Memorial dedicated to Jews slain in Holocaust

by Lisa Abdul

A Holocaust Remembrance was held in the Student Center by the Jewish Student Union Monday.

The Yom HaShoah Program was a memorial dedicated to the six million Jews who were killed during the holocaust.

Ron Hollander, director of the Journalism program at MSC, gave a lecture on the fact that the American public did not have knowledge of the massacres happening to the Jews in Europe.

Hollander said, that contrary to the general opinion of today, the average American was informed of the genocide taking place in Europe at the time, yet failed to take any action.

Hollander said that as early as June 1942 there was news coverage of the Nazi slaughter. On June 1, 1942 the Seattle Daily News ran a front-page article titled "Jews Slain 200,000." Although most stories were not treated with gravity they deserved, Hollander said newspapers of the time did detail what was happening.

Hollander also pointed out the reasons that the memorial was held on May 3. He stated that many horrible incidents have happened to Jews on May 3, on different years starting in the 11th Century. On May 3, 109,611 Jews were killed while exiting a synagogue. On May 3, 191,813 Jews were drowned. May 3, 1943 was the fourth day of the Warsaw uprising. May 3, 1945 thousands of Austrians and Hungarian Jews were shot and burned.

About 20 people attended the memorial including the president and vice president of MSC.

President Reid spoke about his trips to Austria and how fearful the people there are of something that horrible recurring.

Reid also said, that memorials such as this one should be held more often so that horrors like this would not be repeated.

The program opened with the lighting of six candles for the six million who were killed. There was a reading of a poem about the Warsaw Ghetos. Jacob Krief, a member of the Jewish Student Union, read a prayer for those lost in the Holocaust.

College Senate endorses graduate tuition increase

by Jincheng Liu

The College Senate had endorsed tuition increases for post-baccalaureate students as a way for the college to meet revenue needs.

If the proposal is passed, all the post-baccalaureate students who enrolled for certificate programs will pay the same regardless of the level of the course they take. Currently, their tuition fee depends on the level of course they take. If the course number is under 400, they pay the undergraduate program rate, if it is above 400, they pay the graduate program rate.

The difference between the graduate rate and undergraduate rate is $65 per credit hour, $79.50 for in-state students, and $80.75 for out-of-state students.

Graduate rates are $65 per credit hour, $79.50 for in-state students, and $80.75 for out-of-state students.

Currently, there are 3,595 students enrolled as post-baccalaureate students many of these students come from low-income families.

Who can join The Montclarion?
Any undergraduate student with an interest in any aspect of journalism or newspaper production.

How do you join?
Come to room 113 in the Student Center Annex and speak to an editor. Or, if your schedule is tight, call ahead at 893-5169 to set up an appointment with an editor.

The Montclarion attempts to report the news and events of MSC as fairly and accurately as possible. If you spot a factual error in The Montclarion, please contact the News Department - at 893-5241 - as quickly as possible so The Montclarion can print a correction. Thank you.
POLICE, from page 1

The Montclarion Police, from page 1

gas as its fuel source. Inspectors from the N.J. Department of Community Affairs felt this was unreliable because the gas can be turned off at any time, for any reason, by the gas company leaving exit signs unlit. Inspectors insisted the building have an independent source of electricity for the signs before police could enter the building, or fines against the college would be imposed. Jerome said a battery-powered back-up was chosen.

Campus police were unaware of the problem and were in the process of relocating before being threatened with fines. The building needs four battery lights inside and two battery lights outside before the move can be completed.

Jerome said that MSC officials had hoped that inspectors would allow them to use the building then reinspect it but inspectors would not allow it.

The building was scheduled for occupancy on May 3, but now the police will have to wait until at least May 10 to occupy it.

The new police headquarters is larger than the former Chapin Hall headquarters and was paid for by the Job Education and Competitiveness (JEC) bond act and college resources.

The vacancy in Chapin will be filled by expanding the Curriculum Resource Center and developing a special purpose computer room for students.

GRADS, from page 1

ADA program in the Department of Home Economics.

Another ADA student Joanne DeCandia said, “It’s not right because after we get our certification, we are going to earn the same amount as a person with a bachelors in dietetics, yet we have to pay more to take the courses.”

Because concerning this proposal is going to affect all certificate students, particularly those who come from low-income families, it is still on hold. However, the school is supposed to set fees for next year’s programs before June 30, therefore the decision will be made soon.

Todd emphasizes with the low-income students who it will hit the hardest, but she believes they will continue their studies by working more and taking less credits per semester.

Tom Auch, the vice-president for Administration and Finance, refuses to give any comment regarding this issue at the moment.

Welcome, loyal readers, to another “first to you” installment of PROPHET BIGG! Once again, I was fortunate enough to be able to attend the screening of a great film. The film, Bound by Honor, is now playing and I will recommend the film for your viewing pleasure. I was also invited to a luncheon with Damian Chapa and Benjamin Bratt, two of the three central figures in the film, as well as director Taylor Hackford (An Officer and a Gentleman, Against All Odds, White Nights) as well as the acclaimed writer Jimmy Santiago Baca.

Q. How would you describe the film?

Damian Chapa. It’s about a family that grows up in East L.A. and it’s about a bond between three brothers, or cousins, and no matter what happens in the family you’re bound by your blood and you have to face each other. That’s what it is to me.

Taylor Hackford. I wouldn’t call it a prison movie, although we certainly spent a lot of time there. We feel that the idea of dealing with prison life is important. I think that doing a realistic picture of what life is like inside the joint has a lot of relevance. A lot of people may not realize the influence of prison on our society. It’s a hyper-reality of what’s happening outside in our society. Jimmy has a knowledge that very, very few writers, certainly writers in Hollywood, have ever had.

Q. The film seems to send a negative image, a push to the extremes. Was that the intention?

Jimmy Santiago Baca. You got it (laughs).

TH. The film is about these three guys on a journey. And whatever happens to them they are bound by the fact that they’re family. There is no attempt on our part to make Mido (Damian Chapa) stand alone. Certainly, he’s the focus. We follow him. He allows us to show how a guy, who at the beginning of the film, is not a bad guy, not evil and you watch him become desensitized and dehumanized. And at the end of the film he had betrayed and destroyed the things that he is supposed to represent. That’s what that system does and it is negative.
Texas. I grew up in Ohio. My sort of mixed up growing up. But I love music. I was very bi-cultural. I was the way we live, that was us. I don't want to look like that no more.”

Benjamin Bratt. I think it's extremely clear by the end of the film that although the character of Miklo has risen to power at what cost, you ask yourself, and you see that the cost is his soul.

Q. Why were there so few women if you were trying to represent all aspects of Latino cultures?

TH. Sometimes your ambition goes beyond what you can actually accomplish. We had a female Chicano character, Paco's (Benjamin Bratt) love interest. She worked in a union and had her own story. The problem is she couldn't come in till half way in the film.

You struggle with this giant and then you ask yourself, and say, "Man, that was me," or "Man, that was me, man. I saw myself up there. I never saw myself before and all my camaros, the way we lived, that was us. I don't want to look like that no more.”

Benjamin Bratt and Damian Chapa in Bound by Honor.

And he told Taylor, "Man, that was me, man. I saw myself up there. I never saw myself before and all my camaros, the way we lived, that was us. I don't want to look like that no more.”

And I got that from my mom. But I had to do a lot of research because Paco is Chicano to the bone. So, with Taylor's prompting, the three of us actually moved into a house in East L.A. for two and a half months. We lived there for a month before filming began and it was there that I got to really absorb and soak up the angle I was looking for, you know, getting to know some of the gang members in that neighborhood. We were living with a reformed gang member who, at this point in his life, was giving back to his community through the Community Youth Gang Programs. That was quite an experience.

I had my father's brothers, my uncles and other relatives from his side who were very, very stone-cold Chicano people. I had uncles who did a lot of time. The majority of my family on my father's side, well, at least half of 'em either done time or maybe should have done time. But some of them went the right way. I grew up fast. I quit school in the ninth grade. I went into the Navy. I served a little time myself, only six months, but I don't want to get into that. Nothing real bad. (laughter) So I didn't grow up exactly like that character, but there are similarities.

Q. How will inner city children feel about your role?

DC. Well, I know how they feel cause we actually had a screening for a group who are actually gang bangers. They were watching the film and I remember one kid, about 15, who stood up after the screening and he was crying.
Talkin' dirty with Dr. Judy

Lorraine Rooney

Let's talk about sex, B-a-by! That was the theme in the Ratt on Thursday, April 29 when Dr. Judy Korianski, sex therapist, host of Z100's "Love Phones", and popular talk show guest, visited Montclair State to discuss attitudes toward sex with students.

Dr. Judy, as she is called by her followers, emphasized being uninhibited when discussing sex by showing a close-up view of popcorn popping and asking audience members what they thought the abstract picture could be. She encouraged different views about the video and said that students should take the same creative attitude toward sex.

"Be open with your partner to say what you want," stated Dr. Judy while telling the audience the importance of being honest with sexual desires. "Be comfortable enough with someone in order to work with them."

Dr. Judy also discussed certain taboos that many students hold about their roles in sexual performance. She explicitly told the male portion of the audience that, "it is not a woman's job to turn a guy on and a guy doesn't make a woman have an orgasm."

Women, according to Dr. Judy, need to become more educated about their own bodies. She said, "Women must allow themselves to look at their bodies," and informed females that there is a ten week course to help women explore their bodies and sexuality.

Another aspect about sex women should take into consideration is investing in vibrators. Dr. Judy says vibrators can provide constant stimulation and build up a woman's confidence. She also said that vibrators can be found in stores in the home appliance section (and yes, Dr. Judy owns one, too). Dr. Judy also addressed male inhibitions as well as female problems. She stated that men are too concerned with penis size and the length of time of an erection. This is known as "performance anxiety" and should be worked on with the male's partner.

Dr. Judy also answered questions from the audience who wrote down their curiosities before the discussion. Some of Dr. Judy's answers were reinforced by some disturbing facts, such as, "only one-third of women have an orgasm during sex," and "it takes a guy three minutes to get to the point of excitement and it takes a woman fifteen minutes."

A discussion about safe sex and AIDS wrapped up Dr. Judy's visit to the Ratt. "A woman can get pregnant at any time during her cycle," stated Dr. Judy. "Pulling out and the rhythm method do not work." Dr. Judy suggests wearing a condom during intercourse for prevention of both AIDS and pregnancy.

I think he's done a half-way decent job so far, although it's still early. His policies still haven't taken effect and when they do, then I can have a better opinion about it.

Remembering The Holocaust

This past Monday, there was a Memorial held in remembrance of all six million Jews killed in the Holocaust. The project, held in the Student Center, was funded by the Jewish Student Union and entitled The Yom HaShoah Program.

There was significance in the chosen date, May 3. In the Eleventh Century, eleven Jews were killed exiting a synagogue. On May 3, 1918, thirteen Jews were drowned. On May 3, 1945 thousands of Austrian and Hungarian Jews were shot and burned. Only for the "aggravating" reason of their religion.

The sobering reality is that the past is not dead, that survivors of the Holocaust are still alive today. This brings a chilling truthfulness to how little has changed in the fifty years since the Holocaust. Examples such as the L.A. Riots, the beating of Rodney King and the tortures present in Bosnia are grim reminders of the dark underbelly of humanity.

The Klu Klux Klan, a known prejudiced and racially violent organization, is more prevalent today than it was fifty years ago. Nazism can be found in underground magazines and some overt Skin Head organizations pledge their distaste for Jews, and other 'minority' groups.

No matter what the fight, there should always be held a value of human rights. Though the Holocaust was, and always will be remembered as horrific, it would desecrate the dead not to learn from the past. The reason for Memorial events, is not only to lament the dead, but to avoid further occasions to remember.

Dr. Ron Hollander, a professor at MSC, spoke of the importance of not forgetting the Holocaust. He also stressed the role of the press's responsibility to inform the public, and how not all the information during this travesty was reported on.

It is also important that MSC, as a student body, remember the horrors that happened fifty years ago this year, and to be aware that these same atrocities have occurred through and up until today within wars, revolutions, as well as the racial and religious fighting found all over America today.

The Klu Klux Klan, a known prejudiced and racially violent organization, is more prevalent today than it was fifty years ago. Nazism can be found in underground magazines and some overt Skin Head organizations pledge their distaste for Jews, and other 'minority' groups.

With all the functions held on this campus, Elections, the Mardi Gras, etc., it is relevant and pertinent to take a somber step toward reducing the violence in our own country today. Functions held like this one, are well worth the student fees we give every term if that is what it takes to reduce prejudiced hatred.

The program ended in a poetry reading and the lighting of six candles to remember the six million Jews that were tortured and killed. Let them not go forgotten.

Quote of the Week by

Memorials such as this one should be held more often so that horrors like this would not repeat itself.

Pg.1 President Reid
Powder keg mentality still in inner city

I remember driving home last spring when a voice interrupted the song I was listening to on the radio. The man was obviously trying to retain both composure and opinion. He was the voice of two rear seat passengers—this voice in monotone, so that all I could decipher amidst my own swirling thoughts of nuclear war and emergency broadcast system beeps, was that somehow Los Angeles exploded in flames, and was burning out of control.

I raced home and immediately turned on the television. The California sun had not sought refuge yet, making the scenes before me seem like visions of another world trapped in constant twilight. Black smoke curled in great plumes of malignance and painted in the horizon, obscuring the city. The cameras cut from one scene after another, and it slowly dawned upon me what it was so unстерving about the images was the fact that amidst all this destruction, there was not one person to be found. Silences waited in the distance, as though they were chasing some mysterious being. This was my first time watching Los Angeles in the heavens to wreak havoc upon Los Angeles.

Just as I began to doubt my senses and reach for the LSD flashback survival manual, the man seemed like visions of another world trapped in my head. The California sun had not sought refuge yet, making the scenes before me seem like visions of another world trapped in constant twilight. Black smoke curled in great plumes of malignance and painted in the horizon, obscuring the city. The cameras cut from one scene after another, and it slowly dawned upon me what it is so unsterving about the images was the fact that amidst all this destruction, there was not one person to be found. Silences waited in the distance, as though they were chasing some mysterious being.

Today, almost one year since the riots we had nearly forgotten, the good old siege mentality has returned.

This is a common complaint that people have about students who are “gifted”; you give them a simple problem, and the problem looks too easy to them. So, instead of stating the obvious answer, they go through a very complex reasoning process to come up with the wrong answer.

Believe it or not, this is not a problem limited to “gifted” students. Everybody does this. Nobody, including myself, really knows how to live life. The answer is really quite simple: just do it and don’t think about it. The solutions to problems often just fall in our lap if we don’t try too hard. I have found this to be true, and yet it is so hard to live this way in our society. Everything has to be perfectly done in advance, and we panic when things don’t work out, it doesn’t work out. No sense pouting over it.

Now don’t start accusing me of being callous and unfeeling until you’ve tried this. Most people get annoyed at this sort of thing; after all, how can you go through life not caring and not having a set direction? Well, first of all, not caring too much is not the same as not caring. Secondly, nobody’s life has a set direction. Even the best laid plans are fouled up. When we plan too much, we complain when things don’t work out, it doesn’t work out. No sense pouting over it.

Don’t worry about whether or not it comes out right - if it doesn’t you have plenty of time to either fix it or start some- thing new. To sum up in the words of Jack Kerouac, “I don’t know. I don’t care. And it doesn’t make any difference.”

Reminder, only one more chance this year to voice your opinions! Send in a letter or be unheard.

SIGMA DELTA TAU - Would you like some cheese with that Whine? Greek Week is supposed to bring us together not tear us apart!

Big Daddy and Long Stroke - Thanks for 3rd place and keeping our "secrets." You're "the man."

Anne - You dumb slut doing the PR with — I Love your roommates in the Presidential Suite!

Dawn D. (Tri Sig) - Your secret Sigma loves you!

To the former Gold Medalist - I really wanted to borrow those shorts.

To the former Gold Medalist - Thank you very much.

Michelle (TS) - Your secret Sigma loves you?

Jill O (Tri Sig) - You must earn my status as the you-know-who.

Christine (Tri Sig) - You are the best shippie! Best be seeing you around Cliffside this summer! Love your shipmate.

Dawn, your hair is starting to get darker ... time for some more bleach.

Stacy (Tri Sig) - You are the best sister! Love Stacy (Tri Sig)

Hey Fathead - Sack off! Watch your back and live by the Gth! Duh, we didn't call the cops and we used the money for oil.

5th floor bathroom...today.

Jim Rich you are a petifile.

Melanie (TS) - Good luck this week with "Our Town." I know you'll be great! Love Joanne

Tommy little Stacey (TS) - Cheer up! Things will get better - I promise. I love you! Love your big Vicki

Krisy (TS) - Have a great birthday and a great time at KCBF! We'll celebrate when you get back! Love Kris

Joanne (Tri Sig) - Have fun with Kung Fu man! Love your LL Jill ZK43

Rich - Thanks for dinner - Aims.

Tri Sig - Chill on the personal ads, or get a life, because I won't type them ALL! Love your typesetter.

Angelina (D Phi E) - Let me lick you up and down till you say stop, let me play with your body, baby. Make you real hot. Let me do all the things you want me to do, cause tonight baby, I want to get freaky with you.

Vicki (Tri Sig) - You are the best big love Stacey (Tri Sig)

Hey/ashhead - Back off! Watch your back and live by the Gth!

Not getting a new car for graduation?

Here's the next best thing:

No money down, deferred first payment and $400 cash back from Ford Motor Company

Let's face it, not many students can count on a new car for a graduation present. But you can count on the Ford and Mercury College Graduate Purchase Program for some help. With it, there's no down payment or eligible new Ford and Mercury vehicles if you qualify and finance through Ford Credit. You may even get the benefit of a deferred 1st payment in states where allowed. You'll also get a $400 cash incentive regardless of whether you buy or lease. You can opt to use it toward your purchase or lease, or just keep the cash.

You may qualify for the program if you earn a bachelor or advanced degree between January 1, 1993 and December 31, 1993 or are a graduate student enrolled during the same period.

Simply visit your local Ford or Mercury dealership or call 1-800-321-1536 for more information.

With college soon to be behind you, it's time to trade in your greasy snacks
for something with dual overhead cams and sequential multi-point fuel injection.

Of course, we're talking about the fun-to-drive Nissan NX 1600, one of a full line
of very special Nissan cars we're offering to graduating college students at some
very special leasing and financing rates. The program is called the Nissan College
Graduate Financing Program and you’ll find complete details (in other words,
eligibility requirements and legal jargon) in a brochure that we have conveniently
placed in your cap and gown package.

It will explain how getting into a styling, new car like the NX 1600, 240SX,
or Sentra is easier than you might have thought. (Not as easy as ordering a pep­
peroni pizza. But easier than Biophysics 401.) Also, look for
details about our sweepstakes, which could put you behind the
wheel of an NX 1600—free of charge—for an entire year.

Now that you're graduating from college, perhaps it's time to redirect
your pizza budget.

The Nissan College Graduate Financing Program

Nissan Motor Corporation U.S.A. Smart people always read the fine print. And they always wear their seat belts. Subject to
credit approval. No purchase necessary. See brochure for complete details. For the dealer nearest you, call 1-800-NISSAN-6.
MSC lacrosse's season of disappointment comes to an end

by Nicole Festa

Disappointing is certainly one way to describe the MSC lacrosse team's recently concluded season.

The Red Hawks finished with a sub-.500 record for the first time during Doug Alsofrom's six-year stint as head coach.

The Red Hawks' 3-6 record also created a post-season road-block. The Red Hawks were initially invited to the ECAC Metro New York-New Jersey Division III Men's Lacrosse Tournament. However, MSC was not allowed to participate because of their record and was replaced by Drew University, the eventual winner of the tournament.

Despite the team's record, Alsofrom was pleased with the way his team handled itself on the field.

"As far as wins and losses are concerned it was a disappointing season," he said. "But the way the team responded wasn't. They had two options. They could have just quit trying or they could have just done the best they could do," Alsofrom added.

Back in February, Alsofrom knew that the season would be filled with complications. The Red Hawks altered their original schedule by replacing four mar­ginal opponents with four tough ones.

Then the team began to lose players to either ineligibility, injury or illness. "That's the hardest thing to deal with. The players on the roster change from the beginning of the season until the end of it," said Alsofrom.

The Red Hawks did have their share of outstanding perform­ers, even though their record doesn't indicate it.

Senior goalkkeeper Ken Kane will be the toughest to replace ac­cording to Alsofrom. "Ken is defi­nitely the best goalie in our league and he has a shot to be an All­American," Alsofrom said proudly.

The "heart" of the team this season was its midfielders. Chris Bill, Neil Blaney and Keith Van Ness will all return next season with hopes of turning things around.

The Red Hawks will also have a brand new face among two of their top defenders. All­Knickeenocker Conference per­formers Jim Bruston and Heath Pisica will be lost to graduation.

Alsofrom was also pleased with the role players who performed that duty. Mike Bruston, Jim Nugent, Rich Skalski and Roger Welton all filled holes that weren't anticipated at the start of the season. The added experience should help all of these returnees to be key contribu­tors next season.

Speaking of next season, things are looking much brighter for the Red Hawk lacrosse pro­gram.

"We should be outstanding. Our guys are stepping up in class and we have many returning play­ers. Also, we're expecting a few recruits," said Alsofrom.

When asked to sum up this season, Alsofrom said, "It was a learning experience.

RED HAWKS NOTES...

Alsofrom's career record at MSC currently stands at an impressive 25-7. This season MSC played only 11 games. In the previous five seasons, the team had averaged 15 games played per year.

Brame, Stevens bring back memories at CTC meet

This past weekend marked the return to form of one of MSC's best athletes.

Shantay Brame answered any questions concerning her will­ingness to recapture the form of a linewoman in the world's first­ever talking steroid, Arnold Schwartzenagger. She let her ac­tions speak for themselves and her point was well taken. She's back!

Brame won the 100 meter race this past week­end at the CTC Championships, held at Trenton State College in Ewing Township.

She won with a time of 12.21, which qualified her for the National Championships.

In the 200 meters Brame finished a close second and filled her arch-rival from William Paterson, Danielle Humphries, with a healthy dose of respect.

MSC Lacrosse Schedule

Friday, May 7:
Softball (away) vs. Trenton State in the second round of the NJAC tournament at Rowan College, 10 a.m.
Baseball (away) vs. Rowan College in the NJAC tournament at William Paterson College, TBA

Saturday, May 8:
Outdoor track and field (away) The NJAC Championships at Trenton State College, TBA

Wednesday, May 12:
Baseball (home) vs. Adelphi University, 3:30 p.m.

*Both tournaments are at the double elimination stages, with the championship games being played on Sunday.

MSC Sports Schedule

Will MSC baseball find the promised land?

by Brian Faizaranzo

The show. The dance. The road to Battle Creek. All are synonyms for the journey which MSC is about to embark upon in the ultimate quest of Division III baseball's College World Series Championship.

Sure the Red Hawks are 25­7 (13-3 NJAC). Names such as Rob DiLaurenzo, John Pallino, Ralph Yezza, Jason Scavalla and Joe Critelli make the Red Hawks a force to be reckoned with. But like the Detroit Tigers of recent, pitching is a bit thin.

This column, I will examine why MSC will or will not "make noise" in the post­season, supported with fact and sound reasoning.

Reasons why the Red Hawks could be the toast of the party:

1. Hitting. First and fore­most, the Red Hawks would not be 25-7 without their legion of bats. The top seven of DiLaurenzo, Tony Martinez, Critelli, Pallino, Yezza, Mike Minues and Scavalla combined for 25 homers and 201 RBI.

2. Starting pitching. Drew Yocam and Chris Rampone are the two constants. Combined, they went 10-0 with an ERA near two. Add highly promising freshman T.J. Consello (3-3) and the surging Todd Sak, who has won his past two deci­sions and will give head coach Norm Schoening some options.

3. Reasons why the Red Hawks will be sent home packing:

Relief Pitching. Shaky, inconsistent, scary. They have been erratic at best. "The Freezer" Frank Dippold is the reason why they are as good as they are. Schoening needs Scavalla, John Carlon and a cast of currently underachieving arms to keep MSC in the hunt.

2. The Pioneer Factor. The Red Hawks have not beaten William Paterson in their past nine tries. The Pioneers have pitching as deep and talented as Flapper-20,000 Leagues beneath sea level. And the hitting can set a fire alarm at a moment's notice.

Will MSC have revenge on its mind, or will it be as timid as the 90-pound weakling against the 250-pound bully?

MSC has had a very successful season. But unless the relief pitching, aside from Dippold, gets better, the Red Hawks could become an endan­gered species early in tourna­ment play.

MSC should beat Rowan again. WPC will be tough, though. Look for the Red Hawks to end the Pioneer hex in the NJAC playoffs as both teams prepare for the NCAA tourna­ment.

But when all is said and done, WPC will defeat MSC in the Mid-Atlantic Regional of the NCAA's, continuing its domi­nance over the Red Hawks.
THE COLLEGE STORE WANTS TO GIVE YOU:

No substitutions of prizes and no cash redemption will be allowed. 9.) The College Store reserves the right to rescind offer at any time.

**Sportsworld hit hard by week of tragedy and misfortune**

Every once in a while the (often fantasy) world of sports is given a dose of reality. This past week was certainly proof of the preceding paragraph's theory.

The death of legendary basketball coach/television commentator Jim Valvano didn't come as a shock to anyone. Jimmy V was suffering from the advanced stages of cancer and his condition was getting worse with every new report.

Yet, when the news reached this writer last Wednesday night, a chill went down my spine as well as that of loss was inevitable.

You see, even if you never met Jimmy V, he made you feel like you did. He was one of those special people that almost everyone could relate to. Whether he was coaching, covering a game on television or lighting up a room with his outgoing personality and sense of humor, everyone wanted to be around him. He is just one of those people that make you feel good.

Jimmy V was so full of life, right up until the very end of his days. When he was in a terminal physical state, he refused to alter the personality that had made him so likeable.

That's probably why it was so difficult to watch him at this spring's first annual ESPY's. Security had to intervene when Jimmy V stood up and was very weak but still let everyone know that he would never give up.

He taught us all a very valuable lesson that night. The strength of one's personality can be more powerful than any disease.

Jimmy V, thanks for the memories.

**Calling the shots...**

Last Friday gave us all a wake-up call. There are some real sick individuals in this world. Why someone would try to kill someone that he/she doesn't even know? Monica Seles is lucky to be alive after being stabbed by a spectator at the Citizen Cup tennis tournament in Hamburg, Germany. What's really troubling, aside from the fact that the incident took place, is the lack of effort that was required to attack Seles. Security has to improve at these events.

The game is far from over. Better move the stands further away from the court or add more security personnel. Otherwise, as Seles can attest, someone could be killed....Reggie Lewis' collapse in the Celtics-Hornets playoff game last week brought back a horrible memory. On March 4, 1990, a similar incident occurred during a college game in California. Only Hank Gathers wasn't as fortunate as Lewis was. Lewis, 27, is one of the top shooting guards in the league and the heart of Boston's team. However, he has a heart ailment similar to the one that Gathers had. Gathers' death should provide Lewis with all of the evidence he needs to make his decision. Basketball or life? The choice is rather simple.

**Baseball, from page 20**

"Todd has really turned it around. He is pitching very well right now," said Schoening.

ECSU (16-8-2) charged to the hot corner last Friday night with a 1-0 victory over Richard Clegg (2-3, 3 RBI) drilled a two-run home run in the inning to pace MSC's 10-hit attack.

Chris Roof added a two-run blast of his own, his second of the year, to put the game out of reach for ECSU. Dippold, Andrew Maira and Scavalla combined to close things out. Scavalla, best known for his offensive production, got the final out to get his first save.

"He had arm problems earlier in the year," said Schoening. "We hope it doesn't kill him." Scavalla, who pitched sparingly last year, "Hopefully he can help us down the road."

On Friday, the place was electric as the Marauders got to gear up for the state playoffs. The team consisted of Joe Bass, Jacinto Blacharski, Brian Sasso and Frank Scalabrini off of MSC's John Blacharski. Brian Sasso and Frank Dippold went the rest of the way, with Dippold picking up the victory (4 2/3 photon innings, 5 strikeouts).

Miccucci had to bring the victory into the clenches of the Red Hawks. After John Pallino (381, 10 HR, 46 RBI) tripled to start the ninth, Micucci stepped to the plate. Previously hitless, he saw a drawn in infield and singled through it, scoring Pallino with the winning run. Scavalla (3 for 5) added an RBI single, which scored Micucci, to produce the final outcome.

This past week was one of ugly games, but beautiful outcomes - the Red Hawks won three of four - which is not lost on Schoening.

"We're doing a great job offensively," Schoening said of his crew. "But we can't hold a lead. It could hurt our chances later on, but we'll be able to use fewer pitchers," Schoening added, of the MSC playoffs and the Mid-Atlantic Regionals.

A team doesn't go 25-7 and not be cognizant of its capabilities. This team can go far in the playoffs if it plays well.

"We are confident we can compete with anyone. Now we just have to go out and execute," Schoening said.

Sometimes that is easier said than done.
MSC seeks to tame Lions in tourney

Red Hawks pitted against Trenton State in second round NJAC game

by Keith A. Idec

They meet again. After finally defeating Trenton State for the first time under head coach Anita Kubicka last week, the MSC softball team will take on the Lions again this Friday at 10 a.m.

Softball

However, the stakes will be much higher this time around. That’s because this game will be part of the championship round of the New Jersey Athletic Conference tournament.

The tournament will be played at Rowan College in Glassboro and switches from single-elimination to double-elimination in this round. The championship game is tentatively set for Sunday afternoon. The tournament could be over on Saturday due to the double-elimination process.

The winner of the tournament receives an automatic bid to the NCAA Division III NJAC tournament. Since the top twenty could change after tournaments played this weekend, every team must wait until Monday to find out its fate..... The NCAA regionals begin on Friday, May 14...

Costly Red Hawk errors force split with Rowan

by Brian Falzarano

The MSC baseball team’s season can be summed up in a three-prong description. They’re never pretty, usually diligent and almost always get the job done.

While the aforementioned describe the Red Hawks, it was of no use at MSC claved out a split of a double-header against NJAC rival Rowan College on Saturday, winning the opener 6-4 and losing the finale 7-4.

Baseball

This loss gave William Paterson the NJAC regular season title, giving MSC, ranked No. 9 nationally in Division III, the second seed in the NJAC playoffs Friday at William Paterson. The Red Hawks will play the very same Profs of Rowan in Wayne.

Sophomore Jason Scavalla continued his consistent play, striking in the game-winning run in the eighth inning to lead the Red Hawks (25-7, 13-3 NJAC) to a 6-4 victory over Rowan.

"We are playing very well," head coach Norm Schoenig said.

"And Scavalla is doing a great job for us," Junior left-bander Drew Yocum (6-0), who was hit by the ball, was used for the third and fourth.

How far will MSC baseball go?.....

A View From the Pressbox............19

MSC beat Rowan 4-2 lead through three, with Rob DeLaurentis (3-87) delivering a two-run single and Joe Cretelli, who went for 4, driving home runs in the third and fourth.

However, Rowan outfielder Mike Gazzardo powered the Profs to victory. Gazzardo, a junior, went 2 for 4 with 4 RBI, including the game-tying two-run single.

"We stranded two runners in the seventh, which hurt us," said Schoenig. "Then we had some defensive lapses," he added.

Dippold (6-0), who was hit by the ball, was used for the fourth time in three days, partially due to the ineffectiveness of the MSC bullpen. Mike Stacey (1-1) gained the victory for Rowan by throwing the final three innings.

In previous action, Todd Sak turned in a solid outing up at Eastern New Jersey, allowing three runs over seven innings for a 7-4 MSC victory, its sixth consecutive over RCSI. Sak, who had struggled earlier in the season, pleased Schoenig with Saturday's outing.

Red Hawk shortstop Tony Martinez stokes a stroke in Sunday's double-header split with Rowan College at Pitter Field.

MSC's one-two punch. Denise Warnock (15-1, 3.33 ERA), at left and Michelle Serio (12-5, 2.11 ERA) have kept opposing hitters in check.

"Our pitching has been very solid all season," said Kubicka.
