The Montclarion

Students Await New School of Media

Montclair State University’s Board of Trustees has approved the creation of a new School of Communication and Media set to open in the fall semester of 2012. The School of Communication and Media will combine existing degree programs with new offerings to accommodate the rapidly changing communication industry. The School of Communication and Media will offer Bachelor of Arts degrees in Communication Studies, Television and Digital Media and Communication and Media Arts. The school will also offer a Bachelor of Fine Arts degree in filmmaking and a Master of Arts in Public and Organizational Media.

Female Student Assaulted

A female student narrowly escaped an assault by two males in the lower level of the Student Center Annex on Dec. 16, 2011. Grabbed from behind, the victim broke free after almost being dragged into a bathroom. The case is currently under investigation. “It is unknown what the intention of the individuals was, as they said nothing,” said Lt. Kieran T. Barrett. “There were no witnesses to this incident or further description of the subjects from any other person. The Detective Bureau has worked tirelessly to canvass the area, review video and interview to attempt to get a clear indication of this assault and will continue to do so.”

After the victim escaped, she met with friends who later encouraged her to contact the police. The men, currently unknown, are believed to be in the area at the time of the assault.

Blanton Hall Renovation Raises Health Concerns

A $10.4 million renovation to Blanton Hall is now underway, but at what cost to students? Clouds of dust and the piercing sounds of jackhammers greet the brave souls who dare to venture to the University’s Health Center located on the second floor of Blanton. Visitors to the Health Center must walk through construction areas and down twisted corridors on route to the cramped offices of the health center. “It was hard to feel like I was getting adequate treatment while such loud construction was going on,” said Dan Truitt, a junior who has recently visited the health center under these conditions. “I definitely felt unsafe by having to walk by [active] jackhammers in order to get up to the health center,” he said.

Despite ongoing construction, Blanton Hall is in preparation for a Fall opening.

University Launches PaperCut Software

Print from Anywhere with New Page Limits

The new PaperCut program is designed to make printing an easier process. Students can borrow a laptop with software needed for their courses. This enables them to research anywhere on campus. With PaperCut, students will also be able to submit print jobs from virtually anywhere on campus using an Internet-based application. They can keep track of their printing with a personalized meter that lets them know how many pages they have printed.
On Dec. 13: Matthew Groszew, 23, of Denville, and Dylan Thomas, 19, of Levittown, Pennsylvania, were charged with possession of marijuana and drug paraphernalia while in Bohn Hall. They are scheduled to appear in Little Falls Municipal Court.

On Dec. 14: Two residents of Basie Hall reported an unknown male knocking on their doors early in the morning and trying to gain entry. This matter is under investigation.

On Dec. 16: A male resident of Einstein Hall was a victim of a bias crime. This matter is under investigation.

On Dec. 17: Daniel Avento, 22, of Montvale was arrested for disorderly conduct while at the Red Hawk Diner. He is scheduled to appear in Little Falls Municipal Court.

On Dec. 19: Dave Berkefeld, 22, of Stanhope, was arrested for filing a false police report while in Alice Paul Hall. She is scheduled to appear in Little Falls Municipal Court.

On Dec. 10: Christian Bustamante, 20, of New Milford, Michael Yim, 19, of Morris Plains and Nicholas Steinbach, 20, of Edison, were arrested for conspiracy in their involvement in stealing hang tags. They are scheduled to appear in Little Falls Municipal Court.

On Dec. 21: A female employee reported the theft of a cash box from her unsecured desk drawer inside of Calcia Hall. This matter is under investigation.

On Jan. 12: A male employee reported a fraudulent Twitter account registered under his name. This matter is under investigation.

On Jan. 15: A female non-student reported being sexually assaulted at Hawk Crossings. This matter is under investigation.

Anyone who has information regarding these incidents is urged to call the police station from any campus phone at T-I-P-S (8477). All calls are strictly confidential.

The Departments of Modern Languages, Spanish and Italian and Linguistics have relocated to their new home in Schmitt Hall. Formerly Finley Hall, Schmitt opened its doors this semester to students at Montclair to ease the overpopulation of majors in Dickson Hall, son of the father of the college.

The Montclarion

The Montclarion

During the 2011-12 period, Blanton Hall was closed in order to renovate it until the Student Health Center is reopenable. This will be completed by next January 29, 2012. The newest, and final, set of renovations began on Jan. 3, 2012 and are expected to be completed by July 27, 2012. The renovation of Blanton Hall, during the present Academic Year 2011-2012, said Bressler.

The renovation will also include, “converting existing rooms to be ADA-compliant suites, renovating all student room bathrooms, replacing the corridor flooring and lighting, painting the student rooms and corridors, replacing the closet door with new wardrobes in all student rooms, re-finishing the student room doors, replacing building signage, upgrading the fire alarm system throughout the building, constructing a new entrance into the Roadsides Hall portion of this building and, adding a new security desk and renovate the first floor student lounge area.”

Bressler said that students of Montclair should auto- matically prompt to be installed onto their computer. Once they arrive at the computer, students can then log onto the program on their computers and be able to save their print jobs to a queue. Once they arrive at the computer, they can then choose to print their assignments directly from their queue.

The project is funded under Montclair State University’s Housing Plant Funds.

pages they have printed.

In addition, students now have a limited amount of pages that they are permitted to print each semester. Active students will each be given 800 single-sided prints or 1,142 double- sided prints. The printed pages allow- ance was determined from studies of well-established prisons programs at other colleges and universities and was determined with the intention of help- ing the campus stay “green,” as stated in an e-mail from the Office of Informa- tion Technology (OIT).

One of the most important features that students are excited about is being able to print from their personal computers. Once logged into the printing services possible,” said Edward Chapel, vice president of the IT Department.

Students test out the system to make sure it fits their needs. The “information technology division is al- ways committed to providing students with the best and most flexible ser- vices possible,” said Edward Chapel, vice president of the IT Department.

We believe this new printing application will provide students with all of the services, where you can then log onto the program on their computers and be able to save their print jobs to a queue. Once they arrive at the computer, you can then choose to print your assignments directly from your queue.

Although there are many perks to the new program, many students are still upset about the limitations to the amount of pages they can print. “Printing should be something that students should be able to do freely and is something that should be given to us,” said Andrew Lopez, freshman. “We already pay for tuition and fees, as this something that should be included in what we pay. It should be a privilege that students of Montclair should auto- matically have.”

However, the IT Department is confi- dent that students will be happy about the new changes they are introducing this semester. They tested the program out for an entire term and ran it with some students. The department also met with students from SGA and had students test out the system to make sure it fits their needs.

The “information technology division is al- ways committed to providing students with the best and most flexible ser- services possible,” said Edward Chapel, vice president of the IT Department. We believe this new printing application will provide students with all of the services they need. At the same time, it will allow the students and the university to be environmen- tally efficient and effective.”

Professor Jefferson Gatrall, who teaches Russian for the Modern Lan- guages Department, is excited of the new technology. “I think the technology is going to allow us to more fully immerse in an immersive environment.”

Professor Diana Guemarez-Cruz of the Department of Spanish and Italian highlights the benefit: “I like the fact that it has more light and it is convenc- ionally located,” she said. “More impress- ingly, we [Modern Languages, Span- ish and Italian, and Linguistics] are all situated together and can mingle more, exchange ideas more easily and pre- pare activities together.”

Dickson Hall separated Spanish and Italian, formerly located on the third floor, from Modern Languages and Lin- guistics which was located on the first floor. The combination of these three departments on one floor offers profes- sors and students the unique opportu- nity to bridge cultural gaps and learn in an immersive environment.

Alison Carter, a junior and linguistics major, is excited for the changes of view- ing print, you can then choose to print your assignments directly from your queue.

Although there are many perks to the new program, many students are still upset about the limitations to the amount of pages they can print.

Printing should be something that students should be able to do freely and is something that should be given to us,” said Andrew Lopez, freshman. “We already pay for tuition and fees, as this something that should be included in what we pay. Communication. Students have the option to remain in their current program with no changes or switch to the new one, which has a slightly different core group of classes and more flexible electives.

"I'm glad Montclair is moving toward new technology and giving new opportunities to media students," said Jon Aronoff, current graduating broadcasting major. "I think being so close to New York City, I think it's going to allow students to get that extra added real life experience."

"The School of Communication and Media will offer a comprehensive program that is academically superior and reflective of the emergent digital technologies that have resulted in unprecedented cultural and global interactivity," said Montclair State University President Susan A. Cole in a press release. "This initiative underscores the University's commitment to aligning our programs with evolving critical workforce needs in the state and beyond."

The School of Communication and Media will give students the option to have a broader based educational experience. The University's development of outside media partnerships will give students a chance to work alongside professional media operations as part of academic life on campus.

"I think the new school is a response to a changing broadcast communication industry," said David Sanders, chairperson of the broadcasting department. "It's our feeling that people entering the field today need to have a very broad background that can take them in many different directions as professional opportunities present themselves."

"I think it’s going to be beneficial for the respective majors in the long run," said Rob Dickerson. "I've seen [communication] majors taking a couple courses in our program as it is. The whole thing is going to provide a really streamlined and well-rounded education for everybody. I'm definitely very excited to see the new school get off the ground."

In making these curricular and organizational changes within the University's communication program, Montclair State is responding to scholarly changes that have influenced the study of communication," said Geoffrey Newman, dean of the College of the Arts in a press release. "This is an exciting time to be engaged in the field of communication, particularly with the University's accessibility to the nearby media markets of New York City and northern New Jersey."

In addition to the School of Communication and Media, the University recently completed a major technology upgrade of its DuMont Television Center to a state-of-the-art high-definition studio, which includes the most technologically advanced equipment. The University also announced that it will become the new headquarters for NJTV's news division and will provide studio space for the public media network's nightly news broadcast.

Think Before You Print!

Save trees and money when you print smart with PaperCut.

PaperCut is a print management software system that lets Montclair State’s Division of Information Technology help you manage and monitor your printing and printing costs.

Start printing smart today with PaperCut—and by following these tips before you push “print.”

1. Think before you print! Do you really need to print this email, webpage, or article?
2. Use duplex printing.
3. When printing a slide show, print multiple slides per page.
4. Always use print preview to finalize your document before printing.
5. Save research material by emailing the URL to yourself.
6. If your document has not printed yet, do not reprint. There may be multiple jobs ahead of yours.
7. When printing study guides or class notes, reduce margins and font sizes to lower page counts.

As the student center is so heavily occupied, there are obvious precautions that must be taken.

“In all the years I’ve spent in Montclair, I’ve learned it’s better to be safe than sorry; sometimes a little too safe and then it becomes paranoid,” said Justin Roes, 22, a student who spends a great deal of his free time in the Student Center Annex. “This incident doesn’t concern me too much other than the fact that I should take extra care when roaming the Montclair University grounds.”

Most campus clubs and organization offices are located in the lower level of the Student Center. “As an organization that is here to serve the student body, the SGA is greatly alarmed by this incident,” said Ryan Fanning, Press Secretary, on behalf of the SGA.

“We will work with administration to explore any possible solutions that can better assure student safety.”

Students are encouraged to practice safety habits and operate on a buddy system if personal safety feels threatened. As information on this event continues to develop, students will be on guard.

“I am not that surprised this happened because this is an open campus and there is lack of security; such as surveillance cameras,” said Gramescu.

“I definitely feel that my safety is compromised. I don’t like being by myself on campus at night to begin with, and this situation doesn’t help,” he said.

Students are strongly encouraged to report any suspicious behavior to the University Police at (973) 655-5222, the confidential TIPS line on campus at extension 8477 from any phone on campus, or utilize the TIPS text alert system. More information on this can be found at http://www.montclair.edu/socialnet/.

Some students are taking extensive caution and purchasing mace.

The new year is finally here! It brings a new slate of opportunities and potential for change and friction. Let’s face it, the vow to lose weight is always a favorite at New Year’s. We're always into the short-lived resolution. We have all heard it too often: promise to lose the love handles and guts, and pants. The memberships that are bought with great intentions. Yet, the unrealistic diet regimes continue to plague us, fostering what become unsustainable plans.

As college students, we are at a pivotal stage in which we develop habits that will remain throughout our lives. The ultimate promise to stay healthy, strong and fit to feel our best should be the recalibrated resolu-
tion for 2012. We are all inundated with images of celebrities shelling pounds for variety through unrealistic means; unreasonable diets consisting of only apples are unhealthy standards that are impossible to uphold. Instead of dieting, we must form a lifestyle that we can keep up forever. Make 2012 the year you want to stay healthy for your whole life. Here is a compilation of tips to help you in the vow to better your health!

1. Prepare yourself before you wreck yourself. How many times have you stuck with a healthy eating plan, hit the gym, and then found yourself and an empty sleeve of Orees together in bed? Surrounded by crumbs, you beat yourself up. It’s happened to the best of us. To prevent the hunger pangs that make you reach for the unhealthy food, preparation is needed. Have healthy snacks on hand, and cook meals ahead of time so you’ll have your hands in the cookie jar won’t be an option.

2. CHUG CHUG CHUG! Drinking eight glasses of water a day is one of the best things we can do for our bodies, not only for our skin’s appearance, but to fill up on calorie-free liquids, cutting down on caloric intake. Start your day with hot water and lemon. According to dieticians, it revs your liver, helping to get rid of toxins. Afêtre the holidays I’m sure we can all use that.

3. Greens on deck Whether you choose to drink your greens in a smoothie, make a colorful raw salad or sauce them, greens are good! With such a wide variety, try them all.

4. Ice ice baby For us college students, it’s hard to buy fresh veggies and fruits. They go bad quickly and you wind up throwing away your produce and pay-
checks. Buying frozen produce is the next best thing to fresh since they are flash-frozen at the peak of ripeness. Frozen fruits are also great for morn-
ing smoothies and frozen veggies are yummy sautéed in a pan with a driz-
zel of olive oil, salt and pepper. You’ll need to buy fresh veggies and fruits. They go bad quickly and you wind up throwing away your produce and pay-
checks. Buying frozen produce is the next best thing to fresh since they are flash-frozen at the peak of ripeness. Frozen fruits are also great for morn-
ing smoothies and frozen veggies are yummy sautéed in a pan with a driz-

Food Allergies vs. Food Hypersensitivities

Lioness Doyle

At Montclair State University alone, women make up 60 percent of the student body. Unfortunately, they are considered the 51 percent minority, a bizarre contradiction that implies the presence of female students is a statistical anomaly and politically vulnerable while still making up the majority of the population. Aside from the prevalence of women on campus and the mere facts that you and I are women, do you spend the first six weeks in utero as a female, why should women’s issues even occupy a column in The Montclarion? Why am I wasting your time?

Feminism is defined as the social, economic and political advocacy of the equality of the sexes. Simple enough. The common misconceptions of feminism have unfortunately clouded this unoffensive mission statement by convincing many people that feminists must hate men, hate shaming and love burning bras. I’ll be defying more deeply into those misconceptions of feminism (these femi-ist’s) in my installment next week. But for now, let’s go over what it actually means when the girl next to you on the shuttle or at Cafe Diem says she’s a “Women’s Studies” major or, scarier yet, a real, live feminist.

Feminism is about more than women’s issues; it affects anyone with a gender or a sex drive. Sexual inequality and gender-based dis- crimination are alive and well even today. Here are some remarks of why this is an issue relevant to all individuals: a post-feminist apologetic climate. When happened? What is the right vote to until 1920, 50 years after Af- rican Americans. Suffragettes were the leaders who had to look forward to a life of ridicule and ostracism when they were released. Maybe your high school history class covered some of this, but did anyone ever go over in exacting detail the forced feedings these women went through behind bars during hunger strikes? All for only 55 percent of women to vote in the last presiden- tial election.

With the upcoming presidential election, it’s important to consider the process of four years when the big issue was racism versus sexism, Hillary vs. Obama. Think about the treatment of Hillary Clinton in com- parison to Sarah Palin and the jokes that surfaced around their perceived attractiveness. Consider how many of your friends may have scoffed at the idea of having a female president, either because of some PMS joke or having an arrest warrant who re- minds them too much of their moth- ers. In the end, who won that elec- tion?

It took until the 1970s for policy makers to realize that rape can occur within a marriage and the 1980s for them to train police of- ficers to not ignore rape. This is all within your parents’ life- times. To this day, on average, women make less money than their male counterparts for the same work. Asian women make $0.92, white women make $0.80, Latin Ameri- can women make $0.89 and Latina women make $0.80 to the average white male $1.00.

Food Allergies vs. Food Hypersensitivities

Eight percent of American children and three to four percent of American adults are affected by food allergies, according to the Centers for Disease Control and Prevention (CDC). The seven most common food allergens include shellfish, tree nuts, peanuts, seafood, milk, soy, eggs and wheat. With significant increase in food allergy prevalence over the last 10 years, it is important for the general public to note key distinctions between what is considered a food allergy and what is considered a food hypersensitivity.

A food allergy is an immunologi- cal response to specific food pro- teins, or allergens. The human body is programmed to recognize foreign invaders as bacteria or viruses. Def- erences known as antibodies attack these invaders. In a similar fashion, sometimes the body recognizes food proteins as foreign invaders. When the allergen is ingested, an allergic antibody called Immunoglobulin E is released, attacking the allergen while releasing a large amount of the chem- ical called histamine. Histamine trig- gers allergic symptoms ranging from mild to lethal. These symptoms include hives, itching or eczema, runny nose, sneezing, tingling or itching in the mouth, vomiting, diarrhea and at- tress including nausea or vomiting. Anaphylaxis is the most severe ad- verse reaction resulting in simultane- ous multi-system body reactions in- cluding swelling of the throat, tongue, lips, throat, swelling rapid in blood pressure, and disorientation. Immune system administration of epinephrine must

The CDC names pregnant women, older adults and persons with chronic illness- es as the most susceptible groups to fall ill from food poisoning.

Food poisoning is a hypersensi- tivity due to intense dislike from past psychological, social or cultural experiences with food. In this case, there is no immunological, physical or chemical reason food cannot be processed appropriately. If anyone has fallen victim to spending part of the night over bathroom porcelain, a food aversions to the sight and smell of your miser of choice may emerge over a lifetime. A theory proposed by David Sore, a Ph.D. student in psychology at Montclair State University, suggests that a food afer- sion is the brain’s way of keeping you away from a substance that once poisoned your body. Food aversions are very complex by cannot be tied by any biochemical mark- ings. Medical testing or traced back to a physical source.

Food is a physical response to food that is not of allergic consider- ament by any biochemical mark- ings. Medical testing or traced back to a physical source.

Nobody dreams of having multiple sclerosis.

Some dreams are universal: scoring a perfect 10 on your last attempt to win the Gold medal, standing on the podium as the national anthem fills the arena. Finding out that you have MS is not one of them.

Multiple sclerosis is a devastating disease of the central nervous system where the body’s immune system attacks the insulation surrounding the nerves. It strikes in the prime of life — and changes lives forever.

This is why the National MS Society funds more research and provides more services for people with multiple sclerosis than any organization in the world. But we can’t do it alone.

To help make the dream of ending MS come true, call 1-800-FIGHT MS, or visit us online at nationalmssociety.org.

Welcome Back!

The Montclarion is looking for cartoonists!

Email msuproduction@gmail.com for more details!
When Al Gore invented the Internet in the early ’90s, his dream was of a world where all people, young or old, rich or poor, coherent or stumble, could travel in perfect harmony down the information superhighway judged not by the content of their character, but by the timeline on their Facebook pages.

Now Congress is trying to pass a bill that will prove to be more damaging to the First Amendment than all of the people who have defended their outrageous actions with said amendment throughout U.S. history.

On the surface, the Stop Online Piracy Act, or SOPA, seems generally harmless, proposing to stop the flow of illegally shared U.S. copyrighted information, punish the Communists for posting YouTube videos on your Facebook pages, and basically be a box-checking approach to your character, but by the timeline on their Facebook pages.

This bill, if passed, would give a small group of people the power to enforce the Internet under their own values and essentially create a caste system in virtual space either you have supreme power or you are just another n00b.

In a self-policing reality like the Internet where people have developed their own methods to circumvent the Internet where people have developed their own methods to circumvent the Internet where people have developed their own methods to do so, the Stop Online Piracy Act demonstrates once again how unprepared we are for the things we know we can’t control.

The Stop Online Piracy Act is a not-so-hideous attempt by people to have the power to control the Internet where people have developed their own methods to circumvent the Internet where people have developed their own methods to do so.

With SOPA, corporations, organizations or even various government offices will have the power to order an Internet service provider to block an entire website simply based on allegations of copyright violation. If this doesn’t scream “abuse of power,” then you just aren’t listening closely enough.

So, all of you pirates out there, your best advice would be to firmly down-load as much content as you can and stockpile it for the dark ages to come because when people want to watch the third season of Lost, but can’t afford to pay the $60 to buy it, they’ll be knocking on your door to “borrow it from you.”

While we applaud those who are trying to save our souls, we really doubt that the University is unprepared for a serious emergency; the bomb threats in October’s snowstorm, that make us wonder about the University’s back-up plans.

Namely, do they have any?

We don’t seriously doubt that the University is unprepared for a serious emergency; the bomb threats in October’s snowstorm, that make us wonder about the University’s back-up plans.

Overzealous Yoggizing May Lead To Injury

World looks on in horror as health craze makes a few people less healthy

Like some of you reading this article, I'm something of a fitness nut. I go to the gym every day, my diet is packed with whole grains and protein and I'm an extremely active individual. I'm outgoing, spontaneous -- and, before this starts to sound like a dating bio, I'll go to the point -- and I'm usually up for trying anything.

Which is why, about six months ago, I decided (having never taken a yoga class in my life) to try Bikram Yoga.

Colloquially referred to as “hot yoga,” the class goes on for approximately 90 minutes and all the while, the instructor is trying to get both of your legs behind your head while you try not to slip on the solid inch of sweat that has accumulated around you on the floor.

All joking aside, Bikram Yoga was one of the most intense, yet enlightening experiences of my life.

But not everyone walks away from the class with the same effects on their minds and bodies (in fact, some have difficulty walking away at all).

Recently, the dangers of yoga have been at the forefront of the media’s attention — and not without reason. Yoga, done incorrectly, can actually be very harmful to the human body.

Like most other popular fitness programs, yoga is a vigorous and physically demanding activity, one that requires substantial flexibility, stamina and/or muscle strength.

What did I learn from my “hot yoga” experiences? That the human body can twist in ways I didn’t know it could, that I can sweat much more than I thought I could and that 90 minutes of supposedly serene and peaceful postures is actually extremely grueling.

Now, you might be thinking: okay Tom, Bikram Yoga is different than other types of yoga because of the altered room temperature. But the truth is, the difficulty of yoga depends solely on the individual performing the activity.

According to the New York Times article, “How Yoga Can Wreck Your Body,” “not just students but celebrated teachers too, injury themselves in droves because must have underlying physical weakness or problems that make serious injury all but inevitable.”

I consider myself relatively fit, but I have pastel tendons in both of my knees and chronic lower back pain.

I left Bikram Yoga painfree, relaxed and hell-bent on sharing my newfound skepticism (though I left those pounds on the floor in the form of a pool of sweat, but not everyone is so lucky).

One of the main things I remember, my instructor — a dreadlocked, hemp-strung hippie — telling everyone: “work at your own pace if you can’t do something, don’t force yourself.”

Her message was to have fun — and be one with nature, or something like that — but as I looked around the room I still saw many people struggling to elevate their bodies skyward while sustaining the entirety of their weight with their necks.

Staying active, healthy and in shape is very important in today’s society, but you can really call it staying healthy when you’re injuring yourself beyond repair by attempting insane poses that the human body probably wasn’t meant to be in.

Candidates Make Reality Stars Look Tame

Extreme Americans are extremely frightened in election year

There have been, to date, 23 Republican debates. With eight more planned, we will be left with 29.

That’s an average of just under the real Real World. Las Vegas, suspiciously.

This entire season has been a bit messy, with many characters recycling the same tired arc: the realization, what has men and finally a fast following "sweeting, pinkish lumps. Republicans boast a plump arrangement in shape: pulled muscles, twisted ankles that we’ve always associated with staying fitness trend we also remember the perils of this, but a bio, I’ll get to the point — and I’m usually having never taken a yoga class in my life to try Bikram Yoga.

Colloquially referred to as “hot yoga,” the class goes on for approximately 90 minutes and all the while, the instructor is trying to get both of your legs behind your head while you try not to slip on the solid inch of sweat that has accumulated around you on the floor.

All joking aside, Bikram Yoga was one of the most intense, yet enlightening experiences of my life.

But not everyone walks away from the class with the same effects on their minds

that there is. They sag like wax figurines forgotten in the sun, shredded into various stages of decline, and their televised discourse is equally as unappetizing.

Rick Perry is a particular doorknob, and he understands when it gets its name. The room is heated up to a staggering 105 degrees Fahrenheit with the humidity 40 percent or higher. For all intents and purposes, the room is #f**king hot!

The class goes on for approximately 90 minutes and all the while, the instructor is trying to get both of your legs behind your head while you try not to slip on the solid inch of sweat that has accumulated around you on the floor.

Get Down to Dubstep: A Flash Flood of Colour: Enter Shikari’s new album delivers life lessons

Christine Byczkiewicz
Staff Writer

For those dismissive of the dubstep genre, even in the slightest, take this into consideration. The post-hardcore band Enter Shikari does not use such electronic elements just to entertain and/or make listeners dance, but to inform and educate, especially on their latest album, A Flash Flood of Colour.

Here are some valuable lessons that will never get old: No one is too big or too small to help those in need, a lesson from “System...Mehlown.”

No matter how much one complains about human- ity, he or she still shouldn’t be just sitting back, but rather taking a stand, al- luded to in “Ironglue.”

Going through obstacles to reach your goal and learn- ing to take initiative and re- sponsibility instead of wait- ing until someone else takes action, especially when it is too late to do so is the main moral to learn from “Argu- ing with Thermometers.”

War and hatred not being the answer is easily learned through “Stalemate” and “Gandhi Mate, Gandhi.”

Instead of blaming one person for all the world’s problems, we are actually all to blame. Thankfully, we can still do something to help fix that and the people most ca- pable of bringing change for the better are those who hold no political power, a theme alluded to multiple times. The evils of some pride are the tale of “Hello Tyranno- saurus, Meet Tyrannicide,” and the values of loved ones in are explained in “Con- stellation,” which shifts from the political stand- point to a more psychologi- cal, emotional standpoint.

Utilization of such les- sons isn’t the only gem of this album, but also the uti- lization of different genres. From electronic to acoustic, to mellow singing to screaming in spoken word, all have appropriate effect on every theme touched upon. For example, in “Search Party,” there is an initial mellowness of vocals and electronic music so danceable that one may not realize how serious this track actually is until 2:20 into it, when vocalist Rou Reynolds (literally) yells out: “I know that we’ve got to find some- thing new!” followed by “All hands on deck/we’ve got to scrub these — — — out!”

“Gandhi Mate, Gandhi” uses almost every element fa- mous in Enter Shikari’s mu- sic. When Reynolds screams out of pure anger towards the majority of the human race, spoken word is provided by his band mates, reminding him to “Calm down, remem- ber Gandhi,” in reference to his non-violent protests. The only two tracks to provide a relatively steady tone are “Stalemate” and “Constel- lation,” both appropriate for their respective themes. Whether or not a listener is a fan of hardcore, dub- step or other forms of metal and electronic music, this is a project that has some- thing for everyone. It goes beyond simply entertain- ing and exemplifies life les- sons and universal truths.

Christine’s Grade: 5 out of 5 Stars

Maluca Mala
Asst. Arts Editor

Iggy Azalea’s is has been making some major waves on the In- ternet with dance tracks infused with freestyle, meren- gues, cumbia, and even hip-hop. Maluca Mala has got the right sea- sons and universal truths.

She’s grabbing attention with her hit single “Chinatown” from her debut mixtape, Ignorant Art. Maluca recently released a track with The Partyquad called “Lola (Cing Dan- gai)” that would have to be one of the sickest dance tracks I have ever heard!

If you’re looking for some much-needed spice in your life, Dominican princess Maluca Mala has got the right seasons to keep your tongue numb. This New York native, who is currently signed to Mad Decent, makes high en- ergy dance tracks that puts the WERKs into any function. Her debut mixtape Chino Fuad delivers an audio trip into New York nightlife that is infused with freestyle, meren- gues, vogue, hip-hop, cumbia, disco and house influences. Philadelphia DJ/producer Diplo works closely with Maluca and the two produce dance floor treasurers that are infectious and powerful. Her debut single “El Ti- gerazo” (available via Mad Decent) catapulted her into the spotlight and draws on her Dominican electro-mengueño roots. Maluca recently released a track with The Partyquad called “Lola (Cing Dan- gai)” that would have to be one of the sickest dance tracks I have ever heard!

Glamour, Glitz, and A Bygone Era in Film

Silent romance and beauty throughout The Artist

Alan Vallee
Arts Editor

The Artist, which saw a very limited release in November, has finally received if not a full-scale national release, at least one which makes it to Montclair’s own Clairidge Cinemas, purveyors of arthouse and independent films. A silent black and white movie about the era at the end of silent films and the beginning of the “talkies,” it is as revealing as any documentary could be.

The plot centers around George Valentin (Jean Dujardin), a star of silent films in the same vein as Rudolph Valentino, the “Latin Lover.” A superstar of the highest caliber, we are told almost everything we need to know about him within the first ten minutes: his ability to charm audiences, his love of his dog and above all, his pride. We are also introduced to a colorful cast, including an aspiring actress, Peppy Miller (Berenice Bejo), the boisterous studio boss (John Goodman) and the loyal chauffeur (James Cromwell).

Valentin’s character, upon being introduced to Peppy Miller, began an awkward adorable infatuation with her in a series of scenes which can only be described as sweet. Eventually, this pride of his brings him to a catastrophic downfall, as he refuses to make any films with sound and attempts to make his own silent film without any studio support and himself as the actor, director and producer. This film then fails in the face of a talkie blockbuster, which, in conjunction with the beginning of the Great Depression, caused his financial ruin, with his large mansion being exchanged for a tiny one-bedroom apartment. Eventually, he is redeemed by his former infatuation, Peppy, who has become the modern superstar and retained her love for his films. This leads to an eventual reconciliation and a surprisingly upbeat ending.

The use of black and white film, the ancient aspect ratio of 1.333:1 and the lack of audible dialog all would seem to be working against it, but due to the influence of director Michel Hazanvicius and the incredible acting from everyone involved, it was able to become an amazing movie. On Sunday, it won the Golden Globe for Best Picture, Comedy or Musical. Hopefully the accolades continue.

Rock Your Face Off On The Ride Home
Band puts the life back in pop punk

By Emilia D’Albero
Staff Writer

Pop punk may be on the decline lately, but in the small suburban town of North Haven, Conn. it is most certainly alive and well. Last weekend at the Webster Underground in Hartford, Conn., up-and-coming group On the Ride Home jumped, kicked and rocked their way onto the pop punk radar. Their fast-paced early-Fall-Out-Boy-meets-The-Swellers sound combined with the amount of sheer energy this band has makes them an incredibly unique act that is sure to get the audience on their feet and moving to the beat.

Drummer Mike Donta fearlessly led the group into songs like their own “Happy on a Dare,” with which they opened, as well as an incredibly accurate and awesome cover of Taking Back Sunday’s “Make-Damn-Sure,” to which the crowd was singing along with energetic frontman Jared Hunter. But Hunter is definitely not the only energetic member of the group; bassist Sean Robichaud and guitarists Brendan Sullivan and Richard Kim were constantly in motion on the stage, bouncing around from side to side, amp to amp and even sometimes into each other.

The vibe that On the Ride Home gives off in their live performance is similar to that of pop punk superstars New Found Glory, Fall Out Boy or even Good Charlotte — perfectly coiffed hair and heartthrob bassist aside, this band has it all: witty banter, catchy tunes and an energy that will eventually send them straight to the top of the charts.

On the Ride Home is definitely a band to see live; they will certainly impress you because, according to their Facebook fanpage, their main interest is “ROCKING YOUR FACE OFF.” What kind of person wouldn’t want that?

Emilia’s rating: 3.5 out of 5 rocked faces

Montclair Celebrates the 40th anniversary of 15-0 men’s cross country team

During halftime at the men’s basketball game against Kean University on Saturday, Jan. 7, the 1971 men’s cross country team was honored for their perfect 15-0 season. This extraordinary group is one of a select few Montclair State teams to finish a perfect season. What makes these men so special is that they didn’t just go undefeated, they won all 15 games that they played in ’71. The cross country team was the fourth team in school history to have a perfect season. The only three teams to accomplish this before them were the 1947, 1960 and 1964 football teams.

Since then, the 1982 football team and the 1989 men’s lacrosse team have been the only two other teams that have been able to achieve such an accomplishment.

Win Puts Men’s Basketball in Second Place in NJAC Conference

The men’s basketball team is having yet another successful season. The Red Hawks are currently 14-4 and stand in second place with a 4-2 conference record. Montclair State is only one win behind William Paterson. The Red Hawks’ most recent victory was over Rutgers-Camden. Montclair State dominated the Scarlet Raptors in a routing that ended with the Red Hawks up 72-53.

Montclair State jumped to an outstanding 18-0 lead in the first nine minutes of the game. After slightly reducing the lead throughout the rest of the first half, the teams went to the locker rooms with Montclair State leading Rutgers-Camden 27-18.

The Scarlet Raptors started to fight back in the second half. They were able to cut the lead to five and almost had a shot at taking the lead away from the Red Hawks for the first time all day. Montclair State quickly got its act together and exploded with 15 minutes left in the game. Within minutes, the Red Hawks were able to bring the lead back up to 17 points and they didn’t stop there. The Red Hawks didn’t let their guard down after almost losing the lead. Montclair State continued to pressure the Rutgers-Camden offense and capitalized on missed shots.

With just under two minutes left in regulation, the Red Hawks held an outstanding 24 point lead. The Red Hawks continued to play their hardest until the final buzzer rang. After getting off to a slow start, star forward and senior captain Andrew August had an amazing second half. The Raptors managed to hold August to a mere four points and four rebounds. That lack-luster first half definitely motivated August to step up his game going into the second half. August scored 18 points and grabbed five more rebounds in the second half.

The Red Hawks have seven games left in the regular season. All seven of them are conference games and four of them are home games. This works out for the Red Hawks because they haven’t lost a home game since Saturday, Nov. 26. Montclair State is set to Rowan on Saturday, Jan. 21 at 1 p.m.

Swim Team Makes a Splash Against NJIT

The men's swim team started the new year off right with a 108-76 win against New Jersey Institute of Technology. Only six days removed from their intense eight-day training trip in St. Croix, the Red Hawks won 11 events, five of them by first and second place finishes.

Junior freestyler Zak Winterberg won two individual events, edging out fellow Red Hawk Michael Volski in the 200 yard butterfly for a 1-2 finish with a time of 2:13.37. Lee would also be victorious in the individual medley with a first place time of 2:13.37.

"It wasn't the most amazing meet, but we swam solidly. I think Vassar should be a tight, they match up well with us," said McLaughlin.

"We just want to build on the hard work that was done first semester, try and keep focused. The season starts to get long this time of year. We just get to keep our eyes on the finish line." said Ryan Fanning.

Swimming & Diving

Game of the Week

The women's basketball team plans on extending its win streak to four games when the Red Hawks take on the Pros this Saturday. Montclair looks to avenge last year's 71-73 road loss to Rowan.

Who's Hot This Week

Andrew August
Forward — Men's Basketball
August had a game-high 22 points, five rebounds and four assists in Montclair's 72-53 loss to NJCU. August then recorded another 22 points along with nine rebounds and five assists as Montclair defeated Rutgers-Camden 72-53.

Melissa Tobie
Guard — Women's Basketball
Tobie helped Montclair bounce back after two close home losses with 17 points, seven rebounds, one assist and five steals in the Red Hawks' win against Rutgers-Camden. Tobie also recorded 25 points and seven rebounds in Montclair's win against Stevens to give the Red Hawks their current winning streak.

Ice Hockey

The Montclarion
The undefeated Pioneers of William Center. The Red Hawks took on they returned to the Panzer Athletic spectacular homecoming when 55 and freshman standout Melissa dominated Hamilton University 70- bounds. The next day, the Red Hawks game with 21 points and 10 re- dominated Hamilton University on Dec. 30 during the high note with wins over Widener University and Kean University. After the close loss to William the contest, but ultimately fell 5-3. After the game, Doug Kubek said, “Fox gave us a chance to win this game. He kept us in it, but both teams played hard and we stuck with them the whole game and we’ve shown a lot of improvement since last season.”

Women’s Basketball Flying High

The Red Hawks currently in fifth place in the SECHL standings.

Women's basketball team has been very successful over the past month. After losing to William Paterson in their second match-up this season. In a back and forth game, neither team came away with the win. The tie will keep the Red Hawks (4-5-2) in the top four in the SECHL conference with 10 points, right behind University of New Hampshire. Back in October, Montclair beat WPU by a score of 6-2. With a win and a tie against the top-ranked Pio- neers, the Red Hawks would hold the tie-breaker if it comes down to them to decide the division. However, it is never too early to talk about the Red Hawks need to kick it into gear this season. “As much as I would have liked to win this game, I can’t really com- plains too much with how the boys played. They came back after being down in the game twice and really showed some heart,” said coach Frank Borone after Thursday’s game. Cody Ingles was the top per- former in the game. He scored a goal and had two assists, giving him a total of three points, all coming at just the right time during the game. Tyler Timeke, Albert Alva, and Thomas Lindquist made the other goals for Montclair. In 86 minutes of play; Kevin Fox racked up 41 saves on 45 shots and had a save percent- age of 0.911. Montclair hit the road on Sat- urday to Central Connecticut to take on a surging Blue Devils team ranked second in the SECHL behind William Paterson. In a very physi- cal game which landed a combined total of 47 penalty minutes and eight goals, the Red Hawks had a long bus ride home after they fell to Central Connecticut State (6-1-3) with a score of 5-3. The game was closer than the scoreboard indicated. The Blue Devils raced out to a 50 shots and stopped 46 of them. The other goal was an unassisted goal. Fox wasn’t the only goalie who showed he belongs on the ice. John Palmieri of CCSU stopped 46 of the 46 shots he faced, which shows this game was very even and, in the end, was really only decided by one goal, even though the final score was 5-3. After the game, Doug Kubek said, “Fox gave us a chance to win this game. He kept us in it, but both teams played hard and we stuck with them the whole game and we’ve shown a lot of improvement since last season.” The last time those two teams met was back on Dec. 3 when the Blue Devils stomped the Hawks, beating them 6-1. The recent game gives CCSU cause to sweat when they are matched with Montclair this season. With only six games remaining on the regular season schedule, four of them are conference matchups.

Women’s Basketball Flying High

The Red Hawks stood in fourth place after winning 8 of last 10 games.

The women’s basketball team has been very successful over the past few weeks. After ending the semes- ter with a record of 6-4, the Red Hawks went 4-2 over winter break to increase their record to 10-6 (2-4 NEC). The Red Hawks were able to win six straight games before losing two at home to William Paterson and Kean University. Montclair State ended 2011 on a high note with wins over Widener University on Dec. 29 and Hamilton University on Dec. 30 during the Land of Magic Tournament in Day- tona Beach, Fla. Against Widener, Montclair State was able to tie the game at 65 with five minutes left in regulation. The Red Hawks won their first two games of the season. Senior guard Jaime Ericson finished the game with 21 points and 10 re- bounds.

The next day, the Red Hawks dominated Hamilton University 70- 55 and freshman standout Melissa Tobie finished with 22 points and seven assists.

Montclair State had a loss-although it was able to hold the lead for a 74-72 win. Senior guard Jaime Ericson finished the game with 30 points and 10 re- bounds.

The Red Hawk hockey team limped into winter break hoping that when they came back, nearly a month of practices would allow them to gain control of the rest of the season. The first game of the new semester rewarded their efforts.

On Thursday, Montclair played at home against their rival, William Paterson University in their second match-up this season. In a back and forth game, neither team came away with the win. The tie will keep the Red Hawks (4-5-2) in the top four in the SECHL conference with 10 points, right behind University of New Hampshire. Back in October, Montclair beat WPU by a score of 6-2. With a win and a tie against the top-ranked Pio- neers, the Red Hawks would hold the tie-breaker if it comes down to them to decide the division. However, it is never too early to talk about the Red Hawks need to kick it into gear this season. “As much as I would have liked to win this game, I can’t really com- plains too much with how the boys displayed. They came back after being down in the game twice and really showed some heart,” said coach Frank Borone after Thursday’s game. Cody Ingles was the top per- former in the game. He scored a goal and had two assists, giving him a total of three points, all coming at just the right time during the game. Tyler Timeke, Albert Alva, and Thomas Lindquist made the other goals for Montclair. In 86 minutes of play; Kevin Fox racked up 41 saves on 45 shots and had a save percent- age of 0.911. Montclair hit the road on Sat- urday to Central Connecticut to take on a surging Blue Devils team ranked second in the SECHL behind William Paterson.
