Hate Messages Reach New Heights

**A Rally for Unity**

*The Campus Community Comes Together*

Hundreds of students and faculty members gathered outside of the Student Center on Tuesday afternoon to help support the LGBT community against the threats they have received over the past couple weeks.

A sea of purple transformed the quad, since everyone was asked to wear the color that represents unity and equality. Many students proudly carried signs that varied from “I’m a little bi-furious!” to “Man-on-man is cool-on-awesome.” Red Hawks from all over the community gathered in the quad to show their support in the Rally for Unity.

**MSU Community Meets Hate with Hope**

The discovery of the hateful graffiti messages found on Jan. 28 was met with a sharp inhale felt campus-wide, yet what resulted was a whirlwind outpouring of love, organization, unity and justice. Signs were scrawled, events were planned and in less than a week, the Montclair State University community showed those mired in hate that this is a campus not to be trifled with.

At the inception of this event, there was an emergency meeting last Wednesday where students spoke out at the Board of Trustees meeting. Since the initial report, police have been working on the case of criminal mischief and bias intimidation.

**Hateful and derogatory messages targeting African-American women were found on the door and walls of a suite in Mills Hall, located in the upper Machuga Complex of the Heights.**

The incident was reported at 10:33 p.m. by a student staff member of residence education and services, according to sources. The hateful messages came just hours after a peaceful day of unity was held on campus in support of the LGBT community.

Lt. Kieran Barret reports, “We met and provided campus resources to the victims in this case of criminal mischief and bias intimidation.”

“In addition, the bias-response task force has been alerted for a comprehensive victim and community response to the incident,” he said.

Since the initial report, police have been working on the case of criminal mischief and bias intimidation.

“Students have reacted with clear vehemence and disgust, feeling unsafe and rattled from this second incident. I think it’s really scary how someone could, you know, threaten a community like the black community, especially after the whole LGBT thing was so huge,” said student Chesnie Cain. “It’s just, are they doing it for attention? I don’t know how to feel. It’s very unsettling.”

When the instance occurred, pictures of the door immediately surfaced on the web. African-American students expressed their frustration at the situation and planned a rally at 3:00 p.m. on Wednesday and declared that they would wear all black to represent the message that “black is beautiful.”

“I would just like to say that what happened last night will not be accepted at Montclair State University,” said Dontae Booth, organizer and speaking representative at the rally.

“When the instance occurred, pictures of the door immediately surfaced on the web. African-American students expressed their frustration at the situation and planned a rally at 3:00 p.m. on Wednesday and declared that they would wear all black to represent the message that "black is beautiful."
Pelican Police Report

February 9, 2012

A staff member reported an act of criminal mischief inside of the women’s bathroom inside of the Student Center. Graffiti was discovered inside of one of the stalls. This matter is under investigation.

On Jan. 31:

Seth Pennington, 26, of Morristown, was arrested and charged with violating a final restraining order. He is scheduled to appear in family court.

On Feb. 1:

Juan Otalbaro, 29, of Hawthorne, was arrested for driving under the influence of alcohol on Route 46 East. He is scheduled to appear in Little Falls Municipal Court.

On Feb. 2:

All Hammoudah, 21, of Paterson, was arrested on outstanding warrants out of Union Township. He is scheduled to appear in Union Township Municipal Court.

An act of criminal mischief was reported at Hawk Crossings. Graffiti was found spray painted on the stairwell leading to Clove Road. This matter is under investigation.

Anyone who has information regarding these incidents is urged to call the police station from any campus phone at T-I-P-S (8477).

Students Create a Spontaneous and Informative Reaction Piece

The idea was sparked by student reactions on campus to the events that occurred during the past few weeks. All content for the show, including guests who were gathered specially for this event, were made possible by students’ efforts.

Broadcasting Department Shows Student Unity

This presentation was an online broadcast. Other broadcasts last semester covered events, such as the 10th anniversary of Sept. 11.

The hour-long anti-bullying special was compiled with only one week of pre-production.

Students Speak Out at B.O.T. Meeting

Additionally, “Presentations shall be subject to reasonable time limits. Speakers who are recognized by the Chair will normally be permitted to speak for three minutes [...] Due to time constraints, ordinarily the number of such speakers at any one meeting will be limited to five.”

Cole says there are numerous ways that students can make their views known on campus. “Students sit on a wide range of university committees that address all kinds of issues, from safety, to academic issues, to food on campus. Students have access at all times to the office of the dean of students that has a whole staff prepared to hear student suggestions and concerns and to work with students to address those matters.”

“We encourage any student that have any ideas or problems on how to improve the university to contact the SQA, Alex or me,” student representative said.

The student government, student representatives, students in the university senate and students in positions of leadership around campus all have opportunities to be heard by the administration and other university officials. Cole affirms that the Board of Trustees “does not manage the university.” Further more, “The most appropriate and most effective places for students to make their views known is within an organizational structure provided within the university for just that purpose.”

Health Center Now Open on Weekends

Students Now Able to Seek Medical Aid Whenever it is Needed on Campus

Mike Conforti

The University Health Center has been added to the list of weekend activities and services offered at the university. As administrators continue to implement policies geared toward encouraging students to remain on campus over the weekends, they have expanded their efforts into health services. Beginning Feb. 18, students may visit the University Health Center, operated by Quality Care Management, Inc., at 120 Fretz Hall, on Saturdays from noon to 3 p.m.

Preliminary discussion on the issue began last semester. With the campus planning to be empty for the last 3 weeks of the semester, it needs to permanently keep Webster Hall open to remedy the overcrowdedness of students into off-campus housing. It has become apparent that the university is feeling a quick rise in the residential community.

In an effort to curtail students from packing up on the weekends, the university had looked into offering health center services on Saturdays. Instead of MSU police, as personalized as MSUPD Chief Paul Celii, informed the administrators that students wanted the University Health Center on Saturdays.

“I love this school and I want, with all my being, to improve it for everyone,” Coleman said. He further noted that safety and wellness were his top priorities of the fall semester, “Personally, I’m here every weekend, so I’m trying to brush off the campus challenges. It’s ready.”

“I love this school and I want, with all my being, to improve it for everyone.”

“I think it shows that the police take things seriously and they support the community as well. I just think that it’s important that we stay positive and respond in a prepared manner,” said Jill Whittaker, a graduate student.

Inside the student center, a stand stacked with 500 purple shirts that students will no longer have to find off-campus medical help on the weekends.

They tackled this issue. “Current staff will adjust their hours during the week,” she said. In the past, students who needed weekend medical care were forced to find off-campus care for that aid. “Students who need medical assistance on the weekend will be able to seek help on campus, rather than an off-campus site or emergency room,” Pennington added.

Students will no longer have to find off-campus medical help on the weekends.

Dontae Booth leads a rally the following day in the Student Center quad. Students freely speak their mind.

The rally was held from 12 to 4 p.m. on Tuesday. Throughout the day, students and faculty could listen to people speak, watch the Players perform and write positive messages in chalk all around the quad. Some messages displayed were “we are united as one” and “I can’t imagine being hated simply because I’m in love.”

The speakers were members from the Christian Fellowship and Spectrum. Alan Akins, the president of Spectrum, was just one of the many speakers at the rally. “Today, the overwhelming message is unity,” said Akins, inspiring the crowd. “As a community, we acknowledge that we are all human beings.”

Aside from members of various organizations, President Susan Cole also delivered an inspiring speech. “You cannot let one stupid person who scribbles on a wall come even close to touching the strong and confident core of yourself,” said Cole, to the approving cheers of the crowd around her. “If you do, you win. It is they who should be fearful, not you. The person who wrote those words is the one with the problem, not you.”

Members of The Planet also thanked Dr. Karen Pennington, vice president for student development and campus life, for showing her immense amount of support and helping them plan the rally. Throughout the rally, many chants were done, they touched their lights to the next person in line in order to light their candle.

Students stood side-by-side, some holding electric candles. Everyone was able to share their thoughts and feelings about the day and the events that led up to it. Once they were done, they touched their lights to the next person in line in order to light their candle.

Dr. Susan Cole and Dr. Karen Pennington were present.
The University increased its security and guidance. "Cameras cannot be a useful tool for security cameras and continued extra police presence."

"We are working around the clock to stop this," he said. "We have eight people working this case because we take it that seriously. We are going to take every step possible to make this a safe campus." This was followed by a meeting held by student organizations at 8 p.m. in Dickson Hall, which focused on discussing actions taken thus far, granivosa and proposals for what next steps should be after Asphalt Green. Groups that attended included SPELTRUSM, NJUS, Phi Sigma Sigma, Fenellos, SGA, ROTO, Psychology Club, SDS, The Planet, Smile Station and WMSC radio. Proposed ideas included an student escort services, improvements to the freshman seminar class to include sensitivity training and work to de- liver messages that counter hateful sentiments and work In an article by Bryan Walsh published in TIME magazine called “Who’s Bankrolling the Climate Change Deniers?” Walsh states that as recently as 2008, climate change denial did not exist. In fact, it was even accepted by Republicans as a legitimate scientific claim. Now, 2012 has the Republican Party whistling a new tune called “Climate Change Isn’t Real (We Didn’t Do Nuttin’!)”. Walsh even made it on the Top Ten hit list of almost all of their followers who now believe the same thing.

Walsh also claims that during this time, oil companies like Exxon and Peabody Energy have teamed up with conservative corporations such as the U.S. Chamber of Commerce in order to refute climate change beliefs. These are the facts.

Clearly, Exxon isn’t really in the mood for all that, or else their followers who now believe the same thing.

In an article by Bryan Walsh published in TIME magazine called “Who’s Bankrolling the Climate Change Deniers?” Walsh states that as recently as 2008, climate change denial did not exist. In fact, it was even accepted by Republicans as a legitimate scientific claim. Now, 2012 has the Republican Party whistling a new tune called “Climate Change Isn’t Real (We Didn’t Do Nuttin’!)”. Walsh even made it on the Top Ten hit list of almost all of their followers who now believe the same thing.

Walsh also claims that during this time, oil companies like Exxon and Peabody Energy have teamed up with conservative corporations such as the U.S. Chamber of Commerce in order to refute climate change beliefs. These are the facts.

Clearly, Exxon isn’t really in the mood for all that, or else their followers who now believe the same thing.

Fashion and Feminism

Liousie Doyle  New Yorker

What's the first thing you notice about what someone is wearing? Have you ever made your own clothing? Do you think you have a say in what is fashionable?

The second Thursday of February marks the fashion week in New York City. Even if you aren't thinking about your own personal style, there's chance you're thinking about someones clothing, being paraded down the streets of Manhattan catswalks.

Every wave of fashion has its followers, and its detractors. in the 1920s, a secret language in their dress code: porcupine quills represented a rebellious spirit. By the 1980s and 1990s, another fashion was embraced by punk women as a form of fashion as activism.

In true feminist fashion: the corset, hoop skirts and gravity-defying hairdos were钟钟 by women who identify as "butch," "femme" or a hybrid of the two. The use of traditionally sexy fashion. This has skirted the fashion industry is far from Utopian coexistence of feminism and fashion. Perhaps a greater consciousness of the femininity comes from a sense of empowerment, political or economic. This can be seen in the fashion of women in the film industry. Passionate Director Speaks to Students

Valentina Didonato  Senior Writer

United they stand for independence. Ted Hope, an American independent film producer spoke at Montclair about the passion for indie films and his belief in the need that people in the industry do not have to be constrained by the standards of the major brand stores. He explains that indie films remain the same. All it takes is a change in the way people wear their clothes.

When the floor was opened for questions, many curious film students and industry professionals listened to his answer to the question of "How does one break into this industry and see their dream become a reality?" Hope's answer was, "You can start by getting your foot in the door of the film industry. If you have a passion for it, you should choose to wear fashionable campaigns. For such an industry that is "queering" the self. This means defying extreme, radical fights that seem to be defeated by this fashion. On one extreme, butch lesbians appeared to dress and act in accordance to conventional gentlemen, on the other, female lesbians were clocked with the idea of popular feminism. But the style they wore was not just about fashion. As Hope stated, "What we wear makes a difference. It's not just about what's in your closet, it's about what you choose to wear and why you choose to wear it."

A "bitch" or gender non-conforming woman, can acknowledge the fact that she is not a woman, but a woman. She can wear clothes that are marketable, but chic. She can choose clothing that is not just about fashion, but about politics. She can wear clothes that reflect her identity. She can wear clothes that are not just about dressing up, but about dressing down.

Put Your Adult Pants On

How do you measure a hate crime? Where does it fall on the spectrum of petty misdemeanors to serious crimes?

According to Montclair State University’s administration, it apparently falls somewhere in between saving face by showing support through unity rallies but not quite actually making the changes necessary to create a safer campus for all students regardless of race, creed or sexuality.

Before you jump to conclusions, we all know change doesn’t happen overnight. After all, it has been our country’s motto ever since the 2008 presidential election slogan “change” promised us expectations of immediacy but left us wanting for more, faster.

But even global warming policies and the country’s rising unemployment numbers seem more like trivial annoyances when faced with death threats on our own campus.

There’s a matter of urgency here and it makes rallies with cheering, flag waving and well-written speeches seem kind of... hollow.

We had one day of unity, but did it change anything? Would a week?

We’re not calling for vigilantes, masked or otherwise, but it is time to put on our adult pants and take matters into our own hands. We are all adults here, or at least developing into the people we will be as adults, and we need to take responsibility for our actions and those around us.

You see, eight out of the 12 months of the year, Montclair State University is the home away from home to over 3,500 students ranging from first-year freshmen to super seniors and the school away from home for another 15,000 commuters.

We have put our trust, whether consciously or subconsciously, in this institution to provide us with the best possible education (for the money), the opportunity for social and personal growth and the safety and security to achieve these modest goals and graduate with all of our limbs intact.

Maybe this unnaturally warm winter weather has upset the balance of the universe and, just like the geese who have arrived to terrorize campus sooner than planned, coaxed the crazies out of hibernation.

Then again, maybe it was just someone’s really bad week (though that would make me seriously afraid of midterms).

We at The Montclarion assume, with uncharacteristic optimism, that only a very small percentage of the student body are the bigoted lunatics that have been bullying campus this week through various acts of vandalism.

We want to take this opportunity to remind the MSU community that we have a dedicated and capable University Police Department that is committed to the safety and security of all campus members and guests.

They provide an escort service as well as a GPS-assisted tracking application called Mobile Guardian that provides voluntary monitoring of movements from one area of campus to another. If a person does not reach their intended destination in the period of time specified, an alarm is sounded in police headquarters and police will respond to the user’s location.

Whatever the cause is for this sudden outburst of violent hatred, it needs to end now.

One hate crime in a week is terrible, two is outrageous but three is just plain embarrassing.

Alzheimer’s Breakthrough Tracks Disease Spread
Researchers discover progression of degenerative disease

The vacant look in a loved one’s face. The effort to remem-ber a name is becoming too familiar in the world of the elderly. It’s the Alzheimer’s Association’s report which states that 5.4 million people struggle with the disease. The disease has already cost the U.S. $183 billion with the number expected to more than double by 2050. The research being done has only just begun to identify the causes of the disease and what can be done to prevent its progression. The disease — that stems from the entorhinal cortex — can be caused by the spreading of the abnormal tau protein — one of two proteins associated with the disease — that stems from the entorhinal cortex, a part of the brain that supplies memory with information and where the protein begins to develop in people.

Researchers at CUMC have noted a spreading of the abnormal tau protein in patients with Alzheimer’s disease. Furthermore, the researchers are conducting experiments on human brains afflicted with Alzheimer’s disease. They found that the protein spread through the system of the brain to other parts of the brain. The progression follows the progression of Alzheimer through its various stages.

Along with the tau protein, another irregular protein is more closely linked to Alzheimer’s amyloid. In this study, the center of Alzheimer’s tests has been on this protein; PET scanners and imaging agents have been targeting amyloid but have not found any. This study may lead to increased focus on tau, which appears in the late stages of the disease. This along with the National Alzheimer’s Project Act, which was recently signed into law, setting a deadline for an effective treatment of the disease for the year 2025.

Now that the researchers have a new idea about the nature of the disease, they can begin to target key factors. The true impact of CUMC’s research won’t be discovered until more tests can be conducted on human brains afflicted with the disease, but that doesn’t undermine the discovery.

Hopefully, the day will be seen where the vacant look is no longer a result of the devastating disease in the golden years of life and not something more malicious.

The College experience in America is full of fun experiences and growing debt. It is no secret that we are overpaying for our education. But when it comes to campus dining, a service provided to us by the university which we are forced to partake in to fulfill a biological imperative and as a matter of school policy for many students, administrating a打响 among the students by repeatedly serving the same old food? People need jobs, students need a more efficient means of transportation and the board of trustees can hire more drivers which would, in turn, provide them with an important income source.

Susan G. Komen’s Foundation Against the Cancer
Foundation puts politics before progress, endangering uninsured

When I was a fourth grade student, I was taught that breast cancer is a disease of women. I remember the annual breast cancer awareness campaign, the pink ribbons, and women with “I’m a survivor” stickers. I remember the stories of how breast cancer can make women feel, and I remember the hope that comes with the news of a successful treatment.

My mother taught me the significance of this disease when I was a child. She was diagnosed with breast cancer when I was just six years old. She had never been in love or voted or had a job. She had never been to college yet, she was a single mother and she had cancer.

Her story is not unique. Breast cancer is one of the most common cancers among women in the United States. It is a disease that affects women of all ages, races, and socioeconomic backgrounds.

But every woman’s journey with breast cancer is different. Some may face multiple diagnoses, while others may be diagnosed with only one. Some may be treated with surgery, chemotherapy, or radiation, while others may choose to undergo alternative therapies.

No matter the journey, breast cancer affects women in a profound and personal way. It is a disease that can bring families together, but it can also tear them apart.

The Susan G. Komen’s Foundation Against the Cancer is one organization that has dedicated itself to finding a cure for breast cancer. However, their focus on politics is taking away from their mission.

Their top priority is not finding a cure for breast cancer; it is finding large donations to fund their organization. They use their influence to push for legislation that would benefit their cause, but at the expense of women’s rights.

The Komen’s Foundation has received criticism for their opposition to Planned Parenthood, which provides reproductive health care to millions of women. They have also received criticism for their opposition to the Affordable Care Act, which would provide health care to millions of Americans.

The Komen’s Foundation has a clear agenda, and it is not one aligned with the best interests of women. They are more concerned with their political goals than with the health and well-being of women.

As a woman, I cannot sit idly by while my rights and those of other women are being compromised. I believe that breast cancer is a disease that affects all women, and it is something that we must come together to fight. It is time for the Komen’s Foundation to put politics aside and focus on finding a cure for breast cancer.

Breast cancer is not a political issue. It is a disease that affects all women, and it is something that we must come together to fight. The Komen’s Foundation has a clear agenda, and it is not one aligned with the best interests of women. They are more concerned with their political goals than with the health and well-being of women.

The Montclair State theater Department is presenting Shakespeare’s most famous play, Romeo and Juliet, at the Fox Theater today. The production is directed by Peter Zazzali, and the show is absolutely stunning, The classic tale of love had and lost still runs strong with excellent performances by Tony Knotts as Romeo and Shannon Sullivan as Juliet. The story of two star-crossed lovers could not be portrayed any better. A solid cast of some of Montclair State’s best actors has made Romeo and Juliet a must see for anyone. The production value for the show is Broadway worthy from its lighting, live composition, and outstanding performances from its supporting cast. The level of drama derived from its actors is more than commendable to any theater enthusiast. An excellent job has been done by fight choreographer Dan Rotkin for epic and heart-jolting fight scenes. The most notable fight scene between Mercutio (Alli- hundo Hernandez) and Tybalt (Tony Knotts) will keep you on the edge of your seat. Hernandez’s performance was incredibly fluid in his recitation of some of Shake- speare’s greatest lines, and his portrayal of Mercutio’s death leaves you breathless. The emotion of this cast makes you forget you are watching a staged produc- tion at times. They rework the gripping acts of this tur- bodent love affair brilliantly. The costume design leaves for a more modernized in- terpretation and adds to the timelessness of the tale of young, hopeless love. The music is performed by a live band with impeccable tim- ing, adding riveting moods to intense scenes. The lighting was spotty at times. Howev- er, the crew really picked up during crucial scenes such as the epic suicide of Romeo and Juliet, which was mas- terfully portrayed by Knotts and Sullivan. The production team has a professional tone, which really amplifies the performances by the actors. The Montclair State Uni-versity theater Program is argu- ably one of the most over- looked features at MSU. Yet the level of talent truly shows how the MSU theater depart- ment is among the best act- ing programs in the country. Romeo and Juliet plays at the Fox Theater on the Mont- cliff State University Cam- pus at 7:30 p.m. on Feb. 9, 10, 11 and 12 with free ad- mission for students and a fee of $15 for non-students. Get a little more cul- tured and watch this show.

Azari and III: Who says HOUSE is dead?

Azari and III, a Canadian quartet, produces pulsating dance tracks that are eerily reminiscent of the underground New York club scene of the early 90s. In a time where music is filled with sadistic growls of backup vocalist Fritz Holder, who usually is seen wearing wigs of various lengths and colors. DJs Dinamo Azari and Alexander III accompany the two, rounding out the artistic group that always delivers a deep mes- sage in their trance tunes. Their tunes are built with real-time vocals along with guitars, pianos, synthesizers and bass. Their tunes have been receiving some major viral circulation. Norwesconers like Brianne the YRB, Maluca Mala, Rye Rye and Lola Monroe have been giving the fullness in the game some competition, but no one on the roster has stuck out more than Azari and III. Their tunes have been receiving some major viral circulation. Maccabees Deliver Tantric, Electro-Indie Vibes

*Given to the Wild* is an unexpected joy

December.

While listening to *Given to the Wild* for the first time, I experienced something very strange. Coming from a hard day of writing, working and epic adventuring, I fell asleep with my head next to my laptop and the music filling my ears. The music on the album quickly turned into the soundtrack that narrated my dreams, leading to quite an interesting and fast-paced journey. Yet, this trippy dream sequence seemed extremely fitting in correlation to the Maccabee sound.

No, I am not gushing about hearing British boy bands in my dreams, but I am merely referring to the dreamy, psychedelic sound quality that the album possesses. I highly recommend this album to all indie-rock lovers who are looking for a fix of the melodically unorthodox. I did not expect to enjoy the synthesized sounds of the Maccabees but was extremely pleased with its balance between electronic sound and elements of indie-rock with a touch of tantric eclecticism.

**A message from the NBA and its players**

THINKB4YOUSPEAK.COM

Nobody dreams of having multiple sclerosis.

Some dreams are universal: scoring a perfect 10 on your last attempt to win the Gold medal; standing on the podium as the national anthem fills the arena. Finding out that you have MS is not one of them.

Multiple sclerosis is a devastating disease of the central nervous system where the body’s immune system attacks the insulation surrounding the nerves. It strikes in the prime of life – and changes lives forever.

This is why the National MS Society funds more research and provides more services for people with multiple sclerosis than any organization in the world. But we can’t do it alone.

To help make the dream of ending MS come true, call 1-800-FIGHT MS, or visit us online at nationalmsociety.org.

On Sunday night, I was at a friend's apartment in Harlem watching the triumphant victory of the New York Giants with a room full of fans, jumping, hugging and high-fiving each other. I jumped to the Upper East Side, where my father was leaving happily from a different, higher-end party. According to my father, he was sitting in the 90th Street station waiting for an uptown six train. A man on the platform, tragi- cally decked out in Patriots merchandise, said, "The Patriots won." My dad replied with, "No. The Giants won. How could you say that?" "They cheated. They hurt Tom Brady." My father, with a sarcastic tone, said, "This is football!"

This exchange of dialogue reminded me of when the Giants ran over the Philadelphia Eagles 29-16 in week three of this season. In the second half of the game, the defensive tackle Chris Canty smacked the ball out of quarterback Michael Vick's hand so hard that it was thought to be broken.

Following the game, a sulking Vick kept saying "I didn't see no flag." Little did ESPN cover Victor Cruz's breakout performance but more on the excessive hype of the Eagles' "Dream Team" and why they lost to their most hostile rivals. The New York Giants have only had one Super Bowl in which they were favored by Vegas: their first Super Bowl in 1987, from the behemoth stadium and five Super Bowl rings. If the Giants get another bowl victory, the only thing Yahoo! analysts on Fox Sports favor the Patriots. The only nod the Giants received was from comedian Frank Caliendo. Almost all odds in Super Bowl XXXV are not discussed around here. Everybody fa- vored the Ravens on that one, anyway. I only bring this whole ordeal up be- cause the day after the Giants' nail- biting victory, the only thing Yahoo!, Jay Leno and the analysis on ESPN have talked about are how the Patri- ots lost. All anyone can talk about is the Hail Mary pass to the end zone in the last two seconds of the game. At ESPN talked about was how bad Patriots wide receivers for not catching the ball? Why is this so surprising? Thousands of Patriots fans had to have been doing the exact same thing.

The Giants' presence in the NFC East is probably why they are ignored. After all, for some illogical reason, the Dallas Cowboys, "America's Team," are in the same division, with their behemoth stadium and five Super Bowl rings. If the Giants get another ring in the near future, they should be ignored no more. Hopefully, next time they are in the Super Bowl, they won't be facing the Patriots again.

When the Red Hawks (4-6-3) score three or more goals in a game, their record shows they are a strong team to face. They have nine wins, three losses and two ties with a total of 20 points in 15 games. This was not the case when they took a five-hour road trip up to Boston College to face the Eagles last Saturday. Montclair State University's defense did not seem to be on its game and took a long trip home thinking about their 5-3 loss.

After Brian Manning scored his first goal of the year to give the Red Hawks an early 1-0 lead at the 13-minute mark in the first period, the defense seemed to shut down and the Eagles' offense took advantage.

Boston College scored a late goal with three minutes remaining in the first to tie it and took full control of the game in the second. With three straight goals and four unanswered, the Eagles took a 4-1 lead into the third. With only 32 seconds passing in the third, captain John Tully put the puck past BC goalie Ryan Pelichuk to pull the Red Hawks within two. Another goal by the Eagles mid-way through the third all but sealed the deal even though Nick Lie- back put in a stale goal, as we like to call it, making the final score 5-3 in favor of Boston College.

The Red Hawks only have two games left in the regular season. Montclair State is set to go on the road to face New York University on Friday, Feb. 10 followed by a home game against Northwestern University on Saturday, Feb. 11. The Red Hawks are currently tied for fifth place in the SECHL with New York University. Last time the two teams met on the ice, NYU walked out of Floyd Hall with a 5-4 win over MSU. The Red Hawks plan on going to NYU and averging their loss earlier in the season.

The Montclair State men’s basketball team is led by senior forward captain Andrew August. Hailing from Bridgewater, New Jersey, August found his passion for basketball at the age of seven by playing one-on-one games with his brother. In his youth, he also excelled at other sports, such as baseball, football and lacrosse, but basketball was always his passion. He started playing organized recreational basketball in fourth grade. August’s mother has been the biggest influence on his life. “My mother never pushed me into sports,” August said. “But she has always been by my side, and has always been there to give good advice.”

After graduating from Bridgewater-Raritan High School, August began his collegiate career at Felician College, where he helped lead the team to a conference title and an appearance in the third round of the NCAA Division II tournament. However, his career took a negative turn when a coaching change at Felician forced him to take his talents elsewhere. He didn’t need to look very far to find a home right here at Montclair State University where he has become a Division III basketball star. August had a hugely successful first season as a Red Hawk, averaging 15.8 points and 7.4 rebounds per game, leading the Red Hawks to the NJAC tournament championship game.

As a result of his success, he was named to the NABC regional all-district second team, the D3Hoops.com Atlantic region second team, the MBA All-Metro team and first team all-NJAC. August has continued to make an impact as a leader of the Red Hawks in the 2011-2012 season. He was recently named January’s Small College Player of the Month by NBHoops.com, averaging 21.6 points, 8.1 rebounds and 3.6 assists per game, leading the Red Hawks to a record of 5-2 in January. The Red Hawks are currently fourth in the NJAC-North and will begin their push toward a conference tournament championship title on Feb. 18.

One of August’s fondest memories of his career at MSU came during a tournament in Rochester last season where he was named tournament MVP. However, what made the tournament so memorable for him is not what happened on the court, but how it almost didn’t happen.

He and a teammate never got the message telling them what color jersey to wear for the game and arrived at the arena with the wrong uniform. They had to rush to take the bus back to their hotel and make it back to the arena with the correct uniform just in time for the game. August went on to be named tournament MVP in what was surely a memorable experience.

Off the court, August describes himself as a “laid-back person” who enjoys hanging out with his girlfriend and kicking back with his friends at the Village. He is a communication studies major with a concentration in speech communication. He dreams of getting involved in sports media and being on TV. His dream job is to work on SportCenter. As the NJAC conference tournament approaches, August says winning the NJAC “would mean the world to me; words couldn’t describe it.” August finds his motivation from the feeling of losing in the championship game. “Winning would be like icing on the cake,” he says.

The team is led by junior guard Janitza Aquino. The three combined for 42 points and 24 rebounds.

Even though the Red Hawks were in control for a majority of the first half, Rutgers-Newark was able to keep the game close. After Rutgers-Newark took a 9-6 lead, the Red Hawks went on a 6-0 run and maintained a lead until the half. Montclair State finished the first half up 31-22.

Throughout the second half, the Red Hawks fought to stay on top. With 10 minutes left in regulation, the Red Hawks only had a three-point lead. Montclair State finished strong and defeated Rutgers-Newark 58-51.

Three days prior, the Red Hawks went up against the first place Pioneers of William Paterson University. The two teams met earlier in the year in a match that pushed both teams to the limit; the Pioneers were able to edge out the Red Hawks by one point for a final score of 62-61.

The crucial win gives the Red Hawks a chance to jump into second place in the NJAC North division. The team was lead by Tobie, Jef-fers, and senior guard Jaime Erin-son. The three combined for 40 points, 16 rebounds and eight assists. The first five minutes of regulation, the game looked like it was going to be close but during every minute af-ter that, the Red Hawks spent that time increasing their lead over NJCU.

The crucial win gives the Red Hawks a chance to jump into second place in the NJAC North division. The Red Hawks will end their regular season with an away game against Ramapo College. Last time the two schools met, MSU defeated Ramapo 67-51.
Thanks for leaving your car here last night and not ending my family’s lives.

Maria Punjabi
I don’t think winning a championship puts more pressure on a team. I think it raises their confidence. However, it gives other teams an increased drive to beat them next season. Every team that plays the Giants next season will have that game circled on their calendar, especially divi-
sion rivals who now have more reason to raise the level of intensi-
ty. Winning a championship puts a target on your back, but it also
gives a team that added swagger. Winning another title and almost
more than seeing another team
ruined their shot at the title. Af-
der winning the big game, you
set the pace for next season. Teams
will pride themselves in taking
down the champion and will play
their game against you with much
more intensity because every team
plays the game for that top spot.

Of course it does. Every-
one wants what you just earned: a
championship. They yearn for the
respect and celebrity that comes
with such a huge victory. Teams are
going to base their off-season and
regular season results off of what
you have accomplished. You’ve
set the pace for next season. Teams
will pride themselves in taking
down the champion and will play
their game against you with much
more intensity because every team
plays the game for that top spot.

Who’s Hot This Week

Joseph Berry
Sophomore — Men’s Swimming & Diving
Berry had an outstanding day on when the Red Hawks beat the Pioneers 157.5-128.5. Berry won both the 500
and 1000 meter freestyle events with times of 4:59.20 and 10:23.33. Berry finished the day with a winning
time of 1:48.87 in the 200 meter freestyle.

Kelsie Donahue
Sophomore — Women’s Swimming & Diving
Donahue recorded 33 total points in three individual
wins Saturday’s 158-121 victory over William Paterson
University. Donahue won both the 100 and 200 meter
backstroke events with times of 1:04.78 and 2:19.97.
Donahue also finished in first during the 500 meter
freestyle with a time a 5:38.29.

Game of the Week

Men’s Basketball
Wednesday, Feb. 15 @ 7:30 p.m.
@ Ramapo

The Red Hawks will face NJAC North rival, Ramapo, in a battle for fourth place. The Roadrun-
ers currently have the same conference record as the Red
Hawks (6-5), but are one game
back due to overall standings.
Man, oh Man, oh Manning

Eli Manning named Super Bowl MVP for the second time in the last four years

Maybe it’s because Tom Brady doesn’t mind giving the Giants a two-point head start or his sudden knack at missing wide-open receivers, but Brady isn’t the magician he once was. That unbreakable aura that intimidated every opponent facing the Patriots has vanished and now belongs to the world champion New York Giants.

Even with one of the greatest quarterbacks and the assistance of the second-best receiver of all time, Randy Moss, the Patriots have only been able to muster one win against the current Giants regime.

The Giants nearly ended the Patriots’ perfect season during the 2007 regular season finale, but fell short with a 38-35 final score. Eli Manning and Tom Coughlin could have been 4-0 against the Patriots, but the Patriots were destined for perfection and were in love with the fact that the Giants were the only team standing in the way of winning the Super Bowl.

They underestimated the Giants and their inability to take them down may have inadvertently given Manning, and most likely Coughlin, a spot in the hall of fame. Scratch that; Manning and Coughlin earned their way into the hall of fame and left the world wondering why no other team could stop the Patriots like they can.

The Patriots can certainly call the Giants their daddies. It’s easy to see why. When the Patriots make mistakes, it leads to the Giants scoring points and when the Giants make mistakes, it also leads to them scoring points—see Ahmad Bradshaw’s sitting touchdown.

Manning’s accuracy is flawless, though the fact that his receivers hold onto the ball doesn’t hurt. He threw a perfect pass to Mario Manningham, who made a spectacular catch that set the Giants up for a huge drive. New England can’t compare. Aaron Hernandez, Wes Welker and Deion Branch all had key drops for the Patriots, all of which came at the worst time (it’s only half Welker’s fault).

Madonna nearly fell on stage and M.I.A. flipped off the nation during the halftime show, but those weren’t the only things that were fragile during this game. Brady was sacked once near the end of the third quarter and there were questions whether he hurts his shoulder. Manning takes shot after shot in the pocket and pops back up as if it’s routine. No one questions his toughness or his competitiveness. Though, to his credit, Brady didn’t publicly complain after the game, but that’s why he has his wife. Brady “can’t pass and catch the ball at the same time,” Brazilian model, Gisele Bundchen, said after the game. Clearly, she showed everyone why she makes her money with her body and not her mouth. While she does have a subtle point, no one has had a better legacy than Tom Brady. But that’s how these spoiled, selfish people think. It’s as if she’s never seen her husband make a mistake. Last Sunday was a way for everyone associated with the Patriots organization to fall back down to Earth. This is what it’s like to be mortal. It’s a lot worse than being a Giant.

Giants Honorable Mentions
Eli Manning — (30/40), 296 yds, 7.4 avg, 1 TD
Ahmad Bradshaw — 17 carries, 74 yds, 4.2 avg, 1 TD
Hakeem Nick — 10 receptions, 109 yds, 10.9 avg

Patriots Honorable Mentions
Tom Brady — (27/41), 276 yds, 6.7 avg, 2 TD, 1 INT
BenJarvus Green-Ellis — 10 carries, 44 yds, 4.4 avg
Aaron Hernandez — 8 receptions, 67 yds, 8.4 avg, 1 TD

After winning Super Bowl XLII 17-14 against New England four years ago, the Giants beat the Patriots 21-17 in another last-minute showdown. The victory gives New York its fourth Super Bowl win.
