Capturing the Pufferfish
How “Double Down” reflects today’s political spectrum

Kenneth Marcii
Staff Writer

The new book Double Down: Game Change 2012 offers a prime example of the egotism that roosts over the political game of today’s day and age. Bipartisanship is about as rare as Bailey’s Comet, as reverence for any other politician is only actualized if it is advantageous to both parties. We all know politicians have a license to exploit: not just the people, but also other politicians.

Montclair Sings ‘Zelda’

Joseph Remmert
Staff Writer

Dr. Steven Gimbel visited Montclair State University to present a lecture, “Jewish Science: The Nazi Campaign Against Einstein, Freud and other Jewish Thinkers,” on Monday, Nov. 4.

Dr. Gimbel is the chairperson of the Philosophy Department and currently holds the Johnson Chair in the Humanities at Gettysburg College. He is the author of Einstein’s Jewish Science: Physics at the Intersection of Politics and Religion.

Dr. Gimbel’s lecture was a part of a month-long series commemorating the 75th anniversary of the “Kristallnacht” (Night of Broken Glass). Kristallnacht was a night of pogroms, or attacks by both Nazis and non-Nazis, against the Jewish community of Europe.

The series of lectures, described as a professional achievement for the students involved, performed the music from the famous Legend of Zelda video game series at The Theater at Madison Square Garden on Nov. 1. Dr. Heather Buchanan, director and founder of the group, described the experience as a professional achievement for the students involved.

The group performed a similar score of music from the video game franchise with 32 voices at the New Jersey Performing Arts Center in Newark. The producer, conductor and orchestra were so impressed with the choir’s work that they wanted them to continue interpreting the work.

This type of thing doesn’t happen often. It’s entirely unique. When we did the first performance in August, the choir was so amazing. The producer came up to me after the show and told me he thought the choir really digs this. It was one of those things where it’s the right place and the right time and the right people. The choir was so amazing.

Cleaning the Coast

Lawrence Malizzi presenting his sustainability lecture.

Jayna Gugliucci
Staff Writer

Presented by the College of Science and Mathematics, the Sustainability Seminar Series continued Tuesday afternoon with an innovative approach to coastal restoration.

The series of lectures, being popular in the past amongst students and faculty alike, was brought to life with a presentation given by Lawrence Malizzi, vice president for Matzix New World Engineering.

Malizzi has been managing projects in habitat restoration, waste management and wildlife rehabilitation since he first started at the company.

With his vast knowledge in the field of sustainability, Malizzi’s discussion focused on the “use of the eco-bag: the concept of the eco-bag” and presented a great insight into the world of coastal restoration.

Beginning his speech, Malizzi introduced the audience members to the future of environmental restoration: the concept of the eco-bag.

Being biodegradable, hur- lap or plastic self-contained packages, eco-bags are filled with Spartina alterniflora seedlings and custom-mixed soil.

Red Hawks Win Second Straight
Following last week’s impressive road win at Mor- clair State, the Montclair State Red Hawks football team continued their streak.
Anyone who has information regarding these incidents is urged to call the police station from any campus phone at T-I-P-S (8477). All calls are strictly confidential.
Physicians or mental health care professionals must rec-ommend those animals as service animals.

Dana M. Berry, the Di-rector of Montclair Health Center, believes that those are the only animals that should be on campus because they “will actually sup-port students,” she said.[2]

Mercedes, a 27-year-old army veteran and senior, was one of the students who supports the idea of emotional support animals. A pit bull named Sledsby was recommended by a doctor to help Mercedes deal with her post-traumatic stress disorder (PTSD) and loss of one of her arms. “The meds don’t help much,” she said, “but the emotional support from Sledsby is something else. It’s awesome to have someone at home waiting for you with love.”

Although the SGA supports emotional support animals, it is not the SGA’s place to take a stance on individuals with disabilities. “As a service animal, as defined by Montclair State University’s Non-Discrimination Support Animal Policy, is a “dog, a specially trained to perform a specific task for the direct benefit of an individual with a disabil-ity.”

Walter Azzara, one of the au-thors of this bill, believes that passing this bill would be beneficial to the Montclair community: “Aside from her cat, Perri Sedes is something else. It’s emotional support from [much],” he says, “but the students who have tried or harbored at Montclair State University.

Taylor Perri, a 22-year-old sophomore, from Hartford, is a sophomore, has been kept step on anyone’s toes. This is a political campaign, not a political stance,” she said. Johanna Durazzi, another important issue. “It is some-thing that is relevant to what is happening on our campus.”

Some students did agree with the SGA’s division. “I understand the SGA’s decision,” said St. Peter’s, Fla., has a popula-tion of about 1,820 students and is one of less than 20 institutions in the United States that allows its resi-dents to keep their family pets with them in campus.

Although the SGA now permits pets to be live with students, it is still under review. “We must be careful not to avoid taking a po-"I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support "I keep forgetting to take my emo-tional support animal and two support animals. Montclair State Updates

Real campus and local news with a funny twist

• N1 voted to increase the minimum wage by $1.50 starting Jan. 1. McDonald’s was one of the few able to make it rain.

• Recent reports show that students still keep non-authorized pets on campus despite the Student Senate’s new policy. When asked why student respond, “This is my seeing-eye hamster.”

• Christie was elected for a second term as New Jersey governor, winning over opponent Barbara Buono by eight percent. Christie celebrates by switching to eight percent milk.

- Girls soccer and field hockey team ranked number one in the nation in their respective divisions. Male teams made no comment.

- ‘Grown Ups 2’ to be shown in the Rec Center on Friday. This is the third time that Adam Sandler and Kevin James in a gym.

- Newly elected Newark mayor Luisquin refuses to tweet or use Facebook, according to his AOL away message.

- In an attempt to add variety to the arena’s menu, the Prudential Center now offers five different types of hot dogs.

- The Rathskeller closed for a day last due to plumbing issues. The problem stemmed from the joint’s top selling product, the Ja-macian beef patties.

- When placed in receding coastal sites, the bags are designed to create marshes, re- store wetlands and stabilize eroding shorelines.

- In other words, the eco-bags are used to “jumpstart” the recovery of coastal areas, which have been damaged by action against the shore.

- The eco-bags are constructed by a “30-year-old oceanographer of native vegetation within one year,” coastal sites that were once bare are now full of greenery and have begun to grow their own vegetation. This has led to a reduction in the amount of erosion that occurs in the area.

- Malizzi went on to explain that the trees that are planted on the beach replenishment will be used to help restore the shoreline recreation in the future project of the company, produced by the Restore Bay Saver Bag.

- With “90 percent total coverage” and the ability to “jump start” marshes, the eco-bags are being used to prove that the innovative approach against the shore is working.

- The bags are being used in both coastal development and beach replenishment projects, with a “four-season climate” and the ability to “jump start” marshes, the eco-bags are being used to prove that the innovative approach against the shore is working.

- The Vocal Accord performed an encore of “My Way” and “In the Mood” with no introduction.

Work it Out: Styled and Suited

Yasmin Abboushi
Staff Writer

Jobs are not the same as they were 30 years ago. Actually, they’re not the same as they were ten years ago. The workforce is changing. Everyday, there’s a job out there we didn’t know about. Along with the evolution of our progressive workforce, work wear also reached the same reformist variety. When we think of our typical work outfit, we envision the basic men’s or women’s suit. There’s a skirt or pant with a matching tailored blazer (most likely navy or black) and collared shirt. It’s dull and stiff. However, things have taken an unlikely twist.

Now, there are jobs where you don’t even need to wear a tie, let alone a suit. At Microsoft or Google, they encourage you to come in casual and cool. Unfortunately, there’s not much room for you aspiring doctors, lawyers or bankers. You can, however, mix up a patterned tie with a patterned shirt. Make a statement without having your outfit say: “I don’t respect professionalism.” Fashion is and always will be infused in work wear, even if it is subliminal. Here are a few basic ideas for some professional yet stylish outfits you can pull off even at your nine-to-five cubicle job.

Blazers can be casual too! Mix up a structured blazer in your comfy get up. It can instantly take from lazy to cool effortlessly.

For semi-casual professionals, try a chambray shirt with neutral chinos and suede lace up boots. In cold weather, layer your shirt with a rich colored crewneck sweater.

White collared shirts can give you a dull look. Throw in a pop of color with a structured, greyscale outfit.

Mixing large and small prints can make your workwear look sophisticated and effortless.

Ladies, widelegged trousers can be your friend! Bonus points for matchy same patterned suit pieces.

A hat paired with an oversized bag can really bring attention to your outfit while not being overtly obvious.

Building a Better Plate

Kimberly Asman
Staff Writer

Knowing what to eat to form a healthy meal can seem overwhelming, especially when eating in a place like the dining hall. Doing this, however, is a lot simpler than it seems. The United States Department of Agriculture has replaced the food pyramid with an even easier way of recommending how to eat a healthy, balanced diet. They have come out with “MyPlate,” a simple diagram showing what each meal should contain and how much of each food group there should be. On choosemyplate.gov, it is easy to view the model and learn more about what belongs on your plate when making a healthy meal. The diagram features five sections: fruits, vegetables, protein, grains and dairy. By looking at the diagram, it is easy to tell how much room each group should take up on your plate and how much of each you should be eating in relation to the other groups. Learning more about each category can help you understand how to build a healthy meal.

Fruits
For men and women between the ages of 19-30, MyPlate recommends at least two cups of fruit daily. This can come from many sources: anything from whole fruit such as apples, banana and oranges to 100 percent fruit juice or frozen berries. The health benefits of putting fruit on your plate include a large percentage of vitamins. The fruits’ different colors generally contain different kinds of vitamins. These can reduce your risk of heart disease, certain cancers and lower blood pressure. Most fruits are generally low-calorie and therefore are a good option for a healthier way to satisfy your sweet tooth. Instead of ice cream for a snack, a healthier alternative like Greek yogurt topped with berries or any fruit of your choice.

Vegetables
MyPlate recommends that women between 19-30 years of age should consume about two-and-a-half cups of vegetables a day. Men of the same age should consume three cups. You can fulfill your vegetable requirement in the form of whole vegetables or vegetable juice, which can be raw or cooked. Vegetables are great sources of fiber, vitamin A, vitamin C and folate. The fiber in vegetables is what can help keep someone full, which makes them a satisfying choice. They are also naturally low in calories and fat and can help lower overall calorie intake. A tip to help with easier consumption of vegetables is to use your microwave to your advantage. Many vegetables that you would think need to be cooked on the stove or in the oven can be quickly prepared in the microwave, such as broccoli or cauliflower in a bowl with a small amount of water.

Protein
It is easy to assume that protein is exclusive to meat, but there are actually many ways to consume lean and healthy proteins. Beans, seafood, soy, poultry, meat, nuts, seeds and eggs are all considered good sources of protein. It is important to eat mostly lean or low-fat proteins, such as chicken breasts or eggs. Proteins are the building blocks of skin, bones and muscles in your body. Proteins can also provide you with other nutrients such as B vitamins, iron, zinc and magnesium. It can also be very filling and keep you satisfied until your next snack or meal.

Dairy
Dairy includes milk and any food made from milk such as cheese and yogurt. When choosing dairy, most foods should be low-fat or fat free. Dairy is important because it can improve your bone health and may reduce your risk of osteoporosis. Dairy is also generally very high in calcium. Try to stay away from whole fat dairy products such as whole milk or regular yogurt and switch to one percent or skim milk and fat free or Greek yogurt.

Grains
Foods that are considered grains include rice, bread, pasta or oatmeal. MyPlate recommends at least half of grains consumed are whole grain, such as whole wheat bread, because it has more nutrients than refined grain, such as white bread. Whole grains contain fiber and other nutrients, including B vitamins and minerals which can aid in weight management and reduce your risk of heart disease. They can also help keep you fuller longer compared to refined grains. A way to start incorporating whole grains alongside refined grains into your diet is to mix the two together. When eating rice, for example, make half of your serving brown rice. This way, you will still get the taste you know and enjoy from white rice with added benefits of whole grains.

Focus on Fruits
Choose raw, fresh, canned, frozen, or dried, or 100% juice. Make half your plate fruits and vegetables.

Vary Your Vegetables
Choose a variety of different vegetables, raw or cooked, orange, beets, or purple, dark and other vibrance.

Make at Least Half Your Grains Whole
Eat more whole grains such as whole wheat bread, baked, oatmeal, whole cornmeal, and brown rice.

Go Lean With Protein
Choose a variety of meat, poultry, seafood, beans and peas, eggs, soy foods like tofu, nuts, and seeds.

Get Your Calcium Rich Foods
Choose fat-free or low-fat milk, yogurt and cheese.

**Life as an Editor of ‘InStyle’ Magazine**

**Stéphanie Angudelo**

**Contributing Editor**

If you could travel back to Syracuse University in 1985 and inform Stéphanie Arbetter that she would be a magazine editor for most of her life, she probably wouldn’t believe you. As a college student, Arbetter was always interested in magazines and writing, but never really considered that her interest in magazines could lead to a full-time career.

Originally, Arbetter majored in psychology at Syracuse University. She was always interested in magazines, including her college's magazine editor for most of her time in school. Like many others, she had to start small and work her way up. After college, Arbetter worked as an editorial assistant at a financial-and-travel newsletter publishing company located in Baltimore. She performed simple tasks like fact-checking and administrative work for the company, but the job taught her a lot about being truly detail-oriented and the amount of responsibility required to be the last one editing before the issue prints.

Since then, Arbetter has worked for many fashion magazines, including *Women’s Wear Daily*, *Cargo*, and *People*. She describes her current position at *InStyle* as “challenging, exciting and competitive.” With her busy schedule, only those three words could describe her typical day as an editor perfectly.

“**My day consists of a lot of meetings. I talk to the editors about stories they’ve been assigned to and those that they’re planning for the future. I help them organize the story, to see how the visuals might help tell it and to come up with ideas to extend it digitally. In a service magazine like ours, editors must work closely with the art department because the way a story is laid out is critical.**

“Editors sometimes don’t see the stories in the typical format where there’s a lot of running text and one big image. We are more visual and our stories are more packed-pack.”

Arbetter also works on brand extensions, which include everything from books, apps and TV shows to international magazine editions, digital products and consumer products, all of which are crucial components of modern-day journalism, and utilizes social media outlets to interact with their readers.

In fact, Arbetter attributes the success of *InStyle* to the digital shift in journalism. “It is a much more creative task. It’s important to familiarize yourself with all of the media available to you and what the readers think about the magazine’s culture. We can now talk directly to the readers. If it’s a mystery topic that you want to get reader feedback right away. We often post questions out on Twitter and Facebook to find out what the readers think about a topic (What’s your biggest fear? What would you wear red lipstick?). Their answers inform our stories. Sometimes their answers are the stories—as in our Reader Poll pages.

“But the digital age doesn’t always have a positive affect for *InStyle* or any current magazine, for that matter. Editors aren’t great writers and many writers aren’t great editors. I think it’s important to try both to get an appreciation for what the other does. It’s a partnership, not a battle. Any good writer and any good editor will show restraint with a writer’s ideas. Because of this, you won’t find that many editors aren’t very tolerant with their writers, but in reality it’s the other way around. Editors are often more creative than their writers, so often it’s the other way around.”

Arbetter’s advice to young journalists is to focus on the best way you can understand what will set you apart from the reporter who just goes to Google. “It’s important to familiarize yourself with all of the media available to you and what the readers think about the magazine’s culture. We can now talk directly to the readers. If it’s a mystery topic that you want to get reader feedback right away. We often post questions out on Twitter and Facebook to find out what the readers think about a topic (What’s your biggest fear? What would you wear red lipstick?). Their answers inform our stories. Sometimes their answers are the stories—as in our Reader Poll pages.

“But the digital age doesn’t always have a positive affect for *InStyle* or any current magazine, for that matter. Editors aren’t great writers and many writers aren’t great editors. I think it’s important to try both to get an appreciation for what the other does. It’s a partnership, not a battle. Any good writer and any good editor will show restraint with a writer’s ideas. Because of this, you won’t find that many editors aren’t very tolerant with their writers, but in reality it’s the other way around. Editors are often more creative than their writers, so often it’s the other way around.”

Arbetter has a lot of experience editing, and she has also had experience with the digital age. In 2001, Arbetter published a book about *InStyle* called *InStyle: The Complete Guide to Dressing Every Day*. She believes that some
Help Wanted

Are you a college student experienced in child care and looking for a stable income while pursuing your degree? Becoming a Nanny can provide fulfillment and still allow the time to pursue outside endeavors. Contact Kelley at Perfect Fit Nanny Placement Agency: Kanazarian@gmail.com or call 862-485-5111.

I think it’s actually really good because it’s increasing the minimum wage, so it actually helps people. I think it was a great idea because I think that it’s going to help a lot of people who are working minimum wage. I think it’s important to remember in life that all major decisions in life will have both consequences and benefits. A good example is the STaE’s waverin decree to sign the endorsement for Equal Marriage Rights. Of course, the strain of their hesitance has made much of the student body frustrated with them to say the least. There has been a recent decision by New York voters to increase minimum wages. Although this will be beneficial for many young workers and workers of low income families, there may be a rippling effect for those who live above the poverty line.

According to NJ.com, “The business community put up a tough fight to defeat the minimum wage measure, spending about $1 million to persuade the public the measure will lead to job losses and undermine their ability to move past the lingering effects of the recession. But they were outspent by unions and other supporters who raised $1.3 million to wage a very public campaign that included huge rallies in cities across the state.” The unions and unvaged employees had so much support, the vote to raise minimum wage had won by 50 percent.

Although minimum wage will help all of us part-time employees many fear that this will only add fuel to the fire. Many people are concerned about inflation of prices and the employment rate.

As of Sept., the Huffington Post had reported that 25 percent of New Yorkers are living below the poverty line. Many are struggling to meet basic needs as more people fall below.

It also needs to be understood that many people who are living below the poverty line are unemployed. It is essential to help get New Yorkers back on their feet, but is raising the minimum wage the right way of doing so? It’s believed that with the raise in minimum wage, there will be a vicious cycle of giving and taking. If employers abide by the new minimum wage laws, workers will be making more money. A business thrives on receiving money from customers, but also needs to support the employees. Thus, they will essentially need to raise the price of a product to compensate. In result, people feel that the minimum wage will, in fact, cause inflation and destroy the economy. If inflation becomes a void, that would entail the “letting go” of many employees possibly worsening the unemployment rate.

In contrary, many states that have raised the minimum wage from the federal amount have been flourishing. Wage increase has benefitted millions of workers in their states. It’s actually shown that many employees of this state do not feel the pressure of the raise in minimum wage. Customers, but also needs to support the employees.

We believe it’s more important to focus on the unemployment rate. There is speculation that this will help the economy by raising prices, but will it necessarily help the unemployment rate? There are high hopes that the increase of minimum wage will help sales in business, enough to bring opening up more job opportunities. We can only hope that the initial plan works and that this raise will be beneficial to all parties. It’s great if people keep their jobs, but it would be better if the unemployment issue wouldn’t remain stagnant.

Governor Christie

Christie is now being challenged by fellow Republican New Jersey Governor Chris Christie, who issued a similar ban last August at the Republican National Convention. Christie has also said that any legislation he supports in New Jersey’s legislature that impacts the issue of immigration will be scrutinized. Christie is known for his tough stance on illegal immigration and has been a vocal opponent of Obama’s immigration policies.

KENDRICK MACKENZIE COLUMNIST

THE END OF AN E N T I T Y

A quick turn of events that led to young Johnny Knoxville... Billy be- gan to dance innocently to “My Bonnie Lies over the Ocean” and never, only Johnny Knoxville - quickly flip through channels from watching a video of Christie to watching another video of Christie. Then, the newly forged buddy system in the national party was over. The newly formed buddy system in New Jersey was over. The newly formed buddy system in the country, claiming that they are not the family as more of a private entity. I think I’m going to side with the family as more of a private entity. I think I’m going to side with the government as more of a public entity.

Sociologist Hilary Levey Fried argues a very different story. “In the United States, the idea of moving to the U.S. is developed in the United States. The stress a child experiences in fourth grade...” The bill was introduced in the U.S. the majority of people pay thousands of dollars and spend a lifetime paying off these debts.

The environment in those prestigious high schools are not the same. As, the parents put a lot of pressure on kids to succeed in these new high schools. At the competition, my family was not even there. I could get into a university. Although this is many is free, my family liked the idea of moving to the U.S. because we could study what we want. If someone wants to study medicine in America, it isn’t too challenging to get in. There are a few universities that such legislature will develop in the United States.

Concerning Editors and Columns
Batman: Arkham Origins

Playing Batman: Arkham Origins is much like visiting your favorite old wooden roller coaster at the local boardwalk. The experience, while providing somewhat of a thrill, seems a bit bumpy and repetitive.

That is not to say Origin is completely without originality, but its greatest Vice may actually be the overwhelming success of its predecessors, Arkham Asylum and Arkham City. Rocksteady Studios developed those two games while leaving Warner Bros. Games Montreal the daunting task of creating a prequel to the immensely popular Arkham franchise. In some aspects, Origin is completely unique and effective. In others, it simply feels like plagiarism of the first two entries in the series.

The strength of Arkham Origins is embodied in two distinct phases of Gotham City, and its creatively written storyline. It takes advantage of both the sheer size of Gotham’s open world while paying careful attention to the characters functioning within it. The premise of the main story is relatively straightforward, right from the opening cutscenes. Mob boss Roman Sionis, also known as Black Mask, puts a one-night-only, $50 million bounty on the head of Batman. This sweet pie of gluttons attracts sights of the world’s most deadly assassins to the already criminal Gotham City. The assassins include Killer Croc, Deathstroke, Rose, Firefly, Deadshot, Electrocutioner, Lady Shiva and Copperhead. Those assassins, specifically Deathstroke and Copperhead, generate some entertaining boss battles; they are difficult, but adequately tuned. Meanwhile, as Batman fights to save both himself and civilians from the visiting assassins, another familiar face is introduced into the equation – the Joker.

There is nothing tougher in the gaming industry than producing a prequel. This undertaking gets even more tricky if the original games in the series delve into a free-flowing combat system that is one of the best in the game, and reinventions of the most popular villain of this generation. When it comes to the combat system, map structuring and the devices Batman yields, Arkham Origins really does not bring anything innovative to the table. It uses the immensity of Gotham City to its advantage, allowing it to situate more villains in their own unique spaces. However, Warner Bros. Games Montreal really did add nothing to create that depth in the first place. The inception of the reinvigorated Gotham City in the Arkham series will always be attributed to the eponymous asylum.

For the past 50 years, the Doctor Who program has been a mainstay of British television screens to save the galaxy, and the popular British science fiction series has had a strong influence on the field as a whole.

The Doctor, who travels through space and time in a 300 year old time-traveling blue British police box, is the head of the United Planets – the world’s highest authority, fighting, including David Tennant, who played the Doctor by young and good looking men, including Christopher Eccleston (Thor: The Dark World), David Tennant (Harry Potter and the Goblet of Fire) and Matt Smith, who is the youngest actor to play the role, drew in a younger audience as well.

The BBC is celebrating 50 years of Doctor Who by airing a 75-minute episode, “The Day of the Doctor.”

The plot has been kept secret but fans are excited that two of the shows most popular characters will be returning, with British actor Peter Capaldi reprising his role as the Doctor, and Billie Piper, who played his companion and love interest, Rose. This will also be the eleventh Doctor’s penultimate episode.

The Doctor travels through space and time in a 300 year old time-traveling blue British police box, called the T.A.R.D.I.S. (Time and Relative Dimension in Space), which appears to be a small box but offers infinite space on the inside. He has traveled across the universe and many planets, with stories typically young seeking adventure. In the years, his companions have been played by Billie Piper, Catherine Tate, and Kylie Minogue. The BBC program was created in 1963 as an educational and entertaining show for kids. Episodes set in the past were used as a tool to teach history, and episodes taking place in the future and on different planets. The show ran for 26 seasons from 1963 to 1989. Since aired in 1996, but the series did not make its full return until 2010. The reboot was a continuation of the original, picking up with the ninth regeneration of the Doctor. The popularity of the show increased when BBC America began broadcating the show. The cinematic episodes produced by Stephen Moffat, and the portrayal of Copperhead offer a freshening deviation from the recycled villains of the first two games in the series. However, Origins still seems to be tailored around the horror created by the Joker. It is almost as if this game was solely created to reincorporate the Joker into the series after he makes his demise in Arkham City. Rather, Arkham Origins does offer first-rate utilizing its new villains and creating a fresh combat system, which adds to the rules of the first but works out the kinks at the same time.

Origin does offer fast-paced game design and problem solving that harmonize with the combat system. However, the player’s desire for overpopulation of the enemy will be satisfied, even if in Warner Bros. Game Montreal was content with giving you less.

‘Daily Show’ Producer Speaks
Secrets Revealed at Montclair State
Victoria Nell
Staff Writer

“We are not journalists.”
-Kahane Cooperman

This was the phrase Cooperman kept repeating throughout her interview. The Daily Show is not a reliable source of the news, and if you’re only getting your news from there, you should reconsider. The Daily Show takes major headlines and satirizes the way big news corporations such as CNN, FOX and MSNBC report stories.

They poke fun at the way the main news outlets are handling the news. Instead of looking at the inconvenient truth, some how watch how the media is covering it, and may very well find a way to talk about it but through the media and how they are covering it. Maybe we can touch it, but that would be the only way because just wouldn’t be appropriate to comment directly on something like that, but commenting on the way the media is covering something is fair game.

As one of the head producers on The Daily Show, Cooperman is given the daunting task of overseeing all things Daily Show. She is a part of the upper management team and as she explains it, “involved in a day to day basis of understanding how our staff works together, all the bits and pieces of the moving parts as well as touching base with Comedy Central to make sure what we are doing are complementing each other.”

She works side-by-side with Jon Stewart and is constantly in communication with the Comedy Central execs. In response to the shows relationship with the network, she explained, “Our relationship with the network is strong and good one. I have to find a middle line of what the network wants and what’s best for the show; they trust what we are doing.”

Having a career like Cooperman’s isn’t something that comes easy. She had to work ludicrously hard and push to get where she is today. When asked what advice she has for students who are looking to pursue the entertainment industry and are hoping to have a career as successful and fulfilling as hers, she changed her demeanor. She wasn’t the serious, focused producer of The Daily Show. She was a passionate, adoring fan of quality media and as cliché as you can get. “I did what I loved doing and I followed my heart, doing what I liked doing and one thing led me to the next and in the next and it worked out for me and I feel like it because I was passionate and I followed my passion for things and I feel that sent me on my way.”

Her passion steered her in the right direction, and by the look of things, the ten-time Emmy winner’s passion is still there and isn’t going anywhere any time soon.

‘30 Rock’ and ‘Office’ Alums Costar
Tina Fey and Ellie Kemper’s New Show
Megan Spinelli
Staff Writer

Tina Fey and her 30 Rock co-writer and executive producer are teaming up to bring a new sitcom to NBC starring The Office’s Ellie Kemper. This is set to debut in the fall of 2014, according to Entertainment Weekly.

The comedian, writer and actress have revamped a 13-episode, straight-to-series order from NBC for her single camera comedy, which is temporeous titled Tusken. Joining Fey in her latest project to write and executive produce the series is her fellow 30 Rock writer and executive producer, Robert Carlock, who is also known for his work on Saturday Night Live, Friends and the Friends spinoff show. Although Fey will not be seen in front of the camera, there is a possibility that she may guest star in series. Ellie Kemper, another familiar face to NBC, will be starring as a woman who escapes from a demented cult and begins a new life in New York City. Kemper is best known for her work on The Office, but she has played a number of other widely known roles as well, including a supporting role in Bridesmaids, as well as 21 Jump Street with Channing Tatum and Jonah Hill. The 35-year-old actress also appeared as a guest star on fellow The Office alum Mindy Kaling’s show, The Mindy Project. Jennifer Salke, the president of NBC Entertainment, said in a statement: Original voices like Tina and Robert don’t come along very often and we wanted them back on the air as soon as possible. And to have them working with Ellie Kemper—who we watched grow up on The Office from supporting player to leading actress—puts the whole package together. We feel fortunate to be in business with this entire creative team on something as funny, unique and attention-getting.”

Tina and Robert, who cemented their partnership on 30 Rock, have created a new signature comedy for us that is audacious, emotional and clever,” Robert Greenblatt, the chairman of NBC Entertainment, said in a statement. While tapping into very relatable themes, there isn’t anything like this anywhere else on television. NBC has been their home for many years and we’re so happy that they’ve found another way to push the comedy envelope for us.”

Fey and Carlock co-wrote the script for the pilot and will be executive producers alongside another fellow 30 Rock executive producer and Fey’s manager, David Miner. Miner has also executive produced other well known shows such as Parks and Recreation and Brooklyn Nine-Nine. This sitcom is set to be produced by Fey’s production company, Little Stranger, Inc and Universal television, where Fey is under a four-year deal. According to TVLine, Fey is also working on a workplace comedy that is described as “Cheers-esque” for NBC, as well as a sitcom for Fox that is set at a women’s college. The 30 Rock star and creator have won numerous awards for her work and has recently asked another Emmy win to her list — this being the eighth one — for co-writng the 30 Rock series finale along with Tracy Wigfield. Fey has multiple new TV comedies lined up and everyone can expect to see a lot of her work on TV screens soon.

- This week, Katy Perry's new album *Prism* topped the Billboard 100, selling 286,000 copies in its first week, making it the biggest first week sales for a female artist this year. Although it was a good week for Perry, it was a bad week for the music industry as a whole, as overall album sales of the week were the lowest this week since 1991. With big albums coming from Lady Gaga and Eminem in the upcoming weeks, album sales should rise a bit more.

- The Jonas Brothers have officially split, according to a public announcement this week. The three brothers claimed they each had their own creative ideas and directions they wanted to go in, so they felt it was best to go their separate ways. "We're family first, and that's always been our main priority, and so honesty within what we do as a group was really important," Nick Jonas said.

- The American Music Awards set for Nov. 24 have already piled up a star studded line-up of performers, including Lady Gaga, Kendrick Lamar, Miley Cyrus, One Direction, Imagine Dragons and many more set to perform. Macklemore and Ryan Lewis have the most nominations this year with six while Taylor Swift and Justin Timberlake each have five.

- New Music This Week: Lady Gaga's "Dope," Lupe Fiasco's "Old School Love" featuring Ed Sheeran, Foxes' "Shaking Heads," Britney Spears "Perfume" and Justin Bieber's "Bad Day"

**One on One with Mikey Wax**

Victoria Nelli
Staff Writer

Not many young artists can say their music has been featured on shows and events such as *So You Think You Can Dance, Dance Moms, Pretty Little Liars, The Real World, True Life* and the 2012 Olympic; artist Mikey Wax has done just that. Wax loved music for as long as he can remember. He expressed his love of songwriting, saying “Songwriting is one of my favorite things to do. For me, the process usually just involved messing around on a piano or guitar with chords and creating some kind of riff/lyricody.”

One show that sticks out to him is his Birmingham, Ala. show. “My first tour, when I performed at an awesome venue, called Workplay in Birmingham, Ala. I had never traveled that far south on my own, and the crowd was so receptive of me.”

One career aspiration he mentioned was to play a large stadium show in places such as Madison Square Garden. Wax said, “Awards are cool, but as long as I have a loyal fan base, I’ll be okay.” Wax’s music is beautiful; his lyrics are true and refreshing. Wax has opened for some incredible talents, but soon, people will be opening for him. He has an extraordinary talent that people should recognize.
Red Hawk Round Up

Womens Soccer

With their shutdown of Ramapo on Oct. 30, Montclair State finished out a perfect season for an unprecedented tenth time. On Nov. 5, they recorded yet another shutout as they beat out Richard Stockton College in the semi-finals of the NJAC Women’s Soccer Championships. With that win, they will host the College of New Jersey in the Championship game this Friday at MSU Soccer Park.

Football

Denzel Nieves’ three touchdowns and 123 rushing yards powered the Red Hawks to a dominating 40-13 victory over local NJAC rival William Paterson at Sprague Field on Nov. 2 in the latest installment of the Route 46 rivalry.

The win was Montclair State’s second in a row after starting 1-5 on the season. Montclair State leads the series against William Paterson 40-2-1, with Montclair State ultimately leading the series with 4-13 victories as they look to take off with a strong finish.

Following last week’s impressive road win at Morristown, the Montclair State Red Hawks football team continued impressively with a 40-13 victory over local NJAC rival William Paterson at Sprague Field on Nov. 2 in the latest installment of the Route 46 rivalry. The two rivals entered the game desperate for more victories as they both entered coming off disappointing seasons. After William Paterson received the opening kickoff, quarterback Ryan Gresik threw a 48-yard pass to wide receiver Sajiri, which resulted in a 22-yard field goal with 55 seconds left in the first quarter. The quarter would eventually end at 3-0, with William Paterson leading.

The second quarter started off strong for Montclair State, as Davies threw passes of 10 and 17 yards, tying the game at 10-0 on a 27-yard field goal by junior kicker John Schubert with 2:11 left in the first quarter. The quarter would eventually end at 10-0.

The second quarter was a major factor in the victory, as they recorded a total of three turnovers and one sack while holding William Paterson to 213 yards of total offense. Sajiri leads the defense with eight tackles, an interception and a forced fumble while senior linebacker Dan Avento recorded seven tackles and a forced fumble.

"It feels great to win two games in a row, especially against a local rival like William Paterson," said Davies. "We’ve been playing very well as a team and we are excited about the opportunity to finish our season very strong.”

New 3-5 on the season and 2-3 in NJAC play, only two games remain for the Red Hawks on the 2013 schedule. The Red Hawks’ next game will be this Saturday, Nov. 9 when they travel to the College of Brockport for a 1 p.m. contest.

Mens Soccer

Just a week after a win over Ramapo, the Red Hawks were victorious against William Paterson, now boasting a 10-7 lead against the Pioneers and earning him the Red Hawks to a 10-7 lead against the Pioneers.

The quarter would eventually lead to a seven-yard touchdown run by senior running back A.J. Scoppa, putting Montclair State ahead 7-3.

The second half was all Montclair State, as Denzel Nieves scored a second touchdown, this time a 6-yard run with 4:38 left in the third quarter, capping off a 47-yard drive he had that ended with his touchdown.

The second half was all Montclair State, as Denzel Nieves scored a second touchdown, this time a 6-yard run with 4:38 left in the third quarter, capping off a 47-yard drive he had that ended with his touchdown.

The two rivals entered the game desperate for more victories as they both entered coming off disappointing seasons. Field Hockey

In the final game of the regular season the Red Hawks recorded an 8-1 win over Gwynedd Mercy their overall season record to an impressive 18-1. In the first game of the NJAC Field Hockey Championship MSU hosted Richard Stockton and shut them out 3-0. With this win the lady Red Hawks advance to the NJAC Championship and currently await their opponent.

Football

Denzel Nieves’ three touchdowns and 123 rushing yards powered the Red Hawks to a dominating 40-13 victory over local NJAC rival William Paterson at Sprague Field on Nov. 2 in the latest installment of the Route 46 rivalry.

The two rivals entered the game desperate for more victories as they both entered coming off disappointing seasons. After William Paterson received the opening kickoff, quarterback Ryan Gresik threw a 48-yard pass to wide receiver Sajiri, which resulted in a 22-yard field goal with 55 seconds left in the first quarter. The quarter would eventually end at 3-0, with William Paterson leading.

The second quarter started off strong for Montclair State, as Davies threw passes of 10 and 17 yards, tying the game at 10-0 on a 27-yard field goal by junior kicker John Schubert with 2:11 left in the first quarter. The quarter would eventually end at that score.

The second quarter was a major factor in the victory, as they recorded a total of three turnovers and one sack while holding William Paterson to 213 yards of total offense. Sajiri leads the defense with eight tackles, an interception and a forced fumble while senior linebacker Dan Avento recorded seven tackles and a forced fumble.

"It feels great to win two games in a row, especially against a local rival like William Paterson," said Davies. "We’ve been playing very well as a team and we are excited about the opportunity to finish our season very strong.”

Volleyball

After going 2-2 over last week’s Dig Pink Invitational, the Red Hawks dove right back into NJAC play with their win over local NJAC rival Ramapo in the NJAC Volleyball Championship.

The Red Hawks are excited about the opportunity to finish our season very strong.”

New 3-5 on the season and 2-3 in NJAC play, only two games remain for the Red Hawks on the 2013 schedule. The Red Hawks’ next game will be this Saturday, Nov. 9 when they travel to the College of Brockport for a 1 p.m. contest.

Red Hawks Win Second Straight

The pass set up a two-yard touchdown run by Darius Kersey to give William Paterson a 17-7 lead with 9:47 left in the first quarter.

Montclair State would strike again on their next possession thanks to an 11-yard, 57-yard drive, tying the game at 10-0 on a 27-yard field goal by junior kicker John Schubert with 5:11 left in the first quarter. The quarter would eventually end at that score.

The second quarter started off strong for Montclair State, as Davies threw passes of 10 and 17 yards to sophomore wide receiver Clinton Coffee to get to the WPU 10. That set up a 30-yard field goal drive by freshman running back Denzel Nieves, putting Montclair State ahead 17-10 with 12:13 left in the first half.

The Red Hawks did its part, the defense was shut down the Pioneer offense with eight tackles and an interception.

The Boston Red Sox celebrate their first World Series title at home since 1918.

Boston Red Sox closer Koji Uehara was nothing short of stellar throughout
the playoffs this past
season. Despite not being able to speak English very well, Koji’s son Koa
couldn’t have responded
any better to Fox Sports
reporter Erin Andrews on how both his father and the rest of the Red Sox Nation
among him must have been
feeling.

He responded, “good”
towards how proud he was of his father, and “crazy” on how
hard little Koa was going
to party that evening.

These one-word answers
gave the long awaited
95 years of finally clinching
a World Series in Fenway Park into perspective.

The franchise’s
eighth World Series
championship had also put into
perspective just how “Boston
Red Sox” four words make the Red Sox team have been this past year.

Manager John Far-
rell was always destined to
dominate this ball club.
Unfortunately, it took a year of
finishing in last place un-
der former manager Bobby
Valentine to come to the
realization that Farrell was the
right man for the job all along.

Dustin Pedroia, the
second baseman and cap-
tain, wasn’t afraid to speak his mind during last season’s split.

It has been quite
a period on how things should work around that club-
house. It gives more credit
to Farrell and his coaching
staff to bring back the team’s
chemistry and made it fun again for guys like Pedroia
and David Ortiz in playing the
show was lost. For-

Bellator 106 was
almost wiped out of his
career with Quinton “Rampage” Jack-
son, the show was moved to
Spike TV, with many fear-

Photo Courtesy of facebook.com/RedSox.

It will be interesting
to see if Major League Base-
ball willudge in letting
David Ortiz into the Hall of Fame considering his past usage of performance en-
hancing drugs. The biggest
performances of quite possi-
bly any major league season this was starting pitcher
John Lackey.

Going into this
year, Lackey had been an utter
disappointment since he
signed with the Sox back in 2010. However, he came into this season refocused and
in much better shape.

Nobody could have
ever imagined how well he would pitch throughout the regular season, but it
was mostly his sheer will
to shine in the playoffs.

With the likes of
pitchers like Michael
Wacha and Joe Kelly, the
Cardinals should be rel-
evant for a long time to
come. The Sox also have a
couple of highly-touted
hitting prospects, including
catcher Oscar Thames, who will most likely emerge
onto the scene next season to
replace free agent Carlos
Beltran.

They also have
infielder Kolten Wong, who was able to get some expo-
sure during the World Se-
ries. However, it wasn’t the
type of exposure that Wong had envisioned, considering
he ended Game 2 by getting
picked off at first base.

In an interview with
Brooklyn Nets play-by-play
commentator Ian Eagle, He correctly predicted the
Sox to win in six games. He
said it best that this team is “riding this destiny’s dar-
ing type of band wagon.
They’ve got that ‘it’ factor
which helps give them the
right experience and vibes
towards how proud he was
of his father, and “crazy” on
how hard little Koa was go-
ing to party that evening.

Red Hawks Remain Unbeaten
18-0 womens soccer advances to NJAC Championship

The Montclair State University womens soccer team celebrates their perfect season.

Mike Panepinto
Staff Writer

The Montclair State womens soccer team finished their regular season at 17-0 overall and 9-0 in the New Jersey Athletic Conference (NJAC).

MSU is the 10th different sports team in school history to have a perfect regular season. DIIISoccer.com ranked the Red Hawks #1 and the National Soccer Coaches Association of America (NSCAA) placed them at #6.

Montclair State hosted Ramapo College in their final game on MSU’s Senior Day on Oct. 30. The Red Hawks dominated throughout and won the game 9-0.

Three minutes into the match, junior forward Kalia Fasano scored the first goal of the match thanks to an assist from senior midfielder Jessica Kiniery.

Less than two minutes later, Jessica Bonjione netted a goal of her own off a free kick. Kiniery accounted for the next two goals before the ten-minute mark off of connections from Fasano and junior midfielder Kerry Glynis.

Freshman forward Jennie Hormatra joined in on the action next with two assists off of hook-ups by sophomore forward Stefanie Gomes and junior midfielder Brittany Cooper.

Junior Melanie Gress delivered the second goal of the second half by winning a loose ball and finding the back of the net at 49:31 in the contest.

Sophomore forward Kendel Bernardini notched a goal for herself in the 50th minute thanks to a corner kick from freshman defender Erin Sullivan.

Kiniery completed the hat trick in the 70th minute off a through ball from senior defender Allison Whacker. Junior and freshmen goalkeepers Gina Policastro, Meghan Calcaterra and Rachel King all combined in the shutout for Montclair State.

The championship game against TCNJ will mark the eighth time the two teams will play each other for the NJAC title.

The result was not available at press time for the Red Hawks’ last game against Richard Stockton at 7 p.m., at the Montclair State Soccer Park in the semifinals of the NJAC Conference Tournament. MSU defeated Richard Stockton earlier this season by a final score of 3-0.

The championship game against TCNJ will mark the eighth time the two teams will play each other for the NJAC title.
