Seton Hall Blaze Kills Students

By Karen Clarke

Staff Writer

Boland Hall dormitory at Seton Hall University went up in flames early yesterday morning, causing three students' deaths, but many remained indoors, believing the fire alarm was one of many false alarms. Seton Hall's flames were caused by a careless cigarette smoker, an anonymous Seton Hall resident student said.

An MSU student, Kemeisha West, was on the scene during the early hours when the fire broke out at approximately 4:30 a.m. "It was one of the most chaotic situations I had ever seen," West said. Students were fleeing the burning buildings in their pajamas and flip-flops.

"Some were darkened from the smoke, but...my friend was severely burned," West said. 62 students were injured, beside the three students who were killed.

Many disregarded fire alarms because of so many false alarms in the past. An anonymous Seton Hall science professor said that classes will be cancelled until early next week. In addition, an ongoing investigation will continue throughout the week.

"This tragedy has been a wake up call for many students who have ignored alarms in the past," a Junior Seton Hall student said.

"I will be sleeping with one eye open from now on and I won't ignore any more fire alarms," another on-campus resident said.

MSU also has had a problem with false fire alarms. In October, Residence Life even offered a monetary reward for anyone with information leading to the arrest of the culprit.

Every time a fire alarm is pulled here at MSU, the Township of Little Falls Fire Department responds, but the false alarms keep the firemen away from real work, Edward Pomponio, chief of the Little Falls Fire Department, said in an Oct. 7 issue of Montclarion.

"It's a boy-who-cried-wolf thing. Students who live in Blanton and Bohn take it for granted. They're playing tricks that endanger thousands of lives," Freeman resident Ray Donocan, Sophomore, said. "If there were a fire, people could die. I think people need to grow up and stop using the fire alarm as a practical joke."

Transco Pipeline Proposal Bursts; Certification Denied

By Joy Thompson

Staff Writer

The proposed pipeline that would have run through sections of MSU's campus was denied certification by the Federal Energy Regulatory Committee (FERC) on Dec. 15, 1999.

In order for the pipeline to proceed, Transco company would have to meet strict guidelines set up by FERC. The decision to not certify the Independence Project, which includes three natural gas pipelines, came about because FERC determined there was not sufficient market need, according to a Dec. 15, 1999 press release. FERC Chairman James Hoecker said FERC "exercised every effort to ensure that the Northeast has adequate infrastructure to meet its future requirements."

"The Transco MarketLink project that would run through northern New Jersey has had strict guidelines set upon it if it is to receive later certification from FERC."

Although there is no certification for the Independence project, ANR and Transco companies have already begun to adhere to other limitations on the pipeline project:

- A $1 million restoration bond must be posted and held in trust in case the money is needed to restore sites along the pipeline route.
- No construction-related activity may occur on any of the property the pipeline runs through until all areas are surveyed and access is granted with proper environmental permits.
- A post-construction monitoring program must be implemented to assess crop damage techniques.

STOP, a coalition against the Independence project, which includes three natural gas pipelines, came about because FERC determined there was not sufficient market need, according to a Dec. 15, 1999 press release. FERC Chairman James Hoecker said FERC "exercised every effort to ensure that the Northeast has adequate infrastructure to meet its future requirements."

"The Transco MarketLink project that would run 154 miles of 36 inch and 42 inch pipe through northern New Jersey has had strict guidelines set upon it if it is to receive later certification from FERC."

Although there is no certification for the Independence project, ANR and Transco companies have already begun to adhere to the mitigation set up by FERC. ANR has appointed an ombudsman to take complaints from landowners in the pipeline’s path about trespassing and objectionable land acquisition techniques.

A post-construction monitoring program must be implemented to assess crop damage.

FINGERPRINTING USED TO PREVENT GUN VIOLENCE—WASHINGTON: President Clinton started a $280 million initiative to combat gun violence that includes a proposal to help police track bullets to the gun that fired them by fingerprints on Tuesday.

MEGAN'S LAW CLARIFIED—Melgan's lawsuit suggests courts must pay attention to the N.R.A. when handling such cases. The support gun control has been a divisive issue in state and national elections that many lawmakers have been afraid to take on.

CHILD PORNOGRAPHY—CANADA: Civil liberty issues arose in Canada when they began hearing arguments about possession of child pornography. Courts said they would be powerless to control its possession if it were legal. The case was prompted by the decisions of two lower British Columbia courts that ruled last year the federal law outlawing possession of child pornography was a denial of freedom of expression. The courts struck down the provision in the province but it will still be illegal to make and distribute child porn.

SPARING THE ROD—Battlers may not be able to punish their children using any tools except hands, and cannot hit their children on the ears, eyes, or head, after a government proposal. It came after a case where a British father assaulted his child, but it was dismissed because the act was said to be a "reasonable chastisement."

SOCCER STAR BEGINS TREATMENT IN CUBA—Elian Gonzalez is due to begin lengthy rehabilitation in Cuba today after being flown there by his grandmother. She wants him sent back to Cuba until she holds a hearing to decide the case because she believes it will be more sensitive to the best interests of Kazan, the boy's father.

MIAMI: Relatives of Elian Kazan, the boy Cuban castaway, will face federal court this week to try to stop the immigration and Naturalization Service from sending Kazan back to his father in Cuba. Instead, they want the Florida court to decide the case because they believe it will be more sensitive to the best interests of Kazan, the boy's father.

NEW OVERSEEER POSITION—The town council may create the position of Public Safety director to oversee the Fire and Police Departments. They have already thought about Police Chief Thomas Russo for the temporary position. According to the Township manager Terence Reidy, "The whole purpose for the move is to give us an opportunity to study regionalization (an agreement in which smaller communities combine to share a larger municipal department)."

FINISHING UP—Battlers may not be able to punish their children using any tools except hands, and cannot hit their children on the ears, eyes, or head, after a government proposal. It came after a case where a British father assaulted his child, but it was dismissed because the act was said to be a "reasonable chastisement."

Millenium Preparations Prove Useless as MSU is Y2K OK

By Kevin P. Hancock
Staff Writer

MSU, and the rest of the world, breathed a collective sigh of relief as Y2K came and passed, with the so-called millennium bug causing very few problems worldwide, and almost none so far on its campus.

The university spent over $120,000, and set up a special Y2K task force in preparing for the potential hazards of the Y2K bug. Members of the task force worked for two and a half years - right up until the very last moments of 1999 - to ensure that MSU's various computers and systems would be Y2K compliant. Although there is still a chance that problems could arise, the money, time and effort seem to have been well worth it.

"We weathered [Y2K] very well, we didn't have any major glitches at all that we know of," said Harry Schuckel, Vice President for Budget, Planning and Information Technology, who reported that the only problem MSU had was an old server that kept "cranking out silly dates." "It was a fairly trivial thing," Schuckel said.

The minor glitch seems to be consistent with what the rest of the world has experienced with Y2K - minor glitches that took a very short time to fix. Worldwide Y2K problems were reported to be as insignificant as malfunctioning slot machines in Delaware, to broken taxicab meters in China.

Hardly the gloom and doom many were predicting that the Y2K bug would bring. Major world fears included accidental nuclear launches, widespread power outages, and long-term food shortages.

At MSU, officials had their own set of concerns, many of which went beyond minor personal computing problems.

"What we were even more worried about than the desktop computer, was the main business systems of the university," Schuckel said. "The student enrollment system, the financial aid system - we had to upgrade all of those systems so they would be compliant."

"The occasional desktop you can live with problems for a few weeks, but cranking out student grades or paying our employees - that's critical stuff we had to make sure was working properly," Schuckel said.

Another potential problem for the university was the fear that a rash of viruses might be released around Jan. 1, by hackers looking to prey on Y2K fears. In response to this, MSU followed the lead of other universities and government agencies by shutting down its network and computers on New Year's Eve to prevent any possibility of a system crash.

"What we were more worried about than the desktop computer, was the main business systems of the university," Schuckel said. "The student enrollment system, the financial aid system - we had to upgrade all of those systems so they would be compliant."

"The occasional desktop you can live with problems for a few weeks, but cranking out student grades or paying our employees - that's critical stuff we had to make sure was working properly," Schuckel said.

Y2K
CONTINUED FROM P. 3

ing down all of their computer systems from Dec. 30 to Jan. 1, to guard from acquiring these viruses. Schuckel believes that the strategy has worked, as no new viruses have been reported.

University administrators were not the only ones with Y2K fears. Students also had their own set of worries about what the new year might bring for them.

“It would have been ugly,” said Thomas Polese, a Senior Broadcasting major in response to what a Y2K problem could have meant for MSU students. Polese uses MSU’s computer labs every week for schoolwork.

“There is a shortage of computers to use as it is,” he said.

Some students were also fearful of what Y2K could have done to their personal academic information.

“It could have infected the MSU databases, which could consequently do a number of things, like tamper with grades or erase transcripts,” said junior Jason Boyd, who is also a computer lab assistant for Academic Technology.

In addition to these potentially major problems, the MSU Y2K task force had to worry about other systems that might be effected by the bug, such as alarms, old VCRs and the university’s various desktop computers, and software.

The task force tried to make it as easy as possible for members of the university to check their computers for Y2K compliance.

“Folks could simply just log into a server and run this [Y2K compliance] program onto their computer, and the results would register onto a database,” said MSU Director of Continuous Quality Improvement, Tim Carey, who was also Schuckel’s staff appointment to the task force.

Non-compliant hardware and software was located, and then upgraded to versions that were safe from the millennium bug, said Carey.

The MSU Y2K task force was created by Schuckel and consisted of representatives from every area of the university who acted as coordinators, each in charge of ensuring that their particular departments would be ready for the year 2000.

The coordinators’ main focus was to educate members of the university about Y2K, and teach them how to prepare for the possible problems it could bring, said Carey.

Although MSU did not set up a “Y2K Command Center” as many businesses and government agencies had, they did have members of the task force on standby as the clock struck midnight. They were aware that they could be called in at a “moment’s notice” had a problem arisen.

“No matter what anyone told you, no matter how well they thought they were prepared, there was a lot of praying going on around midnight,” Schuckel said.

Despite the initial positive results, there are thoughts that some areas might have been overlooked.

Schuckel said he was concerned about reports that said some Y2K compliant business software was coming up with bugs that could range from nagging little problems, to “fundamental disastrous types of problems.” While nothing has come up yet in any of MSU’s systems, Schuckel said that it was something MSU would have its eye on over the course of the year.

“Hopefully it’s over, but in the event that there are any issues out there, [members of the task force] are poised to step in and address things quickly,” said Carey. “We don’t expect anything major, but it is always possible that there is some software out there that still isn’t compliant.”

In light of all the worrying and preparation, Carey believes that the Y2K hype was a good thing for MSU.

“It forced us to look at some of our old systems and upgrade them,” he said. “The end result is that our software and hardware is now first rate.”
Martin Luther King Jr.
1929 - 1968

"The greatest birthday gift my husband could receive is if people of all racial and ethnic backgrounds celebrated the holiday by performing individual acts of kindness through service to others. Remember, it's not a day off— it's a day on!"
-Coretta Scott King

Six Principles of Nonviolence

PRINCIPLE 1:
Nonviolence is a way of life for courageous people.
PRINCIPLE 2:
Nonviolence seeks to win friendship and understanding.
PRINCIPLE 3:
Nonviolence seeks to defeat injustice not people.
PRINCIPLE 4:
Nonviolence holds that suffering can educate and transform.
PRINCIPLE 5:
Nonviolence chooses love instead of hate.
PRINCIPLE 6:
Nonviolence believes that the universe is on the side of justice.

"Many people fear nothing more terribly than to take a position which stands out sharply and clearly from the prevailing opinion. The tendency of most is to adopt a view that is so ambiguous that it will include everything and so popular that it will include everybody."

"There is nothing in all the world greater than freedom. It is worth paying for; it is worth losing a job for; it is worth going to jail for. I would rather die in abject poverty with my convictions than live in inordinate riches with the lack of self respect."
La Vita e Ancora Bella!
Italian Cultural Event At MSU

By Terry Fierro
Special to The Montclarion

Ask architect Frank Gerard Godlewski what a typical workday is like and you’re liable to get an elaborate response. Whether it be crazygluing potsherds of century old gem encrusted china or redrawing a Greco-Roman grotto simulating a time when Greek sailing ships ruled the Mediterranean Sea, Godlewski has never had a typical workday. At least that’s what he seems to reveal about his life as an architect restoring historical properties in Italy.

The impressive talk and slide presentation held on Sunday, December 19, in Cohen Lounge brought together a diverse group of standing-room-only attendees who were treated to an awe-inspiring visual array of Italian architecture and Bindi deserts.

Hosted by Conversazione e Caffe’ and The Center for Italian Culture, the informal group of MSU students and patrons gather weekly to practice their Italian language skills. Godlewski’s discourse sparks a renewed interest for cultural exchange.

A native of Montclair, New Jersey, Godlewski completed his formal education in architecture at the Cooper Union School in New York City and the Architecture Institute of Venice in Italy. Hand picked for his emergent talents by the famous Italian architect, Aldo Rossi, Godlewski was whisked off to labor in Italy.

SEE ITALIAN ON P. 7
Over the past 18 years, he has restored various villas, palaces, and castles throughout the country's many regions. In 1983 two design projects were featured in The Bianale, an international architectural exhibition held in Venice. Now living in Naples, Mr. Godlewski has just finished co-writing a new edition of The Fodor's Guide to Naples, due out this spring.

His own home is testament to the fact that he is interested in things-of-old. It is filled with epoch furniture in the style of Louie XVI. The foyer walls sport a glitter-gold collage of architectural designs. A house dressed for a feast, one popular Italian magazine exclaimed. There is even a year round Presepio, an elaborate nativity scene, set up in the corner of his studio.

Frequently featured and quoted in the Italian newspaper Corriere del Mezzogiorno, Godlewski is linked with the blue bloods of Italy. Looking through his impressive address book, one finds the names of Italian dukes, duchesses, princesses and Nobel Prize winners with whom he cavorts on a regular basis.

Names like Antonia Stradivari of the famous Stradivarius violin family and Arabella Gietaeni d'Aragona have shared grand ballroom space together with Godlewski. But let it be known that he is not an elitist. He spends a great amount of time volunteering in the neglected neighborhoods of Naples.

As disclosed in the evening's slide presentation, Godlewski is currently curator of several historic properties, which he will be offering this fall as part of a 10-day cultural tour for interested travelers beginning this summer. One such impressive site is IL Pizzu Sant'Aniello in Sorrento near Naples. Originally Duke Pizzutu Sant'Aniello of Francavilla, an agricultural and ecological habitat, IL Pizzu is located in an old fishing village dating back to the mid-1800s. Surrounding with a bit of the mod sewing house one is led to a citrus farm with a private coastline disclosing the Bay of Naples and Vesuvius in the distance. Guests who have stayed at this property have waxed poetical about the rhythmic beauty of orange tree archways and unforgettable sunsets. The ancient method of lemon farming, still in use today, employs 20-foot high pagliaere.

These stately cistern frame structures protect the fruit from excessive sun and wind. At one time mulberries were grown to produce silkworms. As revealed by another slide, Italian farmers string rete among the olive trees on the Pizzu property.

Rote, or Italian nets, are used to catchfalling olives at harvest time in November and December. As advised by Godlewski, due to a recent dry spell, the year 2000 will produce superior olive oil.

According to Pizzu's history, the grounds were abandoned for quite some time before thieves wandered through the farmhouse snatching valuable paintings and furniture. Godlewski then catalogued and dated the entire remains reconstituting priceless pieces of household goods and art. One must remember that precious frescoes and tempera can only be cleaned by hand with a dry cloth to prevent damage, while aged wooden floors must be soaked with linseed oil every month.

In each room there is a fireplace or coal stove. As pointed out, only a skilled traditional labor force, now old enough to retire, can be trusted to maintain such historic properties. For ancient artisans and farmers work is needed, but after obtaining a formal education, the children of these toilers do not want to engage in manual labor. This has led to an increase in Moroccan and Polish workers.

With the decreased birth rate in Italy it is now cost prohibitive for a family to maintain such a majestic home. Currently the house is used only in the months of July and August for close friends and disciples of Duke Paolo Roberto Imperiali di Sant'Aniello in Sorrento near Naples.

The institute for reproductive medicine and science of saint barnabas medical center is seeking egg donors. There are many interelle couples whose only dream is to have a family. That's why we're reaching out to you—women of all ethnic backgrounds, between the ages of 21 and 30, who are willing to try. You will be carefully screened both medically and psychologically to ensure your optimum health. Our donation program adheres to the highest ethical standards, and your participation will be confidential.

Do not hallucinate.
The ABC’s of the Flu: For Every Student and Budget

By Lisa Gribbin
Assistant Feature Editor

Just when you thought it was hard enough to get motivated and head back to school after winter break…With the crazy combination of cold and warm temperatures we’ve been having paired with the official arrival of winter, the flu season has arrived.

If you find yourself extremely busy and already stressed with the prospect of getting the flu, don’t worry. There are some effective methods to successfully treat the flu that will have you feeling better in no time.

Recent pharmaceutical treatments for the flu include both the antiviral drugs Relenza and Tamiflu, and an influenza vaccine given before flu season (late December through early March) approaches.

The medications have been proven to be effective treatments against battling the flu, and the vaccination has shown to have a 70% to 90% success rate in preventing illness in young adults, according to a recent report by the Centers for Disease Control and Prevention.

Although these new treatments are helpful in fighting the flu, they are not for everyone, and have guidelines to follow as the first 48 hours of flu symptoms to be of any help, and the vaccination should be administered between September and November to provide maximum protection.

The vaccination is an actual flu virus that is grown in the eggs of hens and injected into your body, and is best given before flu season begins to provide the best immunity.

If these treatments sound a bit expensive and scary, don’t worry. There are plenty of other methods to get better fast without someone sticking a needle in you with a viron grown in eggs and taking medication that can be costly if you don’t have good medical insurance.

If you’re on a tight budget and can barely scrape enough change off the floor of your car for a beer run, these tips are for you! Not only do they involve rest and relaxation, which is one of the best free things in life, but your friends will feel so sorry for you that they are bound to cater to you and bring you things for the next few days. There may be some benefits to being sick after all.

First of all, whatever symptoms you have, it really is best to stay home to avoid getting others sick. This way, you are doing your part in protecting others and also getting a chance to lay around all day and watch TV while you fight your way back to health.

And it is always smart to let your teachers know. Make sure to call when you sound really awful; teachers know when you are pretending to be sick just so you can skip class.

If you have a fever, always make sure to drink plenty of water and juice. Avoid coffee and alcohol, which are dehydrating and provide too much enjoyment for you to have right now. Remember that you are sick. You must try to stay as miserable as possible so people will come over and bring you chicken soup (which is another fluid you should have.)

Health professionals recommend that you wear light layers of clothing when you have a fever; bundling up in sweaters and blankets will make you feel even warmer. Take some Tylenol or ibuprofen (the most expensive things you will have to buy) to reduce your temperature.

If you have a bad cough or a sore throat, a good way to get free stuff from your friends would be to call them up so they can hear how bad you sound and feel very sorry for you.

If that doesn’t work, you can make a mixture of honey and lemon (2 parts honey to one part lemon juice, check with your doctor before trying this if you have diabetes) to ease your throat if you don’t like cough syrup. Breathing steam from a shower or a bowl of hot water can help clear a cough. Gurgling with salt water (1/4 teaspoon in one cup of warm water) provides instant relief for an irritated throat. Ice pops, hard candy, and cough drops are other good remedies for a sore throat, too. If you smoke, now would be a good time to avoid it.

If you are congested, hot drinks like tea and soup and spicy foods can help you feel better quickly. Nose drops made from a mixture of salt and water (using 1/4 teaspoon of salt in 1 cup of warm water will help clear your sinuses. If blowing your nose all day made it red and irritated, use petroleum jelly to soothe it.

You are now well equipped to fight the flu if need be. If you would like more info about the flu vaccine, prescription drugs for flu if need be. If you would like more info about the flu vaccine, prescription drugs for influenza, or other remedies, go to the website for the Centers for Disease Control and Prevention at www.cdc.gov or contact the site www.onhealth.com.

When to see a doctor

• Shaking chills
• Fever of over 100 degrees for more than three days, a fever that is not reduced when taking aspirin, or a fever over 100 degrees that begins three days after the onset of cold symptoms
• Loss of balance

If you have a fever, always make sure to drink plenty of water and juice. Avoid coffee and alcohol, which are dehydrating and provide too much enjoyment for you to have right now. Remember that you are sick. You must try to stay as miserable as possible so people will come over and bring you chicken soup (which is another fluid you should have.)

Health professionals recommend that you wear light layers of clothing when you have a fever; bundling up in sweaters and blankets will make you feel even warmer. Take some Tylenol or ibuprofen (the most expensive things you will have to buy) to reduce your temperature.

The 1999-2000 Winter Movie Review:

From A Man on the Moon to A Man on Death Row

By Michael Fli ener and Justin Vellucci

We are the stile pop corns so you didn’t have to.

Final exams were over, you packed your bags and got out of your resi dence hall. The holiday season was suddenly underway. So, what was on top of your list of things to do beyond picking up more wrapping paper and toasting back another glass or two of eggnog? How about a few trips to the local theater? What better way to start off a holiday season that is full of mythical tales about a jolly, old fat man who climbs down your chimney than by catching a film based on the life of another eccentric individual, the late comedian Andy Kaufman. In Man on the Moon, Jim Carrey (The Truman Show, The Mask) gives dimension to the often enigmatic Kaufman, through scenes that sought to recreate the comedian’s life and body of work. Carrey deals with the awkward material masterfully, switching seamlessly from Kaufman’s early days as a misunderstood stand-up comic to his edgy tallad debut singing the “Mighty Mouse” theme song on Saturday Night Live and his years as a cast member on the sitcom Taxic. When Kaufman’s life takes a turn for the worst, such as his detour into the world of wrestling or, more importantly, his contract ing a rare and terminal form of lung cancer, it is a testament to the masterful storytelling by writers Scott Alexander and Larry Karaszewski, who penned Larry Flynt as well as Wood, seem to have found some degree of success in past biopics, little in sight is offered into why Kaufman was the way he was. Creative genius or eccentric goofball, despite a brilliant showing from Jim Carrey, the movie, by the end, seems to leave the viewer with as many questions as the title implies.

“I always thought it was better to be a fake somebody than a real nobody,” Matt Damon (Good Will Hunting, Saving Private Ryan) says near the end of The Talented Mr. Ripley, Anthony Minghella’s follow-up to The English Patient. In the film, adapted from Patricia Highsmith’s novel by the same name, Tom Ripley (Damon), a wily writer and an unscrupulous businessman, brings his bohemian son back from an end less trip to Europe. What follows is part travelogue, part psychological thriller. Minghella’s film is both a chilling journey, taking corners of the Italian landscape and the viewer is literally sucked into a world where Dickie Greenleaf, played by Jude Law (Gattaca, eXistenZ,2), and Marge Sherwood, played by Gwyneth Paltrow (Shakespeare in Love, Seven) are running around between rivers boats, stunning outdoor cafes and jazz lounges.

Damon is the lifeblood of Ripley and, when he truly grasps the depths of the character’s psychology and motives, the film is almost in credibly predictable. Ripley takes a kes to play around among the Euro pean elite, and tries his hand at making friends, including a wonderfully lovable Philip Seymour Hoffman (Hoffman’s portrayal of the male gigolo) and the entire film just snaps at viewers. Beyond this, Pacino’s vocal cords haven’t seen this much effort since And Justice For All, and the film emphasizes the mediocre and some thing else, the film plays almost exactly as the novel reversed, with minor exceptions, and, despite the 188-minute running time, the novel’s narrative will keep you focused until the end.

Another novel that’s made its way to the screen is the life story of boxer Rubin “Hurri cane” Carter, adapted by Sam Chaiton. Based on Carter’s novel, The Hurricane is the tale of the conviction of Carter for a crime that he didn’t commit, and the fight to set him free. Denzel Washington (Malcolm X, Glory), portrays the imprisoned Carter with a stunning amount of intensity and focus and many of the social messages in the book are emphasized in the film, avoiding Carter’s imprisonment due to his race and the growth of the civil rights movement, hit home due to times overlooked in the book. Much like Carter’s portrayal of Kaufman in Man on the Moon, Denzel Washington was truly incredible, giving dimension to the character and the film proves that time and again. The backing cast also worked well together, but not rise up to the level of Washington’s performance, leaving individual roles and the movie as a whole lacking some emotion and punch (pun intended).

Did Chaiton take too many liberties in bringing the story of “The Hurricane” to the screen though? When it all boils down, a film centered on a charismatic character, Washington seems to gravitate toward Hollywood formula: a child writes a letter to Carter and, throughout, continues to fight to free a wronged man. While in real life, “The Hurricane” hit loud est, perhaps, in the courtrooms and in the folk song penned by Bob Dylan, the film seems to leave the viewer with as many questions as the title implies.

The Shawshank Redemption, the movie as a whole lacking some emotion and punch (pun intended).
Ani Shines Right Down To The Teeth

By Anna Lawrence
Assistant Arts Editor

Ani DiFranco, the best female folk rocker you’ve probably never heard of, closed the twentieth century with her greatest album to date. To The Teeth, released on DiFranco’s very own Righteous Babe Records, goes political, to the circus and to the very depths of the soul in the way that only DiFranco can.

To The Teeth opens with the song of the same name, addressing the state of America today and DiFranco’s own advice for the future. What makes “To The Teeth” so powerful, is the style in which it is presented. The finger-picking on acoustic guitar is an everly simple, barely there kind of melody. Its simplicity emphasizes DiFranco’s vocals. She sounds so alone and alienated as she sings, fed up and aggrieved with the place America has degenerated into, a place where “school kids keep trying to teach us/ what guns are all about/confuse liberty with weaponry/ and watch your kids act it out.”

She also goes on to mention civil rights activist Malcolm X. “He said the chickens all come home to roost/ Yeah, Malcolm forecasted this flood/ Are we really gonna sleep through another century/ while the rich profit off our blood?” DiFranco finishes the vocal part of the song with her “humble opinion” and what she suggest we do, which, when you think about it, may be the truth of the matter and a great revelation, not just one singer’s humble opinion.

“Open fire on Hollywood/ open fire on MTV/open fire on NBC and CBS and ABC/open fire on the NRA/ and all the lies they told us/ along the way/ open fire on each weapons manufacturer.” As DiFranco sings, listeners just nod their heads in awe and agreement at her innocent voice and poignant lyrics.

Another political song is the stirring “Hello Birmingham,” where she addresses the shootings and violence surrounding abortion doctors and clinics. DiFranco adds a personal touch to this song by talking about her own abortion experience. Some may find it shocking that she can write beautiful, poignant lyrics.

Still another political tune is “Open fire on Hollywood/ open fire on MTV/open fire on NBC and CBS and ABC/open fire on the NRA/ and all the lies they told us/ along the way/ open fire on each weapons manufacturer.”

While an uproar has erupted over rap-rockers Limp Bizkit and Kid Rock, a little bit of rap has infiltrated the DiFranco universe as well, in the totally grooving song, “Swing.” Not only does a guest, “Corey Parker” add a rap, Daren Hahn brings his skills with turntables into the mix. A saxophone, Wurlitzer, bells, triangle, bass and acoustic guitar round out the instruments, making it an interesting blend, well worth the listen.

Another refreshing song is “The Arrival of Hard Times,” detailing DiFranco’s day trips to the airport, where she is content to watch families reuniting. “I just want to sit here for a while/ I have determined/ it’s a sure cure for cancer.”

You could spend days with “To The Teeth.” Every time you listen to the CD, you’ll hear something new, like trying to discern DiFranco’s female voice from The Artist Formerly Known As Prince’s female sounding voice. Reading through the CDs booklet, you’ll discover that not only are members of Ani’s band credited with playing their respective instruments, crickets are also credited with playing their legs. Reading DiFranco’s lyrics without the music is like reading poetry.

It’s amazing that DiFranco has remained an independent, relatively unknown to most of America’s society since her first CD, self titled, appeared in 1990. Over 15 albums later, DiFranco is still that relatively unknown folk/punk/rock ‘n’ roll girl, putting her all into ever musical venture, and into the record label she launched, Righteous Babe Records. Perhaps the twenty first century will be the year DiFranco gets mainstream appeal and approval, while still maintaining her independent voice.

Theatre Performances

On Golden Pond, opening Friday, Jan. 21, running Fridays and Saturdays at 8 p.m. and Sundays at 3 p.m. until Feb. 5. Performed at The Barn Theater, 225 Old River Rd., West Orange, NJ. (973)260-4700

Pigeons on the Walk, opening today, Thursday, Jan. 20 at 8 p.m. Showings Thursdays through Saturdays at 8 p.m. and Sundays at 2 p.m. until Feb. 20. Performed at The Blackbird Theater at The Morris Museum, Morristown, NJ. (973)539-0434

What’s Up, Tigertilly?
Out and about in the local arts scene

**Concert Calendar**

**Thursday, January 20**
Coco Lee, Bowery Ballroom, New York, NY. (212)533-2111
Blue Dogs, Mercury Lounge, New York, NY. (212)260-4700
Sunday, January 23
TLC, Christina Aguilera, Madison Square Garden. (212)465-MSG1

**Saturday, January 22**
Funky Meters, Irving Plaza, New York, NY. (212)777-1224
Possible Side Effects Comedy Revolution, Twelve Miles West Theater, Montclair, NJ. (732)516-0838 Free preview, 11 P.M.

**Monday, January 24**
Catatonia, Bowery Ballroom, New York, NY. (212)353-2111
The Band With No Name, Kenny’s Castaways, New York, NY. (212)979-9762

**Tuesday, January 25**
Michael Hewett, Honey Child, The Lion’s Den, New York, NY. (212)477-2782

**Wednesday, January 26**
Professor and Maryann, CBGB, New York, NY. (212)967-0455

**Movie Releases**

**Thursday, January 20**
Boiler Room, Dir: Ben Younger. Giovanni Ribisi, Nia Long, Vin Diesel, Ron Rifkin, Jamie Kennedy

**Friday, January 21**
Play it to the Bone, Dir: Ron Shelton. Woody Harrelson, Antonio Banderas, Loli Davidovich, Lucy Liu, Tom Sizemore.
Rear Window, Dir: Alfred Hitchcock.
James Stewart, Grace Kelly, Thelma Ritter, Wendell Corey, Raymond Burr. limited re-release

**RUTGERS-NEWARK Summer Session 2000**

**Register Now!**
At Rutgers-Newark Summer Session, You’ll get:
- A wide selection of undergraduate courses in Arts & Sciences, Business, and Criminal Justice
- Graduate Courses in English, History, Nursing, Political Science, MPA, and Social Work
- Distance Learning Classes and Saturday Morning Classes
- Your choice of six-week, ten-week, or twelve-week sessions...
- Day & Evening Classes
- Credits transferable to other colleges and universities
- A vibrant academic atmosphere for... Rutgers students, visiting students and professionals.

For a Free Summer Session catalog, including registration form Call 973-353-5112

Winter

Continued from p. 9

the dark underbelly of poor acting and an unbearably predictable story-line.

Winona Ryder (Alien: Resurrection, Beetlejuice) is Susanna, a bored and uninteresting mental institution patient whose only aspiration is to keep a journal about her life. Angelina Jolie (Bone Collector, Gia) plays Lisa, a fellow patient with a wild streak and a history at attempted escapes. They team up, plan an escape, flee to the house of another former mental patient and camp out, trying to figure out, apparently, if the script can become any more formulaic. And it does. The ending is nothing more than a blip on the screen, a last breath from a tired screenplay. While films like Thelma & Louise have really succeeded at tapping into feminist philosophy and translating it into narratives of escape and liberation, Girl, Interrupted, while it might turn out to be a commercial success, seems vague, dull and uninspired.

While it was hardly groundbreaking, Galaxy Quest proved to be one of the more original films of the season, playing as a parody on the Star Trek cult following and phenomenon. In the film, Tim Allen (Jungle to Jungle, The Santa Clause) stands at the helm of the Galaxy Quest team, a group of semi-washed up actors from an old television show who are contacted by extraterrestrials unaware of the fact that the show is fictional. The film features good performances from Allen, as well as Sigourney Weaver (Alien, Gorillas in the Mist) and Alan Rickman (Die Hard, Dogma) but sometimes plays just too much like bad television. While this is surely the intention, and really captures the essence of what a bad television series like Galaxy Quest really is, it's not always easy to watch and, by the end, you're almost waiting for canned laughter to run over the credits.

And what would a winter movie review be without a trailer of coming attractions? We can all start breathing again since Leonardo DiCaprio, the disappearing act of Titanic fame, is set to appear in The Beach. Director Ridley Scott (Blade Runner) is set to deliver the epic Gladiador, starring Russell Crowe (L.A. Confidential, The Insider). Woody Harrelson (The People Vs. Larry Flynt, Natural Born Killers) is set to go head to head with Antonio Banderas (The Mask of Zorro, Desperado) in the boxing film, Play It To The Bone. Dennis Quaid will follow up his turn as an aging quarterback-back in Any Given Sunday with Frequency, a film about a ham radio with his now-deceased father. Perhaps most promising of all, however, is the adaptation of Bret Easton Ellis' intense novel American Psycho, with Christian Bale (Midsummer Night's Dream, Velvet Goldmine) playing the lead and Mary Harron (I Shot Andy Warhol) directing.

So, winter break is over, classes are back in session and all of the holiday sales have ended. The winter blockbuster popcorn is stale and you lost your ticket stub, but if you start saving your pennies now, you might be able to pull together enough cash to catch another “can’t miss movie” event come June.
The Seton Hall Tragedy: Could It Happen Here?

At 3 a.m. the fire alarm sounds and hundreds of MSU residents come out of their beds, put on their coats and trudge down the steps to stand outside in sub-zero temperatures waiting for the fire company to turn off the false alarm. Does this sound familiar? False fire alarms are an almost daily occurrence for most MSU residents.

Seton Hall University students were not this lucky. Earlier this week, students were awakened by an early morning fire alarm. Most took their time getting out of their residence hall. There were no delays in leaving the building. The students turned off their alarm. They were creating the problem. The solution is simple. Next time that you hear the fire alarm it leaves less protection to surrounding communities if a real emergency occurs.

Since there have been a number of false alarms, students are less likely to take alarms seriously. They may take their time leaving their room or even stay behind, not wanting to face the bitter cold. What would happen if there was a real fire?

The tragedy at Seton Hall not only affected their 10,000 students but also students nation wide. It will hopefully instill in them the seriousness of fire alarms. Residence Life, University Police and even the local fire departments have been trying to collaborate on finding a solution to the problem. So far, there have been none. Does a tragedy similar to Seton Hall’s have to occur for MSU officials and students to realize this is a serious issue?

False fire alarms not only endanger the lives of students, but also residents in neighboring communities. When fire officials are called to MSU due to a false alarm it leaves less protection to surrounding communities if a real emergency occurs.

Where does this end? Does there have to be a tragedy to open the eyes that are creating the problem? The solution is simple. Next time that you wake up at 3 a.m. fire alarm blaring, you have to wonder how real the situation is. Does smoke detectors in your house as a joke, why should you anywhere else?

The Associated Press reported that there has been 18 false fire alarms at Seton Hall since September. Many students reported hesitation to evacuate the building, based on many past false fire alarms. MSU had similar problems last semester. The problem here escalated so much Residence Life issued a reward for any student who has information on false fire alarms. Residence Life, University Police and even the local fire departments have been trying to collaborate on finding a solution to the problem. So far, there have been none. Does a tragedy similar to Seton Hall’s have to occur for MSU officials and students to realize this is a serious issue?

Y2K Passes Into History as The Apocalypse That Wasn’t

Thursday, January 20, 2000 • THE MONTCLARION • 13

Justin VELLucci, Editor-In-Chief of The Montclarion, is a Junior English major.

VIEWPOINT

Stranded on Campus: Lot 28
Parking Poses More Problems Than Solutions

My name is Frank Hering and I am a second year student here at Montclair State University. I am writing this letter in reference to the parking situation here on campus. My car was towed one night while I was working at the radio station, leaving me stranded on campus. After discussing the matter with such people as Dean Helen Moody, I was advised that I must park in lot 28 as a security measure for my own safety. Not wanting to break any of the rules I complied with the solution given to me.

The problem I now have has to do with the business that transports students to different parts of the campus. On Monday, November 30, I left my radio show as usual and waited for a bus to bring me to my car in lot 28. When the bus arrived, the driver informed me that he was no longer picking up students up. He stated that the best he could do was drop me off at the bridge leading into Clove Road and that I would have to walk from there by myself at approximately 2:30 a.m. I must question whether this is the safest thing for students to do. I hope you will look into this matter and hopefully find a way to correct it before something happens to a student.

Frank Hering
Second Year Student

There is also no need to blame the desk assistant who came late. She called to say she would be late, as desk assistants are instructed to do. We need to lay the blame on Residence Life and Campus Police. If there was no desk assistant desk cover the desk and the Director of Residence Life, Resident Manager and Resident Assistants were not available, what are you to do? Stay at the desk and risk failing a final exam, or leave the desk unattended, the choice is not difficult to make.

I feel there is no unity we have no campus community! If for some reason a D.A. can’t work at the desk, or if they call to say they will be late, and no other desk assistants or resident manager is available, it should be the duty of the campus police to lend a helping hand in securing that building. What else are they there for, to ride around on bikes, sleep and eat in police cars, in lot 28 and give tickets mercilessly?

If I have offended any students, I apologize. If I have offended any desk assistants, I apologize. If I have offended members of Residence Life or campus police, good! Take heed of what was said and make changes. Sometimes the truth hurts, but if you listen to it, it might help.

Return to the Bond House, Attn: Liz Voltman, by January 31
Greetings, students of MSU. I came over here to address some concerns that have been raised by you, the subjects of my domain.

First of all, I am not some “Moon Man” as some of you have so delicately put it. I didn’t arrive here with plans of complete domination. And I certainly didn’t come here to give you all anal probes. Where you came up with that one even my humungous cerebellum can’t figure out.

I’ve come here because of opportunity and coincidence. I received word that your species was having difficulty with its computers. A Y2K bug or something. Apparently, you all went and designed your species’ computers that didn’t know what year it was. Then, you went and built your entire world around these computers that - when you think about it - had no idea what day it was. Smooth. Real smooth.

Well, I’m not worried. We all make mistakes. Except me. I’m perfect. But then again, I was genetically enhanced so that I would be. My creators designed me to be both super-intelligent and super-attractive. Well, don’t worry. We all make mistakes.

The last thing I want to address are concerns that have been raised by you, the subjects of my domain. As far as I can tell, this was drawn up by either one of your administrators. Not only would their hot air give him wind like you wouldn’t believe, but all that fat and gristle just can’t be good for any living thing.

In all fairness, Merv’s meal will be heavily sedated and will not feel pain when viciously ripped to shreds. In order to get him interested in his prey, I will need two or three volunteers to prop up the food’s arms and legs and make it dance. It’s actually quite similar to a profession you on earth call a “rodeo clown.” I plan to charge admission to see this. Actually, it sounds more like the earth programs called “game shows.” If you enjoy “professional wrestling,” you’ll get a kick out of this as well.

Now there are a couple of benefits to this plan besides the improved parking. First, remember that at a university with such a large enrollment, Merv’s meal probably won’t be anyone you know. Second, it could very well be someone you know, but there’s a chance that it was someone you didn’t like anyway. Third, you have to admit that lines will without a doubt be shorter. Finally, just remember that even if you are the one selected, at least you don’t have to worry about those G.E.R.’s you’ve been putting on.

The last thing I want to address are changes I plan to make in the coming semester. Eventually, I will replace all administrators with farm animals. I’ve already appointed Quackers the duck as my Vice President of Budget Blowing. I’m also going to improve the food quality by serving a tasty dish I call “Soylent Green.” I think you’ll all find it tasty and surprising.

In all fairness, Merv’s meal will be heavily sedated and will not feel pain when viciously ripped to shreds. Actually, it sounds more like the earth programs called “game shows.” If you enjoy “professional wrestling,” you’ll get a kick out of this as well.

Now there are a couple of benefits to this plan besides the improved parking. First, remember that at a university with such a large enrollment, Merv’s meal probably won’t be anyone you know. Second, it could very well be someone you know, but there’s a chance that it was someone you didn’t like anyway. Third, you have to admit that lines will without a doubt be shorter. Finally, just remember that even if you are the one selected, at least you don’t have to worry about those G.E.R.’s you’ve been putting on.

The last thing I want to address are changes I plan to make in the coming semester. Eventually, I will replace all administrators with farm animals. I’ve already appointed Quackers the duck as my Vice President of Budget Blowing. I’m also going to improve the food quality by serving a tasty dish I call “Soylent Green.” I think you’ll all find it tasty and surprising.

In all fairness, Merv’s meal will be heavily sedated and will not feel pain when viciously ripped to shreds. In order to get him interested in his prey, I will need two or three volunteers to prop up the food’s arms and legs and make it dance. It’s actually quite similar to a profession you on earth call a “rodeo clown.” I plan to charge admission to see this. New Course Announced at MSU

By John Frusciant
HUMOUR™ Writer and Sixth Mars Brother

Attention students: the administration of MSU announced this week that, effective immediately, a new class has been added to the MSU curriculum. This new course is entitled Complacency 101.

No longer will you be able to use the skills it takes to be an effective student. You will no longer be able to learn all the skills it takes to have a job you can't stand and that has absolutely nothing to do with what you really want to be doing with your life. Learn the basics of work ing far too many hours for an absurdly low salary, getting little vacation time, becoming disconnected from your family and friends, and dreading waking up every morning! Work for the same company all your life, and when you retire you'll receive a gold watch in exchange for all the ulcer-ridden, socially destructive, cancer-causing years you put into a company that could care less about your well-being as long as you keep up your part of production!

Students will have the option of interning in the break room of an office building of their choice, where they can glean the finer points of complaining in the office and doing nothing! You'll learn how to become - that's right - complacent!

Through Complacency 101, you'll learn all the tricks of the complacency trade, like muttering nasty comments under your breath to people who have little to no power and when you retire you'll receive a gold watch in exchange for all the ulcer-ridden, socially destructive, cancer-causing years you put into a company that could care less about your well-being as long as you keep up your part of production.

Students will have the option of interning in the break room of an office building of their choice, where they can glean the finer points of complaining in the office and doing nothing! You'll learn how to become - that's right - complacent!

Another feature of this course will be studying how to complain about the environment but never do anything about it because...

“Hey, what can I do? I'm not an environmentalist!”

The course will be taught by a professor who didn't get what he/she wanted out of life, so instead he/she settled into a comfy teaching career and now takes it out his/her aggressions and bitterness on the students by ridiculing everything they do and tearing apart their work. This professor has just received tenure, so he/she is safe in the knowledge that no matter what he/she says or does, he/she will not be fired.

Sit back, relax, and let the administra tion do whatever it wants with your money, your life, and your college career! Sign up for Complacency 101 today and you too can learn how to become - that's right - complacent!

Editor's Note: Have you ever laughed so hard that soda came out your nose? While it made the journey from mouth to throat to nose, did you ever think for a second that maybe it started fizzing around in your brain? I think that happened to me once or twice. It certainly would explain a lot.

“Told you it was going to freeze that way!”

What's Cookin' At Humour™?

It's my famous Yankee Bean Soup!

Well, not exactly. See, I'm looking for a partner (an assistant editor) in crime and someone who will eventually replace me. I sure as hell can't stay here for ever, and I'm not running for re-election at the end of this semester. The hours are not bad, the position is fun, and it looks great on a resume. So if you're funnier than I am, and that's not asking much, call the Montclarion office at 655-5241.

Humour™: Annoying People For Fun And Profit. Well, Okay, Just For Fun.

Chris Finegan, Humour™ Editor

Humour™'s Website of the Month

THE ILLUSTRATED BEOWULF
www.frognet.net/~wentwrth/beowulf/

Those of us who stayed awake in English literature were treated to the story of Beowulf, the larger-than-life warrior whose exploits saved a nation and bored narcoleptic students for centuries to come.

Fortunately, for those who fell asleep, there is a “Cliffs Notes” version available. It’s our website of the month, and it explains Beowulf in terms even a Wheel Of Fortune contestant could understand. The characters - Geats, Danes, Thanes, and Monsters - are played by their modern-day counterparts, including Bill Clinton, Catwoman, Godzilla, and Cookie Monster. The site is well worth a look, and it’s one of the few places on the net to see Slick Willie and Pope John Paul II cruising for chicks.

Find the listed words in the diagram. They run in all directions - forward, backward, up, down and diagonally.

Words Ending in “IST”

VOTE FOR YOUR FAVORITE SPORTS SEASON OF THE LAST TWENTY YEARS!

Over the last twenty years, there have been some amazing seasons in the World of Sports, especially New York-area Sports. From Bill Parcells leading MVP Lawrence Taylor and company to the Super Bowl in 1986 to the Yankees winning a record 25th World Series in 1999; from the Devils’ Stanley Cup-winning defense in 1994 to the Bulls and Michael Jordan’s last game in 1998, it’s been an exciting couple of decades for sports fans in New Jersey and New York. This is YOUR chance to pick what YOU thought was the most exciting season to watch, listen, read, and talk about. Submit your vote for Most Exciting Sports Season from the choices below to RedHawkSports@Hotmail.com by Jan. 28, and the Montclair Students’ Choice will be unveiled in the Feb. 3 edition of The Montclarion!

‘86 New York Mets
Led by young superstars Dwight “Doc” Gooden and Darryl Strawberry, the Mets earned their highest win total ever, going 108-54 during the regular season, the ninth greatest season ever at that time. After defeating the Houston Astros in six games, the Mets overcame the Boston Red Sox in seven games to earn their second first World Series Title since the Amazin’ Mets of 1969.

‘98 Chicago Bulls
Led by Michael Jordan in what turned out to be his last season, the Bulls defeated the Utah Jazz in six games to win their 6th NBA Championship in eight years. Jordan was named Finals MVP for the sixth time after scoring 45 points, including the game winning jumper, in the final game of the series, and his career.

‘98 McGwire and Sosa
In the greatest home run race of all time, Mark McGwire and Sammy Sosa spent the season chasing each other on the way to break Roger Maris’ record of 61 home runs in a season. McGwire won the race, hitting his 62nd home run in early September, on the way to an unfathomable 70 home run season. Sosa finished with the second best home run total ever, with 66.

‘94 New York Rangers
The Rangers had the longest Stanley Cup drought in history, not having won the Cup for 54 years. In 1994, Mark Messier, Adam Graves, and Mike Richter finally led the team to the Holy Grail of hockey. The Rangers defeated the New Jersey Devils in a grueling 7-game series to reach the finals, where they came back from a three-games-to-none deficit to beat the Vancouver Canucks in seven games.

‘98 USA Women’s Soccer
Mia Hamm and Brandy Chastain led the favored United States Women’s Soccer Team to Olympic Gold. Their season was capped off with an exciting 5-4 shootout win over China. After the most accomplished goalkeeper in U.S. Women’s soccer history, Brianna Scurry, turned away one of China’s shots, Brandy Chastain secured the Gold Medal with the final U.S. shot.

‘86 New York Giants
Head Coach Bill Parcells and quarterback Phil Simms led the Giants to a regular season record of 14-2. NFL MVP Lawrence Taylor led the defense, and the Giants defeated the Denver Broncos 39-20 in Super Bowl XXI. Phil Simms was named Super Bowl MVP for his 22-25 passing performance. Eight Giants players were honored with spots in the Pro Bowl.

‘99 New York Yankees
The Yankees swept Texas in the Divisional Round of the AL Playoffs, then defeated Boston in the ALCS en route to a sweep of Atlanta in the last World Series of the 1900’s. The win marked the 25th World Series Championship in Yankee history, making them far and away the most successful sports franchise of the 20th Century.

‘95 New Jersey Devils
1994 Rookie of the Year Martin Brodeur, top defenseman Scott Stevens, and vicious but effective forward Claude Lemieux led the Devils into the playoffs, past the Bruins, Penguins, and finally the Flyers, to reach the Stanley Cup Finals. In the Finals, the Devils defeated the Red Wings in a 4-game sweep. Lemieux was awarded the MVP Trophy for his outstanding play in the Stanley Cup Finals.
When all was said and done, the scoreboard showed a 61-29 MSU victory. Ouch. Shine finished with a game-high 14 points and 11 MSU players scored over the course of the night.

The Red Hawks will have a great opportunity to build more momentum when Rutgers-Camden’s Scarlet Raptors (1-11, 0-8), who happen to be just as inept as Rutgers-Newark, visit Panzer Gymnasium this Saturday at 4 p.m.

Hopefully, MSU will be able to build on this huge victory in preparation for meeting NJAC’s second-ranked team, Rowan University (12-1, 6-1), on Rowan’s home court next Tuesday at 8:00 p.m.

In their first meeting, Rowan dominated, winning 98-54, and letting no MSU players even reach double digits in scoring. Rowan’s Donna Clark (20 points), Meleena Edwards (19 points), and Kristi McCullough (21 points) will most assuredly be looking to have another huge game against the MSU defense.
Men’s Basketball Takes Ford Holiday Tournament

MSU’s Milenko Beric named Ford Help The Children Holiday Tournament Most Valuable Player

By Mike Halper
Sports Editor

The MSU Men’s Basketball team came away with a big 72-67 overtime win over Roger Williams University in the finals of the Ford Help The Children Holiday Tournament. Junior center Milenko Beric, who had been injured and sat out for seven games coming into the Tournament, won MVP honors as he racked up 26 points and 32 rebounds in MSU’s two games. After leading 36-28 at the half, MSU spent the first nine minutes of the second half building their lead. Up 51-39 with 10:59 to play in the game, the Red Hawks looked like a lock to win the tournament. This was a good example of why they play the games.

Milenko Beric hit the first of three straight jumpers to tip the game in Richard Stockton U.’s favor. Despite another strong game from Lawrence and Ellerbe again having strong games, MSU valiantly attempted a comeback, hitting 20 of 28 foul shots in the second half, but Ramapo kept them at bay, going on to win 69-64 and handing MSU their third straight NJAC loss.

Back at Panzer Gym three days later, MSU had a good chance to break their NJAC losing streak. MSU was up 48-46 but Ramapo kept them at bay, going on to win 69-64 and handing MSU a 69-62 lead, and spark a 15-3 MU run to finish the game.

As the team took to the road again for Mahwah and their game with Ramapo last Wednesday, they left that little bit of momentum behind. Lawrence and Ellerbe again had strong games, with 14 and 13 points respectively, and Lawrence grabbed a game-high 16 rebounds. Tara Larkin and Stephanie Pillari countered for Ramapo with 17 and 15 points, respectively, helping their team to a 40-26 halftime lead.

MSU valiantly attempted a comeback, hitting 20 of 28 foul shots in the second half, but Ramapo kept them at bay, going on to win 69-64 and handing MSU its third straight NJAC loss.

Back at Panzer Gym three days later, MSU had a good chance to break their NJAC losing streak. MSU was up 48-46 with under two minutes left in the game, when Amanda Petronaci and Tamika Riley of Richard Stockton U. hit consecutive jumpers to tip the game in Richard Stockton’s favor.

No Break for MSU

Women's Basketball

Red Hawks fall short in Gettysburg Tournament; loses fourth straight NJAC game

By Mike Halper
Sports Editor

Things seemed like they might be going up for the MSU Women’s Basketball team, as they bounced back from two straight NJAC losses to reach the finals of the Days Inn Tournament held at Gettysburg College.

With big games from sophomore guard Stephanie Ellerbe (13 points), junior guard Kerry Shine (game-high 18 points), and six-foot junior center Marlena Lawrence (18 points in 17 minutes), the Red Hawks played more efficiently than host Gettysburg in the first round of the tournament on Jan. 7, coming out with a 63-56 win.

In the final game, played the next day against a 4-3 Wheeling Jesuit team, the Red Hawks couldn’t put together another win. Despite another strong game from Lawrence (18 points, 2 blocks, 2 steals), the team was defeated.

Once back at home in Panzer Gym, Kerry Shine welcomed the College of Staten Island to town with a 19 point game, leading MSU to their highest total score of the season, and they handed the Dolphins an 82-65 loss.

After MSU closed out the first half with a 40-26 lead, April Nelson led a Staten Island charge to come within five points at 65-60. After the teams traded scores, Marlena Lawrence layed the ball in to give MSU a 69-62 lead, and spark a 13-3 MU run to finish the game.

As the team took to the road again for Mahwah and their game with Ramapo last Wednesday, they left that little bit of momentum behind. Lawrence and Ellerbe again had strong games, with 14 and 13 points respectively, and Lawrence grabbed a game-high 16 rebounds. ### Male Athlete of the Break

**Rami Ratel**

Rami Ratel (20-0, 11 pins) has been on a hot streak all season. At the Hunter Invitational held at Hunter College, Rami led the Red Hawks to a big victory by winning his 149-pound weight class and being named Most Outstanding Wrestler of the Tournament. On Sunday, in a Quad Match versus Coppin St., E. Stroudsburg, and Howard, he scored three victories, including two pins, leading MSU past all three opponents.

---

### Female Athlete of the Break

**Marlena Lawrence**

In four of MSU's five games over the break, Marlena Lawrence was MSU's high scorer. Over those last five games, she has amassed 82 points and 47 rebounds, 16 of them coming against NJAC rival Ramapo. Her best performance of the break has been a big game this past Sunday against Richard Stockton, in which she scored a game-high 21 points, pulled down 13 rebounds and had two blocked shots, both of which were team-highs.
Men’s Basketball Outlasts Rutgers-Newark

By Mike Maranover
Staff Writer

The MSU Men’s Basketball team defeated Rutgers-Newark (3-9, 1-8 NJAC) 67-47 at Panzer Gymnasium last night, improving their record to 11-4 (5-4 NJAC). The Red Hawks were led by sophomore guard Jason Bush, who scored a game-high 18 points on 7-16 shooting from the field.

In a game that was played rather sloppily, the Red Hawks managed to wear down their opponent by playing good defense, rather than running them off the court. MSU held the Scarlet Raiders to just 34 percent shooting, despite a good showing by sophomore Kyle Harvey, who led Rutgers-Newark with 16 points.

MSU senior guard B.J. Reilly opened the scoring by hitting a 3-pointer seven seconds into the game. Rutgers-Newark then proceeded to go on an 11-2 run, taking an 11-5 lead with 14:08 remaining in the half. MSU called their first timeout after having committed five turnovers.

The Red Hawks seemed anxious at the onset of the game, forcing shots and consequently giving Rutgers-Newark opportunities at the other end.

The Red Hawks pulled to within four, but a 3-pointer by the Scarlet Raiders’ Keith Harvey put the Raiders ahead 23-16 and promised MSU to use a 20-second timeout. Another 3-pointer by B.J. Reilly cut the deficit to five. See OUTLAST on P. 21

MSU Women Snap Four Game NJAC Losing Streak

By Mike Halper
Sports Editor

The kind of holiday break the MSU Women’s Basketball team would probably appreciate more than anything else was a hard fought game against Rutgers-Newark, one that they eventually won 79-69.

In a game that was played rather sloppily, the Scarlet Raiders were led by sophomore guard Stephanie Ellerbe who scored 24 points, which included 16 straight points, putting the Scarlet Raiders at 30-10.

After a layup, Hunter scored a free throw, giving Rutgers-Newark two points, closing the half out at 36-11, with a 46 percent shooting percentage compared against Ramapo and the NJAC’s top-ranked team.

Wilson’s 14 points in each game marks a career-high, and his 16 rebounds against Ramapo also marks a career-high. For the season, Wilson has appeared in six games, and has averaged 21.7 minutes, 8.3 points, and 5.8 rebounds per contest.

MSU Wrestling Dominates Competition Over Break

By Mike Halper
Sports Editor

Coming in to this past Sunday’s quad match with Cuppin St., Howard University, and East Stroudsburg University, MSU’s wrestlers were on a roll. With three big wins in their last four matches, plus the Hunter Invitational Tournament Title under their belts, the Red Hawks (6-1) had been wrestling dominantly. The trend would continue through the day.

MSU rolled to easily defeat all three teams, and the team’s two undefeated wrestlers, Rami Ratel (20-0) and Florian Ghinea (17-0), both added three victories to their tallies. Ratel pinned two of his opponents, upping his total pins to 11, a tie for highest on the team.

Dominic Dellagatta (16-1), who also has 11 pins on the season, also had three victories and two pins on the day. All three matches were lopsided, with MSU averaging nearly 40 points per contest, and only giving up an average of just over 12 points.

Brad Christie (20-2) added three victories for the team, and Carmen Mercandante (6-3), Joseph Immeneri (7-4), and Kyle Good (7-2) added two victories each on the day. Montclair also recorded six forfeit wins in the three matches.

MSU’s next match is Tuesday at 7:30 p.m. in Panzer Gymnasium, against The College of New Jersey (6-2), who feature 149-pound Matt Moscatel (18-7) and 125-pound Anthony Conte (18-4), who has a 43-11 career record.

MSU wins Hunter Invitational Tournament

After winning three of their last four contests, the MSU Wrestling Team must have been hungry heading into the seventh annual Hunter Invitational Tournament on Jan. 8. They dominated the competition, scoring 10 top-three finishes, including five first place awards. The team won by a comfortable margin, 32 points ahead of second place New York University.

MSU rode a wave of victories led by 149-pound Rami Ratel (17-0), who won first place in his weight class and was named Most Outstanding Wrestler of the tournament, and 133-pound Jess Monaco (13-0), who had three victories by pin fall, two of them in less than 90 seconds.

The Scarlet Raiders were led by sophomore guard Stephanie Ellerbe who scored 24 points, which included 16 straight points, putting the Scarlet Raiders at 30-10.

For the season, Wilson has appeared in six games, and has averaged 21.7 minutes, 8.3 points, and 5.8 rebounds per contest.

Four days later, as Richard Stockton invaded Panzer Gymnasium, Wilson, in his second start, racked up another 14 points on 7-15 shooting, to go along with his six rebounds and three blocked shots against the NJAC’s top-ranked team.

Wilson’s 14 points in each game marks a career-high, and his 16 rebounds against Ramapo also marks a career-high. For the season, Wilson has appeared in six games, and has averaged 21.7 minutes, 8.3 points, and 5.8 rebounds per contest.

Walik Wilson Named NJAC Rookie of the Week

By Mike Halper
Sports Editor

It’s been a good week for freshman forward Walik Wilson. Against Ramapo last Wednesday, he got his first call to start in an MSU Men’s Basketball game. Then he went out and proved that he deserved to stay in the starting line-up.

Wilson earned NJAC Rookie of the Week honors this past week for his contributions in Montclair’s 55-54 loss to Ramapo on Jan. 12 and their 59-51 loss to Richard Stockton this past Sunday.

Against Ramapo, Wilson, who graduated from St. Anthony’s High School, shot 7-11 for 14 points, and pulled down 16 rebounds for the Red Hawks. Wilson helped MSU charge back from an 11-point deficit before Ramapo narrowly won the game at their home gym.

Four days later, as Richard Stockton invaded Panzer Gymnasium, Wilson, in his second start, racked up another 14 points on 7-15 shooting, to go along with his six rebounds and three blocked shots against the NJAC’s top-ranked team.

Wilson’s 14 points in each game marks his college career-high, and his 16 rebounds against Ramapo also marks a career-high. For the season, Wilson has appeared in six games, and has averaged 21.7 minutes, 8.3 points, and 5.8 rebounds per contest.
