Hate Crimes on Campus

Two Students Plan on Creating a Voice for Victims

A group of students are part of the student production, The Exonerated, which voices the true stories of six individuals on death row who were then exonerated after spending several years in prison.

Make Way For Hawk Crossings

Montclair State University has decided to officially change the name of the apartments on Clove Road to “Hawk Crossings,” due to the ongoing renovations of the complex. This new title will be formally adopted for the fall semester of 2010.

According to Dr. Karen Pennington, vice president for student development and campus life, “The complex is undergoing a renovation both inside and out. It seemed an appropriate recognition of these changes.

The individual apartment buildings, previously only recognized numerically, will have new names as well. They are all related to the school’s red-tailed hawk mascot, Falcomides, Accipiter and Butus. In Latin, these words are the scientific terminology for the order, family and genus, used to classify the species of Red Hawks.

UNEMPLOYMENT FOR HIRE Part 1: Where Are All the Jobs?

Sally Jews
Arts & Entertainment

With the economy in the shape it is and college seniors graduating each year, are jobs for them in their field? This is a concern for many students and especially for the class of 2010.

Among college grads, younger workers see a higher number of unemployment. It is still worth something to have a college degree in the end, even though the unemployment for college grads is overall lower than unemployment for college seniors.

NEWS
Students looking to learn about developing countries have an opportunity to travel to Nicaragua and bring their knowledge and experience back to Montclair. The creator of the program, Jhon Velasco, came to Montclair State University in 2003 with the dream of creating an international social justice program, three years ago, this dream became a reality. Teaming with Witness for Peace, Montclair sent students to Nicaragua with the assistance of Reverend Ann Ralosky, the University’s Protestant Chaplain and the group has continued the delegation ever since.

The project is currently housed at the Center for Non-Violence and Peace Initiates. This year’s leaders for the delegation are Velasco, who is the director of the Center for Non-Violence and Peace Initiates and Kevin McGowan, the program coordinator.

There was a presentation given in University Hall on Thursday Nov. 12, 2009 by some of the students who attended the most recent delegation traveling to Nicaragua.

They discussed the many challenges the citizens of this country face and the need for help and support from other countries. Students shared their experiences and were very passionate about their cause.

“I decided to join the program after speaking with Jhon Velasco. I learned that the goal of the delegation was to learn more about Nicaragua’s current state and how we should all be educated on other countries’ governance.”

Each member came back to the states with many significant memories.

“Another memorable moment is our visit to La Chureca, which is a garbage dump and having the privilege to meet Yamileth and listen to her story.” Garcia said. “Yamileth is such an inspirational woman; she helped to create a community out of the dump by helping families recover food found after the garbage is dumped and searched through.”

Velasco said that, as of now, this is an annual project.

“We will be implementing another delegation for January 2011, as we have already the team for 2010.”

Every year the delegation changes. This year the team is doing something new and will study racism issues in Nicaragua to have a different perspective of racism here in the U.S., he said.

Currently, team Nica has about half of the funds needed to enable the new project. The students have been all over campus and the Montclair community to raise money for their delegation.

“Thinking about the hardships they have endured and continue to endure breaks my heart to this day,” Gastulo said. “When we left the village, I remember being around saying goodbye to everyone, but I could not find Israel, the little boy who stole my heart. To this day, I still wish I had gotten to say goodbye and given him one last hug.”

Students who went to Nicaragua were able to meet school children from the country and experience what a typical school day is like.
The university’s Global Education Center is hosting a delegation of five Ukrainian court administrators in the Open World Leadership Program. The delegates are visiting Montclair to learn about the American Court Administration. The student body already began showing interest and gratitude towards the delegates, as information about their visit is spread around the campus.

“...it is a good thing, they could learn from us while we learn from them. I feel good knowing they choose our school to come to; it’s an honor,” Jennirett Whitaker, a commuter said.

The question that is of major concern is whether the student body will have the chance of speaking with the delegates. The delegates attended a small discussion seminar yesterday at the courtyard lounge in University Hall, that consisted of a crowd of graduate and undergraduate law students. “The students will then have an opportunity of a round table discussion where they can ask questions about the issues at hand,” Dr. Marina Cunningham, executive director at the center, said.

The group of delegates include six women: Olha Volodymyrivna Davyd, Lina Oleksiyivna Hubar, Svitlana Valeriyivna Koltunova, Olena Oleksandrivna Panchenko, Natalya Vasylivna Sulyatytska and Iryna Oleksiyivna Khymchak, who is the facilitator.

Montclair has been the host of visits from other countries such as Russia and Uzbekiston. However, this is the first time being visited by Ukraine.

The program, which is run by the Global Education Center, is designed for former Soviet Union members. It was organized about 20 years ago. “This program was designed for young leaders to meet their counterparts, for them to learn about democracy and also to meet each other and exchange cultural and personal views,” Cunningham said.

The stay for the delegates is expected to be filled with events such as visits to New York city, the United States District Court, CNBC studios, Essex County Law and Public Safety and to the Administrative Office Court of the State of New Jersey located in Trenton.

This event is not just one that brings outsiders to Montclair State; instead it is a prestigious program that engages in a strong international focus. It provides the university with the option of continuing its development and extending contacts.

The student body of Montclair State University is indeed grateful to have such an event hosted at their school. “Our campus is diverse, comprising of different things and cultures they can experience, not only about the political system, but also other Americans views on the system itself,” sophomore Daniel Hernandez said.

“It shows positivity that they chose our school over other schools,” sophomore Bodenrin Oluwo said. “As a student, I feel good as this is a good experience.”

Roy McKenna

**Sodexo Can Drive**

**Initiated to Fight Hunger**

Preparing to Set a World Guinness Record

Call Info

Antonio DeSena-Bustamante

Sodexo Dining Services has involved the Montclair State University community in an annual Cans Across America food drive as a preparation to fight hunger and an attempt to set a new World Guinness record.

Sodexo dining services has been involved in the drive for two years, and last year, was able to raise $860 dollars.

“Montclair State University has helped with the Food Drive in conjunction with Dining Services. We had money bins all across campus and called our vendors for donations. We collected $460 in money in just a week and a half,” marketing director Kamal Archukhan said.

“One of my best friends is gay and over the summer one kid at my house was harassing him a lot for being gay,” McKenna said. “You don’t take something like that lightly especially since he is one of my good friends. “There’s still such a discrimination against people and I told the kid to get out of my house. I feel like its not really known about and people aren’t realizing that it is happening at Montclair.”

Once the research and gathering stage from the victims is completed, the outline of the play will also be developed.

“We are not just looking at homosexual but race and religious discrimination as well. The Linzer Project focused more on hate crimes against homosexuals while we are trying to focus on the broader version of hate crime.” Wolf said.

Flyers will be posted in a few days, McKenna said, which basically announce that “if anyone has a story to tell us and you want us to get it out there, we will get it out there.”

“Montclair is going to be big,” Wolf said.

Wolf said from a play write standpoint, one of the difficulties he will have is finding a place to put the show on since there are constantly other shows being performed throughout the campus. 

“Momma’s Man” is the most recently written script of the play. McKenna, he had an emotional point of view on what he will find to be difficult as the show progresses.

“We haven’t experienced hate crimes ourselves which makes it hard to connect to. People say you haven’t experienced it, you can’t write about it.”

“People say ‘if you haven’t experienced it, you can’t write about it.’ But that is why we are trying to do.”

Exploring Bloomfield Avenue: Leela’s Trinidad Cuisine

Scott W. Buchanan
STAFF WRITER

Sick of (or from) the food on campus? Take a short ride with me to explore the culinary diversity along the historic thoroughfare that is Bloomfield Avenue — on a college student’s budget, of course.

No exploration of Bloomfield Avenue would be complete without a sampling of some good Caribbean food. I entered Leela’s Trinidad Cuisine, and found some. A new opening and an immaculate interior betrayed the fact that this restaurant has not been open long. I was surprised to see that the restaurant emphasized a counter service set-up. The dining room was very attractive and had been decorated with plenty of color, which gave it a warm Caribbean feel. It was apparent that the tables had been set with care and the first thing the woman at the counter said to me was to watch my step because they had just waxed the floor.

Tip 3: Drink More Water
Drinking an adequate amount of water is a smart habit to get into; not just for the holidays, but year ‘round. It’s good for your skin, so if you are suffering from lack of vitamin, you’ll look better if you are well hydrated. Also, considering the human body is composed of about 60 percent water, virtually every function is dependent on this vital nutrient. Don’t wait until you feel thirsty as your body chemistry will have you feeling off buttons. If your body chemistry is telling off buttons. If your body chemistry is saying off buttons, it is time to hydrate. Count your blessings and give back. For example, I experimented and was pleasantly surprised with the results. Follow the recipe for classic pumpkin pie on the label of plain, canned pumpkin. Subtract the substitute the regular eggs with aquafaba. For each egg, use 1/4 cup of soaked and mashed chick peas. Mix in 1/2 cup of pumpkin puree. The pumpkin pie was a little sweet and a lot bitter — just like me. It seems that this restaurant understands the importance of being authentic, and I was pleased.

Tip 4: Watch the Alcohol
I’m not just talking about your date, but about vanity, you’ll look better if you are well hydrated. Also, considering the human body is composed of about 60 percent water, virtually every function is dependent on this vital nutrient. Don’t wait until you feel thirsty as your body chemistry will have you feeling off buttons. If your body chemistry is saying off buttons, it is time to hydrate. Count your blessings and give back. For example, I experimented and was pleasantly surprised with the results. Follow the recipe for classic pumpkin pie on the label of plain, canned pumpkin. Subtract the substitute the regular eggs with aquafaba. For each egg, use 1/4 cup of soaked and mashed chick peas. Mix in 1/2 cup of pumpkin puree. The pumpkin pie was a little sweet and a lot bitter — just like me. It seems that this restaurant understands the importance of being authentic, and I was pleased.

Tip 5: Keep Active
Social gatherings don’t always have to be centered around food and drink. Consider volunteering your time at a food bank or after meals with family or friends, go for a walk. If you have nieces, nephews or kids of your own, play with the little people. Help out with yard work, walk or run a 5K. Or if you register with a buddy, it’s harder to give up causes why you can’t workout, especially with the colder weather when it’s all the more tempting to stay in bed and hibernate.

To come and have the dinner of all dinners with that pack of animals. In all seriousness though, Thanksgiving is a family holiday. I can’t think back to a year where I wasn’t together with at least my mom and brother for the day. Considering this, it’s obvious that any building relationship could be ruined out for spending the day together, not to mention that asking any girl you’ve only been on a handful of dates with is probably only going to scare her away. You might as well ask whether the kids will be with yours or her parents for Christmas.

Personally, if I was dating someone for a long period of time and the question wasn’t asked, my man would be headed for the doghouse. So to avoid the chance of getting into an argument; bring the invite to the table and make it known that you want your man or your woman there by your side.

Truthfully, as I’ve said, Thanksgiving is a family holiday. Focus on your mom, your dad and eating yourself into a coma. You have the rest of your life to worry about bringing that special someone home to see the skeletons you hide back home. Well then, there is always Christmas.
Thanksgiving Edition!

Ladies and Gentlemen, this is what you have all been waiting for: Thanksgiving! We are so thankful for you! The DePasquale family’s finest cooking secrets come out on Thanksgiving, that includes being a piece of the magic with you, my devoted fans.

As you make your plans on where you are going, which football games you are going to watch, who will be the designated driver (definitely not Uncle Jack), don’t forget the most important part of Thanksgiving: The Feast! If you are the host for the party this year, keep all your relatives, wanted or unwanted (hey, there’s always that one person… or five…), begged to come back. And if you are the one at the table this year, you can stun your host and all the guests of this next masterpiece. Lasagna has been a great tradition in my family and in all Italian families, for years. But when you have lasagna on a first course, before the salad and the Turkey, it just seems to hit the spot the best. Let’s further dissect ‘thanksgiving’ by dividing it into two separate words that are commonly used nearly everyday: thanks and giving.

Thanks can also be used negatively — when someone sarcastically uses ‘thanks’ in a degrading way.

For example: ‘Thanks for showing up at my birthday party last week,’ when the birthday celebrant was hurt when her or his friend did not attend the party. Usually, if you are indeed truly thanking someone, whether it is a friend, relative or a stranger — be sure to say it in a positive manner and show them how much you appreciate them. And, job seekers heed this advice: display ‘thanks’ in today’s competitive job market. As you are about to say ‘Thank you’ note following an employment interview: ‘I really appreciate your considering my application for the position.’

The second word, ‘giving’ also has various connotations. For instance, are you a “giving” type of person or just the opposite — selfish or materialistic? Hopefully, you’ll be one of yourself more than you receive. How often do we hear of someone “giving up their time” to be of service to others? Or, the old saying “better to give than to receive.” In this world, there are ‘givers’ and there are ‘takers.’ We recognize those who donate goods or labor or money to aid the needy or others who donate large sums of money to charities, educational or medical institutions. However, beware of the ‘takers’ or ‘thieves’ out there.

So, for those of us who will observe the traditional American Thanksgiving holiday next Thursday with family or friends, just remember what ‘thanks’ and ‘giving’ mean and how they can be used best during the other 364 days of the year.

This Thanksgiving Day and every day of the year be ‘thankful’ for the things often taken for granted such as the ability to see, hear, smell, feel, taste and walk around each day. And by the way, ‘thanks’ for taking time out to read this article.

Happy Thanksgiving!

Super Mario Brothers Find Another Home
Brothers Now Available for Wii Console

Mark Kendall

When it was the home video format, Super Mario World was missed. This game had many new features and innovations that made it a hit, but the lack of a power-up system and the inability to jump over obstacles was a disappointment. With the release of Super Mario Brothers on the Nintendo Wii, this gap is now filled.

With the release of Super Mario Brothers on the Wii, players can now enjoy the classic game with new features and improved controls. The game features a new power-up system that allows players to unlock new powers and abilities. In addition, the game has been optimized for the Wii, making it even more enjoyable for players.

Overall, the release of Super Mario Brothers on the Wii is a welcome addition to the gaming community. It is a great way to experience this classic game in a new and exciting way.
The music of John Dowland, who died in London in 1626, rarely finds its way into the modern recital program. What made the all-Dowland lute recital on Sunday, Oct. 25 so special was a combination of beautiful, yet unplayed music and a tremendous display of virtuosity on the part of the soloist.

John Dowland led the life of a modern day singer-composer. During the Renaissance, manuscripts and recordals did not yet exist, so composers made themselves known by traveling Europe and performing in aristocratic circles with the hopes of landing the dream job: court musician. As both opera and lute soloist, O'Dette performed in many of the world's major capitals, including Vienna, London, Paris, Moscow and Tokyo. As both opera and lute soloist, O'Dette performed in many of the world's major capitals, including Vienna, London, Paris, Moscow and Tokyo.

As both opera and lute soloist, O'Dette performed in many of the world's major capitals, including Vienna, London, Paris, Moscow and Tokyo. As both opera and lute soloist, O'Dette performed in many of the world's major capitals, including Vienna, London, Paris, Moscow and Tokyo.

The music of John Dowland, who died in London in 1626, rarely finds its way into the modern recital program. What made the all-Dowland lute recital on Sunday, Oct. 25 so special was a combination of beautiful, yet unplayed music and a tremendous display of virtuosity on the part of the soloist.

John Dowland led the life of a modern day singer-composer. During the Renaissance, manuscripts and recordals did not yet exist, so composers made themselves known by traveling Europe and performing in aristocratic circles with the hopes of landing the dream job: court musician. As both opera and lute soloist, O'Dette performed in many of the world's major capitals, including Vienna, London, Paris, Moscow and Tokyo.

The performance of Dowland’s lute recital on Sunday, Oct. 25 was a pleasant surprise to see John O’Dette race across the fingerboard in an O’Dette’s most skillful playing was in the “Fantasia,” an eerie piece in which several melodic lines intertwine, creating an intense dramatic effect. The “Fantasie,” which ended the program, left audience and members shaking their heads in awe. Tim Robbins and Morgan Freeman use at their best, and are only brought higher with a flawlessly supporting cast. Often referred to as one of the greatest films of all time, with the ratings to prove it. The Shawshank Redemption, is not a film that you would want to miss. Disagree with anything I have said? Have anything to add? Any requests for movies you want me to mention or review? Send an email to msuarts@gmail.com with “Ask Reino” in the subject heading. Thank you and you will be heard.

Full, released Nov. 17, gentle rock has become a new ingredient in her usual jazz mix. With no trouble at all, Jones has shifted gears and did a great job doing so. "Chasing Pavements" starts off the CD with a strong feel that carries throughout the album. Jones will shell many with this album. Can the jazz queen become a rock goddess? The Full proves she’s rising to the challenge.

I was hooked. California literally sinks into the ocean. It was all kinds of awesome. The Yellowstines calm down, rock on! This causes the sink to be covered all of North America, oops! Earthquake after earthquake strikes the continents as the capital of the world comes crashing down, yikes! Massive tidal waves cover everything again and again. oh... the earth's crust shifts thirty thousand degrees, uh-huh. The magnetic polarity of the earth is reversed, hum... More earthquakes, oh. More tidal waves, yawn. Everyone dies, everyone dies, everyone dies.

After an hour and a half, I was eager to go see 2012 a good rating. The film was played at exactly the right pitch between schlock. Why didn't they try to have some fun? The only person who seems to be having a good time is Woody Harrelson, as a pickle chomping conspiracy nut who seems to realize that they are acting relevance characters might have had. Mostly everyone's tone is somewhere between somber and terror. Few of them seem to realize that they are acting schlock. Why didn't they try to have some fun?

The story is equally uninteresting. Cusack is divorced from his wife, Amanda Peet, has trouble with his children and slowly draws them back into his life as the planet goes to hell. The government is planning a secret project to save a small portion of humanity, and through a series of happy accidents. Cusack and his breed discover how to be a part of it.

You know, I promised I wouldn’t nitpick, but there’s one moment my commonsense brain processed. Unfortunately, it made no sense. At one point, the heroes are in a plane somewhere over the Pacific.

Mario
Continued from Page 15

the only real downside is that gameplay is really chaotic in multiplayer, which is why single player exists and is also a blast.

Graphically, New Super Mario Bros. Wii is decently average. Visually, there isn’t a huge difference between this and the DS game. Amazingly, some of the textures, such as lava, are much better done and the pixels are sharper. When it comes to the sound, Nintendo did a great job. All of the old tunes are there, but now there is a slick coating of orchestration, which will put a nostalgic smile on everyone’s faces.

Nintendo’s Wii console at launch brought a small but together, if only for a short while. Then the hardcore gamers became angry at the triviality, or because their mothers kept winning. Once developers saw this, they started pushing. Now the Wii is on the forefront of a new wave of games that will easily be enjoyed by everyone, no matter who they are, even if they are cynics.

COOL!
Smoke and Mirrors: Clove Road Renovations

Clove Road Names Get Classy

If you haven't heard by word of mouth, or if you've missed the article on this week's front page, the administration has renamed the Clove Road Apartments complex.

The new name for the complex will be "Hawk Crossings." That's not the only name that diverged.

The apartments numbered in the 100s are now called Falconidae, as a group, the 200s are named Accipitor, while the 300s will be known as Buteo.

We were wondering the exact same thing that most of you may ask yourselves right now. What the heck is their thought process?

In Latin, those words are the biological classification order, family and genus of our beloved mascot, the Red Hawk.

Dr. Karen Pennington, vice president for student development and campus life, went on record stating that because of the renovations, recognition of the changes seemed appropriate. So what better way to show the dorms are new and improved (pennilessly, really), than to change the names?

Now don't get us wrong here, we appreciate their efforts in trying to encourage even more school spirit (as if that were necessary!), and trying to get the students to make the most of our everyday campus routines.

But at 7 a.m., the screeching of construction vehicles, the noise from the general dampness that is Clove on this week's front page, the administration has renamed the Clove Road Apartments complex.

The next thing you know "He-who-must-not-be-named" will show up at the door of your dorm, or if you've missed the article on this week's front page, the administration has renamed the Clove Road Apartments complex.

Women Left in Cold by Universal Healthcare

A Closer Look: New Health Care Legislation Affects Women’s Rights

Recently, the Universal Health Care amendment to the 2010 President’s administrations’ conference on the Affordable Care Act has been in the spotlight. This amendment allows for medial abortions and birth control without the present problems that are in the midst of the abortion in the case of incest or rape, as was also the case in the past. The amendment may not be a stop, forward, but the near of decision in the health care bill is not the most important. It seems women have been left out in the cold by “universal” health care.

First, in addition to not covering elective abortions, the bill does not make it a necessity that all insurance policies cover for birth control. This is not to say that some policies won’t cover the contraception pill, but it is a blow to reproductive rights. Sadly, there are more women who have to bear the worst that women have to bear. Female health care involves more than just yearly check-ups at the doctor. Women also need to have yearly examinations, namely an expensive one for breast care. It is mandatory that mammograms are performed by an experienced health care provider. One breast exam at the universal health care bill, but most other facets of a gynecologist “well visit” are not covered by the universal health care bill, but most other facets of a gynecologist “well visit” are not covered by the universal health care bill. These exams can detect ovarian cysts, fibroids or early-stage cancer. A pap smear, coordinated and it should be the concern of all women, is an expense men do not share. It is mandatory that mammograms are performed by an experienced health care provider.

Women should not be treated as second-class citizens, but they are, and it’s a fact of life of the country’s population and have been granted the right to vote. This cause has been swept under the rug by the American public, even though this issue affects many many women and a much more basic right. The right to health is more important than reproductive choice.

While abortion and birth control are sensitive topics due to religion and ethics, this is not the case for these services out of pocket. It’s possible many women may end up paying for these services out of pocket. It’s possible many women may end up paying for these services out of pocket.

There is little more frightening then going to an interview about what should determine the rest of your professional life. There is little more frightening then going to an interview about what should determine the rest of your professional life.

is there question that recent graduates have a very difficult road ahead of them.

Despite the bleak statistics, however, hope should not be completely lost. Graduate school and three of his friends successfully got jobs after graduating from Montclair State University. Giumaras’s girlfriend and her friend landed jobs as teachers. Another woman wrote a music column for a music magazine.

It was not an issue of me failing to care about my finances, but rather, that I wanted to be able to do all the things I desired and not have to worry about becoming broke or in debt.

However, what is not to say that I was spending much more money on luxuries such as clothes, restaurants, comedy clubs, concerts tickets and beer. I did not feel like school in itself is a job and that I should be focusing on schoolwork instead of working. I did not feel like school in itself is a job and that I should be focusing on schoolwork instead of working.

I feel like school is a job and that I should be focusing on schoolwork instead of working. I did not feel like school is a job and that I should be focusing on schoolwork instead of working.

I was truly working hard to make sure that I maintained a decent GPA for a typical college student. The current economy is bad enough as it is, and has no reason to be any worse because of my new saving strategy.

I feel like school is a job and that I should be focusing on schoolwork instead of working. I did not feel like school is a job and that I should be focusing on schoolwork instead of working.

Instead, the job I was hired to do was a job that I could work at and have a nice little break. However, when my bank account began to plummet, returning to work was inevitable.

I won’t lie, I had a job since I was 16, and have always strived to save money while still maintaining a social life which is pretty much impossible for a college kid.

Working on the weekends meant having to work hard, like many other college students do. Some students have time-consuming, exhausting jobs at restaurants. Sophomores Brittany Benevento worked late shifts that prevents her from getting her social work done. I feel like school is a job and that I should be focusing on schoolwork instead of working.

I feel like school is a job and that I should be focusing on schoolwork instead of working. I did not feel like school is a job and that I should be focusing on schoolwork instead of working.

For some, working part time is the only thing keeping them from sleeping. Sophomore Ashley Rogers, working part time to pay for college, said that due to a tough economic climate, since she was a freshman, she has never been able to have a true summer vacation before.

I found a possible answer to this question in an interview with a Montclair State graduate of May 2009. Giumara’s girlfriend, a columnist for The Montclarion, said that during the recession, someone working part time to pay for college, said that due to a tough economic climate, since she was a freshman, she has never been able to have a true summer vacation before.

Don’t pick a job that you can’t help but have my doubts that the economy is going to see two major improvements in the next four years.

I don’t see the job market being improved in the next four years. As a freshman at Montclair, I find my job seeking with dread at the thought of graduating during an economic recession.

I can’t help but have my doubts that the economy is going to see two major improvements in the next four years.

I don’t see the job market being improved in the next four years. I felt like school is a job and that I should be focusing on schoolwork instead of working.

I don’t see the job market being improved in the next four years.

I can’t help but have my doubts that the economy is going to see two major improvements in the next four years.

I can’t help but have my doubts that the economy is going to see two major improvements in the next four years.

I don’t see the job market being improved in the next four years.

I don’t see the job market being improved in the next four years.

I don’t see the job market being improved in the next four years.

I don’t see the job market being improved in the next four years.
Eight-year-old Virginia O’Hanlon wrote this letter to the editor of New York’s Sun, and the quick response was printed as an unsigned editorial Sept. 21, 1897:

“DEAR EDITOR: I am 8 years old.
Some of my little friends say there is no Santa Claus.
Papa says, ‘If you see it in THE SUN it’s so.’
Please tell me the truth; is there a Santa Claus?

“VIRGINIA O’HANLON.
“115 WEST NINETY FIFTH STREET.”

Do you believe in Santa Claus? Want to answer Virginia? Send your letters to MSUOpinion@gmail.com. Deadline for submissions Tuesday, Dec. 8 at 8 p.m.
Kristie, oh Kristie. Kristie. KRISTIE!!!

I’m so happy to go. By the time you read this. I will be home. At DQ!

Remember when the balloons in the Macy’s parade popped every year? Good times...

Can you people of Montclair please send personals? I’m running out of ideas.

How did we start a game where we throw around a ball saying things with the “ja” sound?

I’ll miss you Kulsoom.

What’s Friday night?

The carousel just keeps on turning.

Hey guess what!

Lou is so cool. I wish I were him. Wait a minute ...

I feel bad for Thanksgiving. Never gets respect. By noon, people are already talking about Christmas.

Remember Peter Schaus?

Gobble gobble, suckas!

Happy Thanksgiving, all.
Women’s Basketball Falls in Home Opener
Red Hawks Come Up Short in Second Half Comeback Attempt

November 19, 2009 • The Montclarion

NEW nano with built-in video camera
Stop by the University Bookstore to pick up a new iPod.

Everything just seemed to go right for the Scranton women’s basketball team as they faced the Red Hawks in the season home opener. The sharp-shooting Lady Royals shot over 65 percent from the field in the first half, 48 percent overall, making perimeter jump shots almost at will.

MSU showed tremendous hustle for the entire 40 minutes, but were down 42-27 at half. They made a significant push to pull a comeback in the latter 20 minutes, outscoring Scranton 38-29. However, the hole they were put in initially proved too deep, as the Red Hawks were defeated 71-65.

“When Scranton shoots 65 percent from the floor in the first half that’s not necessarily defense, that’s good shooting,” Head Coach Karen Harvey said. “They’re the fifth-ranked team in the country.”

Scranton’s offensive runs were largely contributed by their ability to spread the ball around and run successful picks, giving their teammates opportunities to make open jumpshots. Four different players had seven or more points, led by Megan Kopecki with 22.

“We didn’t get our post players involved as much as we wanted to today; we have to work harder to get them a little more involved,” Harvey said.

Montclair struggled throughout the game offensively, especially during the first half, as they were down 30-9 at one point, and finished the game with a shooting percentage of 34 percent. Open shots were a rarity and last season’s top scorer Kisandra Ayanbeku was constantly double teamed. She scored only one point in the first half, finishing the game with 10 on four of 11 shots and team-leading eight rebounds.

Following half time, however, the Red Hawks emerged with colossal intensity. They found success driving into the paint, which caused Scranton to commit fouls, sending Montclair to the charity stripe 33 times. The Red Hawks struggled slightly making them count, sinking only eight.

Senior All-Conference guard Jackie Berry, who had three points and seven rebounds, was the centerpiece for Montclair’s increased energy coming out of the locker room, contributing to three of the team’s eight steals, and making the perimeter shooting that helped Scranton create a large deficit much more difficult.

The heated comeback attempt was led by junior guard Jamilee Pflug, scoring 21 points on seven of 14 shots. She sprinted down the court on every fast break opportunity, which led to four assists.

The offensive pressure in the paint created open shots for senior forward Catherine Cristino and sophomore guard James Ericson, scoring nine and 11 points respectively, with Ericson making three of her six shots from beyond the arc.

Other notable players include freshman guard Rhonda Shariff, scoring four points off the bench, while showing respectable ball-handling skills. Senior forward Kara Burcham, placing strong from the paint, also finished the game with four points. The Red Hawks’ next home game is Saturday, Dec. 5, at 3 p.m. versus Kean. For the full schedule, log on to www.montclair.edu/athletics.

Senior Catherine Cristino blocks a Ryan Mooney shot in MSU’s 71-65 loss on Sunday at Panzer Athletic Center.
Red Hawks Season Ends with Loss to Stevens
Montclair’s 4-0 Loss is the Largest Deficit Since 2001

In stunning fashion, the Red Hawks Season Ends with Loss to Stevens. Montclair’s 4-0 Loss is the Largest Deficit Since 2001.

As the Montclair State University men’s soccer team wrapped up its fourth straight NJAC title early this month, so did a couple of seniors on the team. They were lucky enough to win the title throughout their collegiate career as soccer players. In fact, they’re brothers. “It’s an incredible feat,” Joseph Cullen said. “I am proud of every single player on our team and proud to have been part of this season. To cap off my career with a fourth NJAC championship is what they worked for on the field during their college careers not winning the conference, especially so in the NJAC because the winning is usually so aptly split.”

“Winning four straight conference championships is a dream and it might not happen again,” Mike Cullen said. “It’s something I’ll never forget and I’m glad I could help mark that in program history.”

Twin brothers Mike and Joseph, 21, have always been close friends, but they were five years old. They have always played on the same teams growing up. “I have been with these guys in this sport for three years,” Mike said. “They all have been the backbone of this program for the past four years,” Sentowski said. “I’ll miss everything about them, it’s impossible to pin-point one specific thing I’ll miss. It’s all of them. Besides their soccer abilities and talents, they are all real good people.”

Next season starts in about nine and a half months. If the returning players use this as a learning experience, fans should get ready for the same Red Hawks next season.

The Cullen Brothers Finish Their College Careers with a Bang

As for life after college, both brothers did have their disagreements on the field at times, they seemed to have worked around it, like true brothers and stuck to what they worked for on the field during practices and games. “I wouldn’t change anything,” Mike said. "We had a great run, winning four out of four conference finals. That’s something no one will ever take away from us.”

For life after college, the Cullen brothers are not sure if they are going to continue to play soccer on a higher level. But one thing they are going to miss playing for the Red Hawks and working with their coaches and teammates. “Playing soccer here at Montclair has been one of the best experiences of my life,” Mike said. “I can’t imagine anyone that could have a better experience, and I owe it all to my teammates and coach.”

“It has been an incredible time on and off the field,” Joseph said. “I can’t imagine anyone that could have a better experience, and I owe it all to my teammates and coach.”

“Winning four straight conference championships is a dream and it might not happen again,” Mike Cullen said. “It’s something I’ll never forget and I’m glad I could help mark that in program history.”

“Winning four straight conference championships is a dream and it might not happen again,” Mike Cullen said. “It’s something I’ll never forget and I’m glad I could help mark that in program history.”
a top notch run defense that will have its hands full with the Maritime ground game. Much of the outcome for this week’s game will ride on the shoulders of that defense, if they cannot shut down the running game, Maine-Maritime will have a huge advantage.

Likewise, the Red Hawk offense will need to put up points this week. Montclair State has put up big points against weak defenses such as College of Brockport and Merrimack State, but has shown signs of inconsistency. The offense will need to score points, and possibly lots of them if Maine-Maritime is able to let their offense run loose.

The Red Hawks expressed their eagerness to play next week following Saturday’s win over Kean. “We have something to prove,” senior linebacker Brian Tweer said. “Every time we play we have something to prove. Until they give us the respect we deserve, we’re going to keep giving it to everyone we face.”

“We definitely don’t think our season is over yet,” senior running back Jeff Bliss said. “I think we have a good team. We may not blow teams out, but we have a resilient. For the Red Hawks to be able to defeat Maine-Maritime, they need another solid day from their run defense to win. They were able to shut down Kean’s rushing offense last week, and they will need to play similarly to win again this week.

The battle between the Mariner rushing game and the Montclair State front seven always may be the deciding battle of the game. If the defense can at least shut down Maine-Maritime’s ground game and the offense is able to open up a little bit against a suspect Mariner defense, victory can easily be achieved here in August and all our hard work paid off,” senior fullback Ron Litz said. “I’ve never had the opportunity to win the NCAA before,” senior running back Jeff Bliss said. “We left this to us, we didn’t have to have another team lose for us to win the NCAA. We won out the NCAA and it felt good that this was the last game of the year.”

Despite the great defensive play, there was not a simple turnover in the game and a combined 20 points. In the end, it would be the excellent defensive play, special teams and offensive success in the red zone that gave the Red Hawks the victory.

Montclair State now enters the NCAA Division III football playoffs for the first time since 2001, with hopes of winning their first national championship since 1979. They will host Maine Maritime Academy at Sprague Field on Saturday in the first round. The game will be on Saturday, Nov. 21 at 12 noon.

During the week.

**NCAA Division III football playoffs for the first time since 2001, with hopes of winning their first national championship since 1979. They will host Maine Maritime Academy at Sprague Field on Saturday in the first round. The game will be on Saturday, Nov. 21 at 12 noon.**

Despite the great defensive play, there was not a simple turnover in the game and a combined 20 points. In the end, it would be the excellent defensive play, special teams and offensive success in the red zone that gave the Red Hawks the victory.

Montclair State now enters the NCAA Division III football playoffs for the first time since 2001, with hopes of winning their first national championship since 1979. They will host Maine Maritime Academy at Sprague Field on Saturday in the first round. The game will be on Saturday, Nov. 21 at 12 noon.
Montclair State football will be looking to keep their season on the nation this weekend, as they play in their first NCAA playoff game since 2005. They will host the Maine-Maritime Academy at Sprague Field on Saturday Nov. 21 at noon.

The NCAA Division III football tournament, unlike the Division I Football Bowl Subdivision, is a 32 team play-off bracket, with four regions of eight teams each. The tournament games will take place every Saturday for the next five weeks, culminating in the Stagg Bowl in Salem, Virginia on Dec. 15. The Red Hawks have been seeded fourth in the East region, giving them a first round home game.

They will do battle with the Maine-Maritime Mariners, champions of the New England Football Conference. The Mariners, like Montclair State, finished the season with a 9-1 record. Montclair State is coming off a 34-19 loss at the hands of Bridgewater State University.

Since that loss, Maine-Maritime has won seven straight games, including a 48-42 victory over Curry College last week that decided the conference champion. It was the first time since 1994, when they split the title, that a team other than Montclair State or Massachusetts-Dartmouth, have won the NEFC.

The Mariners, meanwhile, have won six straight games, including a 34-21 win over Holy Cross in the first round of the NCAA playoffs. They are coming off a 13-10 win over Allegheny College 20-19 last week, giving them a 7-0 record, the best in the NJAC.

Montclair State, meanwhile, had a tough road to the playoffs. They managed to get to the NJAC championship since 1994, when they split the title, because of a controversial decision by the conference. The Kangaroos, who finished the season with a 9-1 record, have a first round bye and will host the Maine-Maritime Mariners in their first NCAA playoff game since 2003. They are looking to make their first trip to the Stagg Bowl since 1995.

For the Red Hawk defense, Maine-Maritime is going to be a very tough challenge as they play in their first NCAA playoff game since 2003. The defense has been inconsistent at best this season, and only once this season have they allowed less than 10 points in three games. The defense managed to hold Chunn to just 57 yards on 21 carries.

The defense has been inconsistent as well. They have been able to do a good job against the top rushing team in the entire conference, but they have given up some big numbers against weaker opponents. The defense was able to hold Chunn to just 57 yards on 21 carries.

With their running game slowed down, the Cougars were forced to air it out, something they have done fewer than any team in the NJAC all season. Cornerback Tom D'Ambrisi withered under the spotlight of the big game, completing just 10 of 39 passes for 11 times for an average of 38.8 yards. Meanwhile, Kean punter Billy Daniels punted nine times for just 31.9 yards per kick.

The Red Hawk defense has been solid this year. They have allowed 40 or more points in three games this season, and only once this season have they allowed less than 10 points in three games. They will do battle with the Maine-Maritime Mariners, champions of the New England Football Conference. The Mariners, like Montclair State, finished the season with a 9-1 record. Montclair State is coming off a 34-19 loss at the hands of Bridgewater State University.

Since that loss, Maine-Maritime has won seven straight games, including a 48-42 victory over Curry College last week that decided the conference champion. It was the first time since 1994, when they split the title, that a team other than Montclair State or Massachusetts-Dartmouth, have won the NEFC.

The Mariners, meanwhile, have won six straight games, including a 34-21 win over Holy Cross in the first round of the NCAA playoffs. They are coming off a 13-10 win over Allegheny College 20-19 last week, giving them a 7-0 record, the best in the NJAC.

Montclair State, meanwhile, had a tough road to the playoffs. They managed to get to the NJAC championship since 1994, when they split the title, because of a controversial decision by the conference. The Kangaroos, who finished the season with a 9-1 record, have a first round bye and will host the Maine-Maritime Mariners in their first NCAA playoff game since 2003. They are looking to make their first trip to the Stagg Bowl since 1995.

The defense managed to hold Chunn to just 57 yards on 21 carries.

With their running game slowed down, the Cougars were forced to air it out, something they have done fewer than any team in the NJAC all season. Cornerback Tom D’Ambrisi withered under the spotlight of the big game, completing just 10 of 39 passes for 88 yards. All together, Roan was held to just 192 yards of total offense for the entire game.

On the flip side, the Montclair State offense struggled to put up any big numbers offensively. On the afternoon, the Red Hawks began to move further up field into Kean territory. Much of this credit goes to both the solid play of the defense and splendid punting of from their own one yard line. The Red Hawks, who had gone three and out on every previous drive, finally got enough offense going to drive into the red zone and score on a Tom Fischer quarterback draw from three yards out to make it a 7-0 MSU lead.

In the second half, the Cougars offense finally got together a sustained drive early. The Cougars embarked on a 15-play, 47-yard drive, but stalled when they hit the red zone. The Red Hawks, who had gone three and out on every previous drive, finally got enough offense going to drive into the red zone and score on a Tom Fischer quarterback draw from three yards out to make it a 7-0 MSU lead.
