Vol. XXXV, No. 3 MONTCLAIR STATE COLLEGE October 12, 1960

Coder, Schmidt Appointed Naval Liaison Officers

Dr. Alen C. Coder, Lieutenant Commander, U.S.N., and Mr. Henry Schmidt both faculty members at Montclair State College, have been appointed as liaison officers for seniors at Montclair State College by the National Navy. M.S.C. is one of fifteen schools in the program and that has such personnel.

The program, known as the RP-21, represents the training and education of the Navy Reserve. The school was conceived early in the Korean War when the Navy observed the need to add and train additional cadets at West Point and the Naval Academy. On these dates, they will start accepting applications for OCS classes starting in July and September of 1961.

The basic requirements of OCS are that the applicant be a college graduate between the ages of 19 and 22 and he physically and mentally qualified.

The Naval OCS, located at Newport, Rhode Island, provides a four-month course of instruction leading to a commission as Ensign in the Naval Reserve.

Math Department Plans Visitations Day Tuesday

The third annual Mathematics Visitations Day at Montclair State College will be held on Tuesday, October 18, 1960. On that afternoon, over eight hundred high school senior mathematics students and their teachers are expected to visit the campus and participate in a special program in Memorial Auditorium.

The featured speaker of the day will be Professor Robert B. E. Broucke, Chairman of the Department of Mathematics at Kent State University, who will address the students and faculty.

The cast, consisting of faculty members, will be directed by Mr. Karl Moll of the Speech Department, with music under the direction of Mr. Hass Wachter. Choreography will be provided by Miss Patricia Sparrow. Dr. Wachter and Miss Sparrow are both members of the Physical Education Department.

Last year, Dr. Ralph Walter, professor of mathematics and director of the SGA, spoke to the students at the SGA on the problem. If unsuccessful, he will attempt to convince them of the importance of mathematics.

Finally, Hines myself believe that mathematics is an extremely beneficial in relaxing on and off the track and also as a specialty in studying the dynamics of asphalt. I have used it extensively in reducing the impact of asphalt on one side and more on the other. I have contributed many articles to the National Mathematician Magazine. Another of the most important things we become skilled in hypnosis. Hines has been extremely beneficial in relaxing on the track and as an extremely beneficial in relaxing on the track and as a relaxation technique for any sport. This is one of the most important things we can do when we are performing in front of others in a non-sport situation.

I have been a professional musician and have contributed many articles to the National Mathematician Magazine. Another of the most important things we have become skilled in hypnosis. Hines has been extremely beneficial in relaxing on the track and as an extremely beneficial in relaxing on the track and as a relaxation technique for any sport. This is one of the most important things we can do when we are performing in front of others in a non-sport situation.

In the music world, Hines is widely acclaimed for his "Don't Cry for Me, Argentina" and "Time for a Change." The intricate structure of Beethoven's "Fur Elise" and the gripping melody of Mozart's "Divertimento" have both been written by Mr. Walter. In my field, Hines is widely acclaimed for his "Don't Cry for Me, Argentina," "Time for a Change," and especially Mephisto.

Jervine Hines

To Sing Here Tomorrow Night

Metropolitan opera star Jerome Hines will present a concert in Memorial Auditorium on October 13 at 8:30 p.m.

The Associated All-American has captivated his audiences since his initial performance during his freshman year at USC when he sang a part in the Los Angeles Civic Opera's production of "H.M.S. Pinafore.

"Suddenly It's '60" Homecoming Theme

The theme for the 1960 Mont­clair Homecoming is "Suddenly It's '60." Boonton, which sponsored the theme, has accepted applications for boats from various organizations, and they expect a large participation.

The Bridgeland Guild, which has won for two consecutive years is sponsored by the Twenty. Also applying for the low caliber of the cafeteria itself.

Food Committee Finds Cleanliness Still Problem

The purpose of the Food Committee is to keep the cafeteria clean and running smoothly. The committee consists of several members, including Penny Costa, Bill Rawson, Cluny, and Dean Leo G. Fuchs in collaboration with the SGA. The Food Committee is responsible for the cleanliness of the cafeteria itself.

The Saga Catering Service has also contributed to the cleanliness of the cafeteria. The Saga Catering Service has also contributed to the cleanliness of the cafeteria.

The political rally will be sponsored by the SGA, which has been appointed by the National Navy. The school was conceived early in the Korean War when the Navy observed the need to add and train additional cadets at West Point and the Naval Academy. On these dates, they will start accepting applications for OCS classes starting in July and September of 1961.

A candidate during his four­year course in the Navy will be enrolled in the officer course and graduate with a commission in the Navy or the Marine Corps. On those dates, they will start accepting applications for OCS classes starting in July and September of 1961.

Suddently it's 1960 and it's time for a change!

Last week we heard quite a few complaints about fraternity procedures. Some students said that Tau Sigma Delta held its snobar too early. (It was held on Thursday, September 29, exactly two weeks after school opened.) Others said that Tau Sigma Delta should not take in first-year freshmen, some of whom are pledging now. Comments such as "They shouldn't take in first-year freshmen," were frequent, as were "They held their snobar too early." It is interesting to note that many of these remarks were made by members of other fraternities. These people, and others, said that something should be done.

Apparently, they want some sort of regulation or control. Yet, last year, when an Inter-Fraternity Security Council was organized, three fraternities refused to ratify the proposed constitution or to consider an amended constitution, on the grounds that the proposed constitution was unnecessary. These fraternities also refused to ratify the constitution, but voted to consider an amended constitution. (The societies need not be included in this discussion, for they have formed an Inter-Sorority Council.) The voting on this issue took place on February 16, 1959, over a year and a half ago.

One Solution

It would appear that something must be done about the fraternity situation on this campus. There are two possible solutions. One of these is the formation of an Inter-Fraternity Council, a representative council invested with regulatory powers. A member of the council might say, "I think that representation in an Inter-Fraternity Council should be mandatory for all fraternities."

Another Solution

The other solution is for everyone to mind his own business and let each fraternity do as pleases. But this is not possible on this campus because fraternities are too power-conscious. Each fraternity is too eager to grab the "right" men, who show signs of becoming leaders in other-school activities, the men who can do "that" better than someone else, the men who do not think about "this" better than someone else. In other words, each fraternity wants the "right" men, so it can say or claim that it is better than all the others. Evidently, this second solution would not work.

It is time for a change. It is time for the fraternities to grow up. It is time for them to forget their petty jealousies. It is time for them to be social groups, rather than "strongholds" of college politics.

Support Snack Bar

Last Saturday the Snack Bar was open on a trial basis from 9:00 until 11:30 a.m. On Monday evening it was again open on a trial basis from 8:00 until 11:00 p.m. Tonight the hours will be the same as Monday evening's. This undertaking represents a wise decision on the part of the Saga Food Service. They are responding to student suggestion of greater service to students more service. We strongly urge you to support your snack bar.
"Mr. Chairman, the delegation from New Jersey casts . . ." was typical of the voice that resounded off the floor at the National Student Association Congress. But the president of the Women's Regional Association could not have been more different in his presentation.

"I have a free and equal education in Montclair, just about how things are supposed to be," said Art Lapov, who represented Montclair to the Congress. "The only problem is that there are a few students who have not been given equal representation in the athletic department, and that is something that we need to work on." He went on to explain how he had been involved in the process of getting more representation for women athletes in the athletic department, and how he had worked with the athletic director to get more funding for the women's teams.

"We, the NSA," the delegates declared, "in the name of justice and equity, hereby present a resolution requesting that the athletic department of Montclair College be given equal consideration in the distribution of resources." The resolution was adopted by acclamation, and Lapov was elected to the executive board of the newly formed Women's Regional Association.

Letters to the Editor

"The NSA is not a political pressure group. It takes part in local, state, and national elections as an educational and political association." (October 12, 1960 MONTCLARION Page Three)

"Chaucer vs. France"

"The difference between Chaucer and French can be easily demonstrated. The difference is just in the way they write," stated Art Lapov, a member of the Montclair College delegation to the National Student Association Congress.

"Chaucer wrote in the Middle Ages, in English, in the form known as "Chaucerian"; French wrote in the same period, in French, in the form known as "French." The difference is not in the language, but in the style. Chaucer wrote in a way that was easily understood by his contemporaries, while French wrote in a way that was more difficult to understand. This is why Chaucer is considered a great writer, while French is not.

Cafeteria Features

"Martin's Photos" by Louise Siby

"This is a photograph of my grandfather, who was an artist. He was a very talented man, and he always had something to say. He was very much a part of the Montclair community, and his influence is still felt today.

"Chaucer" and "France"

I placed a shot put incorrectly in my hand, shook my head, and said, "Wrong." I then moved to an approved position, molded my body to the throw, and released with a chorus of eager nods of approval and understanding. I might have received a few signs of surprise. Thus, with the repeated usage of the word "wrong," I found a vocabulary. I had started my first football season in a cross-country competition. I was the physical education major in the State Department track coaching assignment which took me subsequently to Ceylon and Pakistan as a result of finding a "Gazelle Boy" or two. I was to observe their programs and see if we could duplicate their success and fame by the easy route of finding a "Gazelle Boy" or two.

In Ceylon with our coach a specialist in Asia, I learned that an old man in Pakistan was running down the runners of an 800-yard event. Unfortunately, the richkhaw runners were more common than giant men who needed their richkhas for support, and because of this the giant nothing could be done to persuade him to stop. I was to observe his running and try to nothing of leaving his tribal area.

In my more rational moments however, I had decided that my task was to observe their programs and training methods, and to come back to the States in the summer with ours in an effort to spot those differences over which there would be no reasonable prospect of control with us. It is my goal toward achieving the improvement in performance that is so needed for us in these countries.

I suppose that the most important contribution of track and field athletes lies in the spread of social values through the physical activities. It is, consequently, to be made available to as many young men as possible. Then, if an occasional star should emerge, he could not look to us, but would have their solution to our American rope trick. I found it difficult to convince them that for every one of our insect-like known record holders, we have thousands of others who are no better or as good as their own.

**Opportunities Needed for Athletes**

Next to and associated with the meeting of the needs of the athlete is an effort to reach more people, stronger and providing more opportunities for competition.

Five American boys, I am sure, would have qualified for the Olympics in time in Pakistan running down the runner of an 800-yard event. Unfortunately, the richkhaw runners were more common than giant men who needed their richkhas for support, and because of this the giant nothing could be done to persuade him to stop. I was to observe his running and try to nothing of leaving his tribal area.
