetheless, local negotiations are proceeding smoothly.

In other affairs, the senate ratified a motion criticizing the condition of the faculty’s representation to the Board of Higher Education.

The motion explicitly states that the senate is “displeased with the process of selection for representation to the Board of Higher Education.”

An amendment attached to this motion calls upon the college administration to seek advice from those organizations being represented when nominating delegates.

“TNo one approached the senate for input concerning representation,” Senate Member Anita Uhlia said. “The senate should not be swayed from being consulted.”

As for executive elections, Dr. Wayne Bond, Chairman of the Department of Speech and Theater, was elected as the new faculty senate president for 1986-87.

Lois Guthrie of the department of home economics was selected as senate vice president.

Referring to other senate positions, Dr. Dolores Gioffre of the business education and office systems administration department and Dr. Saudra of the psychology department were respectively installed as recording secretary and correspondence secretary.

In relation to council appointments, Dr. Kenneth Broth of the anthropology department has been elected Negotiating Agent Council Laison (NaC).

Julia Dutka of the educational leadership department, Marylyn Chamberlain of the physical education, recreation and leisure studies department, Dr. Constance Waller, Director of the Women’s Center and Vice President Elect Guthrie are senators at large.

Regarding disciplinary representation, Dr. Richard Draper of the department of psychology is the newly elected School of Humanities and Social Science Representative. Richard Hudson for the department of physics and geoscience is now School of Mathematics and Natural Sciences Representative.

Susan Westen of the department of physical education, recreation and leisure studies is School of Professional Studies Representative.

All of these new senators will serve three years. For Non-Teaching Professions Representatives, the Registrar has been designated for a three year term and Jose Magdalene of the business administration department for a two year term.

BeachHedz applauded for headrests

By Tom Boud

BeachHedz, Inc., a student-operated manufacturing company, was recognized yesterday at a special presentation to MSC President Donald Walters, in his office.

The presentation consisted of an explanation of the evolution of BeachHedz and its product, senior Industrial Arts major, elaboration of the company and a product. “BeachHedz was conceived by student Richard Wolfson.”

“He decided to invent a product (in this case, a beach headrest) and successfully market it,” McMillan said.

The management and production class is given by the Department of Industrial Arts, and is taught by Prof. Richard Wolfson.

McMillan emphasized that BeachHedz was conceived by student initiative. “BeachHedz was organized by the students in my class. Professor Wolfson was there to assist us if we ran into a serious problem. “

McMillan said that the company consisted of 15 students, was founded at the beginning of this semester. “We drew up the legal papers during the first few weeks of the semester,” she said.

Next we came up with ideas for a product,” she said. “McMillan emphasized that BeachHedz will only last for this semester.

Each year, a different set of industrial arts students get together during the spring semester and form a new company and a new product.”

Alluding to student efforts, McMillan said that each of the fifteen students contributed money for material and manufacturing costs.

“Everyone put up $30 for this product,” McMillan noted. “However, the manufacturing costs were kept down thanks to Edward Banderek, one of McMillan’s co-workers who made all the fixtures and saved us money.”

The headrest itself is collapsible and resembles an X with a red canopy on top and bottom when fully extended, it can be compared to a smaller version of a director’s chair.

A total of 166 BeachHedz headrests were made which will be sold to students for $2 each. They will be on sale Friday, May 16, from 10 a.m. to 6 p.m. in front of the Student Center.

President Walters congratulated McMillan and BeachHedz Inc. as he accepted his gift of a complimentary headrest. This is a great show of talent and productivity. The formation of a company and a product, all brought to a successful conclusion, is a great tribute to the students of industrial arts,” Walters said.

AIDS: Facts and feelings

By Della Matula

According to E. Steven Saunders, M.S., a health educator on AIDS, “In ten years, everyone will be dealing with a friend or relative who has AIDS.”

Acquired Immune Deficiency Syndrome (AIDS) which affects the body’s ability to fight off disease, was discussed yesterday at a conference titled, AIDS—The Facts and Feelings, sponsored by the MSC Center for the Study of Human Sexuality.

There are many ways AIDS can be transmitted: blood, semen, and syringe needles. If an AIDS victim inserts a needle and shares it with one or more persons who don’t have AIDS, the AIDS cells get passed on to others, which increases the rapid spread AIDS.

Adults are not the only people to contract AIDS; children and infants are now known to carry the AIDS virus. A mother can give AIDS to her infant; the infant’s eyes and oral cavity can be infected when the disease is parentally transmitted. Very commonly, AIDS is spread throughout the gay community. “Being gay doesn’t mean you’re going to get the disease,” Saunders said.

There are about 6000 cases of AIDS patients in New York City alone and 600 thousand in the tri-state area population.”

Lectures and seminars teaching people about the AIDS helps us to become informed and adapt a reasonable mature attitude toward AIDS victims. “If you’ve got AIDS, don’t feel sorry, kissing, or sitting next to someone who has AIDS,” said Rodrigues.

Gloria Rodrigues, a public health consultant of the N.J. Health Department, also spoke about AIDS. She spoke of the interventions and innovations with AIDS clients, their families and friends.

“Usually when the AIDS patient is diagnosed with the disease he feels complete numbness. Following this is the second stage massive denial, which is an efficient defense mechanism because it gives your psyche enough time to deal with the knowledge,” said Rodrigues.

“There is no way for the patient to avoid the topic of AIDS because he is constantly reminded of it by the media. Some of the patients become very angry and this anger is directed to the people around them,” she said.

Rodrigues recalled an encounter with an AIDS patient while making her daily rounds, "I noticed she had been very sad lately. I reached out and hugged her but, she still cried when I asked her why she said she was afraid that she might never be touched again by another human being. This is when I remembered how important touching really is."

Possible shutdown of Computer Writing Lab

By Perry Schwartz

The Computer Writing Lab located in Life Hall hasn't received a personnel appropriation for next semester and according to lab directors Larry Schwartz and James Nash it may not be in operation in the fall semester.

There are approximately 100 to 150 regular users of the lab from all majors.

"Since April we have requested an additional appropriation for two more people in addition to the graduate assistants to continue the operation of the lab, Schwartz said, without the extra money there is no way we can continue open hours for students. The computers will be used just for classes.

"If the administration has NOT offered the lab states: "As of this date: all the money to every department comes from the Vice President of Academic Affairs, Dr. Roland Garrett. However, there is a procedure to obtain fiscal funds. The money is given to the dean of the department. If the dean needs an extra allocation he must go through Garrett's office. Schwartz and Nash went through the proper channels. First they contacted Rita Jacobs, the English Chair. She in turn is to see Cohen and then Cohen approaches Garrett with the proposal. Evidently, there was miscommunication between the departments because Garrett said a proposal for staffing was never submitted to his office.

"This memo was totally unauthorized and false," Garrett said. "This doesn't represent college policy. I think the men are jumping ahead, because no funds were appropriated for any other department. Also, my first contact with the concern was through the paper and a few students. However Cohen had a different reply to the situation.

"I have helped out the lab in the past and the administration is supportive of the lab," Cohen said. "The only thing is that I have no control over the staffing. The money comes from the department of academic affairs."

The only appropriation the lab received in the past is for equipment. The writing lab, with the help from a state grant cost $50,000 to set up. An additional appropriation of 11,000 helped supply five more computers. In order for the lab to continue extended hours and operation to the public a personnel budget is needed.

"Graduate assistants that usually tutor students also supervise the lab," Nash said. "However there are more students that use the lab, which requires more additional hours for the lab."

MSC Police chief retires after eight years

By Tom Boud

Jayne Rich is retiring as of May 24 after serving eight years as MSC's chief of police and security.

Rich explained her decision to retire.

"After spending a total of thirty-three years in the field of law enforcement, I want to have some time to myself; to simply put my feet up and rest," Rich said. "But before I do, I have to say goodbye to the students who are jumping ahead, because no funds were appropriated for any other department.

Rich cited some of her accomplishments.

"I am proud of the professionalism of the police and security department, the institution of the escort service, and the seminars on crime prevention," Rich said. However, Rich said that problems still exist. "Parking enforcement has suffered because of personnel losses and the shuttle bus service has limped along since it was assigned to campus police in September. These are sources of frustration."

Further reflecting on the past, Rich mentioned her satisfaction with the college's students. "I am content with my relationship concerning the students of this campus. I am impressed by their seriousness. They pay much attention to their studies," Rich said. As for retirement activities, Rich said she eventually hopes to teach. "I hope to teach in a criminal justice program at some college but that probably won't happen in the near future."

A search committee appointed by Vice President for Administration and Finance William Griffith has been organized to find a new chief of police and security.

The committee is headed by Nancy Carvoff of the Office of the Vice President for Administration and Finance, and includes Assistant Director of Residence Life Marjorie Coleman, Chief Engineer of Maintenance Joseph McNulty, Campus Police Detective Debra Newcombe as well as Jose Magdaleno of the department of business administration.

The committee also involves an MSC student who has not yet been designated by the SGA.

A suitable candidate for chief of police and security is expected to be found by August 1.

Michael Postaskil will take over as acting chief of police and security. Between May 24 and August 1 and SGT William Hotaling will additionally assume the function of acting lieutenant.

A farewell banquet for Chief Rich is scheduled for May 20 at 12 p.m. at the Friar Tuck Inn in Cedar Grove. Tickets are $15 each. For further information, contact Sylvia Burts at 893-5122.

If you know now what you would like to do, you don't have to wait until graduation to begin your career. People Express is offering you the chance to get a head start on your future by working for us, part time, in our dynamic new Intern Program, while you are still in school.

"People Express Intern Program is a great idea. The way I see it, the best way to get a good job after college is to have a good job during college." 

Monika Kowleski, Rutgers University

"When my class graduates and everyone begins their training program, I'll have already started mine."

Martin Durney, N.J.I.T.

"I always hear people talking about what they want to do when they graduate- I'm doing it now!"

Roxanne Briggs, Kean College

In Phase I of our program, you will work as a Customer Service Representative-interacting face-to-face with our customers while getting involved in the whole spectrum of ground operational support activities. Upon graduation, you will be an eligible candidate for our Phase II Post Graduate Program.

If you are highly competent, with a real capacity for compassion, caring and concern for people, we would like to meet you. You can start your career with People Express right now. If you are a full time student with a 2.5 cumulative GPA call today to learn more about our Intern Program.

To schedule an interview call: 961-8505/3454 Monday-Friday From 9 A.M.-5 P.M.
Wanted: Typesetters for The Montclarion

Fast, accurate typists needed. Typesetting experience not necessary - we will train! Minimum wage salary. No financial aid required.

Apply now for next semester.

—Ask for Jim, Joanne or MaryEllen at the Montclarion, Room 113 of the Student Center Annex.

Homelessness is not a new problem

By Jennifer S. Slechta

Kim Hopper, a nationally-renowned expert on the homeless, spoke on his book Private Lives/Public Spaces on Wednesday, April 30, in Koppes Lounge, Russ Hall, sponsored by the Sociology Department.

Hopper studied Theology, Anthropology, Sociology and Social Medical Sciences at the University of Columbia, and has had six years experience in advocacy research on the homeless in New York City. His book, Private Lives/Public Spaces, is a work on advocacy research, dealing with policy issues.

According to Hopper, homelessness is caused by many factors. One is displacement, which includes 200 million people a year unable to affordable replacement housing. Displacement can be caused by eviction, higher income dwellings (landlords increase rent or decide to build condominiums) or demolition (homes being torn down). These people find it more important to buy food rather than pay rent. Some victims are never accounted as being homeless because they find shelter in abandoned buildings.

Homelessness is not a new problem: it has intensified over the years, being a familiar face of poverty. The residence of homeless people is the street.

Today, homeless people are being recognized. After not being seen for 50 years, finally there is relief for the homeless. There has been a 60 percent increase over previous years in shelter rights; more volunteer work, including Hands Across America; and local and state funding.

Hopper stated that he feels the homeless need disciplinary action, thereby forcing the needy to find places of their own. He feels this can be done by voluntary organizations, mandatory work programs, and the accepted practice of resorting to buildings (shools, hospitals), applying to homeless need. There is still a need for people to help provide shelters and food, but society does have the capacity, according to Hopper, to "build bridges for homeless anchors."

Improvements expected for on campus housing students

By Kathy McDonough

SGA Director of Residence Life, Patricia Crooks stated; on-campus residents can look forward to cleaner, safer living conditions for next year, in her report last night's SGA meeting.

Crooks told of a number of improvements of the dorms, as well as the Clove Road Apartments.

In the area of safety, Crooks said, "According to Dr. Raymond Stover, Director of Housing, the security firm which we now employ will have to raise standards of security or we will change to a new security firm. This is in response to recent complaints concerning inadequate security in the dorms."

The Clove Road Apartments will be newly stained, and Bohm Hall will be painted.

Although no outside improvements are slated for the other dorms, the dishwashers in Freeman Hall will be fixed and Stone Hall will receive dumpsters.

As for other areas of residence life, uniform posting and announcement rules will be implemented in an effort to keep the campus better informed. Also, meal plan costs for resident assistants will be waived, in the hopes that this will attract more applicants for the positions available.

Lastly, a lighter summer conference schedule has been planned for this year, so as to lessen overusage of the dorms.

In other news, La Campana, MSC's yearbook, received its class I charter after its constitution was amended to include a committee which will be formed to oversee production of the yearbook. The committee will be comprised of two students, two legislators, one administrator, and one faculty member. Its duties will include periodic checks for constitutional infraction and other controversies, which will be corrected before the book goes to the printer. According to Dave Handal, SGA President, this committee, working along with the yearbook staff will "produce the best book possible."

WMSC-FM also had their class I charter approved. Plans for new programming include a public affairs program for the blind, according to Mike Weinstein, WMSC's representative.

A class I charter was also granted to Players. La Vaughn Slaven, Players representative, announced the addition of Forensics presentations to next year's programming schedule.

Lastly, operations budgets were approved for La Campana, Black Student Cooperative Union (BSCU); Players, and Student Intramural and Leisure Council (SILC).

NEWS NOTE

Policy on Final Examinations
1. All final examinations must be given during the regularly scheduled examination period. The Schedule of Courses lists days and times of final examination for each class period.

2. No final examination may be given during the last week of classes before the examination period.

3. If no formal examination is scheduled, the class must meet for one hour during the scheduled final examination time, for a class evaluation session.

In the current semester, the final examination period is scheduled for May 21-28, 1986.

Co-op lists job positions available for fall of '86

By Beverly Ververs

Spring fever has set in and your thoughts are beginning to drift away from academic concerns. You're concentrating more on recreational pursuits. Once your exams are "history," school, deadlines and career questions fade into the background until September.

You can be sure, however, that the business world "waits for no man (or woman)." Employers are always prospecting for new productive employees to fill their immediate staffing needs. Spring fever and the lure of leisurely summer fun does not have the same effect on the business community as it does on us. There are products to be developed, manufactured and sold. And there are services to be performed on time. There are temporary clerical, marketing, and light industrial assignments available. Give us a call today. See you on campus.

By Vivette Watson

Thieves stole an '83 Dodge Van worth $5,300 from lot 23 between 9:55 a.m. and 11 a.m. on Mon., May 8. Campus police arrested a male dorm resident on Wed., May 7 at 1:29 a.m. in lot 17 and charged him with criminal mischief, theft, attempted thefts, burglary and possession of an alcoholic beverage.

The male was observed entering several cars in the lot. He is scheduled to appear in the Little Falls Municipal Court.

Someone stole the vinyl, worth $150, from the rear back window of a '78 Olds mobile in lot 21, between 8 a.m. and 1 p.m. on May 5. Similarly in lot 21, between Sun., May 4 and May 8, a '76 Pontiac was entered and the AM/FM cassette and speakers were removed. Total value is $75. There were no signs of forced entry. Also in lot 21 on Fri., May 9, between 5:45 and 5:59 p.m., cassettes were stolen.

The owner of an '83 Mitsubishi, in lot 20, observed a male trying to steal his car at 5:30 p.m. on May 7. The man fled when the owner confronted him. In another incident, persons attempted to steal a '73 Toyota Celica in lot 23 on May 7, by punching out the ignition.

On May 6, at 4 p.m., two female Bohn Hall residents were involved in an altercation that led to physical assault charges being filed. Criminal complaints have been signed.

A female Bohn Hall resident reported that someone had entered a locker in her room and removed a dress valued at $91, between 5 p.m. on Thurs., May 1 and 12 p.m. on Fri., May 2.

On Sun., May 11, at 9:15 a.m., employees reported that the Snack Bar had been entered. The value of items stolen has not been determined.

A male caller reported a bomb in Partridge Hall at 2:45 p.m. on May 7. Both buildings were searched. No bombs were found.

The Montclarion wishes to thank the following writers, photographers, and various barnyard animals for their invaluable contribution to the paper:

John Astorino  Pasquale DiFulco  Liz Pinter
Tom Boud  Debra Farina  Sue Ryall
Kristin Brooks  Peter Garrett  Lisa Ricotta
Chris Cofone the yearbook staff  Georgette Georgiadis  Terry Rehm
Ed Cow  Gary Gosling  Jennifer Slechta
Dennis Campbell  Stacey Haines  Rodney Stubina
Bob Carmody  Wendy Hall  Perry Schwarz
Patrice Crooks  Barry Jacobs  Mike Sheridan
Cindy Dominguez  Patty Jones  Regina Slavinski
John Doyle  Kathy McDonough  Maria Tamburello
Linda DeCaro  Delia Matula  Vivette Watson
John Paul  EM & EM  Oren Zeve

A very special thanks to our business people—Sue, Jim, Maria; our graphics people—Marianne, Tracey, Beth; our terrific typesetters—Joanne, Kathy, Jim, Lynda; and all the people who we forgot (you know who you are).

We couldn’t have done it without you!!!

A Special Big Barnyard Animal Thanks to: Maureen, Beth, Nic (damit jim), Gawy Wuff, Matt, Mike, John, Tom, & Steph. You made my last semester here the Best! Love, MEM.

HAVE A GWEAT SUMMEW EWEYWONE!

The Montclarion is a Class 1 of the SGA.
A review for the future

Well, another semester at MSC has come and gone. That's something new. And in retrospect, many of the same types of things will be complaining about how nothing got accomplished or no progress was made in any area. These are the cynics.

Then there are the few, with one eye towards the future. They are the optimists who see the spring semester of '86 and other things in their true perspective. They will look at the problems encountered during the past four months, learn from the mistakes, and try to build upon the successes. These people are the hopeful, the optimists.

The cynics and optimists do not get along. They simply try to achieve their goals in different ways: one by complaining, the other by dedication. For instance, the SGA recently elected its new executive board. The cynics' attitudes lean toward, "So what, I didn't vote." The optimists say, "Maybe they'll be able to make some advancements for student activities and organizations."

The cynic says, "Next semester won't be any better than this one." The optimist says, "Maybe it will." Well, you know the story of opposing factions.

This past semester has seen its share of successes and failures, and it's too easy to write off the successes and dismiss failure as inevitable.

Consider the SGA sponsored Spring Week. And the core of some of these people were people who have been through the painstaking chore of raising its own funds. Their reward: the Metropolitan intercollegiate athletics because it undertook the painstaking chore of raising its own funds. Their reward: the Metropolitan intercollegiate athletics.

These are just two stories of students who wanted to do something for themselves, for others. As for points that can be improved upon in the future, student apathy heads the list. Yes, you've heard this before. But do you realize that the one place you won't find it is in the Class One organizations.

These clubs have a special identity—something for everyone. Yet, many MSC students don't realize this. These organizations have one problem—lack of student input. They aren't doing their objectives to be filled and want to bring the campus the best concerts, yearbooks, lectures, speeches, and yes, even newspapers, they can.

And although they may be lacking student input, they don't lack one important thing—pride.

So, over the summer break, think about your involvement in this semester's activities. If it doesn't amount to much, maybe it's time you stop complaining and join The Underground Connection.

BOSTON—Ever since the plant at Chernobyl blew up and melted down, the most peculiar phenomenon has appeared on the cheeks of the American arms-control establishment. Get out the Geiger counters. There are people in the administration who are radiating good cheer. They are convinced that the megadosage of RADS, Russian Attempts at Deception, was enough to turn the American people into hawks.

The only bone-marrow transplant that Kenneth Edelman, Cap Weinberger et al, are interested in is one to stiffen our spines against any arms agreement with the Soviets. It might even harden our resolve to fork up $1 trillion for Star Wars.

The radiation from Chernobyl is polluting the atmosphere, but it is not clear yet whether the "lesson" we will eventually learn from this disaster is (1) that we cannot trust the Soviets or (2) that we cannot trust technology. Our answer is likely to affect the future of SDI, the defense marketed to us as the shield against bombs: protection without negotiation.

On this multiple-choice question on the subject of trust, allow me to share the right answer. It's (3) none of the above.

The recent experience of the Chernobyl plant, like that of the Challenger explosion and the Titan and Delta failures, are gruesome moments in the process called trial and error. A British astronomer has said, "Like the human back, the nuclear power plant was deployed before it was fully developed." These events carry the bleak warning label: Accidents will happen.

We presume, some glibly and some skeptically, that scientists can learn from errors. They promise to do better next time, even if next time begins back at the drawing board or in the congressional hearing room.

But Star Wars? The President calls this program his "dream." He has the dream, says Prof. Gottfried, Cornell University physicist and a director of the Union for Concerned Scientists, "that there is a device yet to be invented that will solve the whole problem of defense. In his mind, it's like somebody inventing a zipper."

But there isn't a zipper or magic shield in the offing. The SDI people are now looking at a seven-layer defense system with hundreds or thousands of satellites in each layer, all of which have to be put up and maintained in a steady state of alert. "Roughly speaking," says Prof. Gottfried, "it's not so different from having a whole lot of nuclear power plants up in space. Now imagine trying to turn them on under nuclear attack, all in synchronization and all for the first time."

SDI is, according to Prof. Gottfried, "intrinsically untrustworthy because it's a technology that is being developed against an adversary, not against nature...and because it can never be tested until it is too late."

There won't be, can't be, any trial; there is sure to be error.

What about trusting the Soviets, then? The process of arms control has never been built on trust. Negotiators don't trade friendship rings. They prefer verification to promises. This message has also been emanated out of the stacks at Chernobyl.

The Soviets didn't give us photo opportunities of the plant burning; our satellites did. It was Western knowledge-gathering—the high technology of communications—that forced the Soviets to be more open with their own people. It is much easier to verify arms-control agreements, including nuclear testing, than it used to be.

We do have to trust one thing, however: Soviet self-interest and rationality. We assume that it is not in their interest to drop a big one on Washington and have us drop one on Moscow. We go to bed assuming that every Saturday night, we couldn't test it. We couldn't rely on it. In the best, rosiest scenario, we could never actually test SDI. If we couldn't test it, we couldn't rely on it.

A trillion dollars later, we would be forced to hold onto the same old policy of deterrence, MAD deterrence. We might as well send the money directly into space. That way, if the rocket fails to get into orbit, it will at least make one dream come true: There'll be pennies from heaven.
Students protest closing of Computer Lab

To the editor:

When I heard that the Computer Writing Lab would be closed next semester, I was devastated. The Writing Lab, located in Room 230 of Memorial Auditorium, has been available to students for the past two years. Over 100 students use this lab regularly. At finals time, the lab is so full it's hard to find an open computer. When I began using the lab 6 months ago, I praised the school for creating such a fantastic facility.

Since that time, I have written several lengthy papers, including a 40 page typewritten project. The English major requires a great deal of written work, including essays, articles, creative writing, and critiques of literature. Revising papers on the word processor has helped my writing immensely. It makes the student's life much easier and it saves the word-processing department much work. In addition, the clean, edited papers reduce the grading time for the professors.

So if the Computer Lab is so great, why is the administration closing the lab? As usual, it comes back to funding. It's that old song and dance about not having enough funds to keep the lab open. Well I think that is disgraceful!

The Computer lab has survived for the past two years and has had sufficient funding. What is holding it back now? Over 100 students use the lab on a regular basis, so it cannot be that the lab is not worthy of funding. I simply don't understand the run-around that lab users are getting.

If the MFC administration is here to promote education, and the excellence of the student, then it will persuade Dr. Roland Garrett, Vice President of Academic Affairs, to provide the funding necessary to re-open this lab next semester. After all, this lab helps the students to achieve academic excellence.

In our society, where everything is becoming so technologically advanced, it has become necessary that students gain computer literacy. Why is the administration overlooking this practical aspect of our education? I sincerely hope that the administration will re-evaluate their decision, and realize that the right thing to do is to re-open the lab next semester.

Cartoonist seeks future input

To the editor:

I'd like to take this opportunity to thank John Connolly and whoever else was involved in printing the "Talking and Listening" comics by EM and EM, which appeared in the issues of The Montclarion. I was happy to see them printed because I'm half of EM and EM. The other EM is Ed Mills, a professor and one of my teachers in the department of Human Services and Listening. I was involved for printing the "Talking and Listening" comics by EM and EM, was delighted to see them illustrated, they would like to see illustrated, they were asserted. If rhetoric was asserted. If rhetoric was...

My general intention for the comic was to share what I have learned about communication skills, and I thought it might be helpful to anyone who had similar communication difficulties as the ones illustrated in the comics to see some possibilities of how it could be worked out, and be inspiring to them to come up with different, opposing or even similar ideas to the ones in the comic.

The part at the end of every comic was an invitation to anyone, to use the comic to see a particular situation explored through the medium of the comic. I regret not having explained this sooner because there won't be any more comics until September (but letters can still be sent).

Hopefully "Talking and Listening" will be reintroduced in the fall.

Eve Marlowe
Sophomore/fine arts, psychology

Response to Abortion letter

To the editor:

I am writing this in response to the letter by Francis Lynn, May 9, dealing with rhetoric in the abortion debate. I agree with the argument that abortion can be a "cop out from (sexual) responsibility," however, if one walks into any planned-parenthood clinic, one is informed of the many preventive measures that could have been taken, and that abortion is not a means of birth control but only a last resort. Since sexual intercourse is an unequal partnership, birth control is the equal responsibility of both partners. I disagree with the "biological fact" that "men don't get pregnant." I found these references as potent as any rhetorical arguments used in the anti-abortion cause (it seems that rhetoric is always used in the anti-abortion argument).

Finally, I would like to defend the pro-choice people's argument against accusations made in Lynn's letter. Pro-choicers are not searching for excuses, as Lynn asserted, nor are they condoning abortion since abortion is a difficult decision which most pro-choicers opt not to choose. It is a question of how much control the government has to exert over the individual. The pro-choice argument lies in the individual needs of each different case. Pro-choice does not necessarily mean pro-abortion... pro-choice is pro-life.

Letters...
Whodini's funky beat

By Perry Schwarz

Rap trio Whodini has followed the success of their first two albums with Back in Black (Arista Records), another expert rap production. One trait that made this group successful is that their music appeals to both white and black record buyers.

The first single from the album, "Funky Beat," has immediate and powerful rap lyrics. The sound effects and engineering are great! The beat maintains that level of Whodini intensity. Another plus is that each of the rappers, including Grandmaster Dee, present rap solo.

Recently, the trio completed a video of "Funky Beat." The video's guest stars include boxer Mark Breland, Donnie Simpson of "Video Soul," Uncle Floyd, and Jermaine Stewart. Run-DMC, Kurtis Blow and the Beastie Boys make an appearance.

The next song, "One Love," starts with an intro similar to that of "Funky Beat," but continues with a much slower dance beat. The echoed lyrics are a good addition and their rapping has an unusual sound that enhances the song.

"Growing Up" has a pickup beat. The musical background and dominant raps are a plus. The rappers compliment each other's style.

"Echo Scratch" has a similar rap style as Whodini's other records. There are power raps along with a new sound of artificial voices.

When the group cut their first single, "Magic's Wand," it went Top 40 in England and charted the U.S., France, Brazil and elsewhere. Their second album, Escape, sold in excess of 900,000 copies. Back in Black should hit the charts also. As Whodni apologizes, their material gets better and more complex.

Listeners who follow rap will thrive on this album. The raps range in length from four to six minutes. Someone who doesn't enjoy rap will not stick through a full song, but for those dedicated rap listeners, go out and get your copy, because this album will be on the move.

Rotund rappers measure up in exciting new album

By Perry Schwarz

The first two albums of the rap trio Fat Boys were large successes. Their third album, Big and Beautiful (Sutra Records) is no different. Since the group's emergence in 1983, they have developed top rap hits and gotten better with time. In one month, Big and Beautiful sold 225,000 copies and the numbers are increasing.

The title track, "Big and Beautiful," has a jazzy, pumping upbeat sound. The song is lively and full of vitality. The female background vocalists who sing "Big and beautiful, the Fat Boys are beautiful" add to the piece. This is a fun tune with the same Fat Boys style.

"Rap Symphony" opens with the sound of violins and moves into a modernized take-off of Beethoven's Fifth Symphony. The transition to a modern beat opened up the door for rappers to do their thing. Along with background vocals, the lyrics in the song, the Fat Boys are "born to talk" and they do much talking in addition to rapping. The rappers complement each other and the song has a mellow fade-out.

"Human Beat Box" is another enjoyable cut off the album. Cool Rockski and Markie-D. handle the rap lyrics and everyone's favorite, Beat Box, rocks the background with his unique vocal sounds. The listener is dazzled by the different, unexpected beats that come out of his mouth.

"Breakdown" presents a good piano opening and Markie D. opens the vocals. The piano adds a fresh and lively sound. There is a climax in each rap interlude which enables the other rappers to begin his segment. Beat Box continues to entertain the listener with his own tempo.

"Beats Box is Rocking" is another of the exciting tracks. It opens with an announcer of a boxing match introducing the Fat Boys. The song is very fast. Expert engineering and the synthesizer add to the beat. Beat Box picks up the pace also.

By Jonathan Butler

Although this is Butler's debut album in the United States, he didn't forget his roots. "Afrika" is a song with a one-word vocal, and has background sounds of jungle noises.

Butler was the only African artist to get airplay on all seven major radio stations. He always sang and played a westernized form of music. He was exposed to jazz as a child and Steve Wonder was his greatest inspiration. After his youth, he formed a band and began playing a new style and sound.

Butler spent half of his life in the music business and this album proves it. It's a perfect introduction of his talent. However, there could be a few more vocals on the album so Butler could prove his singing ability. Overall, this album would impress any jazz or easy listener. It's a refreshing and positive change of pace.

One technique the group uses well is to utilize the same rap cliches as other songs and to present them in a different beat. This enhances the songs and helps keep the lyrics in the mind of the listener.

The difference with Big and Beautiful is that Kurtis Blow, who produced the first two albums, didn't produce this one. The group wanted to accomplish a new style and sound.

Beat Box's sound, along with the other two rapper's voices, is what made this group a hit. Ever since they won their first contract with Sutra Records, they warmed up the crowd at the 1983 Tin Pan Apple Dance/Rap Contest, they have been successful. The Fat Boys will have a video produced by Ubizewicz Rbcyzynski for the song "Sex Machine." They were also in the movie Krush Groove and will be starring in an upcoming Hollywood film.

The Fat Boys have a unique and hilarious performance style which made them headliners on three major sold-out U.S. tours this year.

The trio, originally known as the Disco 3, is not a serious love-crazy rap group. However, if you're looking for a fun-filled, enjoyable, and humorous album, Big and Beautiful is a must for your collection.
Mayfair Street Festival in Montclair

Saturday, May 17 is the day to enjoy a great variety of outdoor entertainment in downtown Montclair. The Montclair Mayfair, an annual event designed to increase awareness of the offerings and beauty of the downtown area, will begin at 11 a.m. with a procession of street performers, who will entertain from stages located at Lackawanna Plaza, South Park Street and Church Street. The Festival will last until 5 p.m.

The Whole Theatre of Montclair is coordinating the talent for the Festival. Over 30 different acts have been selected including jugglers, mime, clowns, dancers, stilts-walkers and singers. Susan Clark, a faculty member of the Whole Theater School, is Director of Entertainment for the Festival. Clark, a professional puppet-maker, has created a pair of giant puppets for the Festival, which are currently on display at the Whole Theatre.

Dancer/choreographer Lillo Way.

Lillo Way Dance Company

The Montclair-based Lillo Way Dance Company will present a concert on Fri., May 16 at 8 p.m. in Memorial Auditorium. The program will feature three examples of Way's highly theatrical choreography which is often inspired by literature, "I Am Rose, and Other Songs" is set to music by Pulitzer-prize winning composer Ned Rorem with lyrics consisting of poems by Gertrude Stein, Theodore Roethke, Elinor Wylie and Walt Whitman. Criss-crossing centuries, "Centerbury" is a modern dance pageant crammed with medieval imagery, song, dance and rollicking humor. Way's characters find themselves from dances of the noblemen with the greatest of ease. The music is by contemporary composer Lester Trimble.

The program concludes with "Remember When," a suite of six solos danced by Way to the jazzy, pop music of Jerry Leiber and Mike Stoller. Anna Kisselgoff, dance critic of the New York Times, has called this dance a "coup de theatre."

Way, a recipient of choreography fellowships from the National Endowment for the Arts and the New Jersey State Council on the Arts, honed her directing and choreographic skills during 11 years as co-director of the Greenhouse Dance Ensemble. She has also had an extensive performing career. In addition to serving as artistic director of the Lillo Way Dance Company, she currently teaches graduate dance composition at New York University.

Tickets for the performance are $11 standard, $9 senior citizens and $6 for students, and may be obtained by calling 893-5112.

MSC student releases LP.

Chris Korzen, an MSC graphic design major, has released his debut album, Nirvana For Home Use, on Playful Records. Korzen, a self-taught multi-instrumentalist, has a style akin to the soft rock popularized by the singer-songwriter genre of the 1970's. Featured on the disc is folk singer Elaine Silver, along with members of The Watch, Bear's Choice and R. Stevie Moore's band. The record can be purchased at Crazy Road Records in Montclair, Meadowbrook County Malls, or by sending five dollars to Chris Korzen at 6 Longview Drive, Whippany, NJ 07981.

Players plans next year's season

Players has announced their plans for the Fall '86/Spring '87 season: "Soft Touch" (September); "Ten Little Indians" (November); "Spring Awakening" (February); "Cabaret Night '87" (late spring). Dates and places for these productions are to be announced.
Living in New York isn't cheap. But our Basic Checking is.

In New York, doing it all generally means spending it all. That's why you need Manufactures Hanover Trust's Basic Checking™. **Spend less on checking, more on living it up.** You have been things to do with your money instead of paying for the privilege of spending it. So the monthly fee for our Basic Checking is only $4, there's no minimum balance, and you can write up to eight checks free.*

**Spend your time enjoying, not rushing to banks.** No bank account gives you more access to your cash than our Basic Checking. An MHT Card™ lets you use the entire NICE® network of more than 1,500 cash machine locations. And the countrywide CIRRUS® network of 8,500 locations. You might run short of cash, but you’ll never run short of places to get more.

**Spend even when your money's all spent.** If you qualify, you can add a personal line of credit** to your Basic Checking account. Then, to spend money you don’t have, just write a check!

For your Basic Checking account, call 1 800 MHT-BANK or stop by any Manufacturers Hanover branch. You'll get more out of your bank. And more out of New York.

We realize your potential.

Track teams come up with noteworthy performances

By Tom Branna

Eileen O’Connor set a new New Jersey Athletic Conference record in the triple jump with a distance of 36'-91", breaking her own record, and led MSC to a third place finish in the conference championships last weekend. Trenton State won the meet with 228 points; Glassboro State finished second with 197-3, and the Indians followed with 68 in the six team meet. O’Connor’s victory in the triple jump earned her allconference honors for the third year in a row.

While it was business as usual for O’Connor, she went the entire season undefeated. Two other Indians made the NJAC team with first place finishes. Silvia Battista captured first place in the long jump, with a leap of 16'-3.1, just outdistancing O’Connor, who finished second with 16-2.

Liz Dilla was MSC’s other all-conference performer, winning the 400 meter run in 53.2.

“Of 18 events we only competed in 11,” said MSC head coach Michelle Willis. “Since we were so short on personnel (only seven athletes), no one really had an opportunity to excel in events so some athletes had to sacrifice personal bests because of the need for more points.”

MSC scored points in six other events. Sheila Holman placed sixth in the discus (103-8) and shot put (30-0), Jean-Marie (66.3) and Lynn Healey (70.0) came in third and fifth, respectively, in the 400; the mile relay team of Battista, Healey Dilla, and Marsh took second place with a time of 4:27.5; and the 400 relay team of Battista, Healey, Marsh and O’Connor also finished second with a time of 54.6.

Battista proved her versatility by placing fourth in the high jump, clearing the bar at 5-0.

“We had good performances from seven gutsy competitors,” said Willis. “I was very happy for the girls in their third place. It’s been such a tough season.”

Godfrey Brown was named outstanding track performer at the New Jersey Athletic Conference track meet but MSC still fell short of their conference title hopes finishing second to Glassboro State by a score of 201-177.

Brown won the 400 meter run with a time of 48.5 and also took first place in the 200 with a time of 21.6. The Indian’s other double winner was Amos Field. The freshman won the 400 intermediate hurdles (53.7) and triple jump (13.9).

MSC’s other first place finishers were Ed Chavis in the 100 (10.6) and Rich Barion (1:05.0) in the 400 meter run.

Following Glassboro and MSC in the standings were Stockton State (92 points), Trenton State (91), William Paterson (38) and Ramapo (10).

Mike Mielke of Stockton was named outstanding field performer based on his two first place finishes in the shot put (45-9) and the hammer (160-7).

The year in MSC sports

By Terry Schwartz

It’s that time again. Another year has passed and it’s time to recognize some key highlights of MSC’s athletic programs, ranging from sporting goods to clothing.

First, let’s recall the MSC football Indians, since they kicked off the fall season. The team boasted a 10-2 record, and captured the New Jersey Athletic Conference championship trophy. Their season was extended until the trio lost a 50-28 loss in the Third Round of the Division III Quarterfinal Playoffs. The team was led by Tony Fleming, Dion Roman, Walter Briggs, Dan Zakashesky, and Ernie Gianpiero.

The Jet’s Journal

Perry Schwartz

In basketball, Bob Smith and Debbie Emery were both voted to the Star Ledger Division III All Star Teams, and All-NJAC teams. Senior Ed Dolan was voted the Most Valuable Player in the North/South All Star game.

Although the Hockey Club was competing in its first season as a team at MSC they showed their stuff by capturing the Metropolitan Collegiate Hockey Conference. They defeated Wagner College, 8-1 in the “Miracle in Morris Township,” to capture the title. Ironically, the Indians averaged an 18-1 crushing in the hands of the Seahawks earlier in the season.

The Hockey Club came from a 2-6 record to finish at 11-10 with the league championship. They earned a lot of respect and credit from the college for their accomplishments, and their feat was certainly the story of the year in MSC sports.

Speaking of championships, the wrestling team captured its first Division III title in 10 years. The team was anchored by Nick Milonas and John Monaco, two names synonymous with MSC wrestling.

Presently, the baseball team is 30-8-1 and is still going strong. They stand a good chance of receiving a bid to the NCAA regional tournament and behind pitcher Anthony Foti (6-0) and centerfielder Tim Johnson (.419), could capture the national championship.

The softball team has also been successful. Under the direction of coach Willie Rucker, the Lady Indians boasted a 31-12 record. They earned a playoff berth and finished second in the NCAA Floating Region Tournament to NJAC rival Ken College.

The year in MSC sports

What’s What in MSC Sports

Eight MJC athletic programs, in an effort to raise funds for their respec- tive teams, have joined together to sponsor a flea market at Panzer Gym, Saturday, May 17th, from 9 a.m. to 4 p.m. On sale will be a variety of items ranging from sporting goods to clothing.

The MJC Swimming and Diving team held its annual banquet at the Robin Hood Inn April 29, attracting a crowd of over 125.

Among the many awards given out were Co-Swimmers of the Year in the NJAC, Gall Meneghin and Jeanne Bauer. Meneghin, a sophomore, also copped team MVP honors with the men’s team recipient, Rich Taylor. Winning the honor as Most Valuable Diver was Karl Dawkins.

One of the most valued awards, the William P. Doguard Award, which is given to a junior or senior who has achieved success at MSC through dedication and hard work, was awarded to Pam Rodns and Paul Griffin.

Head Coach Greg Lockard’s men’s team broke 11 out of a possible 19 MSC records, and talented women’s squad shattered six Indian records. The women won the NJAC Championship, winning an unprecedented 23 events along with winning the Metropolitan Conference Championship, taking 16 events. The men won the New Jersey Invitational held at MSC while winning 14 events.

Meneghin, the sophomore sensation, was a three-time All-American in ’86, while Bauer and Taylor also competed at the Nationals in Canton, Ohio.

Four members of the wrestling team were in Trenton to receive a citation from the state senate for their outstanding season. Nick Milonas, Mark Gaspich and John and Karl Monaco were all honored for winning state championships along with their coach Steve Strellner who was named coach of the year. MSC also snatched the team title from perennial power Trenton State. It was the Indians first NJAC title in 10 years.
Greenwood. Mantle tells how he beating. presented with powerful, humanistic writings. high school years. Unforgettable in the reader back to his boyhood where he is sitting at a window. recollected his past, and he transports the reader to the man behind the legend.

Chapter three recaptures the beginning of Mantle's life after baseball and the death of his father, who was a restaurant entrepreneur, coach and supermarket owner. Mantle's lifelong struggle and the touching story of his son's brush with tragedy is an example to demonstrate that although the man is a star, he has had to encounter problems that one ignores when calling him merely as a baseball legend.

Mantle's life after baseball and the struggles he went through as a restaurant owner, supermarket owner and baseball manager are included in later chapters.

The book is loaded with anecdotes, including those from former manager Casey Stengel, and teammates Phil Rizzuto, Billy Martin, and Joe DiMaggio.

The fascinating thing about "The Mick" is that the reader learns about Mantle in a different respect from his opinion about the game of baseball or baseball fan. It contains much sage with his signature at the end of the volume.

"Z-Man" with his signature at the end of the volume. Despite the blisters, which Foti credited to the use of a different brand of baseball, Foti was happy with his performance. "I had a good breaking ball and good control of my pitches," said Foti. "By the eighth inning, I couldn't get a good feel on the ball because of one of the blisters, but my arm felt fine and I was still throwing hard. I wanted to stay in, but Coach Cooney made the decision to take me out."

Cooney is anxious to return to the World series and he believes his pitching staff could bring MSC the NCAA Division III Championship. "I think we have the best (double-elimination) tournament staff in the league, considering our coaching staff could bring us to get tripped up here (in the NJAC playoffs) or the regionals, because I think we have a good shot at winning the whole thing."

To ensure themselves a spot in the regional tournament, the Indians have to defeat Glassboro again on Thursday at Trenton, then force a final game on Friday by beating William Paterson at 8 p.m. Thursday night. Should the Indians fail to take all three games they will have to be awarded an at-large bid to the regionals. In all likelihood, they would have to at least defeat Glassboro in order to be considered.

MSC stickman's record doesn't tell whole story

By Dennis Campbell

Winning everything an overused expression by Little League baseball coaches, Walter Mondale supporters, and Tampa Bay Buccaneers fans - by blasting another shot over the left field fence to sew up the playoff victory.

Herrero, who leads the team with eight home runs in 10 at-bats this year, credited much of his success as a power-hitter to MSC batting coach Rich O'Connor.

"Coach O'Connor really helped me a lot," said Herrero. "He changed my stance, made me open up more. I owe him a lot of credit. He deserves it because he worked very hard with me."

Foti kept Glassboro at bay despite pitching with blisters on the front and back of his left hand. In the eighth inning, with Jones aboard on a walk and Blanco on a single, Foti pitched a perfect ninth to get the Indians' first victory of the season.

"The (mick)" is a plus for any Mantle or baseball fan. It contains much detail about the fact that it spans five decades of baseball. It's an intriguing and warm book which will interest any reader - baseball fan or not.

Weber's opinion about the game of baseball or baseball fan. It contains much sage with his signature at the end of the volume. Mantle's lifelong struggle and the touching story of his son's brush with tragedy is an example to demonstrate that although the man is a star, he has had to encounter problems that one ignores when calling him merely as a baseball legend.

As a former professional baseball player, Mantle describes his experiences in the major leagues and his opinions about the game of baseball and baseball fans.

"The Mick" is a plus for any Mantle or baseball fan. It contains much detail about the fact that it spans five decades of baseball. It's an intriguing and warm book which will interest any reader - baseball fan or not.

Answer to last week's stumper: 4. What country's team leads the Olympic procession at the opening ceremony? Germany

Answer to this week's stumper: What gasoline station is located in back of the green monster in Fenway Park? Citgo

If you think you have the correct answer to the stumper, drop it off at The Montclarion/Thurs. May 15, 1986 19

MSC baseball team on the brink . . .

By Jim Nicosia

No one on the MSC baseball team believed the New Jersey Athletic Conference playoffs were going to be a cakewalk for the Indians. Yet, none of them probably believed they would only be 1-1 and forced to win three straight in order to earn an automatic bid into the NCAA Division III Mid-Atlantic Regional Tournament, either.

Things started out schedule Friday at Pittser Field when the Indians took apart Glassboro, 9-1. They then suffered a 15-7 setback to William Paterson Saturday that left them in the unenviable position of having to beat Glassboro again and then take two from the Pioneers.

William Paterson 15 - MSC 7

The Indians (30-8-1) dropped the 15-7 decision to the Pioneers primarily because of a nine-run WPC fourth inning that saw the Pioneers cruise to a 2-0 playoff record.

The Indians got four RBI from right-fielder Tim Jones but didn’t have enough firepower to make up for the disastrous fourth. Jones smacked a two-run double in the first inning to put MSC on top, 2-0. Jones then knocked in another run in the second on a fielder’s choice, and the Indians got RBI singles from both Fasano and Jones in the fourth to keep the game tied, 5-5.

Claude Petrotcelli then led the Pioneer rally by homering and doubling in the fourth, and John Milmoe singled in the Indians’ run to get on the board against the Profs.

Deutsch tried to ignite an Indian rally by homering and doubling in the fifth to keep the game tied, 5-5.

It didn’t take long for the Indians to get on the board against the Profs.

With one out in the bottom of the first inning, shortstop Jim Fasano singled and advanced to second on a passed ball. Jones then delivered with run-scoring double down the right field line for a 1-0 MSC lead. Welter followed with a monumental home run over the right field fence for a 3-0 lead.

In the sixth, the Indians put some distance between themselves and the rallying Profs. Welter harmlessly singled to first after hitting forced Dina DeAquino to second base in MSC’s 9-1 playoff win over Glassboro State Friday.

By Mike Sheridan

The MSC women’s softball team finished out its successful season last Saturday against Kean College in the NCAA Division 3 Floating Region playoffs.

Although they ended up losing to Kean in the end, MSC pushed past Ithaca 3-0 to stay alive in the playoffs. Senior standout Debbie Emery grounded out in the second to score Linda Giarusso and Donna Brooks scored on an error to ignite the Lady Indians’ rally in the MSC second.

Dina DeAquino (19-8) gave up just six hits, struck out one and walked only three to pick up the victory for the Indians.

The MSC squad didn’t fare as well against Kean, however, and lost its first game, 4-1. MSC’s only run was scored on a sacrifice fly to centerfield by Andrea Peters.

After Ithaca was eliminated from the tournament by losing to both MSC and Kean won the game, 7-1. Janice Lemchack was the winner for Kean, which is now 37-7 with a 22-game winning streak. Kean will travel to Iowa for the national tournament today through Sunday.

In their final game, Montclair opened up the first with a run scored by Donna Brooks after she had reached on an error. Debbie Emery batted her home safely with a pop hit to second base in MSC’s 9-1 playoff win over Glassboro State Friday.

The MSC softball team came close to making the Division III World Series playoffs last week. However, a pair of losses to Kean College ousted the Indians from the Floating Region of the NCAA tournament.
