4-21-2011

The Montclarion, April 21, 2011

The Montclarion
Students and faculty were able to express their opinions on a possible tuition increase for the fall 2011 semester inside University Hall.

The Board of Trustees held their annual public-session tuition hearing last week during which students and faculty were invited to voice their opinions in three-minute slots. With Gov. Chris Christie’s proposed lift on the tuition cap, this event brought a record number of participants.

Tuition for the 2011-2012 academic year will be established at the July Board of Trustees Meeting. However, students were encouraged to attend last weekend’s hearing last week during which students and faculty were invited to voice their opinions in three-minute slots. With Gov. Chris Christie’s proposed lift on the tuition cap, this event brought a record number of participants.

On April 13: A student reported that her lost credit card had been fraudulently used to make unauthorized purchases at an off-campus location. This case is under investigation.

On April 14: Student Robert Testa was arrested for possession of marijuana under 50 grams and possession of drug paraphernalia while in Fenwick Hall. Testa is scheduled to appear in Little Falls Municipal Court.

On April 14: A student reported being the victim of harassment and an act of domestic violence. The student declined to pursue a criminal complaint and was offered victim services.

On April 14: A student reported the theft of her iPod Touch from a room in Freeman Hall. This case is under investigation.

On April 14: Student Krystyna Cortez was arrested and charged with disorderly conduct while in Williams Hall. Cortez is scheduled to appear in Little Falls Municipal Court.

On April 15: A student reported her unsecured vehicle, which was parked at The Village, had been burglarized and personal items were stolen. This case is under investigation.

On April 16: A student reported being harassed by an identified non-student male while at an event at the Student Center. The victim declined to pursue criminal complaints.

On April 18: A student reported the theft of her wallet that was left unattended in the computer lab in University Hall. This case is under investigation.

On April 18: Students Elsa Rodriguez, Ileana Gutierrez, Jorge Garcia and Michelle Delvalle were arrested and charged with possession of marijuana under 50 grams while in Stone Hall. Gutierrez was additionally charged with possession of drug paraphernalia. The defendants are scheduled to appear in Little Falls Municipal Court.

On April 18: A student reported the theft of her parking hangtag from her unsecured vehicle in Carparc Diem. This case is under investigation.

Availability is LIMITED, and distributed on a “FIRST COME, FIRST SERVED” basis.

ACT NOW, before it’s too late!
Blanton Hall will be evaluated for improvements.

As a result of last June’s theft of $30,000 of equipment from the Film Cage in Calcia Hall, the Cage has become stricter with overall rental rules and regulations. However, a rising number of students enrolling in the film major coupled with the miscommunication between students and Cage operators regarding rental rules has resulted in complaints directed towards the Cage.

In order to rent an item from the Cage, one must first either be a film major or be in a film class. The Cage is open Monday, Wednesday and Friday from 10 a.m. to 6 p.m. and in order to procure an item, a student must simply place a request. He or she will be able to rent it on a Monday-Wednesday-Friday or Monday-Friday basis.

“It’s gotten a lot more strict since the program got bigger, but the rules and regulations have changed a long time,” said BFA film major Chelsea Smith.

“More students are taking out equipment, so there are more incidents with equipment breaking and being lost. But I haven’t experienced a problem,” Smith said.

The Cage maintains that very few students are denied equipment, but they also note that more incidents, expensive equipment is usually reserved for higher-level students that have a greater need for the gear.

Tony Pemberton, head professor of the film department said, “People usually complain about the deposits [system] we used to have. Students would pay $25 at the beginning of the semester and would get it back at the end. We did this to ensure we’d get the equipment back. When students wouldn’t pick up the money or if they forgot about it, they would complain,” Pemberton said.

The Cage, which does not receive funding from the University, currently purchases its own production insurance. Students are only fined for equipment if the item is damaged or lost. When an item is indeed damaged, a claim can only be made if the price is $1,000 or above. In these instances, the Cage works fairly to establish how much a student will pay for the item.

One student, who wishes to remain anonymous, said that complaints are often made by uninformed students and that if students took the time to learn the rules and regulations of the Cage system, many problems could be avoided.

In light of the combined occurrences of theft, growth in the department and complaints, the department is currently trying to resolve the situation by hiring an in-staff member of faculty to permanently take care of Film Cage administrative duties.

“We have $100,000 worth of equipment right now. The students [who work] do the best they can, but it’s a troublesome job. I think there will be an answer this year on an administrator working in the Cage,” Pemberton said.

In the past, the department did not have justification for this position, but now that the film program has increased in enrollment, the position could possibly be created next year.

Any student wishing to raise a problem, concern or complaint should directly contact the Cage first by calling 973-655-4094.

Webster and Stone Remain Offline

Blanton Hall to be Evaluated for Upcoming Semester

Jeremy Grossman Staff writer

Weeks after the announcement that Blanton, Webster and Stone Residence Halls would not be available for room selection, Residential Education and Services Executive Director Dominic Petruzzelli has announced the current state of residential affairs.

“We are keeping Webster and Stone off-line to be utilized for temporary student space in the unlikely event the Hall is not completed by September 1st,” Petruzzelli said. “We are also looking at these spaces for short-term administrative office space,” Petruzzelli said.

In regards to Blanton, Petruzzelli said, “Blanton remains offline and will be evaluated by our facilities management staff regarding any capital improvements that need to be made.”

Petruzzelli also discussed the record number of students that received housing. Velodry 2600 students received housing this year, which is an increase from our previous years.” Additionally, Petruzzelli made clear that students who wish to live on campus next year may still submit a $100 housing application fee to the Bursar’s Office as soon as possible.

While Residential Education is making an effort to please all students, not everyone is able to receive their first choice of housing. Freshman Alex Dunn and current resident of Freeman Hall was hoping to spend her sophomore year right down the hall!” Dunn said with a smile.

It may be difficult to get a room in Russ next year, but students who have not made their final housing decisions still have plenty of options.

“We do have some of our hall communities completely filled and have additional spaces available throughout select buildings on campus,” Petruzzelli said.

For more information on housing options, students can visit the Residential Education and Services Office in Bohn Hall, visit the website, or call the office at 973-655-5188.
Montclair State University hosted a music-boosting, base-thumping concert last Thursday when Grammy-nominate

d American rapper and actor Cam’ron performed with fellow rappers.

Chart-topping rapper Juelz Santana and Jim Jones accompanied Cam’ron. What made this concert so special was

that this was "like a reunion tour," according to Jurney Santana, concerts

chair of the program board.

Santana was able to book hip-hop group The Diplomats, also known as Dipset. Cam’ron and Jones performed together starting in 1997. Juelz San-

tana joined the group in 2000.

Cam’ron and Jim Jones had a fall-

ing out in 2007 which resulted in the group breaking up. The two announced in 2010 that their feud was over. The

group came back with a bang and about 300 Montclair State students got to witness it.

The group performed favorites like, “We Fly High,” “Hey Ma,” and “The Whis-
tle Song,” and their newest song, “Su-

lim.” From the sounds of the students’ screams, it was proof that the concert went well.

Junior Nicole Delfils said the per-

formance “succeeded her expectations.”

Many students around her agreed.

This was the group’s second concert in three days, “I think it was good,” Santana said. “The outcome was really good for it being so last min-

ute. It was difficult but we travelled quickly.”

Junior Genevieve Meyers found out through e-mail on Tuesday about the concert and the performance was on Thursday. Hull immediately contacted his friends and stood on line for tickets that were sold out in days.

“Dipset is one of my favorite groups of all time and it was nice to hear all the music I grew up listening to,” Mey-

er said. “Great job MSU!”

Sophomore commuter student Yasmin Begum hoped that this meeting would

raise awareness about the issue.

The Ballroom was crowded from about 8 p.m. to 11 p.m.
Cody Hodges travels the country to tell the story of Rachel Scott, the first victim of the Columbine High School shooting.

Craig Scott was in the library of Columbine High School as the two student gunmen entered. At that time, students were told to hide under the desks where he was joined by his two friends. They were both shot to death soon after, but Scott was spared when the sprinkler system went off and the gunmen soon left.

Scott told Hodges that when he spoke at schools across the country, he attempts to inform them of the dangers of prejudice. “Encourage people to eliminate prejudices.” Scott said. “I saw prejudice at its very worst. I saw one of my best friends die because of the color of his skin. It doesn’t matter where you go, but encourage people to get rid of the hate. Look for the best in other people.” The thought of his life would never be normal to him, Scott said in the video presentation. He even realized he needed to “forgive these two boys” to move on with the rest of his life. He attributed his ability to do so to Rachel’s love and compassion for others.

Hodges spoke about the two short-era movies which had watched the same violent movie 200 times in a two-month span leading up to the shooting.

The auditors were reciting lines from the movie as they fired shots in the library. Scott, who has since gone to college to pursue a degree in film, hopes to make a movie that have a positive effect on people. He has devoted his life to those who lost theirs that day. “We are influenced by the things we put in our life,” said Scott. He spoke about his two-page essay found under Rachel’s bed after her death titled “My Ethics, My Codes of Life.” In it, she challenged the reader to start a chain reaction of kindness and compassion.

There were five challenges that came from Rachel’s writings. They were to look for the best in others, dare to dream, choose positive influences, have kind words and start a chain reaction.

Hodges described this presentation as a powerful story that changed his life and today he is excited that it might change someone else’s.

Hodges spoke about his life and how no one is “ever too old to stop dreaming.” He spoke about how he got a full football scholarship at Texas Tech University, a part of the Big 12 Conference, at that time. On the third day of practice, he blew out his shoulder and was out of commission for the remainder of his freshman year.

The doctors told him he wouldn’t play again, but he ignored them and persevered. He sat on the bench for the next two years as his coaches told him to “go somewhere else” because they quit believing in him. He eventually played such a great season in his sophomore year that he became part of the NFL’s Tennessee Titans in 2006. “Nobody else should not determin- e your dreams,” said Hodges. “I share my story because of all the reasons my dream was impossible. I was from a small town. Nobody had been great, as he spoke about how friendly the campus is.

On the day of the presentation, he went to Café Bham with two students to dinner and he shared with them the register all he had was debit and credit on him, the two forms of payment that are not accepted. One of the students who was with him allowed him to use their meal plan card.

Hodges said that being polite and interesting is one kind of kindness that can go a long way.

Anyone wanting more information on Rachel’s Challenge is asked to visit www.rachelschallenge.org and to also join the Facebook group “Remember Rachel Scott.”
on campus. However, tuition is set to be
increasing to pay fees associated with utilities
which is not very attractive. "It doesn’t make sense for many of our students," Sullivan said. "If it fits for them, by all means do it, but do not force it.

Students have mixed reactions regarding the
tuition. "I wouldn’t be happy if I didn’t have the luxury of taking hybrid and regular classes," said senior Jayne Baglio. "When you work and go to school it is just better to have options."

Senior Jason Korman said, "I think it takes away from the credibility of the university, but it is good for adults with full time jobs that need to take care of families."

According to Gingerich, these new, fully online programs are not geared for the typical Montclair student. The demographic for these three types of online programs are individuals who are 25–40, are employed and career-driven.

“We are not looking to move existing students into online programs, we are looking to add students who are not cur-
cently in our programs," Gingerich said.

"The online programs are to be structured by departments with extensive course development in order that they remain consistent with the other courses in the program. Programs will be offered in sets of eight-week consecutive semesters.

They are being created in a standard template by faculty teaming up with instructional designers, who are informa-
tion technology experts on Blackboard. There will be a fee with the online courses but this will be offset by not hav-
ing to pay fees associated with utilities on campus. However, tuition is set to be the same as in-person classes, and not all students are pleased.

“I am going to pay as much as any-
one else I would like to be there because I learn more," said senior Daniel Paul Miller.

Senior Moghan Brachitta said, "I would not mind if most classes became hybrid, but there should most definitely be a choice in the matter as some stu-
dents need the consistency of the face-to-
face standard instruction to excel in their classes."

“I think it takes away from the credibility of the university, but it is good for adults with full time jobs that need to take care of families.”

Along with these online programs, Montclair will also be "promoting the cre-
ation of hybrid courses," Gingerich said. "We want to develop and support indepen-
dent online course development through Blackboard and Eliminate.

The online programs will have the same class size as in-person courses. Montclair is also planning to set up full-
time technical support starting in the fall.

Gingerich said, "We were not fully geared up to do all of that for the summer and winter sessions. We are getting better at it as we are preparing to be more thorough."

The programs have not been announced yet and are still pending on building sup-
port services and course developments. The University will release more infor-
mation on this upcoming program in the near future.

Foursquare was launched in 2009

Users: Over 8 million worldwide, adding around 35,000 new users each day

Check-ins per day: Over 2.5 million, with over half a billion check-ins in the last year

Businesses: Over 250,000 using the Merchant Platform

Foursquare can be used via text message if the user doesn't have a smartphone

The Dangers of Illegal Downloads

Nick Vehage

Many people think that when they download songs for free, they aren't hurting anyone. Unfortunately for them, however, if they get caught they can pay up to $150,000 for every file downloaded illegally. Why risk jail time when they could just pay $1 from iTunes?

Many people nowadays download music "legally" through the Internet. In a study done by Matthias Duenner, a graduate student at California State University, "According to the International Federation of the Phonographic Industry (IFPI), in 2005 about 31 percent, or one out of every three CDs sold, was an illegal copy." This is a perfect example of how most of us shrug illegal downloading off as if it is no big deal. People figure that most things that are illegal are usually either hard to do or are secretly performed; downloading music off of a website is very quick and simple. A lot of phrases emphasize how quick and easy it is to do so people will download more and tell their friends about it.

If a person is caught illegally downloading media while on campus, which ever company found the downloader contacts the school. From there, it is the school's duty to internally search for the student. Once the student is found, on top of whatever fines they are given, the school will enforce whatever disciplinary action they have set. This could range from more fines to expulsion.

The price is definitely not right when it comes to downloading things. There is a wide variety of fines and punishments that the accused can receive. Research done by Webster University shows that first-time offenders may face fines of up to $150,000 per file. Though not as common as simply a fine, the downloader may also be charged with up to five years of imprisonment. To top it all off, the accused is also at the mercy of the copyright holder who can choose to file a legal suit or not. This adds even more money because of court fees, attorney fees and, if you lose, however much money you owe the copyright holder. On top of legal and financial trouble, there is also the concern for personal information and computer safety. Since most people don’t know exactly where the files they are downloading are coming from, they run the risk of picking up a virus. Once the virus is in the computer, they may experience slow Internet, pop-ups, loss of data and even identity theft.

Technology is so advanced these days nobody knows who’s capable of doing what and to whom. Many people think that identity theft can only come from giving their information to a fake site, but thanks to key-loggers and hackers, they can be logging into their email and the hacker can steal personal information.

Another thing to be aware of when it comes to the Internet is to make sure that the Internet connection a user is operating on is protected. Even if a user isn’t doing anything wrong, he or she can still get in a lot of trouble if somebody else is using his or her connection to download media files illegally.

"I actually had a friend of mine almost get in a lot of trouble for that exact reason," Montclair State student Chelsea Clarke said. Overall, it is much safer and more reliable to simply use iTunes. You can actually save more money by going out and buying the physical CD and uploading the songs to your iTunes library. Honestly, 99 cents is nothing. You can find that kind of money in couch cushions or on the street; it’s not that hard to cough up a little extra kick of motivation, every now and then, a hand or artist donates some of the total sales to a charity or fundraises for a long run, buying your music legally is better for both you and the artists.
Public Relations Authors in Marketing Series

Katherine Oakes

The Ecomelt has arrived at MSU, and just in time for Earth Week. Not familiar with the term? No, it’s not a sandwich (although it does sound tasty).

It’s actually a state of the art scientific innovation meant for turning contaminated sediments from local rivers into a clean, manufactured topsoil and compost used for landscaping. It’s a product of Professor Eric Stern’s two progressive technologies for sediment decontamination: the Sediment Washing Process and Thermo-chemical High Temperature System.

The Sediment Washing Process begins by breaking down the organic contaminants. The toxic sediment is then sent with high water pressure for dilution and an oxidant is then added to destroy it. What’s left are materials that are turned into dry sediment which can be combined with woodchips, compost and other materials to make the topsoil.

Due to the high temperatures, all of the organic contaminants are destroyed, and the good stuff gets to stay. The glass material is stabilized and used as a 30 to 40 percent replacement cement used for landscaping.

The Ecomelt is located outside of Mallory Hall and is comprised of recycled materials.

Over 100 students flocked to a lecture hall in University Hall on Monday to hear authors Dinah Polk and Krista Ross talk about public relations and how to be your own publicist.

The two women authored a book called “Be Your Own Best Publicist,” which is about setting a personal strategy and surviving in a public relations world. “We have a combined 30 plus years [of] experience in the public relations industry, having worked both in-house and on the agency side,” according to a press release from Newman Communications.

They spoke to Langille’s classes about being self-motivated to present yourself in a professional manner when becoming a public relations personnel. Taking from chapters like, “Be a Know It All (in a Good Way),” and “Test Your Own Horn (but Not Too Loudly)” the authors spoke frankly about how to carry yourself in the professional work place.

The authors also volunteered to stay after the class had let out to sign copies of their book and were available for purchase in the Student Center bookstore.

Kleiman and Cooper spoke to Langille’s morning class of 35 students and again in his afternoon class of 100 students.

Kleiman and Cooper were just two of the guest lecturers in a series that the Student Center asked the two women to talk about public relations and how to be your own publicist.

Most college students spend the beginning of spring outside enjoying the weather and preparing for the sunny days of summer that are on their way. But Renatia Wright, Bianca McGuinn, Wanda Valentinio and Krista Ross are doing things differently.

These four MSU students spent one of the busiest days of the season inside the Student Center helping the less fortunate.

The girls have set a goal to collect at least 410 pounds of clothing. Last year’s group was able to get 400 pounds. They have estimated that each average size garbage bag weighs about 20 pounds and they have about 100 pounds so far.

As of press time, Phi Beta Sigma Fraternity Incorporated donated three bags of clothing to the drive. As a way to promote their cause and encourage people to donate, they offered DVDs to each student who donated clothing yesterday in the Student Center.

These four MSU students have taken a class assignment and turned it into something productive and beneficial.

“IT’s a great way to donate to your community.”

Krista Ross

The Sediment Washing Process heats up the sediment to 2,800 degrees Fahrenheit, turning it into molten lava, which is poured into a water bath and becomes a glass product.

Next, the Thermo-chemical High Temperature System heats up the sediment to 2,600 degrees Fahrenheit, turning it into molten lava, which is poured into a water bath and becomes a glass product.

Due to the high temperatures, all of the organic contaminants are destroyed, and the good stuff gets to stay. The glass material is stabilized and used as a 30 to 40 percent replacement cement used for landscaping.

The frightening decrease of natural topsoil in the world calls for an alternative solution and the Ecomelt has answered that call. There is only about 30 years left of organic topsoil, (the top layer of soil where most plants grow their roots and where farmers plow) before we run out, which is a huge problem.

Having this innovative technology at MSU is a very big deal. So, next time you stroll by Mallory Hall, take a second to admire the dirt and surrounding sidewalk and the native New Jersey plant species, knowing that one corner of the world has done a whole lot of good.
Your professional wardrobe is a big part of your first impression, especially for those who are about to enter the working world. Just because you work in a professional setting, doesn’t mean you have to look stuffy. Here are a few guidelines for looking good but not “too” good.

1. Dress according to your job tasks. If your work is in the back room and you don’t have to interact with customers, you don’t have to wear clothes that fit you properly. Don’t wear anything too small. If your work is in front of a mirror and you have to interact with customers, you want to look well-groomed. You don’t have to wear clothes that are too low, necklines that are too high, or anything that might be outdone. You’re going to work, not to a nightclub.

2. Shine your shoes. It may seem old-fashioned, but a regular application of paste wax will keep them looking good longer. It will help repel water and cover up scuffs, too.

3. Keep an eye out for next week’s article, when we discuss where to buy work clothes around or accessories to add to your outfit. Add a blazer or sport coat and for men a necktie to a basic shirt to dress it up.

4. Wear clothes that fit you. You don’t have to be a size four to look good but you do have to wear clothes that fit you properly.

Don’t wear anything too small. If your work is in the back room and you don’t have to interact with customers, you don’t have to wear clothes that are too low, necklines that are too high, or anything that might be outdone. You’re going to work, not to a nightclub.

When we discuss where to buy work clothes around or accessories to add to your outfit. Add a blazer or sport coat and for men a necktie to a basic shirt to dress it up.

5. Keep your hair and makeup simple. Try to keep your morning routine for hair and makeup less than 30 minutes; any longer is a waste of time. Avoid looking overdressed.

6. Have you ever seen people wearing so much hairspray that their hair looked like it might break if they touched it? Find a balance between good grooming and endless primping.

4. Accurate the positive. If you have some great shape, wear it. Just make sure they’re not told who would be performing each challenge.

5. Keep it modest. A nightgown or bikini is fine, but don’t wear skirts that are too short, necklines that are too low, or anything that might be outdone. You’re going to work, not to a nightclub.

6. Keep an eye out for next week’s article, when we discuss where to buy work clothes around or accessories to add to your outfit. Add a blazer or sport coat and for men a necktie to a basic shirt to dress it up.

Montclair State University is a vibrant institution with nearly 100 doctoral, master’s, teacher certification, and certificate programs. We have much to offer with strong, dynamic graduate programs that fit your needs.

The Graduate Information Session is designed to provide potential applicants an overview of the graduate application and admissions process. In addition, you will have the opportunity to learn about graduate assistantships, financial aid, scholarships, and much more.

Visit montclair.edu/graduate for more information about our graduate programs and register for an information session today.
Long-distance relationships aren’t easy but they are possible. Every relationship encounters struggles and conflicts; by showing your concern, you are also showing that you are willing to work through life’s curve balls. Summer is a tough season for any couple, whether short- or long-distance. If you want to make a relationship last, you both have to make it work and make it happen. If each person is equally invested in the relationship, the distance and the season should have no effect on your title. So, what should you do in order to prevent the miles from coming between you?

I believe love is all about adjustments. Not only is the “perfect” relationship not built upon agreements, but it’s also far from flawless. So when you come across a situation like this, use it to your advantage. Let the distance be a test.

If your boyfriend just graduated, he’s most likely a step away from starting a new career. That’s not to say that distance will remain an issue even after the start of his new job, but his availability could be lessened depending on the hours that are required of him. Considering this, his time spent with you could just as easily be affected. I would hate to throw in the cliché, “absence makes the heart grow fonder,” however, in many ways, this is true.

In this case, it’s all about reorganizing how much you miss him when he’s not around and taking advantage of the time when he is. I would talk to him. Figure out your summer schedules and work around them. Luckily, technology allows for many alternatives when being by his side isn’t an option. If you two are truly committed, asking him to look a little further into the future isn’t a bad idea. You want to make sure that you are both on the same page and want this relationship to work.

At the same time, you don’t want to bombard him with questions and concerns. Instead, take them as they come. Try your best to be patient with the situation and be willing to work around it, and you will find that your relationship will be stronger than ever.
Aries – Your finances are going to be all over the place this week. You may see a delay in your paycheck or an unexpected purchase may leave your bank account dry. Pay more attention to sudden changes in your account and leave some money left for emergencies.

Taurus – Many of your friends are going to be busy with schoolwork or other projects this week, so there will be very little time to socialize with them. Rather than wasting your time by doing nothing, be productive and get a head start on projects that are due in the near future.

Gemini – Make sure to take extra precautions to be healthy this week — illnesses are running rampant and you may be extra susceptible to them. If you get sick, do not hesitate to go to the doctor. Don't make your illness worse than it should be!

Cancer – You have lost touch with your romantic partner lately and it has really strained your relationship as of late. It may be time to break up and look in a different direction. You may find someone that will make you a whole lot happier or you may simply get back together with your ex in the near future.

Leo – Your head is going to feel like it is going to explode with the amount of responsibilities and schoolwork that you have to get done this week. This may lead to negative emotions or feelings towards your friends. Try not to let stress get the best of you.

Virgo – It is going to be a bad week for you as a phone call or letter is going to bring bad news about your job. It is important to keep your head high regardless of what the news may be. Try not to let it bring down your positive attitude — put the news behind you and move on.

Libra – It is time to become concerned about your financial situation. A combination of a bad economy and circumstances within your own life may leave you without sufficient funds to live on your own. It may be best at this point to try to seek temporary financial help.

Scorpio – A sudden change in your life or the life of your romantic partner will leave the two of you separated for a long period of time. It is time for you to reconsider whether continuing your relationship will be beneficial from such a long distance. It may be best to move on at this point.

Sagittarius – Your health is of the highest priority this week as you will come down with a cold or a sore throat. To try and become healthy again faster, stay indoors and take a couple days off of work and school. It's not smart to try and fight through this illness.

Capricorn – There has been some tension lately between your romantic partner and some of your closest friends. Your partner is jealous that you haven't been spending a lot of time together lately. Try and make a commitment to spend more time with your partner this week.

Aquarius – The amount of work that you have been given in the past week has become too much. It is time to just forget about work and school for a few days and take some time off. It will help you refresh your mind and give you a good attitude so that you can finish your tasks at hand next week.

Pisces – You have become separated from some of your closest friends in recent weeks. It is time to re-connect with them. Make some phone calls to your best friends and arrange a weekend of fun and relaxation. It will help rekindle your friendship.
Peak Performances

John J. Cali School Of Music
Department Of Theatre And Dance

April/May

JOHN J. CALI SCHOOL OF MUSIC
MSU Symphony Orchestra

Jeffrey Grogan, conductor

Conductor Jeffrey Grogan and the MSU Symphony will present a wide-ranging performance of contemporary and classical works.

Apr. 25 @ 7:30pm
Alexander Kasser Theater

JOHN J. CALI SCHOOL OF MUSIC
University Singers and MSU Chorale Spring Concert

Heather J. Buchanan, conductor
Terrence Thornhill, cello
Valerie Bernhardt, soprano

University Singers’ repertoire will include “Elegy” by Joseph Twist for mixed choir and Terrence Thornhill, cello solo; “Sleep” by Ivor Gurney, arranged by David Smith (World Premiere); “Ochokemoga” by Mark Strehl; “All Works of Love” by Joan Szymko; and “White Blossom” by Martin Sedek (World Premiere). The Chorale will perform Dona Nobis Pacem by Ralph Vaughan Williams, a cantata for soprano and baritone soli, double chorus, piano and string orchestra.

Apr. 26 @ 7:30pm
Alexander Kasser Theater

DEPARTMENT OF THEATRE AND DANCE
New Works Initiative

The Agee/Evans Project

Based on “Let Us Now Praise Famous Men,” THE AGEE/EVANS PROJECT is a music-drenched chronicle of James Agee and Evans Walker’s descent into the nightmarish existence of three Alabama sharecropping families and their heroic will to live.

Apr. 28 & 29; May 2 & 3 @ 7:30pm, Apr. 30 @ 8:00pm, May 1 @ 2:00pm
L. Howard Fox Theatre

The New Works Initiative is made possible with generous support from Holly J. and Robert S. Gregory.

JOHN J. CALI SCHOOL OF MUSIC
Albert Herring

By Benjamin Britten
Jan Prokop, director

The MSU Opera Workshop and MSU Symphony offer a fully staged production of Britten’s humorous coming-of-age tale set in a late-Victorian English village. Performed in English.

May 2 @ 7:30pm, May 3 @ 7:30pm
Alexander Kasser Theater

ocation where you never have

Seeking to discuss issues of tolerance and cultural understanding that occasionally seem to be lacking on this campus.
A few weeks ago, I had a chance to reach the point when I had just about reached the end of the little matter of the Royal Wedding.

It was when I stumbled across an article on DailyMail.co.uk entitled “Bride-to-be in a bribe-for-wedding” that made me want to find out about the events of the Royal Wedding.

As the mayor, you may display the complete information about your child's daily routine. How many times a day are you doing something that leaves your child wanting or needing? They have given up their privacy to further their careers today, how have they become famous?

And just what does it say about our lives, our day existences?

Are the lives of famous people really so immune to this fact. The divorce rate in this country is about 50%, and I don’t believe pornstars are immune to this fact.

Just one look at the official site for the Royal Wedding—knight—where he hopes to receive no less than 500,000 marriage applications.

And that heading really doesn’t lie — it could be because the notion that anyone in the world are raw-dogging, or getting dirty, dirty sex; to ignore jealousy and guilt when he sees a sink full of dirty dishes and she only has to say two letters for his argument; she’s on the receiving end of that argument.

To argue against at that point; especially if you’re able to do it because they never really change, but we are too far gone to want to turn back now.

It seems that with younger generations, one can fall in love, fall out of love, yet don’t have to argue about it. The divorce rate in this country is about 50%, and I don’t believe people are immune to this fact.

So, pornstars getting married seems like something that many of them may do. They are the ones who still have to work for a living and they can fall in love, fall out of love, yet don’t have to argue about it. The divorce rate in this country is about 50%, and I don’t believe people are immune to this fact.

A new study shows that a current columnist for The Montclarion, Taylor Sykes, they are sticking with their lie. They’re able to do it because they never really change, but we are too far gone to want to turn back now.

It seems as though everyone is fixated on the wedding of Prince William and Kate, and it is one befuddled columnist who’s trying to make sense of it.

It seems that some issues are more important in life. What about the ones who still have to work for a living and they can fall in love, fall out of love, yet don’t have to argue about it. The divorce rate in this country is about 50%, and I don’t believe people are immune to this fact.

Yet why do people choose to put themselves on such a network? Why do they continue to inform others about what they are doing?

It is because of the society that we live in.

From iPhone cases — bedazzled with 100 percent authentic Swarovski crystals — reading “William and Kate April 21, 2011” to chiming plates and even enamel badges with the couple’s face on them, one begins to wonder: Perhaps this should be setting off some alarm bells. Perhaps people have just really changed their lives.

Are the lives of famous people really so mundane that we have to live vicariously through celebrities?

In a world where the wedding invitations of our friends and relatives are often met with sighs of, “Do we have to?” what makes that wedding require our presence for the archaic tradition?

Upon further consideration, foursquare seems more like a parent’s nightmare than a social networking site.

Yet the men are the ones who still have to work for a living and they can fall in love, fall out of love, yet don’t have to argue about it. The divorce rate in this country is about 50%, and I don’t believe people are immune to this fact.

Some of these husbands and wives get divorced, but were now divorced. Alice wanted to know if he would be able to handle a situation like this, and I’m afraid that the ability to comprise and work together is not something that we are naturally gifted with.

It seems that with younger generations, one can fall in love, fall out of love, yet don’t have to argue about it. The divorce rate in this country is about 50%, and I don’t believe people are immune to this fact.

Just as there is a social network for shar- ing the “data” on ice, there is also a social network for sharing the “data” on ice.

To elaborate, foursquare is a program that allows an individual who becomes a member of a website to post things where they are at that point in time. For instance, they can “check in” to places like Starbucks, Chuck E. Cheese or University Hall at Montclair State.

Foursquare has a few more addictions than just the ability to reveal where your friends and foes are. A person receives noti- fication badges related to their type of “check in.”

At first, foursquare seems to be what I call a parent’s dream. It may be because we’re subconsciously influenced by media outside that give us nonsense and unness- ary information about celebrities.

It may be because of the craze from the past two decades known as reality television.

And just what does it say about our lives, our day existences?

Are the lives of famous people really so mundane that we have to live vicariously through celebrities?

The phrase “Nuclear Meltdown” sits in the corners of America’s news media patiently waiting for the day on which it will be needed to describe the world. This type of catastrophe often satirizes the real threat of terrorist attack and possible nuclear war.

These subjects are the last things we want to consider when waking up in the morning. Japan has thrown itself into turmoil as a 9.8 earthquake rocked the island nation. Four reactors at the Fukushima Daiichi Nuclear Power Station in Japan experienced cooling failures and various explosions. Subsequently, radioactive material leaked into the atmosphere and water sources.

This horror served as a reminder to the American people of the potential dangers associated with nuclear power. According to a poll conducted by Gallup last March, 64 percent of people in the United States support nuclear-power development. Due to recent events, that percentage has dropped by 14 percent. The United States contains precisely 104 nuclear reactors. If any of these reactors were to experience serious problems, the American public would be unaware of how to handle themselves because emergency plans do not exist for the public.

This places the American public in a state of utter vulnerability. Unlike Japan, who has a “Special Act of Nuclear Preparedness for Nuclear Disaster,” if a nuclear incident were to occur, citizens across the United States would have no idea how to handle the crisis.

A poll conducted by the Associated Press finds that eight in 10 people who participated believed that the government was prepared for a nuclear emergency.

It appears that the United States government must construct a clear plan for the American people to follow if a nuclear disaster occurs. The government must act now. The American people would only benefit from a plan such as the “Special Act of Nuclear Preparedness for Nuclear Disaster” in Japan. Without guidance, there is a risk that if the worst were to occur, the public would panic, as they did in Japan.

What would happen if the two power plants in New Jersey malfunctioned? According to a review of federal records, 15 percent of reactor operators in America share the same design as the ones in Japan.

This includes the two reactors in New Jersey, located in Salem and Toms River. Toms River is only nine miles from Atlantic City.

New Jersey’s high population (6.7 million in 2009) and its proximity to New York City is the reason why this is so problematic.

In 2008, New York City began rewarding its teachers based on their students’ performance on standard-ized tests — merit pay. In 2009, New York City implemented the first in-depth study has been conducted throughout the country.

Although, the first in-depth study has been conducted throughout the country, the majority of it did not get students’ test scores to improve even though they were being offered a reward.

Despite many experts’ claims, New Jersey’s government stated that the main reason he proposed merit pay back in May 2010 was because he “doesn’t believe that we should be rewarding teachers and scapegoating [sic] teachers and driving them out of the classroom.”

Northeastern University’s study?

They’re more concerned about the protection of their financial institution, the American people need to be thoroughly informed of the measures they should take in case of a nuclear emergency.

Nuclear Preparedness for Nuclear Disaster,” if a nuclear incident were to occur, the public would panic, as they did in Japan.

In light of recent events, the United States has to implement a plan for the American people to follow if a nuclear disaster occurs. The United States government must construct a clear plan for the American people to follow if a nuclear disaster occurs.
Injuries Put End to Illustrious Career

Sudden Retirement of Fan Favorite Edge

Wrestling Superstar Edge shocked the WWE universe when he announced on March 9th that he was "Retiring due to injuries." This shock- ing news was the culmination of nosed with cervical spinal stenosis due to previous neck injury he had never achieved world champion-status in WWE with 31 titles collectively, including being an 11-time world champion. Edge was regarded as a "glorified stuntman." If he had to go out, he went out in style. He walked away with the title in the live two-hour episode, Edge made his typical entrance. He took to the micro-
phone and informed the audience that due to a previous neck injury he had to retire, as per the advice of his doc-	ors. He announced that if he continued to wrestle, he would one day be in a wheel-
chair and not be able to face the audience. In 2003, Edge broke his neck and was out for action for one year. He maintained that the retirement an-
nouncement that he knew he was on borrowed time once this injury set him back. He was recently diag-
nosed with cervical spinal stenosis -- the narrowing of the spine around the neck due to chronic deterioration. As a 15-year veteran of the WWE, another top contender left the ring (or his peak was the current world champion). The one good thing to come of this was that now, he won’t end up in a wheelchair. He can have a nor-
mal life again. No more 300-plus days on the road. He’s going to see his dogs and children as a father should. As he said, "This was the right call."

On that “Friday Night Smackdown” he was making his return with anacro-
show concluded with Edge’s best friend of the past 15 years, Christian, winning a 20-man battle to rival Edge’s spot in upcom-
ing years, hopefully featuring classes where fans can learn about music edu-
cation and business. For all D’Esposito knows, the next Bamboozle festival is currently starting out in another bu-
several moments in recent wrestling history. The way his career ended is a shame, but it's for the best. One's physical health certainly outweighs the importance of any job. It was a tough decision and Edge clearly made the right call.

Edge has had some of the biggest moments in recent wrestling history. The way his career ended is a shame, but it's for the best. One's physical health certainly outweighs the importance of any job. It was a tough decision and Edge clearly made the right call.

He was the winner of the first money in the bank ladder match, made the “ta-
centric” premise of Bamboozle, as he says. "You get the chance to see debut, one or something you love. Giving up the vest, Edge traded much just about making it to the WWE, let alone becoming one of the top wrestlers of the last decade. There is no one word to describe Edge. I can say that he followed his heart and seemed to really enjoy himself wherever-
he stepped out in front of the crowd. "Never say never in wrestling" is a line that all fans should follow. Edge will be back for at least one more match (though, maybe in a tag match with Chris-

Future plans for Bamboozle include branching out into what D’Esposito calls the “Pass The Mic” tour, featur-
ing more artists and comedians. “We
never want to abandon comedy. We
may have trimmed it a little, but it’s always been an anchor for us at the event,” he says. D’Esposito wants to get music, comedy and community all working together in the upcom-
ing years, hopefully featuring classes where fans can learn about music edu-
cation and business. For all D’Esposito knows, the next Bamboozle festival is currently starting out in another bus-

SUMMER SESSIONS

May 16, 2011–August 25, 2011
Schedule available on WESS.*

No Classes May 30 and July 4 • No Friday Classes

• 1st Three-Week Session: May 15–June 2
• 1st Six-Week Session: May 23–June 30
• 1st Four-Week Session: May 15–June 9
• 2nd Six-Week Session: July 5–Aug. 11
2nd Four-Week Session: June 13–July 7
• Eight-Week Session: June 13–Aug. 4
3rd Four-Week Session: July 11–Aug. 4
• Twelve-Week Session: May 16–Aug. 4
• August Three-Week Session: Aug. 8–Aug. 25

Web registration:
Summer course registration is now available.
Summer registration may be completed through the first day of the course on a space available basis.
Contact us via e-mail at summer@montclair.edu.

Summer 2011 Tuition and Fees**

Undergraduate:
NJ Resident: 1st credit: $381.77 Ea. Add'l credit: $315.27
Non-Resident: 1st credit: $607.22 Ea. Add'l credit: $540.72

Graduate:
NJ Resident: 1st credit: $638.99 Ea. Add'l credit: $572.49
Non-Resident: 1st credit: $911.53 Ea. Add'l credit: $845.03

Payment Plan Available
For additional rates and fee schedules, visit montclair.edu/bursar.
Financial Aid may also be available.

* The University reserves the right to cancel courses, change faculty and/or room assignments, modify its calendar, and make adjustments to the availability of the Web registration system.

Last week was a good one for fans of DC comics and good comics in general. Leading the charge was DC with “Birds of Prey” #11, a stand-alone story of two star-crossed lovers, Catman and Huntress, a villain and hero who could star in their own romance comic. The magic of Gail Simone’s plot and dialogue would fizzle without Pere Pérez’s art, conveying more emotion and feeling in one panel than most get in an entire issue. “Booster Gold” #43 ended Keith Giffen and JM DeMatteis’ 12-issue run on the comic, in which they added characters and texture to Booster’s mythos. As always, Chris Batista’s highly-detailed art made every page a pleasure to look at. “Generation Lost” by Judd Winick and Fernando Daguno builds up to a very exciting conclusion to that storyline next week. Daguno’s art is beautiful and Judd Winick’s mysterious plot gets cleared up a lot while setting up the Justice League International/Maxwell Lord conflict even more. Next week promises to be full of explanation, as “Generation Lost” and “Brightest Day” end concurrently, hopefully clarifying some points of both series’ plots. “Red Robin” #22 continues the judgment on Gotham event started in the final issue of “Azrael,” and Tim Drake’s trial seems to be the easiest to achieve the moral high ground in – save the people trapped in a burning church – but the villains find a way to turn it into a loss. Such is the life of a superhero, it would seem. Of course, no week is perfect and this is no exception. “Titans” is a terrible book that manages to get enough sales for continued publication merely by shock value. The writing occasionally rises to the level of average, but only rarely, and the art is the only redeeming feature as it remains consistently adept at conveying the disasters that take place due to the character’s actions and the disasters of the shoddy writing. Overall, it’s a good week to be a DC fan.
The regular season in the Skyline Conference was a month-long shootout, but both of its official ends, the fourth and final playoff spot in the conference tournament next week are finalized. Farmingdale State, Montclair State, New York Maritime and Keansburg battle it out for the conference championship.

The 2011 NFL draft is less than a week away, ending an offseason of chaos, speculation and thousands of people believing they're college football experts.

With the help of the Internet, ESPN blogs and twitter, the pre-season leading up to the draft has become more and more popular with each passing year. Fans take the name they heard heard and argue where such player should go, with some video highlights to back themselves up and a 24/7 SportsCenter splash to increase their knowledge. Everyone seems to know which draft is going to unroll months before it takes place. But with the evolution of the game over the past few years and a lockout that was sealed on Tuesday night in a game between Keans and Richard Stockton, it's hard to gather just how this year's draft will end up.

Draft experts are predicting anywhere between four and seven defensive linemen that draft experts believe may be taken in the first round of the draft. Teams also can't sign any players they select in the draft until after the lockout is lifted. Teams in need of a high draft pick for Philadelphia backup quarterback Carson Palmer. These teams are now forced to pour more resources into the team. But with the evolution of the game over the past few years and a lockout that was sealed on Tuesday night in a game between Keans and Richard Stockton, it's hard to gather just how this year's draft will end up.
The Women’s Skyline Conference Tournament bracket was set on Tuesday night as the regular season concluded with a number of exciting games, one of which was MSU’s 20-9 victory over Farmingdale State that helped the Red Hawks capture home field advantage in the postseason.

The Red Hawks enter the 2011 conference tournament as the defending champions. They will be heavy favorites again this year, as MSU has won the Skyline Championship four of the last five seasons. In outscoring their conference foes by a combined 143-44 this season, they have proven to be the dominant force in the conference again.

Tuesday night’s battle between the Red Hawks and Farmingdale State may have been a preview of this year’s conference championship game. The Rams were the team that defeated the Red Hawks in the conference championship in 2009, the only season since 2006 that MSU has not won the Skyline. Farmingdale State, however, was not the only team other than the Red Hawks to manage a win over MSU this season, the second highest total for teammates in the Skyline Conference. Henderson and Delfini have combined for 82 goals this season, second highest total for teammates in the Skyline Conference.

Senior Kayla Henderson, junior Cora Delfini and junior Maggie Fallon celebrate a goal from earlier this season. Henderson and Delfini have combined for 82 goals this season, second highest total for teammates in the Skyline Conference.

Meanwhile, the Roadrunners are the only team other than the Red Hawks to average less than 10 goals allowed per game. They have done so by allowing the fewest shots on goal in the conference, playing a tough containment defense. A team that plays well in their own end is always dangerous and the Roadrunners are hungry for their first conference title.

However, Montclair State enters the tournament with the best all-around team and with the most postseason experience. After a showdown with the number-one team in the country, TCNJ, on Friday, they will go home and await the start of their postseason. They will host either Kean or Mount St. Vincent at Firemen’s Field on Thursday, April 28 in the semifinals the last two seasons.

Mount St. Vincent has also not been as strong as in recent years, however. The Dolphins were frequently a top four team in the conference in the past, but not as strong as in recent years. The Roadrunners are the only team other than the Red Hawks to defeat the Dolphins to advance to the semifinals. However, Kean’s program has never been as strong as in this past. The Cougars have not been in the Skyline Championship game since 2008, falling in the semifinals the last two seasons.

It was a case of déjà vu yet again for the MSA softball team, this time unfortunately dealing with a loss. Montclair State dropped its second straight one-run game with a 4-3 loss to Oneonta State in 12 innings at Yogi Berra Stadium on Monday afternoon. It was a particularly tough defeat for the Red Hawks to swallow as they blew a 7-3 lead. Montclair State started to come back with two runs in the fifth and sixth innings to come within two at 9-7. However, their rally was cut short and Rowan scored their final run in the top of the seventh inning to make the final score 10-7.

Despite suffering their first NJAC loss of the season, the Red Hawks still lead the conference standings by a full two games, so finishing in first place could prove to be huge for the Red Hawks. Unlike Oneonta State, who removed starting pitcher Ken Smith after five, MSA elected to keep Hille in the game long after. It was a move that backfired significantly one-out double that just about brought Himmelfarb home (who had earlier reached base via a single). However, their rally was cut short and Rowan scored their final run in the top of the seventh inning to make the final score 10-7.

Despite suffering their first NJAC loss of the season, the Red Hawks still lead the conference standings by a full two games, so finishing in first place could prove to be huge for the Red Hawks. Montclair State will be back on the field on Thursday, April 21 at 3 p.m. when they play Kean University in a conference double header in Union.

Junior pitcher Sean Hille held Oneonta State scoreless through seven innings in Monday's loss before wearing down in the sixth innings to come within two at 9-7. However, their rally was cut short and Rowan scored their final run in the top of the seventh inning to make the final score 10-7.

It was a case of déjà vu yet again for the MSA softball team, this time unfortunately dealing with a loss. Montclair State dropped its second
Mickey McGraw making solid contact with a pitch earlier in the season. McGraw is currently batting .286 with 20 hits and seven RBIs in the 2011 season.

At his crucifixion, not even Jesus’ closest followers would have called him a hero. The man they thought was the Messiah was being executed. End of hopes. End of a dream.

But something happened. Three days later, his body was not in its burial tomb. That night, he physically appeared to his disciples. He showed them all of the Scriptures that foretold that he would die for the forgiveness of sins and then rise from the dead.

But that’s not where the story ends, or at least it doesn’t have to. Jesus said, “I am the resurrection and the life. He who believes in me will live, even though he dies.”

If we place our faith into Christ and invite him into our heart and lives, He will indwell us—living in and through us. And “though we die” we will live again with Him—forever.

For Christ cannot die, nor can we (spiritually) if he dwells in us. Simply invite him into your heart in silent conversation with God (prayer). This is the good news of the resurrection, that through Christ we have eternal life.

Men's Lacrosse Clinches Playoff Spot

With playoff positioning on the line, the Montclair State men's lacrosse team took care of Mount St. Vincent on Saturday afternoon. The team, which is ranked third in the Skyline Conference, is now 8-0 in the conference and 10-3 overall, in this very game during the 2009 season.

"We were all definitely looking at this game as revenge," senior attacker Cora Delfini said. "They beat us on their field two times during the 2009 season, one being the Skyline Conference championship game. That was the last time we were on that field and that really fed up for this game."

The first five minutes of the game proved both teams were alive and ready to play. Delfini and sophomore attacker Kailie Beal wasted no time putting MSU on top with a 2-0 lead within the first 44 seconds of the half. In the moments to follow, Farmingdale responded with a goal to cut the Red Hawks' lead to 2-1. After another Montclair goal, the Rams added a pair to tie it up at 3-3, with 1:42 still remaining in the half.

Farmingdale took the lead at 4:24, off a free-position shot by co-captain and senior attacker Justine Rothar. This was the Rams' final goal of the half. Montclair followed with an eight-goal run. Senior attacker midfielder Karla Hembree, sophomores attacker Kailie Beal and Delfini each added a pair while junior attacker Maggie Fallon and senior attacker Meghan Stites added two solo goals to put them up 13-4 heading into the break.

Within the opening minutes of the remaining period, the Rams added an unassisted goal by sophomore attacker Carley Meth, but the Red Hawks would not allow that to happen. MSU added three more tallies in the second quarter, with three goals in the fourth quarter as they pulled away for the 20-9 win over Farmingdale State on Tuesday.

The Red Hawks ended their Skyline Conference season perfectly with a 20-9 victory during a rematch at Farmingdale State Tuesday afternoon.

The two teams met in the Skyline Conference Championship game as the Red Hawks set to avenges their last two losses on the field. The Rams (6-6 overall, 6-2 conference play) beat the Red Hawks, new 8-0 in the conference and 10-3 overall, in this very game during the 2009 season.

"We were all definitely looking at this game as revenge," junior attacker Cora Delfini said. "They beat us on their field two times during the 2009 season, one being the Skyline Conference championship game. That was the last time we were on that field and that really fed up for this game."

The first five minutes of the game proved both teams were alive and ready to play.
