
Local service heroes were nominated to stitch flag patches on the National 9/11 Flag. The flag is being built at the World Trade Center site.

The Montclair State community, Senator Ronald Rice, Attorney General Paula Dow, congressman John McLean, assemblyman Barry Susman, Paul Cell and all uniformed personnel at MSU also lent a hand in the stitching process. Attorney General Dow was honored by making the first stitch on the National 9/11 Flag.

Caitlin Darraugh, a senior, had family and friends who were killed on 9/11 and it meant a lot to her to be able to be a part of the event. “I feel like the flag means so much. Once it is displayed at Ground Zero, it will mean a lot to me knowing that I helped with the stitching,” Darraugh stated.

The flag was destroyed on Sept. 11 and tornado survivors, constitution Day Continued on Page 3

Students Get Stuck in Elevator in Frank Sinatra Hall

Little Falls fire department came on scene to soothe over anxieties while students were stuck in the elevator.

see Article on Page 5

Elevator Continued on Page 5

Traffic piles up around CarParc Diem causing an inconvenience to everyone stuck in the traffic jam.

CarParc Diem was designed to help Montclair State University's parking problems, but now it could potentially pose another problem to students. Traffic.

CarParc Diem consists of 1,530 parking spots and, according to Timothy Carey, assistant vice president of Facilities Services, “has alleviated some of the commuter student parking challenges the campus has experienced in recent years.” Although CarParc Diem was built to add over a thousand more spots, parking lots 22 and 23 were taken away to begin the construction of The Heights, a future set of dormitories.

“It is important to note, CarParc Diem Continued on Page 4

On Sept. 6: A student reported the theft of his vehicle’s sound system from his locked car which was parked in the Red Hawk Deck.

On Sept. 7: A faculty member reported the theft of her wedding ring and engagement ring which were left unattended in Dickson Hall.

On Sept. 8: A student reported the theft of her unattended bag from a lounge in Sinatra Hall. The bag contained an iPod and other personal items.

On Sept. 9: A student reported the theft of his parking hang tag from his unlocked vehicle in Carparc Diem.

On Sept. 10: Richard Boyle, Mark Sarnowski, Michelle McNulty, Stefani Cracchiolo, Nicholas Amadeo, Kevin Ottino and Michael Martucci were charged with underage consumption of alcohol while in Freeman Hall. They will appear in Montclair Municipal Court.

On Sept. 12: Officers responded to Bohn Hall on a report of offensive postings on a resident’s door. This case is under investigation.

 Anyone who has information regarding these incidents is urged to call the police station from any campus phone at T-I-P-S (8477). All calls are strictly confidential.

**SGA Notes**

SGA will have another meeting next Wed., Sept. 22.

**The Montclarion**

The Montclarion is a freely distributed newspaper providing one copy per person. Additional copies are $0.25.

**Corrections**

In last week’s issue, Jillian Keats was given credit for pictures of the Amphitheater sculptures, but Lacei Andrew took the pictures.

- On Sept. 6: A student reported the theft of his vehicle’s sound system from his locked car which was parked in the Red Hawk Deck.
- On Sept. 7: A faculty member reported the theft of her wedding ring and engagement ring which were left unattended in Dickson Hall.
- On Sept. 8: A student reported the theft of her unattended bag from a lounge in Sinatra Hall. The bag contained an iPod and other personal items.
- On Sept. 9: A student reported the theft of his parking hang tag from his unlocked vehicle in Carparc Diem.
- On Sept. 10: Richard Boyle, Mark Sarnowski, Michelle McNulty, Stefani Cracchiolo, Nicholas Amadeo, Kevin Ottino and Michael Martucci were charged with underage consumption of alcohol while in Freeman Hall. They will appear in Montclair Municipal Court.
- On Sept. 11: A student reported the theft of a text book from his bag that he left unattended in the Student Center Cafeteria.
- On Sept. 12: Officers responded to Bohn Hall on a report of offensive postings on a resident’s door. This case is under investigation.

Anyone who has information regarding these incidents is urged to call the police station from any campus phone at T-I-P-S (8477). All calls are strictly confidential.
People in attendance of the National 9/11 Flag stitching ceremony lined up to take their turns sewing a miniature flag on to the damaged one.

vors from Kansas stitched it back together. It is now on a tour across the United States, stopping once in every state.

Montclair State University was chosen as the stop for New Jersey. According to Carolyn Jones, executive director of the Center for Career Services and Cooperative Education and a coordinator of the Constitution Day celebrations, Montclair State was chosen because we were able to secure the flag to the greatest ability.

Jones is also part of The American Democracy Project (ADP) on campus. The ADP’s purpose is to help keep students updated on our democracy and to make sure students get a better understanding of it. The ADP helps Montclair State celebrate Constitution Day every year.

Jones said, “The purpose [of this day] is to revisit the constitution.” She also stated that the ceremonies throughout the day are a “positive community program.”

By community she doesn’t just mean the campus community — she also means those off campus.

Many students did just what Jones hoped. Kevin Rippon, a sophomore, made time in his day for these events and came right to campus from work.

Rippon said that he wanted to “see the opinions of members of the Supreme Court on the Constitution to see what the difference is in interpreting some of the laws, because there seems to be many gray areas in how the Constitution is interpreted and I wanted to see if it came down to political bias.”

Marissa Stapleman, a junior who volunteered the help with Constitution Day stated, “I plan to learn a lot and I really wanted to see what it was about because I’ve never done something like this before. I also wanted to see what the flag stitching was about.”

Montclair State University’s Constitution Day and the flag stitching had a great turn out.

“Mnta College so proud of MSU knowing we hosted this event,” Darragh said. Rippon was also “extremely proud that our school is actually hosting a conference like this.”
"CarParc Diem has alleviated some of the commuter student parking challenges the campus has experienced in recent years."

Check the schedule on our website for additional updates www.montclair.edu/casa

The Heights are being built next to CarParc Diem and the construction blocking off various roads leaves students to travel through one road that is already filled to capacity.

"MSUPD has a responsibility to help take care of situations like this, and we just hope that everyone remains patient until the traffic subsides," Kieran Barrett, Lieutenant of MSUPD

however, that when CarParc Diem was conceived and planned, there was not a plan to build the new residential complex on those lots, Carey stated.

Now that there is construction occurring right across the street from CarParc Diem, many roads have been blocked off leading students to learn a completely new traffic pat-

tern, which Carey believes is adding to the traffic.

Montclair State has recognized this problem and there are now police of-
ficers and Montclair State staff mem-
ers helping to direct traffic around campus and in and out of CarParc Diem.

Along with the new unfamiliar traffic patterns, a new traffic light was installed at the intersection of Carlisle Road and West Quarry Road, in front of Floyd Hall Avenue.

"The university hired a firm to con-
duct a traffic study many years ago out of which grew a Traffic Master Plan. That particular analysis result-
ed in a recommendation that a traffic light was needed," Carey said.

While most of the traffic in vehicles, the number of pedestrians walking in and out of CarParc Diem causes traf-
ic to slow down traffic, too.

There are two pedestrian cross-
walks located right by CarParc Diem. There is one that crosses the entrance/exit of the parking garage and there is another one that crosses the road across from CarParc Diem.

Both of these crosswalks force drivers to stop twice during their en-
trance or exit of the parking garage to allow those who are walking.

At the start of the semester, there were no authorities near the cross-
walks, which, according to Lt. Bar-
rett of the Montclair State University Police Department, allowed pedes-
trians to walk where they pleased.

MSUPD has now posted officers at the crosswalks to guide pedestrians in the right direction, as opposed to walking outside the crosswalks. Lt. Barrett anticipates that this will help the traffic situation.

Carey anticipates which the south-
ern crosswalk that leads to the new stairs on campus will be removed “in an attempt to expedite both pedestrian and vehicular traffic in this region of the campus. […] We think this will result in a significant improvement to the traffic situation.”

"MSUPD has a responsibility to help take care of situations like this, and we just hope that everyone re-
main patient until the traffic subsides,” said Lt. Barrett.

WALK-IN TUTORING SCHEDULE Fall 2010
Montclair State University is revamping Homecoming for 2010 with new rules and events. The "Superheroes" theme is appropriate as Homecoming this year transforms from a mild-mannered affair to an action-packed week-long extravaganza.

The adventure begins Oct. 4, with the King and Queen talent shows in Memorial Auditorium at 8 p.m. and kicks up with eliminations, as the top five finalists will be announced on Oct. 5 at the homecoming barbecue. Hip-hop artist Nicki Minaj will be performing in Student Center Quad and the classic grand finale of the parade and football game will take place on Oct. 9.

A few adjustments that will take place this year include a revamp in the floating building process and king and queen competitions. Applications to participate in the parade can be submitted to Julie Fleming, assistant director for Student Involvement, beginning Sept. 22 at 4 p.m. in the Student Center room 104-L, or through an online submission at montclair.edu/csi.

"Floats" must be constructed from the ground up, simultaneously, in the Student Center Quad from 12 p.m. to 5 p.m. As no vehicles or trucks will be permitted this year, creativity reigns as lightweight designs are encouraged, and wood, fabric and PVC piping is recommended.

Potential homecoming kings, queens and their respective organizations will be expected to perform in accordance with the "Superheroes" theme, which can be extended to all heroes, imaginary and real.

The potential kings and queens must have worthy reputations on campus, upholding the values of an excellent Montclair State student. They are required this year to submit two letters of reference. Upon being deemed qualified, online voting will begin.

This year, each Montclair student will have the opportunity to be a hero themselves by participating in the "Quarter Wars." Montclair State will have the opportunity to be a hero themselves by participating in the "Quarter Wars." Montclair State will give every quarter spent to a charity.

Cordasco uses the page as a way to advertice these T-shirts that illustrate a message from MSU students. You can visit the CafePress page online at https://www.cafepress.com/carparc. The T-shirts are available online and were personally designed by Joe Cordasco.

Cordasco designed the T-shirts on his own, and uploaded the picture to a web site that produces T-shirts. There are three types of T-shirts that can be purchased, a woman’s T-shirt that is cut slimmer than the one pictured above and the T-shirt pictured above available in both white and black.

A Facebook group was also made. Cordasco used the page as a way to advertice these T-shirts that illustrate a message from MSU students. You can visit the CafePress page online at https://www.cafepress.com/carparc. The T-shirts are available online and were personally designed by Joe Cordasco.

Gusty hurricane winds could not stop 85,000 spectators from crowding the Camden/Philadelphia Waterfront this Labor Day Weekend to witness the madness of Red Bull Flugtag. The day could not have been any more beautiful for the 32 teams from New Jersey and Pennsylvania that entered personalized flying contraptions into Red Bull Flugtag. Team themes ranged from a 25-foot tall Empire State Building with King Kong as the pilot to a cuckoo clock plane with a bird in the cockpit.

Each team tempted fate by pushing their flying machines off the event’s 30-foot high launch pad into the Delaware River below. With high hopes to catch some tail wind and fly out along the river, most participants experienced anything but a smooth landing.

Accompanied by a brief stage act to promote their theme, each team of five put their creations to the test by launching the machine and a pilot off the runway. Most flights ended with a crash, making for both a fun and exciting day.

A cast of local celebrity judges looked on, taking note of each team’s plane, costumes, stage act and human powered flight distance. No world records were set or broken, but the Giant Flying Llama team took first place with a red baseball hat shaped craft and a 42-foot flight.

Montclair students could be spotted throughout the sprawling crowds, which lined the Ben Franklin Bridge, Penn’s Landing, Camden’s Waterfront Park and even the Delaware River, with spectators in boats. The event clearly proved to be well worth the trudge across New Jersey for the Montclair viewers.

With this being Philadelphia’s first Red Bull Flugtag, it was definitely an eye opener for those who had never witnessed such a unique and wild event. Being amongst the tens of thousands of onlookers was an overwhelming experience and watching each team’s brief stage act and attempted flights added humor and excitement to the mix.

Red Bull Flugtag was a success and for those who missed out this year, hopefully it comes back to the Camden/Philadelphia Waterfront next year!

Study Abroad Sessions

Friday • SEPTEMBER 24, 2010
Student Center, Rooms 411-414

9:30 a.m. **Diversity Abroad: You can go too!**
Students from Diverse Backgrounds and Abilities Go Abroad

11:00 a.m. **Affording Study Abroad:**
Financial Aid, Scholarships, and Low-Cost Programs

1:00 p.m. **Semester Exchange Programs:**
Studying Abroad at a Partner University

2:30 p.m. **After Graduation:**
International Fellowships and Opportunities Abroad

---

**Did You Know?**

- Montclair State University offers programs in over 50 countries
- Semester, academic year, summer and short-term programs are available
- Programs can fit into most majors’ study plans without delaying graduation
- Students can use financial aid to study abroad
- Students can receive credits for study abroad
- Students can take classes in English
- Employers value international experience
- You will have the experience of a lifetime!

---

**Study Abroad Weekly Information Sessions**

Global Ed Conference Room
22 Normal Avenue
(Across from Panzer Athletic Center)

**Every Wednesday, 2:30 p.m.**
Starting September 8, 2010
No Pre-Registration Required

**For more information**, please visit the Montclair State University Study Abroad Web site at: montclair.edu/GlobalEd/studyabroad/

Please register for the September 24 sessions through the link on our Web site.
Dr. Mike Weinstein is a one-man institute—quite literally. A coastal ecologist by training, Dr. Weinstein landed at Montclair State after a successful career in academia, government and the private sector to become the Director of the PSE&G Institute for Sustainability Studies that was launched in April of this year. A $400,000 grant from the utility giant helped to found the Institute. But don’t let the long and formidable name of the new endeavor fool you. As it stands today, Dr. Weinstein is the sole man working to get this budding project off the ground. The resources at his current disposal may be modest, but his plans for the institute are ambitious.

“We believe that the institute can play a role as a regional, ultimately national and to a degree international player, in urban landscape ecology for sustainable practices,” he said. Tall and amiable, he speaks prodigiously and with conviction about the importance of striking a balance between ecology and economics—a theme at the center of the emerging discipline which he calls sustainability science.

“It’s the study of the interactions of humans and their environment, and the ability of humans to keep those interactions going along sustainable trajectories,” he said of the discipline.

In short, the aim of the institute is to expand and shape the discourse surrounding sustainability—a mindset that rise between perpetual human expansion and finite natural resources.

Dr. Weinstein speaks at the official launch in April.

Dr. Weinstein believes that taking a trans-disciplinary approach, drawing from both the physical and social sciences, is central to the success of his efforts. He cited research of the science-policy interface, new inter-disciplinary curriculum and outreach as the principle components that the institute would like to put in place to forward its goals. Additional faculty that would work closely with the institute and new degree opportunities for students are other priorities.

While Dr. Weinstein’s optimism and enthusiasm are never far from the surface, he concedes that the challenges of effective sustainability science are daunting and that the need for it is pressing, especially in New Jersey. A dense population, proximity to the coast (in light of sea-level rise and other factors associated with climate change) and a legacy of pollution are just some of the reasons to take a closer look at the natural resources of the state and our relationship to them.

If Dr. Weinstein’s energy is any indication, and if his insight is correct, the Institute for Sustainability Studies is unlikely to remain a one-man operation for long. “[We are] in the right place at the right time. The field is emerging, it’s growing rapidly, new programs are popping up everywhere. The city is reflective of that, and an urban center is a natural place to practice sustainability science.”
A Little Chitchat
Dinah Judges Best and Worst Dressed at the VMAs

Ashley Greene - Aside from Twilight I don’t pay much attention to Ashley Greene, but I must say she looked amazing. The dress is different and it fits her like a glove, the shoes are classy and her perfect tan pulls it all together.

Drake - Okay, so who doesn’t love Drake right now? He managed to keep it simple yet super stylish, and he pulled off all black without looking like he was headed to a funeral.

Lady Gaga - Even though Gaga looks crazy when she leaves the house, I find it virtually impossible to put her on a worst dressed list. She’s a fashion genius, from the peacock headdress to the blue tips in her hair. She never fails to be true to herself.

Will.I.Am and Nicki Minaj - These two are tied for the most hideous attire seen that night. If you didn’t see it, then you most likely won’t believe it, so unfortunately here is your chance to take a look. Together, they look like something out of some tacky sci-fi hair show. Definitely a double fail in my book.

Ke$ha - I happen to love Ke$ha, and this really isn’t the worst outfit I’ve ever seen her wearing. Let’s be honest, Rapunzel wearing a garbage bag really isn’t the best look for the red carpet.

Justin Timberlake - I’m a huge fan of his, but unlike Drake, I’m not liking the way J.T. is wearing the all black, and with that pasty skin of his, he looks like he should be filming a scene for Twilight instead of recording songs.

In addition to tutoring, testing and academic support services, the Center for Academic Development and Assessment (CADA) offers

Learning Competencies Workshops to Montclair State University students.

Don’t wait until New Year’s Day to set goals and improve lifestyle habits. MSU students, faculty and staff can use the start of the new school year as the benchmark for breaking old habits and making positive changes in their personal, social and academic lives. MSU students can improve physical and mental health. Here are a few tips to get you started:

1. Walk more, drive less. Use your legs to move yourself and rely less on cars and buses to get around the campus. You’ll have more energy and lose unwanted pounds. You’ll also lower your risk of heart disease by walking.

2. Make sleep a priority. Stop making excuses that you can’t get the seven to eight hours of sleep that are recommended by medical professionals. Budget your time so you go to bed the same time each night and wake up the same time each morning, at least five or six days a week to get your body clock on a set schedule. Adequate sleep is just as important as food and exercise for boosting your immune system and ensuring peak physical and mental performance each day.

3. Don’t put too much on your plate. You only have 24 hours in a day. Don’t take on excess responsibilities that you can’t handle such as extra classes, another job or an extracurricular activity that will interfere with academics or your family life. You’ll end up rushing and getting stressed and disappointment will follow. As for nutrition, don’t overload that plate either. Nutritional advice comes in the form of smaller meals (comprising of protein, carbohydrates and some fat) throughout the day, spaced every two or three hours to enhance metabolism and manage blood sugar.

4. Drink more water! Stay hydrated not only when it’s warm but also during cool and cold weather by making water your number one beverage. Stop drinking soda with zero nutritional value and replace it with healthier beverages such as water, green or black tea. Nutritional advice of water and tea can help burn fat and improve energy during the day.

5. Stop rushing and take time out of your day. Why are you rushing to class or work? Did you oversleep or fail to plan your next day’s schedule ahead of time? Aha! Too much on your plate? Re-read point number three above. What’s slowing you down? How can you make your day more efficient? Your next day’s schedule ahead of time? Aha! Too much on your plate? Re-read point number three above. What’s slowing you down? How can you make your day more efficient?

6. Be kind and give of yourself. Make a point of doing one good thing for another person every day. It does not have to be a huge or spectacular event. Just doing one act a day will make you a better person. It could be as simple as opening the door for someone else or letting someone else go ahead of you while waiting on line. It could be volunteering your services for five minutes or helping someone in need. Just hear in mind the old saying: Treat others as you would want them to treat you.

### Breaking Old Habits and Making New Ones

**James Carpentier**

Students staying on Saturdays and Sundays, which specifically focuses on resident students. All of the MSU students are our students and we want to provide the best educational and social atmosphere for our students to meet others and become acquainted to our university as one community,” said Mario Rapetti, assistant director of Residential Education.

### MSU Works to Keep Students on Campus

**Jade Moskovitz**

In hopes of ditching our suitcase school reputation, the assistant director of the Student Recreation Center, the Center for Student Involvement and Residential Education have been meeting monthly in order to collaborate their efforts and make students feel more comfortable staying on campus on the weekends. We’ve already noticed a positive change in the amount of activities held on the weekends since last year, and I hope others will take notice to what our campus offers seven days a week,” said Isabelle Zosche.

The month of September brings the start of a new school year and a new bunch of weekend activities.

Campus Rec kicked off the new semester with Project College, well coming five hundred freshmen and new transfer students into the community with fun activities and prizes. They also aired 12 hours of movies. One of the hits was Toy Story 3 (still in theaters) which was shown in the Recreation Center’s racquetball court creating a theater like atmosphere and bringing in approximately 35 students.

Keith Fonseca explains that the center now offers an activity for every student and in order to accommodate our students, we are offering a trip to New York City. When asked about her feelings regarding student life’s push and pull every student, Keith says he is “looking forward to a bright future.”

The department of Residential Education is working to implement the idea of “SOBS” programs, which are in-formation about the works for Sept. 25. The low cost of $10 includes transportation. Some other events that are on the agenda for this fall, or the new architecture on campus that catches your eye. In other words, slow down and don’t let life pass you by. You’ll feel lower your blood pressure and be happier. It could be as simple as helping someone else or letting someone else go ahead of you while waiting on line. It could be volunteering your services for five minutes or helping someone in need. Just hear in mind the old saying: Treat others as you would want them to treat you.

Hello MSU students, this week we will continue to sculpt the arms and the upper back to get those lean shoulders you’ve been wanting. All you need is a set of dumbbells of your choice and we can get started!

Work-out:
Step 1 - Shoulder Lifts: Take a weight in both hands and position your arms behind your back so that they are fully extended outward. In reps of 10, raise and lower your arms in a vertical pulsing motion. Do this for three sets and you will feel your arms become tired, but power through and squeeze your arms as you pulse up to fully contract the muscle.

Step 2 - Shoulder Squeeze: Keep your previous position with your arms raised behind your back. This time, instead of pulsing up and down, you will be pulsing inward. Pretend you are trying to reach your spine with your wrist, but do not strain yourself. Squeeze as much as you are able to. Squeeze your arms towards each other as that you feel your back getting a burn as well. Again, do three sets of 10 reps.

Recovery Stretch:
Step 3 - Shoulder Opener: Stand with your legs slightly bent and put your hands behind your head. Lace your fingers together and make sure your elbows are fully extended outward. You will feel this stretch in your upper back, as well as the muscles in your arm. Hold for 30 seconds, breathing deeply through the stretch and release.

Step 4 - Shoulder Stretch: Stand with your legs slightly bent and put your right arm across your chest so it is near your left shoulder. Fully extend your arm until you feel the stretch in the back of your shoulder. For added force in the stretch, hold your right arm with your left hand. Hold for about 20 seconds and repeat on the other side.

You can catch the full video at themontclarion.org. Remember to always stretch before and after every work out. Stretching will prevent injury and relax your muscles. Hope you enjoy using weights as part of our new routine and see you next week.
There is one common fear among The Montclarion staff. Dustyแนะนารา us as we drive onto campus, dodging cones and abiding the police-directing traffic.

With hate-filled breath we arrive on campus to face our parking situation. Every student has grown familiar with the absurd parking situation.

With each new day, we recall new horror stories pertaining to parking.

Even the professors of Montclair State acknowledge the situation as a serious problem.

At the start of each class there are at least ten empty spaces. Professors are now becoming prone to taking attendance fifteen minutes after the class actually begins.

Students and professors alike universally acknowledge the parking problem, so why oak anything being done?

During peak hours, or rather during ALL hours, it could take a student up to forty-five minutes to depart from campus.

From Clary Road students opt to walk to class, finding that it is more likely that they will make it to class on time if they abandon the shuttle. The traffic on campus makes easy transport impossible.

Inexperienced drivers are thrown into the chaos on campus and expected to control their tempers and vehicles all while glancing at the clock wondering if they will make it to class on time.

Initially, the construction of CarParc diem meant that Montclair would have an additional 1,000 parking spots.

Problem solved, right? Wrong, as their infinite wisdom, Montclair made the decision to restrict parking to make new dormitories for future students.

Cars line up outside of CarParc with the hope that they will actually find a spot, which is never a guarantee.

What CarParc really needs is regulation. Students are being tossed into these situations and are expected to act accordingly.

The students need direction, and we only need optimal effort from the university.

Granted, there are some recent developments in references to parking.

Let 28, which was once under restrictions, is now a general parking lot. But that is just a drop in the bucket.

If you're excited for the headlining act, Homecoming 2010 will be the best one yet, despite a few new drawbacks to the parade.

Along with the usual talent show, bands, parades and football games, some changes have been made to the festivities.

While initially there were rumors of helicopter rides and getting a kiss, one of the biggest draws this year will be a performance by hip-hop artist Nicki Minaj. This has led to the decision to perform Oct. 8 on campus.

Whether or not you've heard of her, it's obvious that MUSI is trying, yet again, to draw more students to homecoming, which has had low attendance in recent years.

Over the summer, the MASA sent out letters to student organizations asking if they would individually donate a percentage of their budget to the homecoming cause.

Currently tickets are $20 for MUSI students and $40 for guests. Apparently, more entertainment and new acts do not come cheap.

One strange change is the prohibition of vehicles and trucks from student built parade floats.

The lack of wheels makes them all the more difficult to move. CSI is encouraging students to build more portable, lightweight floats.

One suggestion was to create barricades that students could carry and set up to perform their skits.

We're still unsure of the reasons why vehicles will not be permitted this year, but hopefully the ban will not ruin on their parade.

Besides, this opens up a world of new opportunities for creative students right?

They didn't say anything about banning horse-drawn floats.

Although, that's probably over the budget for most groups. We feel that bicycles, skateboards and rollerblades would probably be better choices for mobility.

It's also been suggested that students carry their creations.

Good thing the theme is “Superheroes” because students are definitely going to need some help pulling their own floats for the parade.

We do applaud the administration and CSI’s continual efforts to make homecoming a bigger deal on campus that students will actually stick around for, and very few people know that students will want to go just to see Nicki Minaj.

Hopefully we’ll see as many MUSI students at our own Homecoming as we do at Rutgers.

If you’re excited for the headlining act, Homecoming 2010 will be fantastic.

If you’re a fan of parades, flock to campus to stare at it as general, you may be underwhelmed.

---

As a part of the university’s tireless efforts to beef up school spirit and the dance fifteen minutes after the

CarParc Sparks Fuse for Tempers and Traffic

Lack of Mobility Won’t Rain on this Parade

Frankly, the danger that now pollutes the campus is nothing short of frightening. We feel as though at any moment a tardy student will carelessly barrel into our care.

One strange change is the prohibition of vehicles and trucks from student built parade floats.

This year’s homecoming parade will be the best yet, despite a few new drawbacks to the parade.

Along with the usual talent show, bands, parades and football games, some changes have been made to the festivities.

While initially there were rumors of helicopter rides and Hopping Tt repairas the air in the Red Hawk dock as students race each other for parking spots. The same danger is prominently featured in the CarParc deck.

Inconvenience is not the only thing to gripe about, there is something far more distressing to parking problem, so why isn’t there is something far more distressing students.

These speeding hunks of metal are being operated by frenzied students.

The screech of resisting tires pierces the air in the Red Hawk deck.

One of the biggest draws this year will be a performance by hip-hop artist Nicki Minaj.

From Clary Road students opt to walk to class, finding that it is more likely that they will make it to class on time if they abandon the shuttle. The traffic on campus makes easy transport impossible.

Security Fails to Secure Vital Equipment

One Student Wonders Why Montclair Does Not Lock Up Extra Assets

Professor Provides Perspective on Attendance Policies Pertaining to Religious Holidays

T heft is not uncommon on college campuses. In fact, in any place where people don’t know everyone else and you can lose track of your belongings, theft is common. However, recently larger thefts have the potential to affect whole departments of students have occurred. In early February, the Saxony Hall was the beneficiary of the Cakeulpin which totalled $10,500. While these thefts might have been made easier by less security on the part of those immediately responsible for the equipment stolen, it does bring up questions regarding overall security on campus.

Campus police have met with its buildings open 24/7, so that students can access classrooms and practice rooms to work on projects that are open. These buildings are left open at night, and just walking through any buildings you encounter many doors that are simply left open.

The Montclarion | September 16, 2010

Professor provides perspective on attendance policies pertaining to religious holidays

ALEXA COPPOLA, COLUMNIST

There is one thing I would call it, absolutely vital. It is even more vital to think back to a time when we were not contaminated what is the need for us to walk the walk over to the trash.

New, this is given a complete visual scan and, hopefully, divided into recyclables and, then tossed appropriately. Through this is how we are supposed to be disposing of our waste, it is often ignored for reasons of convenience.

A more common reason for this reasoning is plain laziness. Not only do plenty fail to recycle their waste, but walking around a college campus makes me very wary of how acceptable many people think it is to litter.

For whatever reason, people seem to think that the earth is for how they purchase. They seem to be under the impression that our planet is uninhabited which is the need for us to walk the walk over to the trash.

Arcade Fire Continue to Find Success

The Suburbs Scores Big with Critics, Fans

Mark Gould
Arts & Entertainment Editor

It takes a lot for a band to really “make it” these days. This goes beyond some-specified popularity, impressive record sales and a bevy of listeners waiting impatiently for more. With so many bands letting the pressure of success inspire music for record labels or press, it’s hard to find a modern band that can actually create something that is both innovative and successful. Arcade Fire has done what most bands in the indie rock genre can hardly fathom; they made an exceptional album that sold incredibly well.

Canadian rockers Arcade Fire found success in the past with their album Funeral and Neon Bible. They quickly became one of “those” bands that you had to know. They became the first band with Merge Records to earn a spot on the Billboard Top 200, and that was with their debut album. Now with their third album, The Suburbs, Arcade Fire have debuted favorably on nearly a dozen country’s top music charts. They debuted number one on the US, UK and Canadian Billboard charts. The list doesn’t stop there.

Arcade Fire is a seven piece band fronted by brothers Will and Win Butler, as well as Win’s wife Regine Chassagne. The album is based on their upbringing in suburban Houston, Texas. At 16 songs totaling 84 minutes, this is no monotonous product.

The Suburbs starts right away with title track “The Suburbs,” a carefully paced song which lets the listener really themselves for the experience of “Ready To Start,” a track that is currently seeing success on radio stations for its upbeat, musically tight style that forces itself into your head.

Part of the reason The Suburbs has seen so much success is its accessibility. Often times in the indie genre, bands start to find fame and become well known, such as Death Cab for Cutie or The Shins. These bands start making more widely spread music and become recognized, but then become pigeonholed to make the same music that scored them the success. When they try to return to their roots, they face criticism. With Arcade Fire, they never really left.

The Suburbs is not the same style of music that Arcade Fire showcased in the past, but it works as well, if not better. The songs are cathartic, without losing its originality. The sound is heavier and brighter than previous works, but the most important thing to know is that it isn’t just louder for the sake of being louder.

Some listeners may argue that the album is too long, or that the songs don’t have anything definitive separating this album from any other in the genre. But when you can make an album that flows together as well as The Suburbs, and that most importantly, can be listened to and enjoyed by virtually anyone, it’s hard to find reason to complain. Some songs on The Suburbs are loud, drum-driven and uncharacteristically anthemic for the indie scene (“Month Of May,” “Empty Room”). Other songs are more hushed, and rely on the myriad of instruments that the band incorporates. These songs, “Recover” and “City With No Children,” take us through the suburbs themselves. Win Butler himself describes the album as neither in praise or contempt of the suburbs, but rather a “letter from them.”

The Suburbs has received high praise from many big-name publications, such as Rolling Stone (4.5 stars) and Spin (4.5 stars). Arcade Fire have even performed recently on The Colbert Report. With no downfall in sight, Arcade Fire will continue to make music that finds success in a time where many bands can’t seem to survive, and that success will be well deserved.

Montclair’s Amphitheater Performance

The Lights and Sounds of Conductor Christopher Janney

Biancia Francis
Staff Writer

Performers Dave Reuels, Jimmie Hayes, Stan Strickland, Wes Wirth, Jerry Leake, performer and tabla player and Eddie Grenga lit up the amphitheater during Montclair State University on September 11 with the premier performance Disembodied Instruments.

Conducted by Christopher Janney, the band’s performances were accompanied by effects from the new sound sculptures installed throughout the amphitheater. The new poles allowed for a more interactive experience between the crowd and the performers.

“(The system) is programmed to change the sound of the music during the performances,” Janney said, explaining why the sudden changes occurred during the show. “It enhances the music.”

The new installations also include lights that change, going through the spectrum. Also, various sounds are included, such as those of birds and frogs. Normally all it takes is the wind or a simple touch for the poles to vibrate and chime with the blinking lights.

The installation was designed and implemented by Janney who has designed similar exhibitions in the past.

“This is one of many different things to reflect the genius of his mind, it’s pleasing to be a part of the team," Jerry Leake, performer and tabla player, said.

“Each of them because not only are they there for a great purpose but they add color to the amphitheater,” Dayna Davis, a junior psychology major.

Nicola L. Harmond said, “I think it’s a waste of money to put up sound devices that could have been used otherwise.”

“It was cool how they integrated what the live performers, bringing art and music together,” said Jill Keats.

Mark’s New Music Roundup

Of Montreal has made a name for itself by crossing as many genre boundaries as possible. False Priest contains a great deal of dance-worthy rock, placed upon well crafted indie rock with a slight hint of nerdcore rap. The album is for anyone interested in having a good time. Even though Of Montreal is best taken loosely, there is still a seriously good theme running through False Priest that is worth listening to, even if you only have the slightest interest.

Jenny Lewis and boyfriend Jonathan Rice recently re-released I’m Having Fun Now. Fans of Lewis will feel right at home because the album is full of charming pop tracks. However, more faithful fans will likely notice the lack of integrity and lasting value. I’m Having Fun Now is exactly as it’s marketed; less artistic, but more fun.

Resident Evil: Afterlife Hits Theaters

Great Thrills, Not Much Horror

Ken Macri

In Resident Evil: Afterlife, Alice (Milla Jovovich) is back to continue her journey to find survivors of the plague and lead them to a ship called “Arca-dia,” which is a safe haven for all people not infected by the deadly T-Virus.

Alice is also seeking revenge on the Umbrella Corporation and Albert Wesker (Shawn Roberts), but this time around she is prepared with clones and telekinetic powers. However, Wesker also possesses superhuman powers himself, and at some points he looks like he is straight out of The Matrix.

Throughout the film, Alice encounters various survivors, such as her old friend Claire Redfield (Ali Larter), Claire’s brother Chris (Wentworth Miller) and Luther West (Boris Kodjoe). Claire and Chris Redfield are very skilled fighters, and they play a large role in Alice’s final battle against Albert Wesker.

Of course, what would a Resident Evil film be without the thousands of undead zombies that were infected by the T-Virus? Those infected now look to devour Alice and the rest of the living survivors.

In my opinion, the trademark of the Resident Evil films is the undead zombies, which are now becoming increasingly absurd as the series evolves.

Resident Evil: Afterlife is by far a better action movie than horror movie.

Most of the stunts by Alice in this movie, especially inside the Umbrella Headquarters in Tokyo, are breathtaking. As the Resident Evil films progress, they contain much more action than actual horror. Also, the 3D technology used on this film gives it a very cool look, and considerably enhances most of the action scenes.

If you want to see some exceptional action, Resident Evil: Afterlife is definitely for you. If you’re looking to be scared to a point were you can’t sleep, then you will be disappointed. Overall, Resident Evil: Afterlife is a good film, but it is not between an average horror movie, and a great action movie.

Resident Evil: Afterlife is the first Resident Evil film to be released in IMAX. It is currently being shown in 3D where available.

Ken’s Grade: 3 out of 5 Stars

When You’re Strange Breaks on Through

By Jesse Cohen

The doors of perception have made the hypnotic documentary When You’re Strange appear infinite. Writer and director Tom DiCillo has created a film that is captivating and compelling to witness. The life and times of Jim Morrison and The Doors have not yet been conceived of in such a crucial and accurate manner until this film was made.

By recording the history of the counterculture movement and the power of The Doors and their leading man, the film offers a glimpse of one of the most fascinating personalities to have ever walked the face of this earth. The viewer will get a feeling of how it all came together and how it all fell apart. Johnny Depp narrates, illustrating the condition of The Doors and its members. He walks you through a psychodelic realm while maintaining the scope on the band. Depp was a good choice for a narrator. He remains both calm and direct while keeping a spirit that will engage you in an active experience.

The film is very well crafted, standing out for its use of color and vivid visuals

Looking around the theater during the performance, I saw my fair share of cringing and teeth-gnashing (typically on the part of arts professionals), while music lovers were often in awe of the piece. There was plenty of calm before the storm which provided the perfect transition hit me the same; how could these innovative pieces fall on deaf ears of art aficionados that seem to frequent these envelope-pushing Peak Performances, posed to set the tone for this season of new classical music. The "new" is derived from the part of arts professionals and students. For those curious listeners, don’t worry. There was plenty of calm before and after to storm which provided emotional depth for the piece. William Britelle’s composition, "Cheyenne Autumn/Spiritual Robot," didn’t like singer William Britelle’s Television Landscape (who for the most part were students).

There was a tremendously well-balanced inclusion of the band’s music. Never once was “Light My Fire” or “The End” overplayed. The music remained entertaining, while not destroying the storytelling one bit.

The film is so well made and edited that any concern or opinionscriticizing how it was made would have to be challenged. It is a unique film that shouldn’t be criticized. The entire film has a design and feel that stands on its own. There are no current band interviews or footage. That would be a different film. This film is not disappointing, taking the viewer back to the strange days of The Doors. It reflects something unique.

The only concern regarding selection of footage was that there could have been a little more on the relationship of Morrison and his girlfriend, Pamela Courson.

The film truly tells a story that could not be gained by reading a book. It sparks the imagination and propels you through a complex tale through visual stimulation.

When You’re Strange is out on DVD right now. If Mr. Mojo Rising himself saw this film he undoubtedly would have been intrigued.

Field Hockey Knocks Off Muhlenberg

MSU field hockey won a fast moving game against the Muhlenberg Mules on Saturday, ending 3-1 for the Red Hawks.

The first half was played conservatively, with the Red Hawks only attempting four shots on goal but converting on none of them. In the second half the Red Hawks showed that they knew they had to get it together and brought their energy to the field.

“In the first half, we were not playing as aggressively as we did in the second. We were letting Muhlenberg beat us to many 50/50 balls,” said senior Jess Murphy. “The start of the second half we came out hard and challenged them for the ball, which put Muhlenberg back on their heels and let us set the pace of the half.”

MSU proved to the Mules what kind of team they are by making three consecutive shots on goal in 45 seconds to start off the second half. Five minutes in, senior Diana Colombo scored with an assist from sophomore Michelle Hagel. The first goal of the game was Colombo’s second goal for the season. Senior Deana Hagel followed up Colombo’s goal with an unassisted goal, her third for the season.

The Red Hawks, now up 2-0, saw their lead cut in half when the Mules’ Tiffany Kreiner scored on a penalty stroke. As Montclair brushed the goal off, they came right back at the Mules, as MSU freshman Sierra Rauchbach scored with just 1:28 remaining in the game.

The Red Hawks score from all points on the field. The three goals against the Mules were scored by three different players at three different positions, a forward, midfielder and defender.

“We have been working on supporting each other as a team, midfielders supporting forwards and backs supporting midfielders,” Murphy said. “Because of this support we are not forced to give the ball to a certain player and expect them to do all the work. We have passing options, which opens the scoring opportunities up for anyone from our forwards to our backs.”

The Red Hawks record now stands at 3-1 overall. Next week, MSU plays Kean University for their first NJAC game.

“This year the Red Hawks are taking things one game at a time. But, they do have a goal set to win the NJAC this year. Step one to winning the NJAC is to defeating Kean next Wednesday, Sept. 22. The game will be at Sprague Field and will begin at 7 p.m.”

Senior midfielder Diana Colombo was one of three MSU goal scorers in the team’s 3-1 win on Saturday.

Women's Soccer Unbeaten in Manhattanville

Jason Hrina
Staff Writer

The Montclair State University Women's Soccer team had one win and one tie this past weekend at the Manhattanville Tournament in Purchase, NY. All three goals by the Red Hawks over the course of the tournament were scored by freshmen, giving each player their first collegiate goal as well as showing a promising future for the Women's Soccer team.

The first game was played against Eastern Connecticut and ended in a 1-1 draw. Montclair State took an early lead on Alyssa Diacheysn's goal in the 16th minute after smooth fundamental play allowed her to easily place the ball in the net for the first goal of the tournament. "Scoring my first collegiate goal was extremely exciting," said Diacheysn. Senior defender Nicole Anulewicz crossed the ball into traffic where freshman Allison Wacker headed across to Diacheysn leading to the goal, earning each of them an assist on the play.

The score would hold 1-0 through halftime and up until the 57th minute when Eastern Connecticut's Nicole Leonard put away a deflected ball into the net from the six yard mark.

Sophomore goalie Marisa Zayac had four saves for the Red Hawks throughout the double-overtime game, playing all 120 minutes in net and allowing only that one goal. The rest of the game had a scatter of close-calls and bright moments, but was mostly a possession kind of game from the second goal on.

The Red Hawks were able to even their record at 2-2-2 with an impressive 2-0 victory over host Manhattanville. With a 17-2-1 record the year before, the Valiants were ready to show that their 0-4 mark was only a fluke.

The first half showed little excitement, mainly because Manhattanville hadn't shown up to their own tournament. A game obviously dominated by Montclair, it took until the 54th minute for the first goal to be scored. Amanda Pero scored her first collegiate goal — after being robbed of what would have been the game winning goal in the Eastern Connecticut game — when a beautiful pass from senior Katie Minervini allowed her to fire it off the bottom of the crossbar and in. "Watching my teammates run over to me was the best feeling," Pero said. With a dominating performance from the Red Hawks, one goal is all Montclair State would need. "Our defense did a spectacular job defending Manhattanville [and] a great job denying them any opportunities," said Zayac. But any question of a comeback or a tie was nullified in the 81st minute when freshman Jenna Carroll scored her first collegiate goal with a ferocious shot from the side of the 18 yard box, giving the Red Hawks a 2-0 lead. That score would hold up over the final minutes to give Montclair the 2-0 victory.

The Red Hawks won the tournament on goal differential.

"We played very well this weekend," coach Patrick Naughter said. "I thought the Sunday game was our most complete performance of the season." Montclair State will host City College of New York on Thursday, Sept. 16 at 4 p.m. Check www.themontclarion.org for updates and scores for Women's Soccer.
The unveiling of the 2010 season for the New York Giants and New York Jets caused noticeable electricity amongst all the fans. The wait that seems eternal from every year’s Super Bowl to opening kickoff is finally over.

With aspirations of reaching the Super Bowl, each team took the field for their home opener in a new, state-of-the-art, 1.6 billion dollar stadium. The New Meadowlands opens its doors to both the Jets and the Giants, but just whose house will this be?

First and foremost, the Giants have a richer and longer history than the Jets do. The Giants have three Super Bowl titles, the Jets have one. The Giants have 20 Hall of Fame members, while the Jets only have three. The Giants have 11 retired jersey numbers, the Jets have four. It’s impossible to argue which team has a bigger influence on the history of the city of New York, but the stadium is a sign of new life, change and outlook towards the future, not a place to dwell in the past.

Talk may be cheap, but the Jets are backing up each and every word so far. As far as the free agent market, they’ve brought in future hall-of-famers with Jason Taylor and Ladainian Tomlinson, household names in Antonio Cromartie and Santonio Holmes and return with all the swagger they left-off with last season. Their coach has everyone believing they’re a Super Bowl contending team, and with good reason. They were 30 minutes away from a Super Bowl berth last season, while the Giants lost by 32 points to close out an embarrassing 2009 season and final game at Giants Stadium. They did atone, however, winning the first official game of the new stadium against the Carolina Panthers. The Jets, on the other hand, lost their first official game at the new stadium 10-9, committing almost twice as many penalties as points scored. The face of the Jets franchise, Rex Ryan, can barely be squeezed into a driver’s license photo, yet he’s still known throughout all of football with help from his mouth and ego. The face of the Giants franchise is a shy quarterback in Eli Manning who was a few bad games away from being exiled from New York. At least the Giants have a player representing them. They just again you could pick Mark Sanchez as the Jets representative; a quarterback that barely completed over 50 percent of his passes and had a horrific touchdown-to-interception ratio in his rookie campaign, nearly matching Joe Namath’s career numbers. Maybe that’s why Jet fans love him so much.

Neither team sold out their first game of the season. The Giants had a waiting list to purchase season tickets up until last year and the Jets, along with a lot of “experts,” are selling theirs, believing they’re going to the Super Bowl this year. Yet neither of them were able to sell the extra 2,000 seat difference from Giants stadium to the new stadium. The Giants were heavily favored to win that game, but it just proves that nothing is as sure-fire as a “Broadway Joe” prediction.

The Jets, on the other hand, lost their first official game at the new stadium 10-9, committing almost twice as many penalties as points scored. The face of the Jets franchise, Rex Ryan, can barely be squeezed into a driver’s license photo, yet he’s still known throughout all of football with help from his mouth and ego. The face of the Giants franchise is a shy quarterback in Eli Manning who was a few bad games away from being exiled from New York. At least the Giants have a player representing them. They just again you could pick Mark Sanchez as the Jets representative; a quarterback that barely completed over 50 percent of his passes and had a horrific touchdown-to-interception ratio in his rookie campaign, nearly matching Joe Namath’s career numbers. Maybe that’s why Jet fans love him so much.

Neither team sold out their first game of the season. Yet neither of them were able to sell the extra 2,000 seat difference from Giants stadium to the new stadium. The Giants were heavily favored to win that game, but it just proves that nothing is as sure-fire as a “Broadway Joe” prediction.

The Jets did, however, sell more seats than the Giants, even with the memory of the Giants remarkable upset in Super Bowl XLII against the New England Patriots only three years removed. The Patriots were heavily favored to win that game, but it just proves that nothing is as sure-fire as a “Broadway Joe” prediction.

The cost of this stadium was split evenly between the Giants and the Jets, so neither team gains the upper hand financially over the stadium. The New Meadowlands Stadium won’t stick for long, and to avoid controversy they won’t call it Giants Stadium or Jets Stadium. Which team will rise and take the stadium for their own? One of these teams will have bragging rights to call this stadium their home, but with that victory comes the cost of claiming that ugly Xanadu thing next door as a neighbor.

Giants and Jets Battle for Stadium Supremacy

The New York Giants and New York Jets are in a race to make their mark on New Meadowlands Stadium first in its inaugural 2010 season.
Men’s Soccer Upsets Whitworth

Kris Husted
Assistant Sports Editor

The red-hot Red Hawks of MSU’s Men’s Soccer team continue to prove why they are the number one seed in the NJAC and why all of NJ soccer needs to pay attention to MSU in Montclair, NJ. This past week marked a well fought tournament win for the men as they took home the Mayor’s Cup at Oneonta, New York. The two unlikely opponents, Oneonta and number eight Whitworth, did not go down without a fight as both games garnered very little offense. The match against Oneonta took a whopping 120 minutes and two overtimes before settling on a 0-0 stalemate of the entire game. Goalkeepers Anthony Rogic of MSU, the NJAC Defensive Player of the Week, and Maxwell Siegelman of Oneonta both earned clean sheets. The final statistics told the story of stellar defense. The Owls could not keep running hard and just execute every play.” McLean said the shutout was huge for Montclair State’s young defense, who lost a number of critical seniors last year. The Red Hawks will officially begin their NJAC title begins on Thursday when they host the Rowan Profs.

continued from page 24
would be a 6-0 halftime lead because of stellar defense. The Owls could not solve the Red Hawks front seven, racking for only eight yards in the first half and gaining just a single first down. Westfield punted during every first half possession except for one, with corner back Kevin Clugheney leading the only other Owl drive with an interception. The Red Hawks’ offense finally over came their miscues in the second half, scoring four touchdowns on a helpless Westfield defense.

Much of this was attributed to the great play of senior running back Chris D’Andrea, whose 259 all-purpose yards and two touchdowns earned him the NJAC Offensive Player of the Week. D’Andrea scored one touchdown on a 42 yard pass from Fischer and another on a 43 yard run in the fourth quarter. D’Andrea said that team was able to make some changes at halftime to help with the turnaround. “Coach (Rick Gamerl) talked to us about different schemes, different running plays, different blocking schemes we were going to run,” D’Andrea said. “He said don’t give up on your blocks, keep running hard and just execute every play.”

The end of the third quarter also brought a beautiful 75-yard punt return after Keegan, who picked up the Owl’s punt coverage all season. Keegan had 121 punt return yards on Oneonta’s return on Saturday, as Westfield was blown off the coverage punt after punt.

Overall, the final statistics told the story of stellar defense. The Owls could not keep running hard and just execute every play.” McLean said the shutout was huge for Montclair State’s young defense, who lost a number of critical seniors last year. Men's Soccer Beats Whitworth

Football Shuts Out Westfield in Opener

Mike Monostora Sports Editor

MSU football began their 2000 season with a roar on Saturday, as a solid running game and air-tight defense shut down the Westfield State Owls, winning the game 34-0.

The Red Hawks controlled the flow of the game from beginning to end, but a number of early miscues on offense and special teams killed many first half scoring chances. The Red Hawks’ second offensive possession saw them set up for a potential 40 yard field goal by junior Jake DeBrito. However, holder James Melody fumbled the snap and the Red Hawks were forced to turn the ball over on downs.

The next Red Hawk possession saw more mistakes, as quarterback Tom Fischer threw an interception on the second play of the drive. A second quarter drive by the Red Hawks saw them drive into the red zone, but DeBrito missed a 29 yard field goal which kept the score at 0-0 at the time.

MSU was able to hold what...
