Montclair State University will be hosting the New Jersey premiere of 8 on Saturday. The play is a unprecedented account of the court case, Perry v. Schwarzenegger, that took place in California. The case was filed by the civil rights group, American Foundation for Equal Rights (AFER), who demanded an overturning of Proposition 8, a ballot initiative that terminated gay and lesbian couples’ right to marriage.

The plaintiffs in the court case were two California couples, Paul Katami and Jeff Zarrillo, and Kristin Perry and Sandra Stier, who sued the state of California in attempt to get the same marriage rights as heterosexuals.

The play was written by Founding Board member and Academy Award-winning writer Dustin Lance Black, an active LGBT rights supporter. He based the play on the actual transcripts from the trial, along with firsthand observations of the courtroom and interviews with the plaintiffs and their families.

The play premiered at the Eugene O’Neill Theatre on Broadway on Sept. 19, 2011. The cast included big-name actors, such as Morgan Freeman, Christina Applegate, John Lithgow and Bradley Whitford. The show made over $1 million in support of the gay marriage cause.

AFER decided to license the play out to colleges and community theatres nationwide in 2012 in order to spread awareness and share the powerful story of an important political shift in America.

“I saw the Broadway premiere and, after hearing it was being offered to schools, I said, ‘We need to do this too,’” said Peter Tatchell, the co-founder of the Queer Rights Group (QRFG) and the founder and executive director of the (London) Queer Rights Group (QRFG).
The Montclarion willingly corrects its factual errors. If you think we’ve made a mistake in a story, please call Editor-in-Chief Katherine at ext. 5230.
Students continue to disagree with the print limit

“Now that my printing that I have something left behind.”

Prop 8

Continued From Page 1

Before the implementation of the print limit, students had the ability to print as much as they wanted, regardless of the importance of what was being printed. While the inclusion of metered printing certainly addresses the issue of abuse of printing privileges, it still creates a certain anxiety among students.

“I behaved as conservatively with my printing that I have something like $37 of my original $40 left,” said Jack Smith, 22, a broadcasting student. “When you know you can run out, you have to save, because the idea of being unable to print on campus is unacceptable. Students need free printing services. Nevertheless, I totally understand their need to cut back on superfluous printing. It’s always used to see hundreds of wasted pages somebody left behind.”

There is also concern for how helpful this new process truly is. In an effort to remain environmentally friendly, the official university website announcement from Jan. 17 stated that students should “choose double-sided (duplex) printing whenever possible. It increases your printed page allowance by 43 percent!”

Most university printers are set to include duplex printing. However, many professors do not accept papers that are double-sided. In many cases, if a student does not produce a hard copy, a professor will not accept any other form of submission.

“Conserving paper is good,” said Celina Vibert, an art and design student, “but if you’d really like us to conserve paper, then allow us to email assignments and papers.”

Student and university representatives from Office of Information Technology declined to comment.

For more information on the PaperCut software and printing on campus, please visit http://oit.montclair.edu/tsc/labs/printacct.html.

Tips for students to conserve their print count:

- Take advantage of your double page prints! You can print more if you use both sides of the paper.
- Try decreasing font sizes to use fewer pages.
- Use personal printers to print those last-minute papers and save a trip to the printing lab!

Be sure to check out the play 8, featuring Susan Cole, this Saturday at 7:30 p.m. in Memorial Auditorium!
President Susan Cole was one of the guest speakers at the summit.

The next guest speakers were New Jersey Senator Linda Greenstein, assistant majority leader of the 14th district, and New Jersey Assemblywoman Valerie Vainieri Huttle of the 37th district. Greenstein and Huttle spoke regarding various legislations that have been passed in regards to bullying in both the workplace and in schools.

Greenstein states that workplace bullying is defined as “the malicious repeated and harmful treatment of an employee, has to cause physical or psychological harm, is done by supervisors or co-workers and can be verbal or nonverbal.”

The act that Greenstein instated is known as the “Healthy Workplace Act,” designed to allow workers who are bullied or abused in any way to receive compensation for what happened to them.

Next, Huttle spoke regarding bullying in schools. She took a piece of paper in her hands, crumpled it up and showed the room the marks left on the paper. The crumpling was meant to symbolize bullying, the marks on the paper represented the scars left from the bullies.

The act that Huttle instated provides that a school district may implement bullying prevention programs and anti-bullying training programs at no cost through various entities.

Ultimately, the guest speakers left an impact on students who attended the program.

“I was bullied throughout my school career, high school, middle school, grade school and even to this day,” said Andrew Lopez, freshman. “If this bill is put through, it would have a huge impact in schools and workplaces everywhere. Less people would be affected by this treatment that is horrible to a human’s physical and mental health.”

Any student who has been a victim of bullying or discrimination is urged to contact Dean of Students Rose Mary Howell at 973-655-4118 or at howellr@mail.montclair.edu. Any faculty member who also feels that they have been a victim is urged to contact Barbara Milton at 973-655-4349 or at miltonb@mail.montclair.edu.

Don’t forget to vote for your SGA officers in the elections!

Polls open midnight Thursday, March 22 and close Wednesday, March 28 at noon.

The Doctor Isn't In
Limited hours and services available leave students unsatisfied

The change to the UHC’s hours was part of the University’s attempt to keep residents on campus on the weekends in order to change the commuter school feeling of the campus, in addition to benefitting the students.

Donna Barry, director of the UHC, was one of the proponents of the addition of weekend hours to the schedule. “This has been a work in progress for the Health Center and I think the students are responding to it very well,” Barry said.

Many students, both commuters and residents, have mixed feelings about the change. Some students feel the changes are pointless because the Health Center is not open on Sundays and Saturday’s hours are short. However, some students responded well and felt that the change is positive.

Commuter student Raymon Barrett is only on campus a few days each week, but participates in a few weekend activities. “I felt that it is a good move for MSU, but I feel that it’s not enough. If a student needs medical attention on Sundays or after 3:00 in the afternoon, they still have to find somewhere else to go.”

Ashley Nieves, resident student and community assistant of Bohn Hall, thought differently. “I am so glad that the health center at MSU is open on weekends,” she said. “Students who do get sick and need quick consultations can go to the health center instead of finding a way to get to the emergency room at the nearest hospital. I have used it once or twice already on the weekends. It is very helpful and beneficial for students.”

PharmFest 2012
The Changing Landscape

Tuesday, April 3
8:30 a.m. • University Conference Center

Two dozen panelists representing a cross-section of New Jersey’s Biotechnology and Pharmaceutical Life Sciences industries

OPENING REMARKS
by New Jersey Lt. Governor Kim Guadagno

KEYNOTE ADDRESS
by Mr. Robert J. Hugin, Chairman and CEO, Celgene Corporation

Full program and online registration available at montclair.edu/pharmfest

1 Normal Avenue, Montclair, New Jersey 07043 montclair.edu

The Health Center’s weekends may not be all students had hoped for.
Stephanie Wright

What position do you hold in the Center of Student Involvement?

My current position is the Center Coordinator for Fraternities and Sororities. I am charged with overseeing the Greek Letter Organization Community at Montclair State University to ensure that we comply with all regulations and that our members receive the best possible education.

What advice would you give to women entering the workforce in the near future?

Never allow the obstacles you face in life to deter you from your heart’s true goals.

Jillian Plonskona

What position do you hold in the Center of Student Involvement?

I am the Student Involvement Coordinator. My role is to work with teams to create a wide range of leadership programs through offering different opportunities to students to foster their understanding of leadership and involvement. The Leadership Institute Certificate Program is open to all current students whose advanced leadership workshops are designed in a full-day conference structure. The Student Leadership Team promotes peer to peer education through involvement tables, leadership programs and offers outreach to uninvolved students.

What factors made you want to work in this field?

After my experience as a Resident Assistant, I opened my eyes to pursuing a professional position in Student Affairs. Creating a community that helps and serves others, designing programs to assist and continue on to a Residence Director. In my current role, I’ve found a stronger passion for the field by helping students gain leadership experience through promoting involvement and other programs based on our students needs.

What advice would you give to women entering the workforce in the near future?

My advice to any student is to take every beneficial opportunity you can. You can not build up your resume before you graduate. Employers want to see your leadership experience as the second most important element on a resume. Make sure you have well-rounded experience including volunteer experiences, internships, specialized trainings/certifications, and some professional work experiences.

Forty years ago, Title IX first gave women access to the same college athletics as their male classmates. Through those initial medial backlash from “old boys’ club” administrators, it has become one of feminism’s most recognizable battles without end. Alternatively, roller derby enthusiasts have fought aggressively since the 1970s to create a legitimate sport of the female dominated space to create a legitimate sport of the female dominated space. Over the last few decades, roller derby has come to resemble the ultimate feminine sport. Despite the long history of fairy tale nuns running around on a track, and a game is made up of teams — “jams” and “jams” and “jams” — with a “jammer” jamming opponents for points by passing their physical tests of willpower and short skirts and flouting their bare and bruised legs through glimpses of nuns nuns, players are not only showcasing their bodies as vessels of power, but also showcasing their bodies as vessels of passion. Many players, quizingly, have converted to roller derby as an expression of feminism. Their badges of honor, stories of their injuries as a means of celebrating their physical testaments of dedication to the sport.

What is your educational/work background?

I received my BA in Communication from Ramapo College of NJ in 2003 and my MA in Administration and Supervision from Montclair State University in 2007. I started my career as a Financial Aid Counselor and worked my way up to Financial Aid Counselor in 10 months. From Financial Aid, I transitioned into Student Involvement with a focus on leadership Development and Committer Student Services and eventually into Greek Life after studying under my first Greek Advisor.

What factors made you want to work in this field?

Knowing I had the ability to help change students’ lives.

The advice I would give to women entering the workforce in the ne future:

To always follow your dreams. Never allow the obstacles you face in life to deter you from your heart’s true goals.

What advice would you give to women entering the workforce in the near future?

Never allow the obstacles you face in life to deter you from your heart’s true goals.

Cancer, bad cholesterol, stroke, cardiovascular disease and aging are diseases that a person may encounter in his lifetime. However, the choice of whether or not these diseases may be decreased by drinking green tea.

That’s right, green tea can halt cancer growth. In a recent study, food code from and can reduce LDL, “bad” cholesterol, and can lower your risk of cardiovascular disease.

This is because green tea contains powerful antioxidants called epigallocatechin gallate. These antioxidants are substances found in our foods which can fight free radicals and reduce the production of free radicals. When an atom has an unpaired number of electrons a free radical is produced. Most often, it occurs when oxygen interacts with certain molecules in the body. Free radicals are a primary cause of aging and can come from the environment, such as tobacco products, pollution, and smoking.

When free radicals are produced they begin to react and break down DNA, proteins, and the cell membranes. As a result, the cell is unable to reproduce and can be destroyed.

Green tea contains the powerful antioxidant EGCG that can help stop cancer cells from growing by preventing them with an electron. This is crucial because the amount of free radicals in the body make the body healthier. For example, a person who gets very little sleep produces numerous free radicals and can be exposed to a continuous exposure of free radicals. Excessive free radicals and their by-products, or main proteins found inside the body. These proteins are responsible for fixing damaged cells in the body. If a person begins to age, the free radicals reduce the production of these proteins to the point where the body can no longer repair itself. Thus, if antioxidants are present, this loss can be prevented. As Dr. Lester Packer says, “Scientists now believe that free radicals are cancer-causing factors in nearly every known disease, from heart disease to arthritis to cancer to cataracts. In fact, free radicals are a major culprits in the aging process itself.”

Free radicals can be prevented by drinking green tea. Green tea is made using the leaves of a Chinese plant, Camellia sinensis and has num-

Caffeine was said to be discovered in the Ethiopian highlands by a herd of goats! This created the legend of the goat who noticed that when his goats became energetic after eating berries from a certain tree. After this, the greens were turned into a drink, which started the spread of coffee that eventually reached around the globe.

Caffeine works in an ingenious way to perk up the brain. It slows the interaction between nerve cells, helping our brains for longer periods of time. Because the receptors on our brain cells are crowded with caffeine, it is hard to filter out caffeine and adenosine. When caffeine is consumed, it takes the place of this adenosine and can increase the brain activity to perk up instead of slow down. Caffeine also raises the level of dopamine in the brain, also known as the feel good chemical. This explains its addictive quality.

As you know coffee is not the only source of caffeine. There are many other sources such as chocolate, energy drinks and teas. Caffeine is the most popular drug in the world. Ninety percent of Americans consume it in some form every day. In addition, people who drink coffee have a higher risk of developing Parkinson’s disease. This disease starts out causing uncontrolled trembling and in severe cases can disable one’s ability to walk. The disease is caused by the loss of brain cells which caffeine is known to protect. The dosage that works is 100 to 200 milligrams of caffeine a day, which is one to two cups of coffee. Regular coffee has about 140 milligrams of caffeine, which increases the risk of developing Gallstones. The reason may be because coffee can increase the bilirubin in the gallbladder, which empties it of stone forming agents like chole-

Coffee and caffeine are very bad in general. With each cup of coffee you drink you have the potential to lose five milligrams of calcium per day. Adding two tablespoons of milk to your coffee can decrease this number by eight. Coffee and caffeine increases heart rate, makes blood vessels constrict, raises blood pressure, makes headaches, fatigue and decreased memory. Long term effects of caffeine are positive on mental alertness. Although short-term effects of caffeine increase reaction time, which is seen as a good thing, the mixing of caffeine and alcohol makes people feel drowsy. People think they are fine when in reality their reaction time is still just as bad. Caffeine can be seen as very addictive, after a week of consuming caffeine every day most people will experience a certain level of alertness if they stop abruptly. If you want to prevent withdrawal symptoms and cut back coffee, you can gradually decrease the amount of coffee you drink.

Coffee and caffeine are bad in every way. From every ox of coffee you drink you have the potential to lose five milligrams of calcium per day. 7 To begin to grow and give off shoots or buds
We don’t know whether there has been a significant increase in bullying in America or if it just has just received quite a lot of press over the recent months, but one thing’s for sure: We’re hungry for blood.

The verdict is in on Dharun Ravi, the 20-year-old Rutgers student who was charged with invasion of privacy and tampering with evidence after secretly filming one of his freshman roommate’s romantic encounters and hosting a private live screening for some of his fellow classmates. Well, Ravi, it doesn’t look hopeful.

Ravi’s actions were deplorable, the authenticity of his theft-prevention motives still questionable and the timing of what he claims to be a lapse of judgment terribly unlucky. There is no excuse that could justify the clandestine voyeurism that took place in September of 2010 and certainly not the later exploitation of its content, but Dharun Ravi, sentenced on Friday to 10 or more years in prison and possible deportation to his birthplace of India, may have gotten himself caught up in something bigger than any one criminal offense.

Every once in a while, stories like the one of Tyler Clementi come along to remind us that bullying is not a lost art and bullies did not go extinct after we graduate from high school. Barely out of high school, still adjusting to a new environment and newfound freedom, vulnerable and scared as he searches for new friends. We all know the feeling.

Now added to the equation that Mr. Clementi was gay and what was once a simple invasion of privacy charge becomes a hate crime. This case also happened on the cusp of a string of suicides of other young teenagers around the country who were bullied because they were gay or perceived to be gay.

The actions of Mr. Ravi and their unforeseeable effects are unforgiveable but to turn a 20-year-old with no previous criminal record into a scapegoat for the bullied LGBTQ community seems like a punishment unfit for the crime. These hate crime laws have been put in place to protect vulnerable communities from predators and other individuals with violent intentions not as a vantage point from which to increase the punishment on mean-spirited deeds.

Our culture has become hyper-sensitive to the bullying problem but that vigilance should not be attributed to the pursuit of condemnation but rather to the continued safety and security of those silenced minorities. This is a case of unintended, misdirected, immature homophobia with a terrible outcome but cyber-crime and punishment are still generally new and there is still much to understand about the difference between physical and virtual crime.

Needless to say there will be plenty more good kids with stupid ideas committing online crimes before these kinks get worked out and we must be careful not to throw away their lives as the result of our own misunderstanding.

And Justice for Some...

Students Speak

Do you know about the SGA elections and will you be voting?

Sam Saez
Sophomore
Graphic Design

“I haven’t really been paying much attention to the elections and I probably won’t vote.”

Giselle Torres
Sophomore
Graphic Design

“I don’t know very much about the candidates or the election so I don’t think I’m voting.”

Riya Walla
Junior
Linguistics

“I’m involved in the Greek community as well as other organizations, so yes I’m going to vote.”

Jillian Varner
Sophomore
Physics/Sociology

“I know very little about them. I just got one piece of paper... so I probably won’t vote.”
Loretta Swit is still a performing artist. Now I'm sure one of his current jobs would start, “But seriously, what does the deal with Harry Potter’s franchises?”

TRAVIS LANCASTER
COLUMBUS

ask you, readers Sextonly, what is the deal with movies franchises?

Now I’m sure more than half of you — deal with movie franchises?

Hunger Games.

Personally, I haven’t read The Hunger Games. This just gives more fuel to the fact that interested in doing so, either. To me, it’s just the latest craze to take the literary world by storm. Take the Lord of the Rings trilogy, for instance: the three novels were published over the course of a year, from 1954 to 1955.

It wasn’t until 2001 that this masterful trilogy was turned into a very ambitious film project ever undertaken. Before that — save for a 133-minute animated film made in 1978 — no one had ever considered turning the third best-selling book of all time into a movie franchise of the year? The biggest question at hand is why was it so predictable that some group, or the Department trying to protect or hide something, was wrong? The next thing you know he was a threat. And for that, he should have to let him into the community?

Driving while black is a very real thing. It’s a fact of life and the fact that seems to leave minorities with the most zero motive.

It’s unfortunate that race is always the matter behind these situations but the pursuit of justice for Trayvon is not supposed to be there. We are not given the right to mind, and George Zimmerman is charged appropriately. We are not given the right to decide who lives or dies, and to see some- thing that seems to be done appropriately. A change has to happen but will not happen until we change ourselves.

A New Search for the Famous Lost Aviator

Ambriel Earhart’s year-long search will never be forgotten

Helen Taussig was the first woman to fly across the Atlantic Ocean without accompanying flight crew. She received a Distinguished Flying Cross for her achievement in 1924.

In addition to this, she set a number of aviation records. She flew in 36 hours, a record for women, and a record for women. She was also the first woman to travel around the world. Helen Taussig was a true pioneer.

She truly made herself evident in a dominantly male environment. This Begins to see to an abrupt end and when Earhart mysteriously disappear- ed during a flight that was supposed to circumnavigate the globe.

The search for Earhart has been a long and arduous one. It has led to the discoveries of some photographs of Earhart’s plane, and believe that they are the only ones who know where she went down.

She was attempting to circle the Earth and read her nautical charts and pilot her plane. She was using the latest in navigation and a top-of-the- line airplane.

The two were attempting to land on the island of Howland Island, and claimed that they identified the flat of land lying in the Pacific, but these last few hours of flight were questionable.

Earhart claimed she was capable of flying for 15 hours and would have been able to make it for the search to be completed.

The natural inclination of any sane person would be to say, “What could this boy possibly have done to this 28-year-old man? According to Zimmerman, Trayvon looked suspicious.

Though we have made strides, dis- crimination, prejudice and racism will always be around for all groups, not just African Americans.

A change has to happen but will not happen until we change ourselves.

The evidence to support this new search is viewed by experts as circumstan- tial but strong, giving fans and admirers of Earhart some hope after so many years.

I am sure that there isn’t a good deal of anticipation for any significant artifacts or remains that might be discovered. July will also mark the 75th year since Earhart and Noonan were seen radioing the island of Howland Island. This is practi- cally a lifetime of optimism with pretty much zero evidence.

Though, there are some key factors to consider before their disappearance. Advising the team of aviators is Robert Ballard, the oceanographer who discov- ered the Titanic.

He also believes that the photographs recently released by the U.S. Coast Guard are of little value, as the photos have been proven to explain the very odd disappear- ance.

The search will begin in July and will be conducted around the island of Howland without anypag t of the naval records of

Kirkland. The evidence to support this new search is viewed by experts as circumstan- tial but strong, giving fans and admirers of Earhart some hope after so many years.

Craig McCarthy, an English major, is in his first year as web editor for The Montclarion.
Deep within the Student Center, there lies places to buy textbooks and sushi but the home of our own college radio station, WMSC at 9:03 PM. The organization is one of the last student-run college radio stations, but don’t be fooled! The professional and innovative minds underlying devoted radio station have a variety of music that encompasses the abundance of genres to satisfy a variety of musical interests. The driven folks at WMSC recorded their sets and yet laid back station that runs like a well-oiled machine and the refreshing combination of music along with the work of our talented DJs are what make Montclair State’s radio station something to be proud of. Although all are welcome to sign up for the program, aspiring DJs must first follow the footsteps of one of the current members of the station as a Baby DJ. Baby DJs learn all of the ins and outs of working at the radio station in hopes of someday having their own show on the station, creating their own playlists and sharing their musical perspectives with their fellow MSU listeners. Matt Komar, musical director and DJ of his own radio station, has been working for the radio since his freshman year at MSU and is now in charge of finding new music for the rotation of all of the station’s shows. Mondays from 7 am to 10 a.m. and Wednesdays from 4 to 7 p.m., DJ Bizah oversees the work and thoroughly enjoys teasing listeners with Roberts “romantically, ridiculously funny, make-you-wet-and-squishy 7th musings.”

Bird brings a laid-back, effortless attitude with his smooth, deep voice, colorful collection of tunes and entertaining banter that you can describe with one word: cool. With his extensive experience in the music industry, Bird shares his incredible stories and life experiences in such vivid and accurate detail with a comfortable tone that makes you feel like you could have been there with him. In the film, former NFL athlete, Holmes went from tossing the pigskin with the Browns, Jets and Steelers to tackling the music industry full force as a producer and manager for acts like GiL Scott-Hammer, Musique and Push Pu$h in the Bush. He eventually moved on to working with some notable artists on Earth Wind and Fire, Luther Vandross, The O’Jays and Phyllis Hyman. Holmes was even able to use his connections to help many MSU students who were aspiring young musicians, producers and DJs find jobs and paid internships. When asked if he had any advice for the Baby DJs or other hopefuls wishing to make it in the music industry, Bird says, “Go for it. And don’t listen to folks that tell you that you have no place to be. This is the only industry I know of that fills a void. But you don’t want to be like Whitney Houston or James Brown, filling the void with things that are not good for you and ruin your opportunities. But there’s room for everyone in the music industry, as long as you play smart and always think about how to figure out what the industry wants.”

Bird, along with the other DJs at WMSC, creates a vibrant array of thoughts and sounds which broadcast culture and creativity to listeners all over MSU. Our station, however, does not get the recognition it deserves. With all of the effort that goes into running this station, WMSC should have listeners around the clock. So whenever you’re feeling bored or could just use some new music as you plow through a day of essay writing, or just want to laugh, try not to tune in channel 90.3 and see what new sounds and ideas are

Classic Crime Drama Gets Comedic Facelift

21 Jump Street delivers laughs and cops

21 Jump Street began as an 80s teen crime drama television series which brought actor Johnny Depp to the public eye as a comedic modern day film based on the classic series starring Jonah Hill and Channing Tatum was announced, it just seemed a bit, well, odd. However, skeptical fans were pleasantly surprised by the end result. 21 Jump Street is about two young rookie police officers, Morton Schmidt (Jonah Hill) and Greg Jenko (Channing Tatum). They attended high school together and are now partners who are being transferred to a “revival of an old 80’s program” after failing to read a suspect his Miranda rights. The old program takes officers who look young and plant them in high schools to investigate and bring down criminals. Schmidt and Jenko’s assignment is to investigate a new synthetic drug that a suspect had been warned on. In the last month of the school year, the two rookie cops are forced to infiltrate the dealers and bring down the supplier of the drug under the watch of their boss, Captain Dickson (Ice Cube). Hill and Tatum may not seem like a typical on-screen duo, but their performances and chemistry are executed perfectly thanks to a well written script, good direction and the antics and acting of the two themselves. The scenes in the beginning of the film have what seem to be sudden transitions and some rushing to get to the main plot, but once it arrises, it is smooth sailing and laughs until the very end. Ice Cube’s performance as the intimidating and extremely angry Captain Dickson was one of the finest performances in the film. The ensemble of the film, which includes The Office’s Ellie Kemper, Comedian Rob Riggle, James Franco’s younger brother Dave and United States of Tara’s Brian Bosworth, all put in one thousand percent to their roles, presenting likable and well-crafted characters.

Although at first glance, it may seem just a goofy comedy, the film is actually incredibly smart by adding little details that may not be initially noticeable such as 4 to 7 p.m., DJ Bizah leaves his work and thoroughly enjoys teasing listeners with Roberts “romantically, ridiculously funny, make-you-wet-and-squishy 7th musings.” Bird brings a laid-back, effortless attitude with his smooth, deep voice, colorful collection of tunes and entertaining banter that you can describe with one word: cool. With his extensive experience in the music industry, Bird shares his incredible stories and life experiences in such vivid and accurate detail with a comfortable tone that makes you feel like you could have been there with him. Poetry Reading Series Welcomes Saskia Hamilton

Top Poets to Slam California in April

Speaking Through Silence selects competitors for national competition

The five members of MSU's slam poetry team were chosen Thursday night. The poetry team will be competing in CUPSI (College and University Poetry Slam Invitational) from April 18-22, in Laverne, California. There have been four Sacrificial Poetry events since September, all coming down to the Grand Slam event. The top two winners from each of the Sacrificial Poetry events battled it out on stage in the Student Center ballrooms. The top eight poets who competed were Timothy DuWhite, Tylik Railey, Imani Shaw, Lamar Washington, Elle Musiwa, Sherlita McCann, Christopher Rodriguez and Liz Hammonds. The Poetry Grand Slam was Speaking Through Silence's biggest event of the year.

Symone Bailey, a senior and the publicity chair for STS, said, "We're expecting a pretty big crowd to-night. We usually get about 100 at the other events, and we're definitely expecting more than that."

Bailey said, to publicize the event, the main form of advertising was word of mouth. They also used a Facebook event, mass messaging and flyers on campus. The Grand Slam consisted of three rounds of slam poetry. After the second round one contestant was eliminated, and after the third round the top five were announced. Poem topics consisted of family, disease, religion, reflection, poetry itself, slavery, love, dreams, nightmares, sin, school and friends. The winners of the event, granting them a place on the MSU team, were Timothy DuWhite (who earned himself a perfect score after the three rounds), Tylik Railey, Elle Musiwa, Christopher Rodriguez and Liz Hammonds.

Congratulations to the MSU slam poetry team, and best of luck at CUPSI!

Nobody dreams of having multiple sclerosis.

Some dreams are universal: scoring a perfect 10 on your last attempt to win the Gold medal; standing on the podium as the national anthem fills the arena. Finding out that you have MS is not one of them.

Multiple sclerosis is a devastating disease of the central nervous system where the body’s immune system attacks the insulation surrounding the nerves. It strikes in the prime of life — and changes lives forever.

This is why the National MS Society funds more research and provides more services for people with multiple sclerosis than any organization in the world. But we can’t do it alone.

To help make the dream of ending MS come true, call 1-800-FIGHT MS, or visit us online at nationalmssociety.org.
The Red Hawks are off to an outstanding start so far after going a perfect 1-0 in their season opener against Cumber- land in Kissimmee, Fla. last week. This success has not been unexpected, as Brehm and McDaniel have been asked for a better start to their sea- son. In the nine games that have been played, the Red Hawks outscored their opponents 38-11.

After having their games against Endicott College and Wheaton Col- lege postponed, the Red Hawks start- ed their season against McDaniel College on March 12. The Red Hawks won 4-1 after eight innings in what would end up being largely a defensive battle between sophomore pitcher Alex Hill and McDaniel’s junior Caroline Bohm.

The two combined for an unprece- dented three hits, four walks and 26 strikeouts in their combined efforts. The houses did not allow a single hit until the eighth inning. What would end up being Brehm’s second loss of the season was a tough spot for the junior. McDaniel came out strong, and Hill ground- ed out, advancing Paulino to third. Following the walk, junior catcher Bergman was faced with a tough situation, fol- lowed by a ground out by sophomore infielder Szeliga. Unfortunately, a wild pitch by Bergman to second but Pau- lino moved to third. Junior pitcher Caroline Brehm then walked senior outfielder Stephanie Szeliga to make the bases loaded. Paulino broke the tie and made it 1-0 thanks to a sacrifice fly to right field. Muglie then drove both runners in with a single to right center. After another clutch perfor- mance in the batter’s box, Hill closed the inning with a perfect strikeout to give Montclair State a 2-0 lead. Bergman dominated the mound for her sec- ond win after striking out eight batters and allowing just one run. The winning pitcher, Bergman, Paulino, Szeliga and fresh- men Olivia O’Leary and Ashley McDaniel were all on base in the five runs that lead the Red Hawks to their third straight win.

MSU eventually got a run in a tough spot when she walked in the first run of the inning. The run was scored when she walked in a third out making up a third out-BBB double to sophomore infielder Ashley Cum- berton to make it a 4-0 game. After McDaniels finally left the field, they were able to record one run on a sacrifice fly before Hill end- ed the game with her tenth strikeout.

Their next game was against the Western Connecticut College. The Red Hawks won 2-0 contest, thanks to smart baserunning and a strong pitching performance. Junior Pitcher picked up the win with three strikeouts while Hill continued to impress on the mound for the save with two strikeouts. The three runs off the bat of Bergman into the bottom of the sixth, the Red Hawks knew that they were running out of time to win the game. With one out, Bergman got to first on a single to right field. Junior Kaityl O’Brien got on base due to a fielder’s choice and advanced to Bergman to second be- cause of a throwing error. Junior catcher Bergman then walked to make the bases loaded. Paulino broke the tie and made it 1-0 thanks to a sacrifice fly to right field. Muglie then drove both runners in with a single to right center. After another clutch perfor- mance in the batter’s box, Hill closed the inning with a perfect strikeout to give Montclair State a 2-0 lead. Bergman dominated the mound for her sec- ond win after striking out eight batters and allowing just one run. The winning pitcher, Bergman, Paulino, Szeliga and fresh- men Olivia O’Leary and Ashley McDaniel were all on base in the five runs that lead the Red Hawks to their third straight win.

The future Hall of Fame quarter- back was certainly capable of cursing the franchise, but Manning might not have the same effect on the Broncos franchise for years to come. I am very surprised to see Pettitte back with the Yanks. He is a great pitcher, but whether or not he still has what it takes to pitch in this division remains to be seen. Many players in all sports have returned from retirement in the past and we have seen some reputations take a hit following an unsuccessful return, so Pettitte will be under some pressure. Nobody knows Pettitte as well as he knows himself, so if he feels that he is ready to compete in the majors once again, he is making the right decision.

Yes and no. I’m shocked that he’s back in spring training as a player. Once he retired I thought that was the last we would have seen or heard from Pettitte for a long time. But when baseball (or anything) is all you have ever done in your life, it’s hard to just give it up, especially when you still have the skills to continue. Once he’s too old, he won’t have a chance to come back at all. If someone is willing to give him a chance and he is still able to play, then why not go for it? You only live once.

Who’s Hot This Week

Sean Hille
Starting pitcher — Baseball
Hille led the Red Hawks to 4-0 victory against first-ranked Marietta in the Snowbird Classic. He threw a three-hit shutout for MSU’s first win against the Pioneers since 2006. Hille had nine strikeouts to accompany with five walks in MSU’s most complete and dominant pitching performance this season.

Alex Hill
Starting pitcher — Softball
Hill has been lights out for the Red Hawks. Over their nine-game winning streak, Hill is 5-0, striking out 45 while walking only one batter. Hill’s ERA so far this season is 0.00. She recorded a save in the Red Hawks’ second game of the season against Washington (MD).

Game of the Week

Baseball
@ Marietta
March 25, 12:00 p.m.

The Red Hawks will face top-ranked Marietta for the third and final time this season. The series is currently tied at one game-a-piece. MSU won the last game 4-0 behind Sean Hille’s stellar pitching performance.

For updates, check out: www.montclairathletics.com @TheMontclarion on Twitter
The first in their third consecutive loss the next day in a 14-10 upset, with reliever Matt Canales receiving the L for his record. MSU held the lead from a three-run homer given up in the first inning, putting up three runs when Stephen Napper doubled in two and scored after Moreno drove him in. Napper continued to play the third and fifth innings, hitting a three-run homer in the game, as Wesleyan put up seven runs to make the score 12-6. MSU answered with four runs in the bottom of the first, but that would be all the Red Hawks delivered in the ninth. The Montclair State men’s lacrosse team fell to 3-6 with an 8-7 loss to St. Lawrence University on March 20, but rebounded with a 15-7 win over Manhattanville College on March 23. This marks the Red Hawks’ first victory of the season, and Chris Kivlen’s first as head coach.

Senior Jake Campbell pitched the last two innings, securing the victory in his first save this season. The Red Hawks offense came out strong, scoring five goals and contributing one assist in the winning effort. Zach Brown pitched seven innings, earning his first win of the season. The game was tied at 5 until the fifth inning, as Wesleyan put up seven runs to make the score 12-6. MSU answered with four runs in the bottom of the first, but that was enough to keep Manhattanville at bay, as the Red Hawks took the victory over Denison University, 6-5. The Red Hawks fell to 1-5 for the season. The Red Hawks next game will be against Muskogee College on Friday, March 23.
