School of Life and Environmental Sciences to Get a New Home

Montclair State University is making an effort to raise awareness about bystander intervention with the Step Up Against Violence Program.

Stephanie Agudelo
Assistant News Editor

If you haven’t already noticed the banner claiming Lot 15 as “the Future Home of the Center of Environmental and Life Sciences” (CELS), you’re probably not studying science at Montclair State University.

Robert Prezant, Dean of the College of Science and Mathematics, explained that the university has been planning this project for years and as soon as it is approved, the CELS will be completed as soon as possible.

On the public ballot in New Jersey this November will be a bond issue dedicated to higher education inns.

Step Up Against Violence Comes to MSU

Montclair State University is making an effort to raise awareness about bystander intervention with the Step Up Against Violence Program.

Originating at the University of Arizona, this program has been adopted by multiple universities across the country. Starting this past summer, the Step Up Against Violence Program arrived at MSU.

The program focuses on a few main areas: sexual assault, hazing, alcohol, anger problems, discrimination, relationship abuse and depression.

Israel Rosado, the Deputy Title IX at MSU, is working along with Robert Vadovic of the University Health Center to deliver this program to various organizations across campus.

The program was first introduced at MSU during summer training for Community Assistants through Step Up Continued on Page 3

Field Hockey Lives up to Pre-season Hype
Pelican Police Report

On Sept. 2: A staff member of Mills Hall reported the theft of his unsecured laptop from his office. This matter is under investigation.

On Sept. 4: A juvenile was arrested in Freeman Hall for possession of marijuana and drug paraphernalia. He is scheduled to appear in Union County Family Court.

On Sept. 6: A staff member of Calcia Hall reported the theft of a Sony CD player and CD from a secured room. This matter is under investigation.

On Sept. 7: A male resident of Machuga Heights reported the theft of his unsecured iPhone from outside of the building. This matter is under investigation.

On Sept. 9: A male patron of Floyd Hall Arena reported being verbally threatened by another patron during a hockey game. No charges were filed in this matter.

On Sept. 10: Michelle Guarino, 45, of Highland Lakes, was arrested and charged with simple assault and serving alcohol to a minor while at Yogi Berra Stadium. She is scheduled to appear in Little Falls Municipal Court.

On Sept. 11: Nadine Caple, 29, of Hackensack, was arrested and charged with simple assault while in the Red Hawk Diner. She is scheduled to appear in Little Falls Municipal Court.

Anyone who has information regarding these incidents is urged to call the police station from any campus phone at T-I-P-S (8477). All calls are strictly confidential.

Corrections

The Montclarion wholeheartedly corrects its factual errors. If you think we’ve made a mistake in a story, please call Editor-in-Chief Lori at ext. 5230.

The Montclarion is a freely distributed newspaper providing one copy per person. Additional copies are $0.25.

The Montclarion willingly corrects its factual errors. If you think we’ve made a mistake in a story, please call Editor-in-Chief Lori at ext. 5230.
Residential Education. Rosado and Vadovic came to speak to the CAs about not only teaching their residents to be aware of violence around campus, but how they can get involved. They also allowed the CAs to use clickers while they asked questions, showing the CAs how their own peers felt about their safety on campus.

“I thought the clicker system was a creative way to see how the group's opinions,” said Kyle Stubber, a CA in Freeman/Russ. “I immediately developed a solid understanding of what the participants valued because of it.”

The Step Up program teaches students about resources they can use on campus to try and bring down the rate of abuse and violence on campus. As always, students can either call the University Police Department or use the blue light system located around campus to contact the University Police Department. There is a phone located inside the box labeled “police” that students can use. If there is an emergency, students can use the “blue light” system located around campus to contact the University Police Department. There is a phone located inside the box labeled “police” that students can use.

The “mob mentality.” In the training session for the CAs during the summer, they were shown a video about a car crash. There was a motorcyclist trapped underneath a car. At first, there were many bystanders sitting around and simply watching the scene play out. However, when one person stepped forward to help the motorcyclist, many people followed suit. They were able to work together to lift the car and bring the motorcyclist to safety. This program is designed for students to be able to work with one another, speak with one another and help each other out in problematic situations.

“This program is to make students aware,” said Rosado. “I like that this program is geared to get students to talk to one another,” said Rosado. “It's not just about us teaching students. This program is here to make students aware and to help students help each other. We want students to look out for one another.”

Step Up focuses on the idea of the “mob mentality.” In the training session for the CAs during the summer, they were shown a video about a car crash. There was a motorcyclist trapped underneath a car. At first, there were many bystanders sitting around and simply watching the scene play out. However, when one person stepped forward to help the motorcyclist, many people followed suit. They were able to work together to lift the car and bring the motorcyclist to safety. This program is designed for students to be able to work with one another, speak with one another and help each other out in problematic situations.

“This program is to make students aware,” said Rosado. “We want students to be able to take care of one another and to intervene before the problem escalates into something horrible.”

Rosado explains that if a situation is dangerous, a student should not necessarily put themselves in the middle of the hassle. He explains that they should use the S.E.E. method. Before they intervene, they should make sure the situation is safe. Next, they should have an early response time and help out as soon as possible. Finally, they should do whatever is most effective.

However, if at any time the situation escalates and becomes dangerous, students are encouraged to get help or call UPD.

The Step Up program has already been shown to Residential Education and Greek Life. Rosado has plans of bringing it to Athletics, major organizations across campus and eventually to the residence halls.

With the efforts of the Step Up program, students are encouraged to help each other in making this campus a safe place. If students look out for each other and go against that “mob mentality,” they can definitely learn how to make MSU a better and safer place for everyone.

Montclair State University offers academic programs in over 50 countries. Semester, academic year, summer, and short-term programs are available. Programs can fit into most majors’ study plans without delaying graduation. Financial aid is available (grants, loans, scholarships). Credits for study abroad towards major, minor or general education requirements are possible. Classes are available in English. Employers value international experience and it’s a resume booster. You will have the experience of a lifetime!

the items be live and explosive, said Lt. Barrett.

Some students were not extremely concerned with what was happening. “I wasn’t really worried because I figure they’d evacuate the entire campus if we were really in danger,” said Melissa Ribaudo, sophomore.

Students received periodic updates throughout the day as the investigation continued. Eventually, it was determined that the wires consistent with blasting were not indeed attached to any blasting device, and the area then was cleared for operations to begin again.

According to Lt. Barrett, this unusual situation was not an extremely dangerous one. However, the wires were embedded in earth far below normal depth, so there is no way to determine how and when they got there, although there has not been any excavation in that area for decades.

University Facilities is working with the construction company to

structure. As you may know the state has made very little invest-

ment in the infrastructure for higher education for many years. This bond issue would be a great start to the state reclaiming the importance of higher education. With approval of the bond issue, the University is committed to getting the building up as soon as possible. This probably means, from start to finish, about two years,” Perzant said.

If the bond issue is approved, the university will be making a tremen-

dous improvement for current and prospective students looking to

receive an education in science. The facility itself would be 100,000 square feet and will be equipped with all the modern techn-

ology students need to perform scientific research. “CELS will offer the prospective student a remarkable new structure to call home, a building with state of the art laboratories designed for modern interdisciplinary scholar-

ship as well as appropriate student study space, high end technol-

ogy and welcoming environments. CELS will also allow us to expand our student base and help satisfy the many students hoping for a sci-

ence education within Montclair State,” said Perzant.

Not only would the CELS benefit the students of Montclair State, it would also help the state of New Jer-

sey and its future workforce. According to the university website, “New Jersey now ranks first nationally in net loss of college bound students (close to 30,000 annually). Why? Because New Jersey ranks 47th in the U.S. in public college/university enrollment capacity (undergraduate seats).”

In other words, this new facility would be part of the solution to that problem and would give New Jersey students an in-state option for their science education. The CELS would also facilitate in conducting research to restore New Jersey’s environmental infrastructure. This center would allow students to get hands on expe-

rience in laboratories and through fieldwork.

“We believe the plans for CELS represent the future of what univer-

sity science buildings in New Jer-

sey should look like. CELS will ac-

commodate our diverse disciplinary needs with an overlay of promoting interdisciplinary; it is designed with student learning in mind; and most importantly, as part of that learning, it is designed to promote discovery,” said Perzant.

HONORARY DEGREE NOMINATIONS 2013

President Cole and the Board of Trustees re-

quest nominations of candidates for honor-

ary degrees at the 2013 Commencement cer-

emonies. Nominations should be submitted to the President’s Office (College Hall, Rm. 235) by Friday, September 21, 2012 on forms that are available on at: www.montclair.edu/board-of-trustees/honorary-degrees.

Please be certain the background informa-

tion you provide addresses the criteria es-

tablished by the University’s policy on hon-

orary degrees: “Honorary degrees may be awarded by the Board of Trustees to persons who have achieved a record of major distinc-

tion at the state or national level in such areas as education, science, the arts, public service, research, the humanities, business, and the professions. Under circumstances approved by the Board, honorary degrees may be awarded to persons who, though they have not achieved national or statewide rec-

ognition, have made an especially outstand-

ing and significant contribution to Montclair State or to higher education.”
Constitution Day presents:

Bioethics and the Body Politic

September 27, 2012
University Hall Conference Center, 7th Floor

Sponsored by the Montclair State University American Democracy Project

Keynote Addresses
“Bioethics and the Body Politic”
2:00 p.m. – 3:30 p.m.

The Constitution is a living document which continues to shape our lives today. Dr. Jessica McCormick, a bioethics expert from UMDNJ and Dr. Leslie Wilson, professor of history at Montclair State will discuss the underlying questions in the book, The Immortal Life of Henrietta Lacks, by Rebecca Skloot and the consequential tension between scientific progress and social exploitation. Dr. McCormick will discuss the challenges presented by the policies and regulations of bioethics then and now and the resulting impact on our lives as citizens. Dr. Wilson, a historian, will address the social issues that surround the question as to whether or not Henrietta Lacks’ rights were violated and if indeed the fact that she was a poor black woman are of relevance to our civil rights as guaranteed by the Constitution.

Dr. Brigid Harrison will moderate. She is professor of political science and law at Montclair State and is an expert on the politics of the Millennial Generation. Additionally, she is a frequent commentator on national and New Jersey politics for print and electronic media, and for television including FOX News, NJTV, ABC News and local affiliates of ABC, NBC, and CBS. She is the author of American Democracy Now, A More Perfect Union, Power and Society and Women in American Politics.

For further information, please contact Carolyn Jones, American Democracy Project Campus Coordinator at jonesc@mail.montclair.edu.

For more information, visit: http://tinyurl.com/2012ConstitutionDay

September 27, 2012
Montclair State University
Conference Center
University Hall, 7th Floor

7:00 p.m.
David “Sonny” Lacks, accompanied by his son David Jr., will join a conversation about what it meant to find out—decades after the fact—that his mother’s cells were being used in laboratories around the world, bought and sold by the billions. The discussion will be moderated by Brigid Harrison, professor of political science and law. A book signing will follow.

Sponsored by the Center for Writing Excellence, the College of Humanities and Social Sciences, the First-Year Writing Program and Student Development and Campus Life.

This event is free and open to the public.

For more information, visit montclair.edu/cwe/MontclairBook.
Celestial patterns are stellar for this fall. These rainbow leggings, worn by Anshula Nathan, are a great example for an out-of-this-world trend. I love when this look is paired with hipster accessories like a beanie, or a leather jacket, or both. Keep the rest of your outfit low-key by making this galactic piece the focal point.

Shift or shirt dresses are great for making your legs appear thinner. I love shift dresses because it’s an easy and effortless outfit. Stay clear of the three-quarter sleeves because the cut can disproportion your body. For curvy girls, like me, add a belt to define your curves. I love how Stephanie Petchers accessorized with a scarf — it gives a casual but cool feel.

Johanna Taborda’s colored hair is a fun trend for fall. You can take her ombré look to a whole new level by adding color to the bleached ends. Caution: before picking an extreme color, I suggest buying clip-on extensions to test out which color best fits your hair color and complements your skin tone.

For men’s fashion, I always love crew necks. You can do what Michael Kissiday did and layer it over a button down or wear it with a pair of khakis. Nothing says fall more than a crew neck. Plus, a crew neck is ideal for layering under a huge jacket because there isn’t a hood to get in the way. I don’t think crewnecks will ever go out of style.

The hottest craze this fall, I would say just by scooping out campus, is bold pants. Solid, stripes, floral, textured, metallic and tie-dye are a few designs I’ve seen. Megan Sommer, Evelyn Vasquez and Kim Roman all paired their colored pants with a solid top to make them pop. For fall, I recommend choosing more of a fall color base. This look is really versatile. You can color block it by wearing hunter green pants with a purple gem-colored top or keep it simple like these ladies did. I love the pop of color, I think everyone should try out this trend!

For men’s fashion, I always love crew necks. You can do what Michael Kissiday did and layer it over a button down or wear it with a pair of khakis. Nothing says fall more than a crew neck. Plus, a crew neck is ideal for layering under a huge jacket because there isn’t a hood to get in the way. I don’t think crewnecks will ever go out of style.

Samantha Van Allen’s loafers are comfortable and well put together — perfect for campus! I cannot resist a piece that is effortlessly put together. I especially want a pair of loafers of my own with metal details. Her loafers add extra pop by dressing them with a black shirt and black jeans. By rolling your jeans up an inch or two, you can show a little skin and also showcase your loafers. I also saw in a magazine that they’re making high-heeled loafers, which would be great for a job interview or internship!

Shift or shirt dresses are great for making your legs appear thinner. I love shift dresses because it’s an easy and effortless outfit. Stay clear of the three-quarter sleeves because the cut can disproportion your body. For curvy girls, like me, add a belt to define your curves. I love how Stephanie Petchers accessorized with a scarf — it gives a casual but cool feel.

Boots are always a fashion trend, but adding studs makes them that much better. Samantha Citelli’s got it right when it comes to studded boots. I love when studded boots, an overly masculine piece, is paired with a feminine piece like a dress or a high-low skirt. Studs are cute on almost anything and give the specific piece an edgy-hipster feel. Be careful not to over-stud. Having too many pieces with studs on them is over kill.
How to Tell if He Really Wants to Be With You

In this age of mixed messages, relationships no longer stand by the definite lines they used to. In this age where relationships don't really have an affirmative beginning, they just sort of happen. How can you really know your man wants to be with you? Guys will argue they show their feelings, but what about that limbo?

Is it possible that two people who once had very strong feelings for each other can completely forget them? And how does that tie in with a new relationship?

This Labor Day, I was contacted by an ex, Joe. While I admit, it is nice to feel like I am still desired, it mostly just sets me in an awkward place. In every situation, I have been either hurt by an ex or had just lost feelings for them. With this one (we'll call him John) it is completely different. The feelings I feel toward John are ones I can't really explain, not even to myself. I have been in a relationship with my current boyfriend (we'll call him Pete) for almost two and a half years and I am beyond happy, but every time I hear from John, I am in an awkward place where you don't want them back but the feelings sometimes return.

I spent a long day thinking about John and the great conversation we had this weekend. Part of me fantasized about giving him a hint of where I'd be with my girlfriend this weekend so we could "run into each other" and hang out all night. I would never cheat on Pete, but a night out with John with a group of friends could be innocent fun while eating these crazy emotions I feel inside.

The other part of me thinks this is the worst idea ever. If there are some in-between feelings about John I need to stay far away as possible. But, will that make them go away? I'm hoping that's the path that will work, and I'm taking it. I realize when it comes to exes, everything must be brought down to its simplest terms. Everything must be brought down to one question: What do you want? That's really all we can do. If we are not happy and chase what we truly want we will destroy everything in our path. I don't want to be the tornado of doom to demolish my relationships. My fear of ignoring my feelings for John causing them to only grow is completely irrational. After reading countless self-help guides on relationship advice all over the Internet, I have decided, I, and all of us, are in charge of our emotions.

I will always be intrigued by the thought of a reunion with John, but doing so will only put me in a more vulnerable situation and put my relationship with Pete at risk. Seeing an ex while you are in another relationship is just dangerous. As innocent as a simple night out with a large group of friends might seem, unless you have absolutely no romantic feelings for that person, it is not a good idea.

So we go back to the question. What do you want? I want to be with Pete. I want to see John. Which one is more important? Staying with Pete. Thus, there is my answer.

In a perfect world, emotions for past romances could be completely erased. Last I checked though, we’re still on the same planet. So for now, I will stay away and focus on making decisions that will only make my relationship with Pete better, focusing on what I truly want and how to make it happen.
#10 Tal Wilkenfeld
Greatest Guitar Moment: “Cause We’ve Ended As Lovers” at Crosseyeds 2007. When Jeff Beck can’t contain himself around you and your basslines, you know you’ve done something right. In fact, this twenty-something has played with Rolling Stone’s own favorites: the Allman Brothers (2), Eric Clapton (6), Jimmy Page (9), and others. Even with these 6-string greats mere feet away, this high school drop out re- fuses to let her bass take the back seat.

#9 Bonnie Raitt
Greatest Guitar Moment: At 20 years, her 10th album Nick of Time got her the credit she deserved. Raitt could place first on any list of pure devotion. Not only can she play a mean slide guitar, but this is a woman with a 40-year career and 18 albums under her belt. In 2000, Raitt was induct ed into the Rock and Roll Hall of Fame.

#8 Suzi Gardner
Greatest Guitar Moment: The “Sh** List” appeared in Natural Born Killers. As Donita Sparkle’s better half in L7, Suzi Gardner brought with her some notoriety and lead guitar chops. To balance out Sparks’s ferocity, she emitted genuine knowledge of her craft.

#7 Joni Mitchell
Greatest Guitar Moment: “Amelia.” An original guitar goddess, Joni Mitchell was discovered by influential guitarist Neil Young and soon after, he and Stevie Ray Vaughan admired, going on to admit, “If I’m going to pass the baton down to anyone, she’ll be my first choice.”

#6 Sharon Isbin
Greatest Guitar Moment: Where do we start? Although she refuses to be tied down to just one musical genre, when she does settle down, Isbin is awarded left and right for her classical skills. Appearing as a soloist in more than 150 orchestras — including the New York Philharmonic and the London Symphony Orchestra — and being awarded a Grammy for Best Instrumental Soloist Performance, the first classical guitarist to receive the award in nearly three decades, receiving an additional two Grammies weren’t enough for her. She also went on to become the founder of the guitar department of Juilliard — the first guitar director in the institution’s history. Not only did she break into the boys’ club, but she redesigned its interior while she was at it.

#5 Orianthi
Greatest Guitar Moment: “Beat It” & “Flight of the Bumblebee.” Orianthi’s own guitar prowess has made her a rich one, busy with a string of hits, awards, and magazine features. In 2003, she was inducted into the Rock and Roll Hall of Fame. She also went on to become the founder of the guitar department of Juilliard — the first guitar director in the institution’s history. Not only did she break into the boys’ club, but she redesigned its interior while she was at it.

#4 Meshell Ndegeocello
Greatest Guitar Moment: “Beattie & Flightsofhellabums.” Jennifer Batten’s live performance on the King of Pop’s “Beat It” pure rock magic. In fact, her fast fingers overshadow Eddie Van Halen’s (70) recorded track.

#3 Charlie Hunter
Greatest Guitar Moment: “Pull Me Out Alive” as a tribute to her cityscape. Disjointed? Sure. Fascinating, complex, and utterly unique. You don’t have to follow Kaki King’s thought process in order to appreciate her simple and sincere brilliance. After all, she did go to NYU. The universe King creates is a rich one, buoyed by her endless talent. A composer, she has played alongside Carole King’s son, Steven, and the New York Philharmonic and the London Symphony Orchestra. She also went on to become the founder of the guitar department of Juilliard — the first guitar director in the institution’s history. Not only did she break into the boys’ club, but she redesigned its interior while she was at it.

#2 Kaki King
Greatest Guitar Moment: “Pull Me Out Alive” as a tribute to her cityscape. Disjointed? Sure. Fascinating, complex, and utterly unique. You don’t have to follow Kaki King’s thought process in order to appreciate her simple and sincere brilliance. After all, she did go to NYU. The universe King creates is a rich one, buoyed by her endless talent. A composer, she has played alongside Carole King’s son, Steven, and the New York Philharmonic and the London Symphony Orchestra.

Number 1
Carrie Brownstein
Greatest Guitar Moment: “Jumpers.” If Joan Jett may be traced back as the mother of “riot grrrl,” the women of Sleater-Kinney should be credited with creating it with clarity and putting some fresh voice on it. Perhaps Stephen Deuser put it perfectly when he wrote of Sleater-Kinney, “To survive these Greatest Guitar Moments: “Cause We’ve Ended As Lovers” at Crosseyeds 2007. When Jeff Beck can’t contain himself around you and your basslines, you know you’ve done something right. In fact, this twenty-something has played with Rolling Stone’s own favorites: the Allman Brothers (2), Eric Clapton (6), Jimmy Page (9), and others. Even with these 6-string greats mere feet away, this high school drop out refuses to let her bass take the back seat.

#9 Bonnie Raitt
Greatest Guitar Moment: At 20 years, her 10th album Nick of Time got her the credit she deserved. Raitt could place first on any list of pure devotion. Not only can she play a mean slide guitar, but this is a woman with a 40-year career and 18 albums under her belt. In 2000, Raitt was inducted into the Rock and Roll Hall of Fame.

#8 Suzi Gardner
Greatest Guitar Moment: The “Sh** List” appeared in Natural Born Killers. As Donita Sparkle’s better half in L7, Suzi Gardner brought with her some notoriety and lead guitar chops. To balance out Sparks’s ferocity, she emitted genuine knowledge of her craft.

#7 Joni Mitchell

#6 Sharon Isbin
Greatest Guitar Moment: Where do we start? Although she refuses to be tied down to just one musical genre, when she does settle down, Isbin is awarded left and right for her classical skills. Appearing as a soloist in more than 150 orchestras — including the New York Philharmonic and the London Symphony Orchestra — and being awarded a Grammy for Best Instrumental Soloist Performance, the first classical guitarist to receive the award in nearly three decades, receiving an additional two Grammies weren’t enough for her. She also went on to become the founder of the guitar department of Juilliard — the first guitar director in the institution’s history. Not only did she break into the boys’ club, but she redesigned its interior while she was at it.

#5 Orianthi
Greatest Guitar Moment: “Beat It” & “Flight of the Bumblebee.” Orianthi’s own guitar prowess has made her a rich one, busy with a string of hits, awards, and magazine features. In 2003, she was inducted into the Rock and Roll Hall of Fame. She also went on to become the founder of the guitar department of Juilliard — the first guitar director in the institution’s history. Not only did she break into the boys’ club, but she redesigned its interior while she was at it.

#4 Meshell Ndegeocello
Greatest Guitar Moment: “Beattie & Flightsofhellabums.” Jennifer Batten’s live performance on the King of Pop’s “Beat It” pure rock magic. In fact, her fast fingers overshadow Eddie Van Halen’s (70) recorded track.

#3 Charlie Hunter
Greatest Guitar Moment: “Pull Me Out Alive” as a tribute to her cityscape. Disjointed? Sure. Fascinating, complex, and utterly unique. You don’t have to follow Kaki King’s thought process in order to appreciate her simple and sincere brilliance. After all, she did go to NYU. The universe King creates is a rich one, buoyed by her endless talent. A composer, she has played alongside Carole King’s son, Steven, and the New York Philharmonic and the London Symphony Orchestra.

#2 Kaki King
Greatest Guitar Moment: “Pull Me Out Alive” as a tribute to her cityscape. Disjointed? Sure. Fascinating, complex, and utterly unique. You don’t have to follow Kaki King’s thought process in order to appreciate her simple and sincere brilliance. After all, she did go to NYU. The universe King creates is a rich one, buoyed by her endless talent. A composer, she has played alongside Carole King’s son, Steven, and the New York Philharmonic and the London Symphony Orchestra.

Number 1
Carrie Brownstein
Greatest Guitar Moment: “Jumpers.” If Joan Jett may be traced back as the mother of “riot grrrl,” the women of Sleater-Kinney should be credited with creating it with clarity and putting some fresh voice on it. Perhaps Stephen Deuser put it perfectly when he wrote of Sleater-Kinney, “To survive these
Child Care

Babysitter needed in Ridgewood for 2 kids, ages 6 and 8. Mondays, Wednesdays and Thursdays, 3-6:30 pm. Includes school pick up and driving to activities.
Contact Ingrid Laub: 917-817-7833 or ingridlaub@gmail.com.

Part Time Child Care Needed – for two wonderful boys ages 2 and 5. We are located in Emerson, NJ (about 15 minutes from the school). Hours are: 12 pm to 6 pm on Monday, Tuesday and Wednesday. Must drive and have a reliable car. Start Oct 1st. If interested, please contact Pam at TOKEN1@ATT.NET.

Child Care

Professional parents need after-school care/homework supervision for my daughter, age 12, and son, age 9. In West Caldwell (6 miles from campus). Licensed driver with clean record, own car for transportation to activities. No cat allergies. Tues-Fri. 3 pm to 6:30 with additional hours on school holidays and some evenings. Contact barbenessy@verizon.net.

ATTENTION: Writers, Photographers, Artists!

FEATURING

Dunkin Donuts Truck will be at the Blanton Quad on:

Grab some free Munchkins & Coffee

September 17th, 1:30p-5:30p
September 18th, 11:00a-3:00
September 19th, 8:30a-12:30p

Grab some free Munchkins & Coffee
Commuters Satisfaction Guaranteed?

Many commuter students have a problem getting to class on time as a result. You can hear them mutter about how much earlier they had to get up, or the fact that it took them an extra 20 minutes to find parking.

It’s understood that residents should have the right to parking, but it’s easier said than done with the limited parking spaces in certain parking lots, not necessarily the lack of spaces.

The issue at hand isn’t just the lack of parking, but the organization of it all. We are allowing our residents and commuters to park in many of the same lots. With the addition of sophomore residents, parking has to be organized in a way that will benefit the commuters. For example, having sophomore and other on campus residents park in one of the farther lots, leaving main parking places such as CarPac Diem open for commuters only. It also wouldn’t hurt to have shuttles go to those uncharted lots of MSU.

Montclair State University’s parking issue has always been a popular topic since I’ve been going to this college. Many students have always complained about the lack of parking on campus, making it harder for commuter students to find parking. Montclair has also had problems with the closest shuttle, the Heights shuttle. Residents must hike to the shuttle, which is a lot cheaper. So we all have a clear visual as to where Lot 40 is; you can clearly see it’s far from campus.

OPINION

A Horror Story for the Masses

Mold about and chairless too

For many students, a new school year means new housing to adapt to. Many choose wisely and move from traditional college dormitories to off-campus housing. Some, like myself, choose less wisely and move from dorms to on-campus apartments. When I moved into my apartment on Clove Road (I refuse to call it by its ridiculous new name, “Hawk Crossings”), I was prepared for just how many problems awaited. My neighbors’ kitchen chairs had been reported to maintenance by our Community Assistant weeks before we moved in, but we reported the problems again for move-in day. Instead, I’m sure that money goes to build the Heights through a private energy project currently tearing its way across campus. I will not argue that these are not necessary projects—they are. However, this university needs to pay more attention to the students who actually live here now and not the future students who will live here when construction is finally over (projected date: 2026). For all the money that we as students borrow so we can pay to live in these apartments, we deserve a little bit more in return to make this a more habitable place to enjoy our college experience.

Kristen Bryfogle, an English and Classics major, is in her first year as assistant opinion editor for The Montclarion.
Iron Consumer: Which Phone Will Reign Supreme?

The Galaxy S III challenges the iPhone 5

This year, we have a battle royale of cellular proportion. The iPhone has some experience in the art of combat, since its first appearance on the market in June 2007. It has successfully beaten out its past competitors, such as the dying BlackBerry.

However, a new enemy has appeared on the market. The Galaxy was the first Android phone released, but wasn’t regarded much when it first appeared on the scene in 2009. The Galaxy S III is looking to blow the iPhone out of the water.

The sales for the Galaxy S III are over the top, beating out the iPhone by far. The Galaxy S III is looking to enter on the scene in 2009. The Galaxy S III is also said to have a much better design because it is made out of metal instead of plastic, giving it a more sophisticated look.

In the looks department, the iPhone seems to reign supreme. It’s much more portable and is eye candy as far as phones go.

The only concern with a metal exterior is that it scratches easily, which ruins the design of the phone. Maybe it was a good idea to use plastic in the design, making the Galaxy seemingly less susceptible to scratches.

But the Galaxy is a huge phone and would probably stick out of most pockets. The iPhone 5 being much smaller is more flatteringly to carry in one’s pockets.

Another issue regarding phones is the processor. As of now, the Galaxy has the iPhone beat in processing and it looks like it will remain that way when the iPhone 5 comes out.

The Galaxy has the fastest processor on the market right now. Now its huge size makes more sense. It’s only logical that the Galaxy is bigger because it has a much more powerful processing ability than the iPhone.

Another feature customers focus on is the space on a phone. Most of us understand the concept of the iPhone’s capacity. You can buy an 8 GB, 16GB and so on.

The GB or gigabits determine how much room your iPhone has to store pictures, videos, music, etc. The more gigabits your iPhone has, the more it will cost.

As for the Galaxy, you are given a standard amount of gigabits, but you can add more gigabits if you need more space.

In some ways, it’s good to have the Galaxy because you are not limited on space. But if you want to be limited on space so you won’t have to pay extra, then maybe it’s better to have an iPhone.

Lastly, there is the issue of expense. The iPhone 4S and the Galaxy S III are priced the same, however, it is safe to assume that the iPhone 5 is going to be a lot more expensive.

If you really do enjoy Apple products and don’t mind spending more, than the iPhone 5 sounds very promising.

Both phones are top notch and are well received. Many carriers sell both the iPhone 4S and the Galaxy S III. The new iPhone will go on sale on Sept. 21, 2012. Whichever phone you decide to purchase, I’m sure it will be an excellent choice.

There is one question that still remains: Which cell phone will reign supreme?

MONIKA BUJAS
MSU Film Student Taps into the Other Side
A Special Look at the Short Film Anima

The trailer has received a lot of positive feedback and has even snatched a few awards at the 2012 Indie Gathering and Film Festival Convention in Hudson, Ohio. In it, we see small parts of the barbaric treatment of the inmate and the turmoil that follows. A year’s worth of production will finally be shared with the world when the film debuts on Sept. 14, 2012. The link for the film will be posted on the official Facebook page, www.facebook.com/Animamovie, but will only be up until Sept. 21 for film festival purposes. This should add some incentive to tune in as soon as the film debuts.

MSU students will also be pleasantly surprised to see that many of the scenes that will play out on the big screen were filmed right here on campus. When asked how MSU shaped him on his journey as a filmmaker, Stable praised the department and faculty. “I’ve learned a great deal of technical knowledge here, but most importantly, the professors have instilled me with a sense of confidence.”

The movie business is difficult to break into and discouraging and setbacks are just a part of the job, but Stable admits, “When I first started taking classes at MSU, becoming a screenwriter and film director was just a dream, but now, as a senior, it feels like a very real possibility.”

Anima stars Tom Zanca, Tony Vitale, Malin Tybahl and Jason Schmitz and was written and directed by Stable who also produced it with the help of CJ Pelosi. Similar to the classic premiere of Truman Capote’s novel, In Cold Blood, with other-worldly twist and turns, the trailer alone had me perched at the end of my seat, assuring me that the film is definitely worth checking out!

Blast from the Past
Album of the Week

Jagged Little Pill was the third release from the Canadian-American songstress Alanis Morissette. The album, released on June 15, 1995, is a brew of alternative rock and post-grunge influences. The 12-track disc catapulted Morissette to commercial and international success. To this day, “You Oughta Know,” the lead single, is the anthem for scorned women across the world. Morissette howls, “And I’m here to remind you, of the mess you left when you went away!” in her signature scratchy vocals, accompanied by a build up of guitar and drums that fuel the flames of her angst.

The album received positive reviews, released six singles and was nominated for six Grammy Awards, winning four, including “Album of the Year.” In 2003 Rolling Stone included the album in The 500 Greatest Albums of All Time list.

Graduate Information Session

Spotlight on
The College of Science and Mathematics

Please join us for a Graduate Information Session Thursday, September 20th 6:00 p.m. University Hall, 7th floor

Immediately following the Graduate School overview, there will be the following breakout sessions:

- Department of Biology & Molecular Biology (MS in Biology, MS in Aquatic and Coastal Sciences, MS in Molecular Biology & Molecular Biology Certificate)
- Department of Chemistry & Biochemistry (MS in Chemistry & MS in Pharmaceutical Biochemistry)
- Department of Computer Science (MS in Computer Science and CISCO Certificate)
- Department of Earth & Environmental Studies (MS in Geoscience, MA in Environmental Studies, PhD in Environmental Management, Environmental Forensics Certificate, Water and Resource Management Certificate and Geographic Information Science Certificate)
- Department of Mathematical Sciences (MS in Mathematics, MS in Statistics, MA in Teaching Middle Grades Mathematics, EdD in Mathematics Education, Teaching Middle Grades Mathematics Certificate)
- Initial Teacher Certification (P-3, K-5 and P-12 with content area certification)
- Newark-Montclair Urban Teaching Residency
- School of Business – Master of Business Administration (MBA)

This is an opportunity to speak one-on-one with faculty and staff from The College of Science and Mathematics.
Welcome Back from Parking Services

We’ve made several exciting improvements!

- Commuter and resident surface lot permits have been reduced by $25.00!
- Red Hawk Dollars are now accepted for in-office transactions!
- Weekend daily passes are available using new pay-by-phone technology!
- The Parker app can be utilized to view commuter parking availability from home!
- Zipcar is available to all students this Fall!
- Sophomore residents are now eligible for on-campus parking!
- On weekends, resident permits are honored in all commuter lots and the CarParc Diem Deck!
- Lot 61 has been converted to a commuter lot!

Don’t Forget: we offer free jump starts if your car battery dies on campus. Just call the office at 973-655-7580.

The Montclair State field hockey team came into this season with high expectations. Currently, MSU ranks 2nd in the nation, 4-1 overall and 1-0 in the NJAC. The 4-1 start gives them a 4-1 overall and 1-0 in the NJAC. The Red Hawks opened their season on the road to the Salve Regina Seahawks. The Red Hawks dominated throughout, picking up an easy 7-1 win over the Road Runners and topping their record to 4-1. Kate Nor- gard, Tafro and Rauchbach each contributed two goals for MSU. Montclair State’s only goal came from Frances Schaefer. The win gave MSU a 1-0 record in NJAC play. In a recent interview, Coach Goh- tenburg spoke about the team’s performance in the games played thus far. The team is playing well in our first four games. We are out-shooting and out-scoring our opponents in all of our games. We are struggling to improve upon early in the season and gave us an opportunity to work on our weaknesses in practice. “As this team gains more experience and addresses some of their weaknesses, the Red Hawks will then be able to realize their full potential, which will mean trouble for future MSU field hockey opponents.” The Red Hawks return home this week to host New Paltz on Thurs- day, Sept. 13th at 7 p.m. and Misericordia University on Satur- day, Sept. 15th at 1 p.m. Both games will be played at Sprague Field.

Red Hawks off to Rocky Start

The Montclair State football team dropped its second game of the season on the road to the Salve Regina Seahawks by a score of 16-7. With the loss, the Red Hawks fall to 0-2, their worst start since 2005. The Seahawks got the board first in the opening quarter when sophomore quarterback Steven Withen completed a 52-yard touchdown pass to sophomore wide receiver Matthew Traynor. Traynor would eventually go on to lead the Sea- hawks with six catches for 166 yards. The Seahawks extended their lead early in the second quarter with a 28- yard field goal attempt late in the second quarter, making the Red Hawks go into the locker room trailing 10-0. The Red Hawk offense didn’t see much action in the second quarter, as the Seahawks ate up most of the clock with two ten-play drives. Their second drive was capped off with a 1-yard touchdown run by Wilkson followed by a missed point-after-at- tempting to make the score 16-0. The Red Hawks were finally able to get something positive on offense with eight minutes left in the game, 84-yard drive that culminated with a four-yard touchdown run by ju- nior running back A.J. Scoppa. Un- fortunately, this would be the final tally of the game, as the Seahawks would hold on for a 16-7 all time against the Engineers. The Red Hawks took on Alvernia University this past Tuesday, MSU played their third game in a row at Ramapo Col- lege. The Red Hawks dominated throughout, picking up an easy 7-1 win over the Road Runners and up- ping their record to 4-1. Kate Nor- gard, Tafro and Rauchbach each contributed two goals for MSU. Montclair State’s only goal came from Frances Schaefer. The win gave MSU a 1-0 record in NJAC play. In a recent interview, Coach Goh- tenburg spoke about the team’s performance in the games played thus far. The team is playing well in our first four games. We are out-shooting and out-scoring our opponents in all of our games. We are struggling to improve upon early in the sea- son and gave us an opportunity to work on our weaknesses in practice. “As this team gains more experience and addresses some of their weaknesses, the Red Hawks will then be able to realize their full potential, which will mean trouble for future MSU field hockey opponents.” The Red Hawks return home this week to host New Paltz on Thurs- day, Sept. 13th at 7 p.m. and Misericordia University on Satur- day, Sept. 15th at 1 p.m. Both games will be played at Sprague Field.

Who’s Hot This Week

Dan Avento
Linebacker — Football
Despite the Red Hawks losing 16-7, Avento recorded an outstanding 15 tackles against Salve Regina. He was honored by being named NJAC Defensive Player of the Week. Avento also became the 21st person to reach 200 tackles in a Montclair State uniform.

Francesca Gibson
Forward — Soccer
Gibson has been a huge force for the Red Hawk offense. In five games, Gibson has scored six goals, including two in their win over FDU-Florham. Gibson is currently second in the NJAC in goals and points.

Game of the Week

Football
vs. Morrisville State
September 15, 12:00 p.m.

The Red Hawks will face off against Morrisville State in their first conference game of the 2012 season. They will be looking to bounce back after an 0-2 start.

It’s that time of year again. Everyone gets excited that football season is back, while also rooting for their favorite team. Of course, I’m not an客观的 reader, so I won’t say I wasn’t just as excited about the NFL getting back into season form.

However, let’s not forget that in just a few weeks, we’ll be heading into October post-season baseball. If we look at the last two seasons, both the St. Louis Cardinals and San Francisco Giants were wild-card teams that got hot at just the right time to pull together a remarkable run resulting in winning the World Series.

This goes to show that you don’t have to be the juggernaut team that had the most wins in the regular season in order to be the best. Even though the playoffs aren’t set in stone yet, I’d like to still take the opportunity to acknowledge the teams that are in serious contention.

This year’s “Cinderella” team has definitely been the Washington Nationals. Rookie outfielder Bryce Harper has certainly lived up to the hype by showing that he is more-than-able to handle his own in the big leagues despite being only 19 years old. This past week, the Nationals have decided to stick with their plans in shutting down pitcher Stephen Strasburg. Strasburg ended up missing most of last season due to Tommy John surgery, and they don’t want him potentially suffering another career-threatening injury. Person-ally, I feel that the decision as this will be the first time since 1945 that the city of Washington will get to witness a legitimate baseball team going into the stretch. While the Nationals are looking at what’s best for the future for St. Louis Cardinals and San Francisco Giants.

For the third straight year with hope of finally winning a championship. The Supplementary baseball team who’s turned a lot of heads. They have the second lowest payroll in the Major Leagues despite being only 19 years old. This past week, the Nationals have decided to stick with their plans in shutting down pitcher Stephen Strasburg. Strasburg ended up missing most of last season due to Tommy John surgery, and they don’t want him potentially suffering another career-threatening injury. Personally, I feel that the decision as this will be the first time since 1945 that the city of Washington will get to witness a legitimate baseball team going into the stretch. While the Nationals are looking at what’s best for the future for St. Louis Cardinals and San Francisco Giants.

Both Los Angeles teams are fighting to clinch the second wild card spot for each of their leagues. In the National League, the Los Angeles Dodgers are leading the majors with 19 wins. Also in the National League East, the Atlanta Braves are comfortably ahead in the wild card race while Chipper Jones attempts his last hoorah in a permant. In the American League East, the resurrected Derek Jeter seems to have turned back the clock by leading the New York Yankees from winning the third straight year with hope of finally winning a championship. The supplementary baseball team who’ve turned a lot of heads.

They have the second lowest payroll in the Major Leagues. Surprisingly, it’s the Oakland Athletics who’ve turned a lot of heads.

In the National League West, the San Francisco Giants has put the Chicago White Sox to a Rocky Start. The Texas Rangers and their ever-spo- tent offense have once again had a great year for themselves, as they look to win their fourth World Series for the second straight year with hope of finally winning a championship.

In the American League East, the Baltimore Orioles are leading the majors with 19 wins. Also in the American League East, the Boston Red Sox have had a meltdown of a season, which included new management and getting rid of high priced players. They will still look to prevent the Yankees from winning the division. It’s amazing to see that the Orioles are relevant at this time of the year, and even if they don’t make the playoffs, Buck Showalter has made a serious case to be voted as Manager of the Year.

In the American League Central, the Cleveland Indians are running with another team, the Chicago White Sox in the AL Central, they have a one-game lead for the second wild card slot. Lastly, the defending champion St. Louis Cardinals have overcome losing Pujols, and their starting ace, Chris Carpenter, who’s been out for the year. Although they won’t win the NL Central, they have a one-game lead for the second wild card spot.

This new implementation this year is that both wild card teams for each league will actually play an elimination game to determine which will continue their postseason in the Division Series. There’s much to look forward to this year. October is setting up to be a very exciting month.
