Sports facilities to open soon

The future home of the Red Hawks, Yogi Berra Stadium.

By Marian Zboraj

The baseball stadium honoring Yogi Berra, and two ice rinks carrying the name of K-Mart Chief Executive officer Floyd Hall will soon be opening to the public despite a two week delay. Floyd Hall Ice Arena is scheduled to open in late November, said Holly Gera, Associate Director of Intercollegiate Athletics.

Valerie VanBaaren, director of Legal Affairs and Governmental Relations said, "Yogi Berra is a long-time supporter of MSU as well as a Montclair resident. Floyd Hall is a highly respected businessman and Montclair resident who wanted to make a contribution to our University and to the Montclair community."

Hall and Berra have donated funds to MSU before, specifically to the athletic and arts program. Both facilities are located near the quarry. The baseball stadium will contain a Yogi Berra Hall of Fame room and the ability to seat 4,000 spectators for MSU's home baseball games. The larger of the two ice rinks will seat 1,000, the other will hold 400. Although there are still negotiations as to how the rink will be used, said Gera, the probable uses would include recreational ice skating, instructional skating, and some classes.

The contractors of this project are Point Construction. The total cost is approximately $8 million said David Yen of the Architectural and Engineering services, and is 100% privately funded.

The purpose of construction for the ice arena and stadium, according to MSU President Dr. Irvin Reid, was to have superior facilities and on-campus work opportunities for students. It will also make more opportunities possible for co-op and internship positions.

On July 24, 1996 a press conference was held to announce the project. At that press conference Hall said, "We (the Hall family) wanted to give something back to the community, the University and the state. We've put together a winning combination, but the real winners will be tomorrow's students as well as the people of this great community."

"I've always felt at home in ballparks and at Montclair State University," said Berra. "All I want to say is: play ball!"

SGA holds annual Fall Leadership Conference

By Christopher Lepre

Assistant News Editor

The Student Government Association (SGA) went on their annual fall conference last weekend. Held at the Aztec Hotel in Seaside Heights, New Jersey, the conference's purpose was to bring together new members and old, in-order to familiarize and teach SGA members methods of governmental procedure.

SGA president, Karen Cardell, commenced the conference on Friday night by conducting a meet and greet with-in the SGA. "The main goals of the conference were to instruct new members of rules and policies, and to concentrate on how we can improve relations between SGA and all other organizations," stated Cardell.

Since new members of the SGA might not be familiar with a position of power, or may not be familiar with the internal workings of government, SGA can act as an educational tool in these areas for students at Montclair State. "One of the goals of the conference was to educate everyone in how to accept these responsibilities, and to stress that the student government system is a tool at the student's disposal."

Those who attended were comprised of the Executive Board members of the SGA, members of the Legislative and Judicial Branches, and the president and treasurers of each Class One organization. This year, administrators Joan Ficke (acting Dean of Students), Chuck Feiner (Director of Student Activities), and Dean Helen (Interim President of Student Development and Campus Life) were also invited.

Unfortunately there was a low turnout this year. Only 35 out of the 65 mandatory participants showed up. Five out of the nine Class One organizations did not show, and a large portion of the SGA Legislative Branch were also absent. When Cardell was asked where the rest of the SGA was, she replied, "Good question."

Saturday morning started with introductory lectures on the administration, and what their role is at Montclair State. Then the Board of Trustees representative Vitaly Satanovsky spoke on the infrastructure of the SGA and how the school itself is set up. In the afternoon, Mike Redpath, Federal Commissions Director of Seaside, was asked to speak to the SGA members so that he could share his knowledge of governmental workings. He gave examples of how municipal government models can be applied to the student government; and he explained how these models can not only be used to build a stronger community but can also increase efficiency in expediting governmental goals. The example of Seaside's summer increase of patronage was parallel to Montclair States increase of patronage when concerts are held on campus. In both cases new money is brought into both communities, and ways of dealing with this new influx were discussed.

The group then participated in a brainstorming exercise that asked: What is the Legislative Board's major aspects of campus, conference cont. on p. 3

**Russian nuclear weapons missing**

Suitcase-size nuclear weapons are missing from Russia's nuclear arsenal and could be in the hands of terrorists, Russia's former security chief insisted Wednesday.

Russia's Defense Ministry repeatedly has denied Gen. Alexander Lebed's claims, which he initially made last year as President Boris Yeltsin's national security adviser.

Russian officials maintain all of its nuclear weapons are accounted for, and that the country never has produced so-called "nuclear suitcases." But Lebed, a gruff reserve general with presidential ambitions, stood by his allegations Wednesday in a CNN interview, and vowed to hunt down the weapons he says are missing.

**Israel frees Palestinian leader**

Israeli Prime Minister Benjamin Netanyahu, in what was called a goodwill gesture to Palestinians, freed the ailing spiritual leader of the Palestinian Islamic group Hamas on Wednesday.

Sheik Ahmed Yassin, 61, was serving a life sentence in an Israeli prison for urging his followers to kill Palestinians suspected of collaborating with Israeli authorities.

A spokesman for Hamas protested the decision to send Yassin into exile in neighboring Jordan and said Israel had only released Yassin because he was near death and feared the Palestinian reaction if he died behind bars.

A senior Palestinian official, Hassan Asfour, said the release was positive. "It's a step in the direction of releasing all Palestinian prisoners," said Asfour. "Their continued stay in prison does not help Israel's interests." Palestinians estimate some 5,000 activists are still in Israeli jails.

**Teenager goes on killing rampage**

A Mississippi teen-ager slashed his mother's throat Wednesday morning before going on a shooting rampage at his high school that left two students dead and at least six wounded, authorities said.

The high school junior, Luke Woodham, was arrested and charged with three counts of murder shortly after the shooting at Pearl High School, about three miles east of the state capital, Jackson.

Police Chief Bill Slade choked back tears as he told reporters, "This was a disgruntled girlfriend-boyfriend thing... We talked to the youth. He gave us a statement and his manifesto was that he felt he had been wronged."

**FBI & CIA say missile probably didn't bring down flight 800**

Dealing a blow to the theory that a missile brought down TWA Flight 800, a study by the FBI and the CIA says the streak of light seen by more than 200 people just before the crash was probably the plane breaking up and spilling burning fuel.

The seven-month study, which is nearing completion, found that "what people interpreted as a missile was in fact the aircraft after the first explosion rocked it," Carolyn Osborn, a CIA spokes­woman, said Tuesday.

"The plane continued to gain altitude, giving the appearance of a missile," Osborn said.

Investigators know the crash in 1996 came after an explosion in the center fuel tank, but they are still investigating what caused it. They are leaning toward mechanical failure but have not entirely ruled out a bomb or missile.

BOSTON — Life after college sounds, well, a lot like a life in hell. Increasingly, college graduates are deep in debt, lack basic skills and are forced to move back home with their parents, according to a new report released by the Institute for Higher Policy and The Education Resources Institute.

Of course, the news isn’t all bad. The report also found that more college graduates are saving money, choosing jobs that interest them, and performing community service. But it’s the not-so-promising trends that stand out. Pinching pennies and dinners with Mom make for less than smooth transition into the real world, according to the report’s authors.

The idea of staying at colleges, life after college has meant success and achievement,” the report states. “For others it has meant challenges and struggles to ‘find their way’ in the world after college.”

The report found that college graduates are saving money, choosing jobs that interest them, and performing community service. But students shouldn’t be scared out of their wits by the results of the report, called “Now What? Life After College for Recent Grads,” says Freeman.

“Overall, we are seeing a more complete picture of college graduates emerge than we’ve had in the past, and much of it is very heartening,” he says.

For instance, 71 percent of college graduates say they are saving money for education, retirement or a home. That’s a higher percentage than among the general population, which is 55 percent.

And making the big bucks isn’t a high priority for recent grads, either, the report found. Forty-five percent say their job must stir their intellect, and 42 percent say it must be interesting. Only 35 percent say a good starting salary is critical.

Such career priorities sound about right to Matt Smith, a freshman paleontology major at Kent State University.

“I’ve been told from the start that there historically hasn’t been much of a job market for paleontologists, but that hasn’t discouraged me yet,” he says.

He adds that he plans to balance his career with volunteer work. “I’ll try to be active in the community, and if nothing else, I plan to take on some type of job at my local church,” he says.

But other students are more skeptical about the reports findings. Aaron Morris, a zoology major at Kent State, says college grads don’t overlook salaries when choosing a job.

“In today’s society everyone is so concerned with money,” he says. “This means that everyone is trying for the highest paying jobs as a first priority, instead of doing what they feel in their heart is a good career.”

Whatever the case, the report found that jobs prospects for 1997 graduates are up 17 percent from last year, and average starting salaries are increasing faster than the rate of inflation, especially for engineering and computer majors.

The demand for jobs requiring bachelor degrees in expected to grow by 27 percent between 1994 and 2005, according to the report.

“The emphasis of the public discussion about college has focused on whether or not people get jobs, or how much they make,” said Jamie Merisotis, president of the Institute for Higher Education Policy.

“But this report demonstrates that a college education has many other tangible effects, from increased civic participation to a higher quality of life. This broader portrait of recent college graduates needs to become more prominent in the national dialogue about higher education.”

The report focused on 7 million students who have graduated from a four-year college since 1992. The report drew on data provided by the U.S. Department of Education, the Census Bureau and the Bureau of Labor Statistics.
09/23/97

PROPERTY DAMAGE

Female reports on 9/4/97 her car was parked near College Hall. Upon her return she discovered paint specs all over the car. College Hall was being painted.

FIRE ALARM

Officers respond to a fire alarm in Bohn Hall. Upon arrival they discover a 16th floor pull station damanged. No signs of smoke or fire. Clifton Fire Dept. responded.

THEFT

Male reports he left his book bag unattended in the men's locker room in Panzer Gym while he was using the pool. Upon his return the book bag was missing.

THEFT OF MV

Male reports he parked his girlfriend's car, a 1996 Toyota in lot 25. Upon his return 3 hours later the car was missing.

09/24/97

FIRE ALARM

Officers respond to a fire alarm at the Clove Rd. Apts. Upon arrival discover a pull station activated. An RA activated the alarm upon discovering major flooding on the 1st, 2nd, and 3rd floors. Little Falls fire dept. responded. Water was shut off in the building. A water main burst on the third floor.

Officers respond to a fire alarm at the Clove Rd. Apts. Upon arrival discover a water flow problem in the sprinkler system that caused the alarm. Little Falls Fire Dept. responded.

BURGLARY/ATTEMPTED THEFT

Female Blanton Hall resident returns to her room after evacuating for a fire alarm and discovered her room ransacked. The contents of her purse were emptied. No theft occurred.

9/25/97

A male maintenance worker fell from a ladder while replacing a light bulb in the Music Building. Victim injured his back. Powder from the fluorescent tube caused his eyes to burn. Victim was transported by ambulance to Mountainside Hospital.

SUSPICIOUS PERSON

Female at NJ Transit bus stop on Heating Plant Way reports a male was making her feel uncomfortable by making lewd remarks at her. Officers ID'd non student. He left campus on the next arriving bus.

THEFT

Female student and felt something snap as she twister her ankle while playing with a friend on West Quarry Way. Victim was transported by ambulance to Mountainside Hospital.

9/26/97

CRIMINAL MISCHIEF

Male Freeman Hall resident reports returning to his parked car in lot 23 and finding his car dented. Footprints were observed across the hood of the vehicle.

THEFT

Faculty member in the Center for Continuing Education reports components from a printer and missing. Investigation continues.

9/27/97

SUSPICIOUS PERSON

Female disc jockey at the Student Center radio station reported an older male was hanging around the lobby then tried to engage her in a conversation. Officers responded. Male had fled the area.

THEFT FROM MV

Male parked his car in lot 5. Upon his return, he discovered both his license plates missing.

9/28/97

FIRE ALARM

Officers respond to a fire alarm in Bohn Hall. Upon arrival discover burning incense in an 11th floor room caused the smoke detector to activate. Clifton Fire Dept. responded.

HARASSMENT/ASSAULT

Officers respond to Blanton Hall cafeteria on a report of a fight. Upon arrival it was determined that a heated argument with physical contact involving a female Bohn Hall resident and a male Bohn Hall resident over past incidents had occurred. No criminal complaints made.

9/29/97

FALSE PUBLIC ALARM

Officers respond to a report of a possible fire. They found a water main break on the frist floor and the water valve to the toilet were shut off. Maintenance was contacted.

9/30/97

CRIMINAL MISCHIEF

Female College Hall employee reports discovering the wheel lug nuts on her vehicle had been loosened. Investigation continues.

MEDICAL

Officer responds to the first floor of the Student Center. A female complained of dizziness, and numbness in her extremities. Victim was transported to the Health Center.

SUSPICIOUS ACTIVITY

Caller reports a shuttle bus driver bumped a parked car in lot 28, and possibly is intoxicated. The incident happened two hours earlier. Investigating officers determine a shift change took place and the driver in question had left for the day. Shuttle service supervisor was advised.

MAINTENANCE EMERGENCY

Officers respond to a Clove Road Apt. A 2nd floor toilet was overflowing, water was entering the 1st floor kitchen electrical fixtures. The electrical circuit breaker and the water valve to the toilet were shut off. Maintenance was contacted.

HARASSMENT

Male Bohn Hall resident reports receiving three harassing phone calls from a female caller. Investigation continues.
The Student Government Association held their first meeting after the fall 1997 Leadership Conference. The meeting started with the swearing in of 7 new legislators.

Next, Johnathon, a representative of the 21 Fund was given the floor. The 21 Fund is a lobby group that lobbies for the reduction of higher education costs. They try to keep Federal Loans subsidized, Pell grants more available, and Tuition Aid Grants (TAG) more accessible over a wide range of household incomes. "By the year 2013, only 50% of the students in NJ will be given Federal Loans, Pell Grants, or TAG's," said Johnathon. A 21 Fund conference will be held at the College of New Jersey on October 18, 1997. More information is available in the SGA office.

Chuck Feiner was then given the floor to comment on the recent SGA Leadership Conference. Feiner addressed the recent rumors that have been circulating around the campus about alleged misconduct at the conference. "Students did drink at the conference. They drank responsibly and no SGA funds were used for the purchase of alcohol. There was a lot accomplished at this very productive weekend."

Legislation was then introduced to grant Theta Kappa Chi sorority a Class IV charter for the 1997-1999 year. "Theta Kappa Chi is dedicated to helping the underprivileged children of the community," said the President. The bill passed unanimously.

Legislation was then introduced to appoint Jesse Taylor as Director of Academic Affairs. "I would like to institute student surveys focusing on teacher performance and book buy-back policy," Taylor said. Taylor also stated that he was looking for a strong committee and open to any other ideas. Legislation passed.

Next, legislation was introduced to appoint Matthew Varisco as Justice. "I was a Justice last year and would like to continue to serve as one this year. No cases were presented to us last year but if presented with one, I would judge fairly," said Varisco.

The last piece of legislation introduced was to grant newly appointed Class I organization, International Student Organization (ISO), their fall budget of $5,452.00. "Since we are a new Class I, the first step is getting acquainted with ourselves and our responsibilities," said ISO treasurer.

When Cardell was asked about these allegations she stated that "All drinking was done by a few students in a bar, and they were of age. I specifically stated before the trip that there was to be no alcohol in the rooms because not everyone was of the legal age to drink." But eyewitnesses stated that there were cases of beer brought into the motel rooms and drinking was rampant by most of the students at the conference. "...there was no drinking going on in the rooms, and there was no underage drinking. You can ask the administrators, they were there. As far as everything else (the other allegations) the are all rumors spread internally by the SGA." When Cardell was asked why would the SGA spread rumors about themselves, she stated "I think its fun to have rumors and all that kind of stuff."

When the Montclarion contacted one of the administrators present, Chuck Feiner, he stated that "...there were about eight to ten people in one room drinking out of beer cans." But Feiner also added that, "...the whole conference was an excellent job."

Also the Montclarion contacted the Aztec Motel and they stated that there were no complaints or problems that were caused by the SGA members last weekend.

The remainder of the Fall, 1997 Self-Defense seminar will be held Monday nights from 6 to 8 pm in the Student Center, Room 419. For further information, contact Campus Police Lieutenant Paul Cell at 655-5123.

Thanks to you, all sorts of everyday products are being made from recycled materials. And don't forget to celebrate America Recycles Day on November 15th.

It would mean the world to us. For a free brochure, call 1-800-CALL-EDF or visit our website at www.edf.org
National Coming Out Day, coming soon to MSU

By Kara Richardson
Staff Writer

Although the official Coming Out Day is Saturday October 11th, Montclair State University is holding its events on Thursday October 9th. Events are sponsored by Gay and Lesbian Faculty and Staff Association (GLFSA)

The day will begin at noon with a Rainbow Flag Raising and Opening Ceremony on the Student Center Quad. President Irvin D. Reid will read a proclamation of diversity. Then a symbolic "Stepping Out" will occur. Faculty, staff and students who are openly gay, lesbian or bisexual will step forward into a circle around the flag. "Coming Out" is the act of revealing the truth about an individual's sexual orientation to others... by being honest about who they are, gays, lesbians and bisexuals can begin to erase the misunderstanding and bigotry." (NCOP)

At 1:00 pm in Dickson hall Room 178, the Safe Place Program Workshop will be held. Elaine Fine and Sally McWilliams are the co-chairs of the new Safe Place Program at MSU. Offices at MSU will be marked with a LGB Safe Place decal; these decals mean that faculty and staff members are willing individuals who will provide support and attentiveness in a non-judgmental setting. These faculty and staff members are gay, lesbian, bisexual, transgender or allies.

Glenn Co-chair of GLFSA, Dr. Sally McWilliams emphasized, "the intent is not to counsel, but to provide 'active listening.'" The Safe Place Program provides a service to students who may be dealing with their own issues of homosexuality; from harassment to questions or concerns. Students now have a variety of confidential resources in the MSU community.

A "Coming Out" panel will be held from 2:00-3:00 pm. Individuals from the MSU and surrounding community will tell their "Coming Out" stories. McWilliams said that this is probably the most moving part of Thursday's events: "The 'Coming Out' stories are a powerful way to demonstrate the excitement and complexity of coming out to self, family, friends and community."

The final event will be a panel of community-based organizations to represent themselves. Two people will come from P-FLAG

Bill Gates is my god

6. Do not move the machines, disconnect cables, or interfere with the hardware in any way. [In other words, don't steal or break the machines. Duh.]

7. If you borrow a chair from another room, please return it when you are done.

8. Please keep the lab clean and throw away personal garbage. Help our recycling effort by placing unwanted printer paper neatly in the recycling bins. If you intend to use a Dell, please disinfect your disks BEFORE using them. If you cannot figure out how to do it, ask a lab assistant for help.

10. Labs are provided for homework and course work. [If the lab becomes busy and you're just goofing off (reading e-mail or whatever), please allow students who have actual work to do the machines.

I hope you were all enlightened by that. Thank you for your cooperation! [yadda, yadda, yadda]

Questions, Answers, & Complaints:

Q: Dear Louis,

My printers just handed me the first copy of Windows 97 (even though it won't actually be released until 2012). Anyway, I was using it and it told me to "Please press any key." Now, I looked all over the place and I can't find an "any" key on my keyboard. Can you help me?

- Bill Gates, The Moron at Microsoft

A: Dear Moron,

There is no such thing as an "any" key. The computer is asking you to hit any key you want. So, you can hit enter, the space bar, "3", "k", whatever. Even though you're a dope, I'd be grateful if you'd adopt me. I'd love to spend time with your money....I mean, with you....I'd like spend time with you. So, what do you say? Can I come over? I'm toilet trained! I won't pee on the rug! Please!!

Cool Site Of The Week:

http://www.yankees.com/

New York Yankees homepage - The Yankees are back in the playoffs once again, and they are looking good. They are expected to beat the Indians, and have a shot at going all the way again this year.

Lame Site Of The Week:

http://www.nymets.com/

New York Met's homepage - For a day or so, the Mets actually led the wildcard. Then, it all fell apart. Oh well, there's always next year.

Next Issue: Why my life sucks. I'll tell you all about it so that you can see how good your life actually is. Or maybe I'll tell you about how to use the IBMs. It depends on my mood.

Log On
By Louis Collin

Topic Of The Week: Academic Computing & Technology Lab Rules

1. You must be an MSU student or alumni and be able to show the lab assistant an MSU ID with a valid sticker upon request.

2. No eating, drinking, or smoking. [This is because so uncoordinated people always manage to spill their drinks on the keyboards.]

3. No music or other software which could cause a disturbance to others. Games are not permitted. [Just because you like John Denver music doesn't mean that others do. Please keep that in mind.]

4. Do not save personal work or connect cables, or interfere with the hard drives. [Actually, most of the machines are designed to prevent you from doing just that. But if you happen to find one that isn't protected, please do us a favor and don't save stuff on it. Bring a disk with you.]

5. No special paper is permitted in the printers. See a lab assistant if a printer needs paper. Do not remove the paper trays or open up the printers! [If you need to print on special paper, for a resume or whatever, go the the Resume Writing Lab in the Student Center. Their printers can handle the special paper.]

Sodexho helps community with Project Renewal

By Robin Tyson

SODEXHO is a contractual dining service that has existed on campus for about two years. Robert Genser is the Resident Regional Operations Manager. Sodexho handles all dining services, vending and catering; Starbucks, Rathskellar, College Hall, along with the other concessions. In addition to William Patterson, and Montclair State, Sodexho is a French based company, and has many successful international facilities, as well.

Robert Genser, though his various associations had an interest in this program for quite sometime, Robert was personally inspired by his social contacts, and saw the need to incorporate Project Renewal in a work related structure at MSU. Project Renewal provides a 15 week culinary training program for its participants that prepares individuals for the work force. The success rate has been about 90%, and SODEXHO at MSU has

Coming Out Day, coming soon to a campus near you.

Phi Sigma Sigma takes part in shore clean-up

By Stacey Rollins

On Saturday, September 20th, the sisters of Phi Sigma Sigma participated in a beach clean-up at Sandy Hook. The Bellcore Pioneer Group sponsored this event to clean the beaches after the summer season.

"The pollution on the Jersey Shore wasn’t as bad as last year," said Cyndi Lozza. "We found soda cans, traces of drug paraphernalia, styrofoam, and other miscellaneous plastic items."

Each sister was given a pair of gloves, garbage bags, and pieces of paper to tally up their findings.

"I am really glad that we took part in this event. After the summer rush of tourists, there is always so much litter on the shore. If I were a parent, I would not want my child digging up empty dime bags or used condoms when they were making sand castles," said Tara Wniewski. This was Phi Sigma Sigma second successful year at the clean-up. They plan to participate again next year and are always looking for more volunteers. They are always looking for more volunteers. If you are interested please contact any of the Phi Sigma Sigma sisters throughout the year.

COMING OUT cont. from p. 6

(Parents and Friends of Lesbians and Gays) Joseph Trasari, the Current Coordinator of the Jersey City State College’s Gays, Lesbian and Friends Association will be there, and Maura Bailey will also join the panel; she is a part of the New York City Gay and Lesbian Anti-Violence Project.

During its three year existence, GLFSA has grown from sponsoring Coming Out day to providing a voice and resource on campus for Gay, Lesbian and Bisexual on campus. They function by subcommittees. Issues such as curriculum and greater campus visibility are some of the things that GLFSA looks into. In the past, they have cosponsored a poetry and music series at Page One Cafe in Montclair. They have also hosted films. Now with the Safe Place Program, GLFSA hopes to continue to provide these services and more as their association grows. GLFSA holds regular meetings, for more information contact Mark Koppel at X5127.

Although GLFSA is exclusively for Montclair Faculty and Staff, there is a Gay, Lesbian and Bisexual group for Students. PRIDE meets Wednesday at 6:00 pm the Student Center in room 418.

SODEKHO cont. from p. 6

incorporated about 20% of their employees from project renewal.

Project renewal began in the late sixties, as a private non-profit organization to assist the unemployed in getting back into the work force. Edward Geffner, has been the Executive Director since 1977, and his goal is to create opportunities, and enhance skills that will enable them to have success with opportunities that are provided. Project Renewal is 95% sponsored by government funds, and they also provide diverse training opportunities.

Last spring Robert Genser recieved Project Renewal’s 1996 employee of the year award, based on a 90% success rate, and the GLFSA 22 participants! A job well done SODEKHO!

Feature Section staff meetings are held Wednesdays at 7:00pm in SC Annex Room 113. All new writers are encouraged to attend! Call x5241 for info.
Did you know how Great Britain is involved in the unification of Europe's economy? On Tuesday, September 30, at 2:00 p.m., Sir Sidney Chapman, an architect, urban planner, and member of the British Parliament since 1970, lectured on "Britain's Role in the New Europe." The lecture was held in Ballroom A at the Student Center and sponsored by both the Center for Global Education and the Montclair State Public Policy Center.

During his time in Parliament, Sir Sidney Chapman served on numerous committees, deliberating on such topics as commercial industry versus the ecology. He is also the majority whip for the Conservative Party. Besides speaking at Montclair State University, he has also discussed relevant topics at Columbia, Princeton, and Caldwell.

Before delving into the economic unification of Europe, Sir Sidney Chapman gave some brief background on the political situation in his native England. Last May, the United Kingdom suffered a great political upheaval when the conservative party, the controlling power in Parliament for eighteen years, was replaced by the Labor Party. Sir Sidney Chapman gave two reasons for such a violent change. Firstly, when a party has been in power for a particularly long period of time, the general population feels the need for a shift in authority. Secondly, the Labor Party was more appealing, since it had reformed many of its policies, while the Conservatives were being regarded as complacent and lazy.

In 1957, a European Union was first attempted with only six nations: Germany, France, Italy, Holland, Belgium, and Luxembourg. At that time, Britain stayed away, due to its commitments to their Commonwealth nations; the British didn't want to endanger their trade with Australia, New Zealand, or any of their Asian territories. By the early sixties, through, the need for such an organization was recognized, and Great Britain attempted to join. Unfortunately, Charles DeGaul vetoed their membership to stir up national propaganda. It was not until 1973 that Britain joined the European Union, which later expanded to include Spain, Greece, Portugal, Denmark, and most recently, Finland, Sweden, and Austria.

The unified currency for Europe, or "Euro," will be put into effect January 1.

**North Jersey Federal's Credit Union Corner**

**Avoid ATM Card Problems**

It's possible for an ATM card to stop working due to damage or demagnetization. Your ATM card can become demagnetized for a number of reasons, such as:

- Keeping the card in a wallet or money clip which contains magnets
- Placing your card back-to-back with another magnetically encoded card
- Carrying your card through airport security screening devices
- Placing your card on top of a computer, TV, or radio.

While these activities won't necessarily demagnetize your ATM card, they might, so try to avoid them. Remember, the magnetic strip on the back of your card is the operational part. Protect it as much as possible from scratches, dirt, grease, or other contaminants, and your ATM card will continue to provide smooth and efficient access to your money, day or night.

If you aren't already enjoying the convenience and security of an ATM card from the Credit Union, stop by or give us a call at (973)-785-9200. You can also visit us at our new web page at www.njfcu.org. Our e-mail address is info@njfcu.org.

**NJ Water Watch: helping clean up our waters**

By Carl R. Cascone

Staff Writer

There was a time, probably about 300 years ago, when the Passaic river was a body of majesty and beauty, where fish were content and animals and people drank in healthy draughts. When one passes by the river now, they can see the pretty swills of floating oil, and garbage near the shore, and the carcasses of carp floating toward the surface. The image of the river changed years ago when people lost respect for the river and began to treat it not as a vessel of life, but as a conduit to dump our garbage. Granted, efforts of organizations such as the New Jersey Community River Watch has improved the quality of the Passaic River, but the river still has a long way to go.

The river is more than a pretty body of water, it supplies the 800,000 people of Patterson and surrounding towns with drinking water. Unfortunately, it also supplies these same people with a very convenient sewers. Many towns and municipal sewage treatment plants dump our old toilet and dish water into the river, only so we can intake it into our bodies again after a period of chemical treatment. This dumping has made the water unsuitable for primary human contact due to unhealthy bacteria levels, and the fish are not eaten because of the mercury taints.

Fortunately, the NJ Community River Watch and other organizations have helped the Passaic River become more suitable for human and animal contact. In the 1970's there were only 4 species of fish that could survive in the river, now that number has increased to 27. The water is also easier to treat now, it only takes 1/5th as much chlorine to treat the water today.

The NJCWW can facilitate these improvements with volunteers such as myself. With our help they can keep the river clean by streamwalking to test the water for toxins and oxygen levels, fun volunteer shore cleanups, and most importantly educating the children of Patterson on the dangers of water pollution's. These events always prove fun, and you can always meet new people. I did, and the Passaic River is a better place because of it!

---

**Did you know?**

- Of all the water on our planet, 97% is salt water.
- The Earth's total supply of water is limited.
- Only 2.5% of the Earth's water is fresh water. This water is found in rivers, lakes, and underground aquifers.
- The amount of fresh water on Earth is slowly decreasing.
- Water is a precious resource and we need to use it wisely.

---

**NJCWW**

Helping the Passaic River become more suitable for human and animal contact.

---

**FAVORITE TIP:**

If you throw away a can, don't think, just do it. Put it in the trash can, don't leave it on the ground or throw it in the river.

---

**FRIENDS DON'T LET FRIENDS DRIVE DRUNK.**

If you don't stop someone from driving drunk, who will? Do whatever it takes.

---

**Lauren Elizabeth**

To look at this happy, healthy baby, you'd never know what killed her.

It was a drunk driver.

April 1, 1993, Lewisville, Texas
listening to translators repeat what was said.

It is for this reason, Sir Sidney Chapman stated, that Britain has chosen to abstain from adopting the “Euro.” Such a move on Britain’s part was likened to “moving [the American treasury] from Washington to Caracas.” The original policy, adopted under the Conservative government, consisted of waiting to see if the proper conditions could be brought about. In this way, Britain was also able to keep its power and influence, which could not have been done, had they simply said that they would not participate in the economic unification. Expectantly, the Labor government has taken the same position.

When he was finished speaking, Sir Sidney Chapman took questions from the audience, giving his opinion on the United Nations, and the current state of British education.

DID YOU KNOW? cont. from p. 8

1999. All other currencies, such as the sterling pound, lira, or franc, will be done away with by 2002. The main idea behind this union is to create free trade within the countries of Europe, and curb the possibilities of large-scale war. So far, this encompasses a total overall population of 370 million people. Some believe this will eventually lead to a “European state” much like the United States of America.

Sir Sidney Chapman, however, feels this will be an “unmitigated disaster.” There are too many political and cultural barricades to overcome, in his opinion. As an example, the British Parliament can spend days, sometimes weeks, deliberating on certain edicts, while the French General Assembly is much more expedient in its handling of its acts. Also, if one were to look at the European Parliament, every delegate would have headphones,

owned eyes are older than that.

“Sure there are technical things that you need to learn but there isn’t a class that tells you how to be a DJ.”

Although Elliot suggested that almost anyone can be a DJ by joking about the recently failed Kelly and Klein duo on a rival radio station, there are many skills that you must possess and improve on through the years.

“You learn so much from other people in radio stations. Start by doing anything you can for a radio station if you want to get into it, from alphabetizing CDs to taking phone requests.”

Good joke and story telling, honesty, debate, sarcasm, and most of all knowledge seem to be the keystone characteristics that have taken Elliot from answering phones at a radio station in Houston to the cohost of one of New York’s most popular morning radio shows.

The Z Morning Zoo and the many other people associated with Z100, most of whom are in their 20’s and 30’s, make up the most popular radio station in America.

Other than the obvious perks of working for Z100 like the free CDs, meeting celebrities, and as Elliot put in his own eloquent way “the Chics.” He has many opportunities to do charity work, which he loves. Elliot finds fun and a great satisfaction from his work.

“I am doing what I love to do.”

When he began his career 13 years ago, he was afraid of coming to New York because he was intimidated by the city. He migrated from Houston to Los Angeles to Philadelphia, and eventually to New York. Now he can’t imagine his life anywhere else. Hopefully he won’t change his mind and will continue to bring life and laughter into millions of people’s mornings.

Theta Xi National Social Fraternity is a Class Four Organization of the Student Government Association, Incorporated of Montclair State University.
I have been going to this school for far too many years. In these five years, I have seen a lot. I remember the day we became a "university." Woo-ha. I remember my first college party. I remember the first class I went to (Art of Poetry, 8 a.m.). I remember the first class I cut (Art of Poetry, 8 a.m.). I remember my twenty-first birthday—wait—I don't remember my twenty-first birthday. Well, we'll let that be one.

I also remember the first day that I sat in the Student Center Cafeteria. It wasn't all peaches and cream. The memory is strong, as if it happened yesterday. It was my first day of school, and I knew NO ONE at MSC. I just sat by my quiet self at a table, frightened like a deer in front of a Mack™ truck. I got my plate of bad Chinese food (General Tso's Chicken) and sat by all my lonesome. (Don't you feel bad for me? You are allowed to mutter a little 'awww' if you'd like.) I saw all of the weird looking Greek lettered shirts, and I just looked like some weird-looking frightened kid. I devoured my food and high-tailed my arse out of there. "I've gotta find someplace to eat," I thought to myself.

Eventually, I decided that I wanted to become one of those people who wore weird looking Greek lettered shirts, and went through the pledging process. For those of you who aren't acquainted with the process of "pledging" or whatever else we should call it now (Associate Membership), I think this is the new phrase), part of it entails sitting in the Student Center cafeteria for a large portion of time. I wasn't sure if I liked this idea, due to my previous aversion to the table. I just sat by my quiet self at a table, frightened like a deer in front of a Mack™ truck. I got my plate of bad Chinese food (General Tso's Chicken) and sat by all my lonesome. (Don't you feel bad for me? You are allowed to mutter a little 'awww' if you'd like.) I saw all of the weird looking Greek lettered shirts, and I just looked like some weird-looking frightened kid. I devoured my food and high-tailed my arse out of there. "I've gotta find someplace else to eat," I thought to myself.

Eventually, I decided that I wanted to become one of those people who wore weird looking Greek lettered shirts, and went through the pledging process. For those of you who aren't acquainted with the process of "pledging" or whatever else we should call it now (Associate Membership), I think this is the new phrase), part of it entails sitting in the Student Center cafeteria for a large portion of time. I wasn't sure if I liked this idea, due to my previous aversion to the table. I just sat by my quiet self at a table, frightened like a deer in front of a Mack™ truck. I got my plate of bad Chinese food (General Tso's Chicken) and sat by all my lonesome. (Don't you feel bad for me? You are allowed to mutter a little 'awww' if you'd like.) I saw all of the weird looking Greek lettered shirts, and I just looked like some weird-looking frightened kid. I devoured my food and high-tailed my arse out of there. "I've gotta find someplace else to eat," I thought to myself. I went back to the table to hang out. You see, I never had a life.

I still sit there, stare at the walls, and stare at people. I don't even know why, I'll purposely stop by there EVERY day to see if anyone is there. The place isn't much to look at. It's a pastel nightmare, with pink and purple splashed all over the place. The chairs make my butt fall asleep. The food is getting better, but it is still way too expensive. There's always garbage and books all over the table, and it's a battle to find an open chair. Since our table is right by the patio doors, it's cold as Alaska during the winter. There's thousands of other places I'd rather be, but regardless, I always end up spending hours in the cafeteria.

Perhaps the reason I sit at the table is because it is the interface between reality and the surreal. I am convinced of this because some weird things happen near that table. I was only there for about fifteen minutes yesterday, and the surreal reared its unearthly head. For example, one of my brothers, while working on a paper about fetishes, screamed loudly, that he is sexually attracted to cream cheese. A few minutes later, former University President, Irv Reid walked through the cafe with his entourage. In honor of his appearance, we all decided to hum the "Imperial March" from Star Wars. Somebody from the entourage laughed, or maybe we were all hallucinating from drinking large amounts of coffee. Or is that just me? It’s probably just me.

Now, you may be shocked to hear this, but I'm not completely normal either. Really? If you read half of what I write, you'll realize that 'normal' is something I try to avoid. This is best exemplified at the Table of the Surreal. There, I usually end up screaming, or falling out of my chair, or jumping about like some dink. I've danced on the table, I've leapt over the table. I've sung entire Pink Floyd and/or Oasis albums at the table. I've done complete musical numbers there. I do a pretty amazing rendition of the Bohemian Rhapsody (with opera section). I just let the surreal nature of the table work its magic upon me, and the rest is inside joke history. People will talk for ages about "that freak O'Sullivan" acting like a loon, which is the way my overbearing ego would want things.
Word of the day: a-bio-gen-esis (it) - The supposed spontaneous creation of life from lifeless matter.
Aries (March 21 to April 19) Your fish won't be floating in your fish bowl because he's dead—he's just really bored. Bring a TV set over to remedy this situation. Here's a suggestion: your fish loves Hometime™.

Taurus (April 20 to May 20) You'll patch up a large problem with your friend this week. You'd never have to patch anything up if you didn't jump into his inflatable pool with spiked heels on.

Gemini (May 21 to June 20) This week will bring up important career decisions—McDonalds or Burger King?

Cancer (June 21 to July 22) You'll discover a new hobby over the weekend—dog kicking™!

Leo (July 23 to Aug. 22) A colleague will be a bit touchy this week. If he gets too sensitive, punch him.

Virgo (Aug. 23 to Sept. 22) You'll be popular over the weekend—but not as popular as I am. Don't get your hopes up.

Libra (Sept. 23 to Oct. 22) Don't dress too suggestively tonight! Merv Albert is starvin' for some sexual satisfaction, and he's looking your way—male or female. "Bite my back big mama! YES(h)!"

Scorpio (Oct. 23 to Nov. 21) You will go out to dinner tonight, and you will give your server a really large tip*.

Sagittarius (Nov. 22 to Dec. 21) Always remember this: urn...remember...urn—Oh, never mind.

Capricorn (Dec. 22 to Jan. 19) You will experience the greatest week of your life...which is good, since you'll be dead next Thursday when an airplane falls from the sky and crushes your house.

Aquarius (Jan. 20 to Feb. 18) Look both ways before you cross the street. Only you can prevent forest fires. Stop, drop, and roll.

Pisces (Feb. 19-March 20) It's a good time for shopping. It's also a beautiful day in the neighborhood. It's a beautiful day for a neighbor.

*Scorpio this week is brought to you by the United Association of Servers, of which I am a member. Our motto: Tip us well, because we know where you live.

Submitted this week by Dave Perlmutter from an actual fortune cookie™.
Brand new look, same old Blanton Cafeteria

Dear Editor,

I am writing to express my feelings about the new policy in the Blanton Hall Cafeteria. You can no longer get two entrees at one time. I think this is ludicrous. We pay for the meals, so why shouldn’t we be able to get as much as we want? Instead, you might have to wait in line for an entree, then again for a hamburger, and yet another time for pizza. That is a waste of time and a waste of trips. If you have a restricted amount of time for lunch between classes, you won’t be able to eat enough. If you do eat enough, you will probably be late for your class.

This came to my attention on Tuesday, September 30 when I got in line for an egg salad sandwich and a grilled cheese. The lady told me I could not have two entrees on my tray. I don’t consider either sandwich to be an entree. I think this new rule is stupid and it should be changed.

Dave Perlmutter
Freshman/Phys. Ed.

Possibilities

One is always met with a disdaining smirk when attacking the validity of Charles Darwin’s theory of evolution. It has become the scientific gospel by which all those who want to be considered as enlightened or scientifically sound must accept. Consequently, it is widely taught in most educational institutions with the faith of ardent zealots.

Ironically, many among Christendom, whose profession, apparently, would oppose its widespread acceptance, have tailored it to their own liking. It is not uncommon to hear among different clergies that God started the world of mankind by creating the initial organisms, then left the emergence of the diversity of life to the processes of evolution.

However, as rickety as that concept will sound to you, the New Physics, in the form of the Quantum Theory, refute the theory of evolution.

Quantum theory explains, in very simplistic terms, that, at subatomic levels, all beings express an interdependent dual property of wave (like ripples on a water surface) and solid. This means that a photon particle, for example, exists in both solid and wavelike states that are complementary to each other and whose complementary forms the whole of the particle. The catalyst for this behavior is the constant vibration of the subatomic particle. Further, the interplay of vibrations and wave/particle states causes the particle to spread over an undefined wide range of space and suggest a ghostly existence.

How does all this refute Darwin’s theory of evolution?

There are two logical reasons. Quantum physicists explain that quantum elements do not exist as objects; they are not pure physical matter existing within a definite space and time. It rests on an observer/participator to fix them in time and space, and realize one out of the many possibilities that exist for the quantum element.

Second, however complex the known universe appears, simplicity seems to be at its heart. A few singular elements combined together form the most complex entity. For example, humans are primarily a carbon-based life-form, which combine with other elements to produce an ingenious diversity of systems, enabling them to actively function within their environment.

According to Darwin’s theory of evolution, these complex systems in any species came gradually with the effects of environment and natural selection. A hereditary trait, which by necessity of the environment and by virtue of the species’ own existence, is passed down to its following generation. It is a continuing process which will never have an end if one considers humans to be a link in an infinite evolutionary chain.

It is evident that if an observer/participator started the fixation of the most simplest quantum element within a time and space, it is exactly that. By added complexity, an existing entity, through the natural virtue of its simplest or basic element, will reflect only one possibility of existence. In other words, it will reflect what it is. Thus, it will recreate itself over and over again with only the limitations confined to its complex systems.

An argument against evolution

The More Things Change, The More the SGA Stays the Same

Every semester, the SGA goes on a Leadership Conference to prepare for the weeks to come. This Fall was no exception. The only item concerns the behavior of the SGA that was very unbecoming of “campus leaders”.

The conference was held at the Aztec Hotel, Seaside Heights. The venue was chosen to isolate the attendees from campus distractions as well as to boost attendance. Unfortunately, the 35 students that did show up, out of a required 80, found plenty of distractions while at the shore.

After business adjourned on Friday and Saturday nights, Cardell said, “There was no drinking going on in the rooms, and there was no underage drinking.” However, reliable sources, who wish to remain nameless, claim that there was underage drinking in the rooms of the hotel. A few of the underage informants admitted to making themselves. Even Chuck Feiner, Director of Student Services, stated, “There were about ten people in one room drinking cans of beer.” (Feiner was an invited guest of the SGA and had no authority over the illicit behavior.) If Cardell was unaware of the illegal activities, who was responsible for the SGA representative?

Also regarding the time between sessions...number of reports involving unruly behavior have been reported to the Montclarion. One of the attendees was seen naked in the pool after hours. Another member witnessed intoxicated members of the conference taking open containers of alcohol to a public beach. After the illeget, they went swimming in the dark. Vice President Jennifer Lynch and Treasurer John Zapata reportedly left a Brainstorming session to go play games on the boardwalk. Last but not least, Director of Greek Affairs Kerrie Ann Dinan had to excuse herself from the Mock Legislature to vomit after celebrating her 21st birthday the night before.

What does all of this add up to? The SGA had a productive conference that was spoiled by gross misbehavior. The worst part is that WE paid for them to hang out at the shore, stay in a nice hotel, and eat three square meals a day. They used OUR money to have a party. Where is our justice? Where is our all-expenses paid weekend getaway?

After the previous few years of SGA scandals, it is dreadfully apparent that the SGA is in desperate need of a strict system of checks and balances. Karen Cardell summed it up herself: “I am the Chief Executive of a six hundred thousand dollar a year organization. Period. There is no one above me. I sign all the checks.”

Phi Alpha Theta

By Willis Petrie

What is rape? This question is often determined on someone's perception of what specifically happened. A lot of people are in an uproar as to how the media portrays the sportscaster Marv Albert who is accused of having forced sex (as stated on ABC News) with a former companion in a Virginia hotel room. As the story has it, Albert bit this woman on the back, and forced her to have oral sex when she did not want to be intimate with him and another man at the same time. Albert later pled guilty to minor assault and convicted of the same charge? Can we say that Tupac Shakur's face is perceived as an innocent victim and is yet to be convicted of attempted rape. Can we as citizens say the same thing of Mike Tyson, who also invited a woman to his hotel room? This woman claims that Albert tried to force her into oral sex after he invited her to his hotel room. This woman claims that Albert quietly settled out of court.

Why do Americans love Marv Albert?

Many people would argue that the media's portrayal of Marv Albert is not due to racism, and we as citizens should wait to hear the specifics of the case; I begged to defer. I do not know whether Albert committed these crimes or not, but I do know that he is (or was) perceived as an innocent victim and is yet to be accused of attempted rape. Can we as citizens say the same thing of Mike Tyson, who also invited a woman to his hotel room? Can we say that Tupac Shakur's face was not plastered all over the papers accusing him of rape when he was in the same predicament as Albert, and convicted of the same charge? Can we say that Michael Irvin of the Dallas Cowboys got the same improper treatment by the media when he was accused of raping a woman?

What is rape? How are our perceptions given to us? Just because a woman is known as a liar and promiscuous, does that justify her being physically violated? What is "forced sex", if not another term for rape? The point of this newsletter is not to assume that people are guilty of crimes but that there is a double standard in society with which we live along with the perception of things being equal.

Always remember the golden rule

River valley, I can say that such disregard for those around you is somewhat unique to this area.}

When I was in a movie theater in Asheville, North Carolina. I was returning to the viewing room from the rest room. Out of nowhere the usherette ran up and opened the door for me. Of course, I thanked her, but from my perspective, I found this to be very surprising. When was the last time you were in a New Jersey theater and an employee rushed to open the door for you?

In many foreign nations, greeting strangers on the street is customary. It is considered rude when someone greets you and you do not respond. Many people in this country, including myself, also consider it obnoxious.

Another case scenario about impatience and coldness exists in the parking lots. How many times have you walked to your vehicle and gotten ready to get in, when you already see some vulture-like human being in their car waiting to get into your space? You get into your car, which you haven't run all day and you proceed to start it up. Looking up to see if they are still there helps you to see their impatient glare. Now that the car is running, they expect you to pull out of your space so they can get in. Can't they at least let your engine warm up to operating temperature? If you pull out too soon you'll stall anyway.

Basically, the moral of this week's column is that we are all equals in this society and at this university. Always remember the Golden Rule: Do unto others, as you would like done unto you. It does not hurt to be kind to someone, or help a stranger once in a while. Even something as small as a smile and hello can help make someone's day.

Being first is not always so important. After all, even the Bible says, "The last shall be first, and the first shall be last."
Rich and diverse talent displayed at Open Mic Night

By Colleen Lutolf
Staff Writer

This past Thursday night there was an Open Mic Night in the Ratt sponsored by LASO, OSAU, Players and 4-Walls. This gave all MSU students an opportunity to show off whatever talents they have whether it be reading poetry (your own or somebody else’s), playing an instrument, singing or whatever you would like to do in front of a receptive audience. This includes all ages too. Last Thursday, everyone from freshmen to a graduated MSU student performed for an audience of about forty people.

If you have ever attended a Cafe Night on campus before you realize how rich and diverse in talent the students at MSU really are. The first person I saw perform was Shariff on his violin. There was no movement in the room except the shadow of Shariff and the long bow playing on the wall. The audience sat enraptured throughout the song. John LaTorre approached the stage next with three of his poems including, “Questions of Existence” and “I Would Like to Know.”

Next was Shaun McCormack on electric guitar who entertained the audience with three original songs. The first was an instrumental. With a voice reminiscent of Ray Davies of The Kinks, Shaun told the audience to “kill your computer/find a new way to learn” in his song, “Stop the Progress.”

Priscilla Calderon then graced the stage and sang, “Looking In” by Mariah Carey. Singing a cappella, her soulful voice told a story about a girl whom everyone stereotypes as a certain type of person, but on the inside is really someone else. Her voice alone conveyed the longing and wanting she was feeling inside.

Another participant of Open Mic Night was Frank Locard. His poem, “Choice” struck a resonant chord with all audience members, and could be a motivational poem for all college students. He read, “Our greatest power is the power to choose/No one can take that power away from us/We can do what we want to do/We can be who we want to be.”

One student that also stood out was Brian Joad who read poetry as well. Brian graduated from Montclair State two years ago, but returned Thursday night to enlighten and entertain some of the students who were not able to catch him the first time around. Brian kept the audience laughing with his humorous jazz poetry.

In his poem, “Games” he used children’s games such as “Mother May I” and “Red Light/Green Light” as an analogy to dating games. To top off his set, Brian sang a tune by Fine Young Cannibals as the crowd kept the beat for him with clapping hands.

Another crowd pleaser was Craig Klein with his stream of consciousness poem, “Feed Your Head.” With lines that would make Kerouac proud, Craig reeled off his poem: “Lots Wife Laughing Her Ass Off Because She Got the Joke” and “Fuck Power Chords You Kurt Cobain Wanna be” just a small sampling of Craig’s humorous wit. Craig was then joined on stage by Sean Hale. Craig and Sean both performed, “Who’s on First” made famous by Abbott and Costello.

The solo comedian of the night, Alma Muniz, kept the audience laughing. Although Alma seemed at first unsure of her ability to win over the crowd, she had the whole room cracking up with her first joke. Freshman Damian Newman finished up the night by asking the audience, “What is a Poem?” Damian made his poem even more effective by the force he used in his voice, and made us realize that anything said with passion and with truth is indeed, poetry.

These were just some of the highlights of the night. We could devote a whole issue of the Montclarion to the overwhelming talent possessed by the students of Montclair. There were other poets, singers, rappers and even break dancers in the Ratt on Thursday night, and there will be more in the future so you will definitely want to stop by for the next Cafe Night. And, if you have anything you want to share, even if it is someone else’s work that means something to you, do it! So, don’t be shy, you already have a supportive audience waiting for you!

A night of entertainment with Dee Dee Bridgewater

By Scott Kline
Staff Writer

I will be the first to admit that I know next to nothing about jazz. My jazz experience is limited to two friends who sang in the high school choir. However, that did nothing to detract from my enjoyment of the Dee Dee Bridgewater concert on September 28th in the Memorial Auditorium.

For those of you who do not know the name Dee Dee Bridgewater, she is a jazz vocalist born in Tennessee, who has been performing since she was a teenager. Her singing career has netted her two Grammy nominations and she has won a Tony for best supporting actress in Broadway’s “The Wiz.” Her most recent studio album, “Love and Peace: A Tribute to Horace Silver” was released in 1995.

Dee Dee calls her current tour “A Tribute to the First Lady of Jazz, Ella Fitzgerald”. Her set list includes new arrangements of Fitzgerald works and the collaborations. She opened up at 7:45 p.m. with Duke Ellington’s “Beginning to See the Light.” She created a rapport with the audience, talking and joking before each song. Dee Dee mentioned several times how much the intimate atmosphere of the auditorium appealed to her.

Dee Dee seemed to be in good voice, and her band was excellent. She tours with a drummer, Andre’ Cecarelli, bass player, Hein Van De Geyn, and pianist Theryr Eliez. During a rousing “Slow Boat to China” it appeared as if the band was on an etheral plane, not even conscious of their surroundings. They played a few ballads, one described by Mrs. Bridgewater as very “New Jazz”, but mostly it was an upbeat show. Their set also included tunes from Gershwin, Cole Porter, and one of my personal favorite songs, “Mack the Knife”. They played for just under two hours, and the grateful crowd of around 150 gave a generous ovation at the end.

I’m sure many of you saw the marquee above the auditorium and asked, “Dee Dee who?” If you had checked it out on Sunday instead of watching television, you would’ve seen a great performer. She might not be a household name in America, but her show is just as electric as any modern rock show.

PHILIPPE PIERANGELI/PHILIPS CLASSIC PRODUCTIONS

Tony Award winner Dee Dee Bridgewater
Roger Munch: Creating art out of nature

Perfect examples of these contrasting themes can be found in the pieces “Marking Time”, “Achilles’ Heal”, and “Sled”. Roger Munch feels these concepts are developed under the influence of their space.

Munch’s interest in Earth science, biology, religion, and philosophy, all contribute to his work. Earth science and biology are important to the materials used. Religion and philosophy are reflected in the meanings of the sculptures. He utilizes volume, mass, and gravity as artist’s tools.

Roger Munch describes his own work as having a Zen-like quality. He sees this in the stillness among motion. He has an envy of the more primitive life when surrounded by the rush of East Coast life. By using natural materials, the sculptures exhibit “Nature in the process of reclaiming a more primal state”. Munch feels there is an aspect of “Indigenous” in his work. This series mirrors his value of returning to the Earth.

The influences that helped create these ideas in Munch are great. According to the artist, he sees his work coming from the world around him. “I see my work as coming from a place of fire; from a place on Earth. I see it as coming from soft defused moonlit nights and from stars insects”. Some fellow artists whose work has effected Munch include Andy Goldsworthy, David Nash, and Richard Long.
Arts and music combine at the festival in Hoboken

By Shaun McCormack
Staff Writer

On Sunday, September 21st, Hoboken held an arts and music festival on Washington Street. The festival was a wonderful break from the Sunday monotony of gussling beer and shoveling potato chips down my throat, while sitting in front of a television for six hours straight watching football.

At first glance, the festival seemed to be a little more than a glorified sidewalk sale. Tables of little knickknacks lined the sidewalks. Less than five minutes after arriving at the scene, and yes it certainly was a scene, I was approached by a saleswoman. She asked me if I had a girlfriend. I don’t, and told her this. She smiled and pulled out a bottle of perfume from her box. She told me that if I had her perfume, I’d get a girl. She began spraying the perfume on me, telling me to take in the succulent fragrance. I told her no way, but she persisted (for ten minutes) trying to sell me a $20 bottle of fake designer perfume.

Finally I escaped this woman, and began searching for the elusive wooden duck. An art festival seemed to be the perfect place to find a wooden duck to decorate my apartment, but no dice, the wooden ducks had already fled for warmer weather. Even though the wooden duck was nowhere to be found, the Hoboken Arts and Music Festival had many things to offer.

At a festival like this, the sights, sounds, and smells combine together into one. As the smell of the Italian sausages being fried and the sounds from bands on every block took hold of my senses, I browsed and purchased some cheap art.

The first things that caught my eye were some disfigured tarmen in various environments. One was playing tennis, one was sitting under a tree, and one of the same style was shaped into a coffee mug. They all had piercing eyes and painful grimaces, but were not at all intimidating. It was as if the character had been through a hurtful existence, but could still cherish the small pleasures life has to offer. I bought the one sitting under a tree for seven bucks.

Next were the African masks. They were made of wood with painted faces and straw hair. Each one was made from the same materials, but they all had individual and human characteristics. I took one from the shelf and gave it to the woman tending to the table and told her I wanted it. She wanted $90 for it. It was quite nice, but I’m a college student, and there is no way I’m going to spend half of my paycheck on a decoration for my apartment. I declined the offer, even after she lowered her price to $75.

After turning down the overpriced masks, we stumbled upon a tiny table with painted 8” by 10” clipboards. Theses were the best buys of the day at $5 a piece. We pitched in and bought four for ten bucks.

One was playing tennis, one was sitting under a tree, and one of the same style was shaped into a coffee mug. They all had piercing eyes and painful grimaces, but were not at all intimidating. It was as if the character had been through a hurtful existence, but could still cherish the small pleasures life has to offer. I bought the one sitting under a tree for seven bucks.

Then there was Native Spirit. El Vate represented the group. He was up there by himself, backed by a synthesized drum beat. The only person in cahoots with him was some kid who sold me the tape for ten bucks. I bought it because Native Spirit’s melodies are so relaxing. El Vate stood alone with a beatnik cap and a bunch of hollow sticks that were held together by masking tape. He had some kind of electrical pickup attached to this, plugged into his amplifier. It looked like he walked through the park ten minutes before and harvested the pieces that he carved into his woodwind pipe.

The festival wound down as we seated ourselves outside of Via Appia. There were two guys standing outside playing some jazz. The guitarist, Matt Cherlaff, was playing a beautiful Gibson Les Paul. It was a deep orangeish brown with becoming gold trim. I’ve seen that guitar in music stores going for four thousand dollars. Todd Herber was on pucker, sax. His sax was old and unpolished, but he played it like a champ. We sat out in front drinking coffee and listening to these two guys bring it home as the night set in on a day rich with culture.
LeAnn Rimes: An inspiration for all ages

By: Angela L. Marchetti
Staff Writer

Only 15 years old and climbing both the country and adult contemporary charts, LeAnn Rimes is out to prove to the music listeners of the world that she’s no flash in the pan, or a “one-hit wonder” for that matter. In fact, in the past year she’s had several top ten hits, and her latest, “How Do I Live,” continues to be one of the top requested songs among radio stations all over the country. This week, it remains in the #4 spot on the Billboard Top 100 Singles chart. So, how does one reach stardom so quickly and at such a young age? Faith, hope and a great first hit single.

Rimes was first recognized after appearing as a two week champion on the popular televised talent show, “Star Search,” and from there went on to make local appearances, opening up for local bands at rodeos in her home state of Texas. Shortly after, she was approached by Bill Mack, a Texas radio disc jockey who had written a song 40 years earlier, intended for Patsy Cline, but Patsy died in an airplane accident and was never able to cut the single. The song was entitled “Blue” and became both the title of Rimes’ first album (which has gone quadruple platinum) and her first #1 hit after only four weeks on the country charts.

“Songs” contains a mixture of great gospel, Broadway, adult contemporary and patriotic tunes to get your toes tapping. Her powerful young voice brings a few “oldies-but-goodies” back to life such as Debbie Boone’s “You Light Up My Life” and Bette Midler’s first hit “The Rose”. Resembling Patsy Cline’s smooth and sultry southern mix of vocal quality, Rimes yo­dels her way through an incredible a capella rendition of “Amazing Grace”, which, quite frankly, is simply... “amazing”.

Showing off her versatile southern style, as well as, a mature adult sound, “Songs” is simply an enjoyable album for anyone, country music lover or not. With already a dozen awards (including two Grammy’s), Rimes has set her sights for the future on nowhere but upwards, and her album definitely proves that. Other albums out by LeAnn Rimes on Curb Records: LeAnn Rimes: “Blue” and LeAnn Rimes: “Unchained Melody: The Early Years”.

Colony conquers new musical territory with Siren

By Garry Doxy
Staff Writer

Colony’s debut album called “Si­ren”, released by MCA, is pro­fessed to be musically diverse and conquering “new musical territory.” In the entertainment industry, either in film or music, there exists a tendency to duplic­ate or replicate a proven success. Un­fortunately, Colony didn’t accomplish that with this album.

Colony was formed by four college guys — Ted Bruner on vocals, Matt Hickenbotham on drums, Jon Armstrong on guitar and John Stuller on bass — that dropped out of school to start a band. “Siren” is preceded by an indie CD “Go”, released in 1995, which was quite pop­ular in the central midwest.

I must admit that I was first attracted to the cover photo of “Siren”. Being visu­ally the male that I am, my eyes rested for quite a few seconds on the image of the nude woman sitting on the rock, reaching to the seawaves. But that was all the appeal the album had.

The album failed to stand out musi­cally even though it was produced by ‘Ben Mink, responsible for k.d. lang’s Grammy Award for the album “Ingenuity”.

The rhythm and tempo of the songs, however distantly, re­minded me of R.E.M.’s “Out of Time” album. Lead singer and songwriter, Ted Bruner, did not possess the pow­erful voice of Michael Stipe. His voice sounded bland and com­mon like amateurish cof­fee houses’ singers.

The only original­ity of Colony sojourns dormant in the lyrics of Ted Bruner. In the song “All My Heart”, he writes “seems to me my heart is driven by no pat­tern and it’s hard to keep it warm, hard to under­stand it and all alone I wait to challenge the world, to tempt my dis­belief of fate. With all my heart I wait”. It would be a joy when Colony’s music fi­nally reaches the level of Bruner’s lyrics.
### What’s Going On?

**Thursday, October 2**
- David Ray-Poetry Reading, 11:00 a.m., DI 178
- Possible Side Effects maneuver meeting, SC 126, 4:00 p.m.

### PMW offers internships

By Charlene Collins Haug

F or almost fifty years, Robert Blackburn has presided over The Printmaking Workshop (PMW), one of the premier printmaking workshops in New York City. BFA students, Theresa Cho and Charlene Collins Haug, spent the summer learning the ropes at PMW. Some of the highlights included working with master printers Marjorie Van Dyke and Sara Smetzer, working with U.S. and international artists, and organizing a visit by Channel 13 for a day-long filming of PMW artists at work. The film celebrates the 50th anniversary of the workshop. Channel 13’s Gail Jansen speculates that it will air in February, 1998.

PMW was established by Robert Blackburn in 1949. He created an environment where artists of all backgrounds and levels of experience could come together. Today, with the help of Lauren Bakoian and Meredith Hedges, PMW offers artists access to its non-profit, low-cost facilities, as well as, to Community Outreach programs which help foster an appreciation of and for the understanding of the arts. In a cooperative atmosphere, with most of the artists working in a large, open room, the exchange of ideas and techniques flows freely. PMW has encouraged emerging minority and third world artists by offering scholarships and fellowships. Internships are another important means of educating young artists.

Says Theresa Cho: “I appreciate my professor for introducing me to the Printmaking Workshop. Working in the art collection room, in particular, was wonderful because you got to see the master printmakers’ works. Without this opportunity I would not have been able to see their work.”

Charlene Collins Haug notes: “The experience has been helpful to me. Seeing printmakers from around the world, print editors, creating imagery, re-working existing plates, and having a wealth of advice readily offered when I asked questions of the artists; has improved my knowledge and printmaking skills. The international and local artists that work at PMW were very inspiring.”

Professors Catherine Bebott and Catherine LeClair of the printmaking department helped organize the externship. According to Bebott: “It is my observation that externships allow students a hands-on, in-depth knowledge through working with artist professionals and engaging in more experiential learning. Printmaking students, like Cho & Collins-Haug share their peers’ enthusiasm for new processes and techniques they’ve learned through externship programs. Therefore, consequently, the learning cycle extends beyond the regular classroom curriculum.”

T he #1 BEATLES Show in the World is coming to the campus center ballroom, Sunday, October 19th. “1964” The Tribute gives their audiences the chance to relive an era when The Beatles were invading America. “1964” has definitely done their homework.

Their tribute to the Beatles is an intimate small show, “It is a full songs recreation,” says Class One Concerts producer Ron Rinaldi. “1964” creates an authentic replica of The Beatles, their music, their equipment, all the way down to their appearance and mannerisms.

Alistair Taylor, the former President of Apple Records for The Beatles, stated the “resemblance was uncanny, it sent shivers down my spine. It was just like seeing the Beatles!” Even George Harrison’s sister was impressed by the show! Since most students here at Montclair missed The Beatles the first time around this is an excellent opportunity to experience their music live. The price of admission for the “1964” show is just $5 for MSU students and $10 for non-students. This is one campus event that should not be missed by Montclair students.

The show will be on Sunday, October 19th. Doors open at 7:30 pm. Come early there is no opening act!!

Classifieds-Personals/Thursday, October 2, 1997 • MONTCLAIRONLINE 21
HELPING YOU BUILD A SECURE FINANCIAL FUTURE IS AN IMPORTANT JOB. FORTUNATELY, WE HAVE THE PERFECT RESUME.

With nearly 80 years of leadership experience in our field, TIAA-CREF is eminently qualified to help you build a comfortable, worry-free retirement.

Our references are equally impeccable — today, nearly two million of the best minds in America trust us with their financial future.

Allow us to review our qualifications.

**Superior strength**
With over $200 billion in assets, TIAA-CREF is the world’s largest retirement organization — and among the most solid. TIAA is one of only a handful of companies to have earned top ratings for financial strength, and CREF is one of Wall Street’s largest investors.1

**Solid, long-term performance**
We seek out long-term opportunities that other companies, in pursuit of quick gains, often miss. Though past performance can’t guarantee future results, this patient philosophy has proven extremely rewarding.

**Surprisingly low expenses**
TIAA-CREF’s operating costs are among the lowest in the insurance and mutual fund industries. Therefore, more of your money goes where it should — towards ensuring your future?

**Easy diversification**
We offer a wide variety of expertly managed investment options to help build your assets. With stock, bond, money market, and real estate accounts — as well as a guaranteed annuity to choose from — TIAA-CREF makes diversification easy.

**Unrivaled service**
We believe that our service distinguishes us from every other retirement company. In the latest Dalbar Consumer Satisfaction Survey, a study of 2,000 financial companies, TIAA-CREF was voted the leading provider of retirement plans.

If you work in education, research, or related fields, why not put TIAA-CREF’s experience to work for you? To find out more, visit our Web site at www.tiaa-cref.org or call us at 1-800-842-2776.

1A++ (Superior), A.M. Best Co.; AAA, Duff & Phelps; Aaa, Moody’s Investor Services; AAA, Standard and Poor’s for stability, sound investments, claims-paying ability, and overall financial strength. These ratings of TIAA as an insurance company do not apply to CREF. Standard & Poor’s Insurance Rating Analysis, 1996; Lipper Analytical Services, Inc., Lipper-Director’s Analytical Data, 1996 (Quarter). For more complete information, including charges and expenses, call 1-800-842-2753, extension 5699, for CREF and TIAA Real Estate prospectuses. Read them carefully before you invest or send money. TIAA-CREF Individual and Institutional Services, Inc. distributes CREF certificates and the variable component of TIAA contracts.
Just wanted to say thanx for the Birthday thang.

Mooney spreads anti-drug message through competition win

By Rob Williams

Despite placing first in the light heavyweight division of The NPC Natural Bodybuilding Show in Wildwood, New Jersey on Aug. 9, William Mooney feels he has accomplished something.

It felt great to have succeeded in a sport where drugs prevail," said Mooney, who competed at a weight of 198 with a height of 5-11. "After dieting for twelve weeks and a strict work out, it felt amazing to win the title without the use of drugs was very important to him.

Mooney, who earned the title with no competition experience or previous titles, said that winning the competition without the use of drugs was very important to him.

"That's where I get the most satisfaction out of winning the title," said Mooney. "This proves to people that you do not need drugs to succeed.

Competing against more than 60 competitors, Mooney did not expect to place as high as he did.

"It was a lot of good competition," said Mooney, a senior physical education major. "I was hoping to make the top five."

"I was shocked when they announced that I placed first."

Mooney said he always wanted to compete, but did not seriously consider entering a show until he was encouraged by a promoter named Mark Steinfield who saw him working out.

"One of the promoters at the gym I work out at told me I should really think about competing one day, and I explained to him that I do not take any drugs," said Mooney. "He said this was natural show and there is drug testing, which convinced me to enter."

Mooney, who was originally apprehensive about whether we would place or not, said after the pre-judging in the morning, one of the judges was so impressed with his drug-free physique said he "definitely won" and advised him not to eat between the pre-judging and the night show so he would have a good shot at winning the overall competition.

With the increasing video and photo shoots offers knocking down his door, Mooney’s professional objective remains to influence more bodybuilders to train naturally. Mooney discussed the use of drugs and the wide acceptance that is throughout the sports.

"I have respect for those in professional bodybuilding, but bodybuilding is a very hypocritical sport," said Mooney. "Most professionals take all kinds a steroids, growth hormones, and diuretics, and a lot of amateurs do also."

Steroids, growth hor-

Hawks lose to Rowan 2-0

By Nicholas Clunn

Saturday afternoon the Montclair Field Hockey team faced Rowan University, a team who plays its home games on natural grass.

The Red Hawks failed to take advantage of their artificial turf advantage, losing to the Pros 2-1 in a NIAC contest.

Montclair’s only goal came early in the second half, off a corner when senior forward Kelly Brandryberry drove a Tammy Werner pass 15 yards into the far right corner, making the score 2-1 with 21:16 left to play. Most of Montclair’s other opportunities came late, with 2 minutes left in the game when they kept the ball in Rowan territory, but only registered one shot.

Rowan’s two goals both came in the first half from Michelle Andre’s stick. Moriah Cheeseman assisted the first and Shenna Marston assisted the second off a corner. Rowan out shot the Red Hawks 10-8 and had 11 corners compared to MSU’s 9.

Montclair’s head coach, Andie Whitcomb rated Saturday’s performance as “very poor”, citing weak communication and a poor small game, as areas to improve upon before their next game.

"It was as if they were the turf team and we were the grass team," added Whitcomb, who felt that her squad failed to utilize their experience on Sprague’s artificial turf. Montclair’s next game is on Oct. 4 at King’s college at 1:00 p.m.
MONTCLARION - Sports/Thursday, October 2, 1997

MOONEY cont. from p. 25

mone, and diuretics are heavily used in the sport according to Mooney. The dangers of steroids became widely known with the death of Raiders defensive tackle Lyle Alzado and diuretics (a drug that thins out the blood making the skin paper thin which enhances the appearance of a competitor) has been known to cause internal bleeding, and also caused the death of Arnold Classic Bodybuilding Competition top contender Andreas Munzer.

"In the gym, bodybuilders are very open about there drug use," said Mooney. "They keep it quiet in the public, but when you are in the gym, some guys may offer you drugs, or ask what are you taking."

Mooney said that when he informs his peers of his training method, many respect him for his decision. Even though many of the famous bodybuilders who drugs grace the pages of Flex and other national magazines, various national publications have turned their attention to Mooney as well. He recently finished a photo shoot for Natural Muscular Development Magazine, and various video shoots focusing on his training. Along with the positive attention, Mooney, William’s mother, described an encounter they had at a local Department of Motor Vehicles in which the an employee commented that Mooney needed to “lay off the steroids.”

Mooney’s natural approach began in high school when he lifted as part of his routine for the Brick Memorial High School football team, which he joined as a freshman. His interest in keeping in healthy condition grew after he graduated, a recently trained during the summer at Fitness 2000 in Brick, and currently works out at Strong and Shapely in East Rutherford.

In addition to maintain a healthy life, Mooney also hopes to serve as a role model to young athletes and to important figures that will enter his life in the future.

“One of the reasons I have not resorted to drug use is that when my kids ask me how I got like this I can say through good nutrition and hard work, rather than drug use."

Those close to him say Mooney appears to be unaffected and modest about his recent success, which is one of the reasons the Mooney family is proud of the champion.

“He has no self-gratification out of the all his success,” said Cheryl Mooney. "He is more concerned about getting his message to the kids, and has worked at it, which is why we are proud of him.”

Want to learn how to write for sports and features but don’t know how? Come to the meeting at 7:00pm, Wednesday, October 8, in the SC Annex Rm 113. Have pizza and soda while learning about sports and features writing.

Eisele, Gillo receive honors in NJAC News

By Lori Meyers

Staff Writer

Junior forward Kristen Eisele and freshman forward Gina Gillo were named player of the week and rookie of the week respectively in the Sept. 15 release of NJAC News, a publication circulated to members of the New Jersey Athletic Conference that covers the happenings of the teams in the NJAC.

Eisele described her reaction to the news. “Are you for real?” exclaimed Eisele, when Head Field Hockey Coach Andie Whitcomb informed her that The NJAC had named her Player of the Week. “It is really nice being recognized,” Gillo humbly replied. “And, it is because of these attributes that they are noticed but, for that week I felt really special.”

Eisele, who is majoring in physical education, has been playing since 7th grade. Eisele attended High School in Livingston, NJ, where she was named All County from 1991-1994.

Eisele and Gillo remarked that much of their success is attributed to their other team members. They feel that without the teams support, “neither would be where they are today.”

Eisele and Gillo both credit an excellent coaching staff, which is headed by Andie Whitcomb. The two players feel she has made a tremendous difference to the team. They mentioned that everybody is very skilled and they are proud to be a part of this closely-knit team.

“We’re like a little family, it’s really nice,” Gillo humbly replied. “And, it is because of these attributes that they are confidant they will have a great season.”

Red Hawks Results

Field Hockey

at Montclair, Sept. 25
Montclair 4, Delaware Valley 0
Delaware Valley (2-5) 0-0-0
Montclair (7-3) 2-2-4

**Overtime overly painful for Red Hawks**

**MSU football falls to Brockport, 33-27, in first-ever OT game thriller**

**By Al Langer**

Sports Information Director

The first overtime football game in Montclair State history was not one for the faint heart, and not one the Red Hawks will soon forget.

After sophomore kicker Mike Stoehr (Iselin) tied the game with a 37-yard field goal just 2:38 left is regulation at 17-17 Montclair State and SUNY-Brockport then needed three overtimes to decide a win, and it was Brockport as MSU could not hold a seven-point lead in the second overtime, eventually falling 33-27 in overtime number three, to drop to 1-2 on the season, and watch as the Golden Eagles improved to 3-0.

The intensity of Thursday night’s home field hockey game ran so high that a fight was stirred up between the announcer and the coach was upset because she accused of being disrespectful in this way, said Whitcomb. “Their school will definitely be getting a letter from me about this unprofessional tampering.”

In overtime number two, MSU won the toss, and it was all Ron Lewis (Long Branch) as he bolted over tackle for a 23-yard gain on first down, setting up a first and goal at the two. On the next play, Lewis took it in for the touch down and 27-20 MSU lead. However, Brockport responded with some trickery as, on its ensuing possession, the Hawks defense had the Eagles looking at a third and seven from the 22. Tailback Rodger then took a quick hand-off on a draw play and bolted 22 yards up the middle for the game-winning touchdown, giving Brockport the opportunity to win game in the third overtime.

Lewis finished the day with his best performance as a Red Hawk, running 19 for 119 yards and scoring two touchdowns, including a 30-yarder in the third quarter that gave MSU a 14-10 lead. MSU’s first score came on a six-yard pass completion from Conney to senior receiver Ellis Allen (Norma) in the second quarter, and the Hawks a 7-0 lead at the half.

Brockport held an edge in total yards in the game, outgaining MSU 364-273, including 286 to 195 on the ground. MSU also committed seven turnovers, the second highest total in one game in school history. Montclair also caused four turnovers (three INT’s and a fumble recovery).

Defensively, MSU saw Keith Izsa (Cedar Grove) pile up a team-high, while Kirk Lapers (South Orange), and Ed Grayer (Scotch Plains) added nine each. Junior Shawn Roberts (Scotch Plains) continued his quarterback assault with three more sacks on Saturday, giving him 7.5 in the last two weeks. MSU also had terrific pass defense, up five pass completions in 21 attempts for 78 yards.

**Field Hockey improves record to 8-4, with 2 wins**

**Whitcomb arranges captains’ practice to mentally prepare team for Kings**
