Scholarships To Jones, Bauman and Mullins

Joan Coppola
Thirteen MSC
Campus Queen

Joan Coppola was crowned MSC Campus Queen for the year 1960-61 last Saturday night at Phi Lambda Pi, 3rd floor of the Kent Campus Union. The coronation was one of the major events in the Campus Queen Dance. The Queen’s court was made up of the seven runners-up in the College’s wide-awake contest, Pat Chadwick, Helen Henkel, Kathy Kennedy, Beverly Long, Joan McMullan, Joan Topor and Pat Wolsenak.

The tense moments before the coronation of this year’s queen were heightened by the speculations of the crowd. At 10:30, Tom Mullins, master of ceremonies, introduced the eight finalists, who were escorted into Life Hall by members of Phi, Bob Paulson, presenter of the frame, followed by Frank Fallavolita, last year’s Campus Queen. At the dramatic moment, Bob turned and presented Joan with a bouquet of American Beauty roses, thereby announcing her election as the new queen. After Joan mounted the stage, Frank crowned her with a silver diadem, and vice-president of Phi, presented her with a scroll, containing the following words: “Campus Queen, Joan Coppola, is one of the men of Phi Lambda Pi, Bob then led Joan out for the traditional first dance with the new queen.

The entire student body voted for their choice of queen from the 58 candidates. The finalists were officially introduced to the student body at the assembly program on the Tuesday of the final voting by the male student body. The identity of the winner was kept secret until the announcement at the dance.

Before the Campus Queen was announced, Dr. Max Rourke presented to Miss Margaret Sherwin, a bouquet of roses in recognition of 31 years of service to MSC. Mr. Rourke has made an intensive study of mathematics in foreign countries, especially Russia, where he spent six years in foreign countries, especially Russia, where he spent six years.

The story concerns the Crochets, a shanty in the bayou of Louisiana, the place of historic and cultural interest. The story is about the beauty, the strength, the spirit of the people who live there.

Janice Matisse Will Present Auditorium Concert

On March 23, MSC’s Music Or­
ganizations Commission will pre­
sent a concert by Janice Matisse in Memorial Auditorium. This con­
tcert is one of the special events given by this organization.

The program will be presented
in the University Auditorium at the Lawrence Conrad and Edward J.

In Memoriam?

No, no one has died. But the Junior Class is so infected with a lack of unity, interest and participation on the part of more than a few members that there is no hope left for it. So, we might as well write our epitaph for it now.

But before we do, let’s ask ourselves a few questions. Why is this class dying? Well, it seems that members of the Junior Class never learned some very common words. These are unity, cooperation, interaction and participation.

Special Bond

They never learned that members of a class have something in common with each other, that there is a special bond which exists, or should, among them. The mere fact that they all will, in the future, go to different schools we have a class that can be looked up to, one that we can be proud of?

Cooperation really can’t be discussed in connection with this class. Conceivably you can’t have cooperation if there is no unity at the base. It is not even necessary to discuss participation, for it doesn’t exist. And it doesn’t exist because there is no interest.

Why Bother?

Why is there no interest? This seems to be the crux of the whole problem. It doesn’t exist because the class members don’t care. Why should they care? If the Junior Class fails apart it won’t make a dink in their lives. So why should they bother? Life will go on as usual.

Small Nucleus

Of course, this lack of interest doesn’t apply to the whole class. A small nucleus of individuals, especially the class officers and representatives, have tried to do something with the class. In the fall semester they were successful in resuscitating the class. A small nucleus of individuals, especially the class officers and representatives, have tried to do something with the class.

In the fall semester they were successful in resuscitating the class. A small nucleus of individuals, especially the class officers and representatives, have tried to do something with the class.

In the fall semester they were successful in resuscitating the class. A small nucleus of individuals, especially the class officers and representatives, have tried to do something with the class.

The next meeting of the Junior Class will be held this afternoon at 3:30 in room 26 of the Administration Building. All juniors are urged to attend their class meeting.
The Art of a Woman Driver by Angelo Costa

Driving a car can be enjoyable, especially if you always know what you are doing or trying to do. Knowing the rules of the road is quite important; adhering to the laws and knowing what to do with rules is important. You should be able to control the things you want to and use your own discretion. You must remember, though, never to get caught breaking the law.

After having given your car pull 300 yards from your grade level. Do not let your car or your friends allow you to park in any place that might be illegal. If you do it, you might be sent to juvenile hall, which will not be fun for you.

We are living in an age of mech- anization. Wherever you are used to work, we now drive. Clothing that was made by hand is now mass- produced with machinery. Every- thing is different from what it used to be. In almost every field the ma- chine is the worker. The first field of the human being. The latest field that the IBM computer does its job. The next step is to deve- lop his time to making more tests. Knowing all the while that we won't suffer the consequences of our actions in the future.

The teacher no longer has to teach him with the aid of his own tests. The IBM computer does his own tests, and he deve- lops the time to making more tests. Knowing all the while that we won't suffer the consequences of our actions in the future.

Baseball Practice

In Progress

Answering Coach Bill Diorio's call for pitchers, staff in the dugout were four pitchers and nine catchers. Coach Pet Lomax, Dave Peterson, physical education instructor, has been a help to Bob Starling, business education junior, and his baseball education sophomore, who were both on trial for the varsity.

Three veterans of last season's pitching staff started work toward opening day on April 3. They were Jerry Golembeski, physical education junior; Iggy Coletti, math junior; and Jim Picotahe, education junior. Randall Boyd, an English junior who missed last season after having a fine record in his freshman year, was also available.

Missing was Tony Mucia, industrial arts junior, who has been a standout for the past two seasons. Tony was out after grading freshman year, posting a 7-0 record, and is expected to return to the lineup by the end of the season. Nonis needs eight more wins to tie the Montclair State record for wins by a pitcher. Billy Rock was 10-11 in games won by Tony from 1953 to 1955. He was unable to pitch his last three games because of an arm injury sustained in the opening game of the season after April 2.

Harold Kircher, industrial arts major from Lakewood; Perry Higley, physical education junior from Washington H. low; Jack McGowan, education senior from Wood-Ridge; and Joe Stahl, physical education junior from Millburn High School, are new freshmen with a chance of making the starting nine pitchers. Pat Luciano and Mark Salad, who were both on trial for the varsity last year, are new candidates for pitchers and catchers.

In all it will be a delightful per­formance for the students and some of the accomplishments of the season. The Intercollegiate is gaining satisfaction here in such a manner that the students are sprunging up and more colleges are coming to appreciate the competition in this sport. The European countries have had a grand time on the field, and the Millard Park are the new trend in college baseball. Frank Ferraiolo, physical education sophomore, is also making a bid for a spot on the team.

Any other pitchers or catchers in the lineup will have a good chance to make the team. The following below is the schedule for the coming baseball season.

April
5 Monday, Bloomfield College Home 3:30 p.m.
8 Friday, *Jersey City State Home 3:00 p.m.
9 Saturday, *St. Peter's College Home 3:00 p.m.
16 Tuesday, Bloomfield College Home 3:00 p.m.
17 Wednesday, Bloomfield College Home 3:00 p.m.
18 Thursday, Bloomfield College Home 3:00 p.m.
19 Friday, *Newark College of Engineering Home 11:00 a.m.
