Committee rallies bond support

by Nora DePalma

Now that NJ governor Brendan Byrne has signed the bill to put the state college $95 million bond issue on the ballot, supporters of the bond are working hard to gain NJ voters’ support.

Kelsey Murdoch, director of college development at MSC visited the Little Falls township committee last Monday night to explain the importance and necessity of the bond to them. He plans to visit as many of the surrounding town council meetings as he can arrange.

On a statewide level, a citizens committee led by former NJ governors, William Cahill, and Robert Meyner, is informing citizens by mass media-radio and television, according to Murdoch. Mike Mintz, director of college development, said that he and his staff are doing at MSC.

The goals for the hiring of full-time faculty positions available during the 1978-79 academic year were set aside to make renovations to existing buildings to allow more conservative use of energy.

The formation of the commission is also being built fireman said. "A 15 minutes is a good time for an evacuation of this size and with these many victims," Griffin said.

The fake victims were all out within 10 minutes. Everyone else was out in 15 minutes. "15 minutes is a good time for an evacuation of this size and with these many victims," Griffin said.

The goals for the hiring of full-time faculty during the 1979-80 academic year, according to Dickson’s report, are somewhat more modest. A total of 25 vacancies is expected and the goals for hiring are as follows: black men (4), women (5), Hispanic man and no black men. The number of positions filled by white men and women, while projected at nine and 10 respectively, had jumped to 18 and 19 respectively.

The goals for the hiring of full-time faculty during the 1978-79 academic year have not been achieved, according to Dr. David W. D. Dickson, in his May 3, 1979 report to T. Edward Hollander, chancellor of higher education.

"The one ambulance waiting at the scene could have been used to build an addition to Sprague Library, and a new Fine and Performing Arts Center, to provide better facilities for handicapped students, and to make some repairs on campus. Also, some of the money will be set aside to make renovations to existing buildings to allow more conservative use of energy.

The SG A also ran a voter registration drive, which Dennis Galvin vice-president of external affairs called “very successful.” He said that approximately 100 people registered.

Webster drills residents

by Adam Sommers

The usually quiet front of Webster Hall sprang to life last Monday night. The first of several fire trucks, two aerial units, and one ambulance rolled a stop at about 7:30 pm, on Webster Hall’s front lawn. The other units came shortly after. Hoses were pulled, ladders propped up and people, pretending to be injured and uninjured, were evacuated.

"The fire drill staged at Webster Hall Monday night was successful,” Don Balchman, Little Falls Fire Department Chief, said.

"The response was good. The men learned a lot. We located a few problems. Also the students, I feel, learned a lot,” John Griffin, Fire Prevention Officer stated.

"Time-wise we did well. We don’t have the statistics on the other drills of this kind, so we can’t really compare,” Balchman said. It took about three minutes for the first truck to get there. After that the next six followed in quick succession. Within seven more minutes all of the emergency vehicles were there.

Raymond P. Stover, dean of housing, was not present at the drill, but he feels that it was a success. He said that last year a similar drill was conducted at the Clove Road apartments by the Little Falls Volunteer Fire Department.

The fake victims were all out within 10 minutes. Everyone else was out in 15 minutes. "15 minutes is a good time for an evacuation of this size and with these many victims," Griffin said.

"The one ambulance waiting at the scene could have been at the hospital within five minutes,” Jack Magee, a large, powerfully built fireman said.

The main purpose of this drill wasn’t necessarily to see continued on page 3
Datebook

TODAY, THURS., OCT. 15, 1979
MEETING: Amateur Radio Club, Mallory V-261, noon, New members welcome.
MASS: Newman House, 12:15 pm.

PEER COUNSELING—REFERRAL SERVICES: Sponsored by Women Helping Women, Math/Science Bldg., Rm 366, 9 am-4 pm.

FRI., OCT. 19, 1979
DISCUSSION: Student Center, Purple Conference Room, noon, free admission. Topic: “What the heck is ‘speaking in tongues’?”
PEER COUNSELING—REFERRAL SERVICES: Sponsored by Women Helping Women, Math/Science Bldg., Room 366, 9 am-3 pm.

SUN., OCT. 21, 1979
FIELD TRIP to Morristown National Historic Park, Student Heritage Club, 50 cent reservation fee to be brought to history department Room 215, Russ Hall by Thurs., Oct. 18., 11 am to 5 pm, picnic at Jockey Hollow—bring brown bag lunch. In case of rain bring rain gear.
MASS: Newman, Studio Theater, 11 am.

Mon., Oct. 22, 1979
MEETING: Administrative Management Society, College Hall, C-304, 4 pm, first meeting—New members welcome.

PEER COUNSELING—REFERRAL SERVICES: Sponsored by Women Helping Women, Math/Science Bldg., Room 366, 9 am-7 pm.

Tues., Oct. 23, 1979
FRIENDSHIP SUPPER: Newman House, 5:30 pm, 50 cent admission.
MASS: Newman House, 12:15 pm.

THURS., OCT. 25, 1979
CLUB MEETING: Marketing Club, Student Center, Meeting Room 1, 2:30-4 pm. New Members Welcome.
MASS: Newman House, 12:15 pm.

MEMBERSHIP MEETING: Latin American Student Organization, Student Center, Meeting Rooms 1 and 2, 4 pm.
FILM: Association of Black Faculty and Administrative Staff, Student Center, Meeting Rooms 1 and 2, Film showing 11:15 am to 12:15 pm, donation. “A Dream is What You Wake Up From” Sociological View of Two Black Families.

DEADLINE FOR APPLICATION PICK-UP: Drop-in Center, located between Math/Science and Student Center, until 4 pm, applications must be be picked up by the above day and time for the Oct. 28 training session, for more information call: 893-3271.

ISRAELI DANCING: Jewish Student Union, Student Center, Rooms 1 and 2, 8 pm, 30 students, 75 others.

WED., OCT. 24, 1979
THE DANCE OF THE TRANCE: The Mystic Ecstasy of the Whirling Dervishes, professor Tatar Halman of Princeton University will speak, philosophy-religion department, Partridge 309, 8 pm.
MEETING: MSC Riding Club, Student Center, Ballroom C, 8 pm.

GENERAL MEMBERSHIP MEETING: Jewish Student Union, Student Center, Room 3 and 4, 7 pm, “Jewish Mysticism and Kabbalah”, pizza and drinks.

SGA GENERAL MEETING: Student Government Association, Inc., Student Center, Fourth Floor Meeting Rooms, 4 pm, Open to all who are interested.

WED., OCT. 24, 1979

Registration
Advance registration for the spring semester has been changed. It is now from Oct. 24, to Nov. 2.
Winter session registration is taking place now. Course pamphlets are available from the Office of the Registrar.
Residents inconvenienced

Septic problems plague Stone

by Chris Carroll

There are mixed reactions concerning the way in which the recent sewer back-up at Stone Hall was handled.

Dave Haoch, housing maintenance coordinator, said, "These things happen, we don't want them. We all wish that things could be running smooth."

On Sept. 29, the sewer backed up into the lounge at Stone Hall. This was caused by a short in the electrical system that powers the two sewer ejector pumps.

The Rapid Meter Company was contracted to repair the pumps. They installed a temporary pump so that the two defective pumps could be rebuilt. Water was turned off in the dorm on Oct. 5, but was turned back on the next afternoon.

Bob Rice, director of Stone Hall, said the situation was "Pandemonium worthy." In regard to the work done, Rice said that "Every effort was made to provide maximum service for Stone Hall. The major inconvenience was that the dorm party had to be moved to Webster Hall."

Paul Haoch, RA at Stone Hall, was dissatisfied with the service. "It was very uncomfortable for everyone to live with," he said.

Apparently many of the residents were unhappy about the situation. Bob Wood, a senior and four year resident of Stone, felt that the fact that Stone Hall is an all male dorm was a factor in when and how to remedy the problem. "The campus is overprotective towards the needs of the girls," he said.

Steve Wikoff, a two year resident of Stone, said that a similar problem occurred his first year here. "Last year the pipes broke in the showers and it took a week to fix them. We've seen it happen before," he said. Dennis Lake, Wikoff's roommate, said that "If it had been Bohn Hall, we never would have had the inconvenience. The problem would have been taken care of immediately."

Matt La Courte, a freshman at Stone, thought it was "a disaster." He said "It was a definite inconvenience due to the fact that we had to run back and forth to Bohn Hall to go to the bathroom and use the showers," he said.

In search of...

Drill works well

continued from page 1

"It was staged so that the men and students would know what to do," Sargent Griffin of the campus police stated. The men learned where the switch boxes, and water taps were. They learned how good the water pressure was, and where and how well the alarms worked.

"The water pressure on the inside lines was a little low," Balchman said. "It was a little low on manpower for the drill. In an actual fire we would have between 60 and 70 men instead of tonight's 40," said the fire prevention officer.

Stover explained that Webster Hall was chosen this year, because it is higher and more remote than Stone Hall. Bohn and Freeman Halls use a completely different evacuation system, and the Little Falls Volunteer Department had a preference for Webster Hall.

The men were learned where to go and what to do in case of a real emergency. "It's a worthwhile effort, but I think that it was a little overdone," Bill French, an MSC freshman psychology major said. The simulated victims found out what treatment real victims receive. "I'm all right," said Elly Houghton, a psychology major.

The accounting major at MSC, Ellen was suffering from an imaginary broken right leg. Winnie Lloyd, a sophomore home economics major stated, "I thought it was fun but I learned something also."
Prejudice problems

Prejudice is the basis of a dispute in the School of Management at William Paterson College (WPC), according to Sue Merchant, news editor of the Beacon. During the summer Berch Haroian, dean of the School of Management, requested numerous meetings with faculty member Oumar Nabey. Nabey claims that Haroian used many racial slurs during their meetings. One of which was: “Faculty members are complaining that you are not a house nigger like Mahalah. (Mahalah is another black faculty member.) Haroian later admitted that “house nigger” was his own term, and not that of the faculty member.

Nabey wrote to President Seymour Hyman in August, complaining about the terms Haroian had previously used. Hyman, and vice-president of WPC Arnold Speet met with Haroian, Nabey, and various members of the faculty to discuss the matter. Some of the members present claimed that Haroian had, at one time, referred to them as “foreigners.” Nabey was still dissatisfied, for nothing was accomplished at the meeting.

At a closed meeting in early September, Nabey demanded that Haroian publicly apologized to him. Haroian did so, admitting that his remarks were in poor taste.

During a faculty meeting held on Oct. 11, Erwin Nack, president of the Teacher’s Union, stood up and demanded that Haroian either resign, or be dismissed from the faculty. Haroian flatly refused to do this. Nabey became excited at this, that Haroian had, at one time, referred to them as “house nigger.” An applause followed Nabey’s outburst. Eventually, Haroian admitted that his apology to Nabey, and the faculty, was not enough.

The Union held a meeting directly after the faculty meeting. Erwin Nack announced that he would consult the AFL-CIO for further action concerning the matter.

Pres. retires

Clayton R. Brower, president, has decided to retire his 10 year position at Trenton State College (TSC), in January.

According to Tim Quinn, editor-in-chief of the Signal, Gordon Goewey, executive vice-president and provost, is one of the candidates for the office. Goewey stated, editorially that they

called the faculty, and directo­r of test develop­ment for the Educational General Service Administra­tion, exclaimed.

Ironically, one of the most conservative panelists, Dr. P. J. Capaccio, resident of Hughes General Service Administra­tion, exclaimed.

Several speakers expressed their opinions and suggestions to the anxious students as how to best prepare for their goals and careers in life. According to Dr. Howard E. Figler, director of counseling and placement at Dickinson College (DC), the most important skills that students should master in college are the ability to read, write, think, and reason logically.

The knowledgeable panelists agreed that the best kind of career preparation was no preparation at all.

“It’s important to be alert and aggressive at your interviews. You have a lot to offer so don’t underestimate yourselves.” Rita Kowalski, regional training officer of the General Service Administra­tion, exclaimed.

The dignified and scholarly Dr. Edward J. Bloustein, president of Rutgers University (Rutgers) informed the attentively listening audience that the best lawyers are not those students who have been specifically or narrowly trained for law. On the contrary, Bloustein said, “The best lawyers are those students who have had a wider range of education and human experiences. These lawyers begin their profitable careers with a rich base of knowledge and understanding of cultural differences, racial discriminations, and human nature in general.”

Reinforcing statements made by Bloustein and Protase Woodford, an MSC alumni and director of test development for the Educational Testing Services, later addressed the fading audience. Woodford began his presenta­tion in high gear, which in turn produced hysterical laughter from the crowd. As the director chuckled he said, “You don’t have to make a choice between career preparatory courses and non-career preparatory courses. Choose by choosing them both because the wider the range of courses the more knowledgeable you will be.

Kowalski said, “It is important to be on your toes at all times during an interview. Show the interviewer you have something to offer to their business, be enthusiastic, and above all keep your dignity but don’t be prudish.”

Speaking from past experience, the distinguished Capaccio said that too many people prepare for only one position or purpose in life. If you find you are not succeeding in your present field, you should have the flexibility to adapt to a new position or a totally new and different field.

Figler concluded the lecture by saying, “College does not have to train you to become a specialist, but it should present you with a broader education, which in the long run creates a greater value.”

Paid leaders

The Student Finance Board (SFB) at Trenton State College (TSC) has formed a Task Force to study the feasibility of stipends (payments for services) for student leaders. There is currently one student receiving a stipend of $2,7000 a year. The recipient is Susan Schreibman, SFB chairperson, according to Tim Quinn, editor-in-chief of the Signal.

Schreibman asked members of the Signal to sit on the Task Force Committee. The Signal stated, editorially that they are against stipends except in the case of the SFB because the student chairman performs in a professional capacity and is not doing the job for experience as in other student organizations. If the student were not doing the job the Administration would have to pay someone to do it, according to Gweyn Jones, news editor of the Signal.

A career in liberal arts?

by Julie Shore and Rick Messina

“Do you know what you can do with your degree...or do you?” Meetings concerning the future liberal arts majors were held on Oct. 4, in the crowded, smoke-filled Student Center ballrooms.

Several speakers expressed their opinions and suggestions to the anxious students as how to best prepare for their goals and careers in life. According to Dr. Howard E. Figler, director of counseling and placement at Dickinson College (DC), the most important skills that students should master in college are the ability to read, write, think, and reason logically.

The knowledgeable panelists agreed that the best kind of career preparation was no preparation at all.

“It’s important to be alert and aggressive at your interviews. You have a lot to offer so don’t underestimate yourselves.” Rita Kowalski, regional training officer of the General Service Administra­tion, exclaimed.

Sorority Socializing

Frat parties, mixers, cotillion, Senior Banquet, Alumni Dinners, trips to Wildwood, Bermuda, ski resorts and great times is what Sigma Delta Phi is all about.

Many people have a misconception about sororities. The sorority invites municipalities and government are encouraged to apply for the scholarship. Each year, it is awarded to 53 students from the 50 states as well as the District of Columbia, Puerto Rico, and the Pacific Islands.

Analytic ability, communication skills, self-confidence, and commitment to future government service are among the criteria judged as well as leadership potential and interest in public service.

For further information, contact Dr. Grovenor Rust, College Hall HR, Box 461, ext. 4239, as soon as possible.

Scholarship available:

Nominations are currently being accepted for the Harry S. Truman Scholarship which is awarded annually to a New Jersey resident enrolled as a full-time sophomore in an accredited institution of higher education.

Winners receive a maximum of $5,000 annually for up to four years (junior and senior undergraduate and two years of graduate study) as well as a one-year optional internship after receiving a bachelor's degree.

Students interested in a career in the federal state, or municipal government are encouraged to apply for the scholarship. Each year, it is awarded to 53 students from the 50 states as well as the District of Columbia, Puerto Rico, and the Pacific Islands.

Analytic ability, communication skills, self-confidence, and commitment to future government service are among the criteria judged as well as leadership potential and interest in public service.

FOR SALE: 1971 Caprice, 2 door, 65,000 miles a/c, trailer hitch, excellent running condition, $999, call 933-0344 or 667-4896.

FOR SALE: Caprice Wagon, 9 passenger, pb, ps, ac, air shocks, hitch, excellent condition, snow tires included (radial) "regular gas," $843-3924 ask for Don.

FOR SALE: realistic car stereo cassette player with auto reverse, 2 speakers with 5-1/4" woofers and 2-1/4" tweeter, wire, like new, $375 firm, call 893-3613 after 6 pm.

FOR SALE: 1970 Ford LTD station wagon, 87000 miles, best offer, 256-1409.

FOR SALE: rug, dogs, ACK- cute, four black mini, inoculated and wormed, asking $175, call 731-3659.

FOR SALE: one half fare coupon on American Airlines, good until Dec. 15, 1979, asking $50 or best offer, call Cindy 239-1657 after 7 pm.

FOR SALE: mattress and box spring (firm), only 6 mos. use, $65 or best offer, 783-9351 or 746-6081.

FOR SALE: 1976 Yamaha, black, 650 cc, luggage rack, magnesium alloy wheels, must sell, $1450, call John, 835-9220.

FOR SALE: girls 26" 5-speed blue bike, new tires put on and breaks adjusted two months ago, complete with lock and back wire basket, best offer, call Nora at the Montclairians, 893-5241.

HELP! ILLITERATE seeing eye dog needs help reading texts for blind mistres, if you can help read, call Karen or Eve—202 Webster Hall, 893-3831.

WILL THE person who saw someone hit a brown Datsum 289 z on October 9 near Webster Hall please call 6259-0710.

WANTED: FACULTY/staff or interested student wanted to help with Avon orders on campus, contact Fran, graduate admissions, 5182, or 746-8675 pm evenings.

WANTED: TUTOR for math for Business I, needed immediately, call Carol 667-1082 after 5 pm.

POETRY: PROSE drawings, essays, photos, and other printable arts wanted for Quarterly's regular issue, send work with a SASE to Quarterly, Fourthfloor SC, deadline Oct. 29, call 893-4410.

WANTED: KAPPA Sigma Rho's social sorority at MSC is looking for new sisters, for more info call 256-4309 or 256-4609.

MANIKIN NEEDED: for sculpture, call Bob. 483-4956.

WANTED: STUDENT needed to work part time evenings, in the SGA Office, must qualify for financial aid, college work study, call 893-2024.

Want To Win $10?

Enter the SGA Logo Contest!

The Student Government Association is offering a $10 prize for a New Logo Design!!

CONTEST RULES:

1. Include the initials "SGA" in design. If possible, also include the slogan "Students Serving Students".

2. Entries will not be returned.

3. Only MSU Undergraduate Students may enter.

4. You may enter as many designs as you wish.

5. Black and white designs are preferred, any size.

Send your Entries to:

STUDENT GOVERNMENT ASSOCIATION
Public Relations Committee
Fourth Floor, Student Center
Montclair State College
Upper Montclair, NJ 07043

Please include your name, address, and phone number

Winner will be notified by Nov. 15, 1979.

Campus Police Report

Crime is no yolk

by Dave Youritch

It was another crazy week around campus, as crimes from pie and egg throwing to pickpocketing occurred.

On Oct. 2, the famous incident involving Richard Helms occurred. Aron Ram, Ray threw a banana cream-filled pie at Helms during his speech, sponsored by the Council for International and National Affairs. Helms dodged the pie, went on with his speech, and Ray was captured. When asked for identification, Ray produced an ID for High Times Magazine, and The Alternative Press Syndicate. Ray was then escorted off the campus.

Sgt. John Johnston of the police reported on Oct. 7 that eggs were thrown at Patrol Car 410 during an investigation of noise complaints. Johnston went to the Clove Road Apartments at 3:25 am and after talking with students decided that nothing was wrong, so he returned to Car 410. When he saw the car, he noticed that about six to 12 eggs had been thrown at the left side of the vehicle. No suspects were immediately captured, but the police did have some leads in the case.

(Rose Marchese reported that the police that her wallet was taken from her pocketbook early in the day on Oct. 4. Later in the day it was located in a trash can and she was advised to pick it up. This was pickpocketing, or theft by unauthorized taking.

Another weird incident occurred to Dr. Jose Gorrin in Parking Lot 4. Gorrin reported that he was leaving the parking lot and he drove up to one of the mechanical gates. The gate opened and he proceeded to go through. However, it came down prematurely and struck his vehicle. The gate bent his radio antenna and also damaged the roof of his brown Plymouth.

On Oct. 5, in Partridge Hall, there was a theft of a TV set. At 3 am the police found the door open and observed a 21" Sony TV sitting on the floor. The police returned it to headquarters for safekeeping.

A burglary was attempted on Oct. 5. An unknown person knocked the latch off a storage door in Bohn Hall with a rock. Noshing was taken from the area, mysteriously, the police found an intercom system lying on the floor.

Two other thefts did occur, however. On Oct. 5, Dawn McGone reported that her Free Spirit 21 bicycle was taken. She said that it was locked, and when the police investigated they found the lock to the bike intact.

Also, Diane Marco told the police that she lost her wallet from the bookstore shelf in the Student Center on Oct. 1. This is a place where many students lose their valuables, and if you lose anything contact the police at 893-5222 immediately.

A Vandalism in the Rathskeller continues on campus as two students reported incidents to the police. Patrick Guarino of North Arlington told the police on Oct. 3 that her front tire was flattened. The police upon investigating found that the tire had been slashed with a sharp object.

On Oct. 6, David Marisini called the police and explained to them that his windshield was smashed. The police, after investigating this incident, believed that rocks were thrown at his car, which was parked in Lot 6, from the railroad tracks.

The police also caught six males in Parking Lot 6 who they believe overturned a garbage can. An officer heard a loud crash, and investigated. The officer saw six males, and some of the six admitted to the crime.

Sgt. Mike Postaski did his good deed for the day, on Oct. 5. While he was on patrol, entering Route 46 from Clove Road, he saw a car on fire. Postaski radioed for the Clifton Fire Department and they responded.

Students will have to keep dancing on the wood floor in the Rathskeller until further decisions are made on the new dance floor.

Last semester there was talk of a new dance floor in the Rathskeller. Harold C. Ostroff, business manager of the Student Center, stated that there is no dance floor because of the problems with the drinking age. He explained that since the N.J. Legislature is deciding on changing the drinking age to 19, the idea of a dance floor will have to wait.

If the age limit is raised, the Rathskeller will have to be redesigned with half the room for students over the drinking age and the other part for minors. Minors may not eat where drinks are served.

The Rathskeller is a social area for the students. Food is served until the last hour before closing. Pizza, calzones and sandwiches are part of the menu. The beverages served are soft drinks, beer, wine. Hours are Monday through Thursday, 11 am to midnight, Friday 11 am to 1 am, and Saturday 8 pm to 1 am.

Tuesday night is disco night. A local DJ plays the top disco hits. Last semester this night was a success. Ostroff said that periodically groups that want exposure will perform there.

No improvements were made during the summer. The room is used more in the day, stated Ostroff, mainly because of commuters. There are games such as chess, pinball and backgammon. There is a jukebox and a TV.

The decision on the new dance floor will have to wait until the drinking age limit is set. Ostroff concluded, "The dance floor is a good idea because the disco phase could end shortly and when a new phase enters a dance floor will always be used."

Decision still un-rat-ified

Students urged to take the train
by Regina Macioci

How would you like to save yourself a lot of gas money, wear and tear on your car, and lots of aggravation? Public transportation is the way to go.

You can manage to get to and from school by train quickly and efficiently. With a little help from someone in the Drop-in Center you can have your entire route mapped out for you.

Colleen Heath, a senior and psychology major, gave some general times that the trains would be running as an example of how easy it can be.

Heath urges students to make a stop at the center. "It's hard to generalize. It's easier to have the person come in so that we can give them exact information," she said.

A spokesman for train service at the Conrail Lines claims that the trains are prompt and very reliable. The trains used as examples - all stop at the Montclair Heights Station, which is directly across from the football field, and leave from there in the evening.

From Denville, the 6:45 am arrives at the Montclair Heights Station at 7:18 am. The train leaves MSC at 7:14 pm and arrives in Denville at 7:48 pm.

From Wayne, the 7:09 am arrives at 7:18 am, and the 7:59 am arrives at 8:09 am. In the afternoon it leaves MSC at 4:06 pm and arrives in Wayne at 4:19 pm.

Finally, the train leaves Boonton at 7:29 am and arrives at MSC at 7:49 am. Or it can leave at 7:43 am and arrive at 8:09 am.

The above listings are a quick overview of how easy it can be to take the train to school.

The people at the center exude friendliness and warmth, and the atmosphere conveys this. The main sitting room is filled with comfortable, colonial style chairs and a fireplace.

Heath urges that the student stop in because one of the instructors will sit with a person for as long as it takes to figure out which train to take and the exact times to catch them.

She said, "If we don't have a schedule we can call Amtrak or Conrail for information."

Minories outraged

After a survey of newly hired faculty, by rank, shows that most of the women faculty hired by the college during this period were categorized as instructors (68 percent), and that relatively few were ranked as assistant professors (42 percent), associate professors of professors (14 percent).

Dickson's report concluded that, within the framework of federal and state legislation, the college intends "to give special emphasis and thrust to changing our faculty profile to reflect more appropriately a larger utilization of minorities and more appropriate ranking for women."

The spokesman reported that, "The service is good but trackwork is being done so the trains may be a little slow." He did say that there is better service in Newark.

As far as prices go, a one way ticket from Wayne to Montclair is $1 and a round trip ticket is $1.50.

From Denville, a one way ticket is $1 and a round trip ticket is $2.60.

Finally, when asked how a person would get to NY, the Conrail spokesman said that one would have to take the Path Train from Hoboken into the city.

Making decisions
by Laura Henault

The decision making process is one of our biggest and most difficult concerns, according to Dr. Arlene King, assistant professor in the department of counseling, human services and guidance. Learning the art of "creative decision making" involves becoming aware that a decision needs to be made and then evaluating alternatives to arrive at a satisfactory solution.

"Decisions are automatic and reflect our values from years past. Some continue to work for us and some don't. This is why we must reassess our values," King stated. She related a recent Women's Center lecture discussion entitled "Improved Decision Making."

King added that she made many decisions before she had the awareness that choices were indeed available. In fact, King related, "In 1953 I had a BA and a husband. Now I have a PhD and a new husband after reversing some of my values!"

The right to make decisions "connects" with the responsibility of living with choices different from those normally made in our society, King said. This responsibility involves looking at one's personal values and determining whether they continue to represent the person he wants to be today.

"Unlocking some of the stuff that locked me up before has given me the potential to grow," King stated. She related that it is vital to develop the freedom to control the environment. This, King said, is accomplished by thinking of "unique and outrageous" ways of handling situations by allowing the openness of all possibilities.

"The ultimate cop-out," King said, "is deciding not to decide." She stated that waiting to arrive at a decision is a decision in itself--a decision to let the environment "impact upon the person without input from the person." This, according to King, places the individual in the victim's role and at the mercy of his environment.

It is important to state one's personal power by taking care of oneself rather than placing power in the environment, King said. "We all have the right to be where we want to be at any given time. All we have to do is use it," she stated emphatically.

Earth is 'displayed'

by Liz Cram

Students walking through Sprague Library will get a chance to view the earth as it is seen from space.

The latest display in the library's lobby is sponsored by the physics/geoscience department. It contains informative panels about the earth.

Frank Kelland of the physics/geoscience department, and MSC students, are responsible for the display. Most of the exhibit is on loan from the US Geological Survey. There is also work done by the students.

The display features a large portrait of the US, various panels which will change periodically, student projects, and free literature dealing with the earth and space.

Kelland, seated in a room with various maps and photographs of the earth, explained that MSC students are responsible for the display.

Kelland said his students are very enthusiastic about the project. The display will make use of satellite and aerial photos done by the students.

Kelland further explained that there was some advertising on the display. He said, "I imagine several people will be coming from outside the campus to see it."

The highlight of the project in Kelland's opinion, is the eight by 10 feet color portrait of the US. It contains an explanation of the significance of each color. He feels the entire display is significant and interest for these students.

"I think it's good to get students working on something more practical like this, rather than using only textbook material," Kelland added. He said the library has been very helpful in providing books about space, and the earth as seen from space.

"Jewish Mysticism and Kaballah"
by Rabbi Herbert Weliner

Pizza & Drink Served
Apathy killed Montclair Hispano.

Mike Mintz, president of the New Jersey Student Association (NJSA), spoke about the organization. He explained that the group officially voted to have the dorms open during the winter session. However, the exact date is unknown at this time.

Kim Dozier, a political science major, is the editor of the newsletter with the assistance of Percy Johnston, assistant professor in the English department. They have built a format for the newsletter different from the previous publication, Strive, based on the current affairs of black students on campus.

Although first publication is due this month, the exact date is unknown at this time. Strive dealt more with liberal arts. Dozier feels the newsletter must be universal, and she also feels the newsletter must be universal, saying the newsletter is definitely a paper for all people. She refers to this newsletter as her “ultimate goal.”

When asked why have an alternate publication when BSCU already had Strive, Dozier frankly said, “Poetry is fine, but there is a need for other fine contributions of black students on this campus.”

The content of the newsletter will consist of an entertainment section, sports features, cultural events, educational values, athletic tributes, guides and other information needed by students on-campus.

Dozier is hoping to have the publication appear before the end of the month since it will be a monthly publication. “Originally I wanted People's Voice to come out two times a month, but I just don't have the time,” Dozier said.

Dozier has selected students who are interested in writing, and those who will write about the functions of black students on campus as her reporters. Although People's Voice will cut down on poetry, its contents will contain some poetry and stories written by students.

Sitting on the second floor of Sprague Library, in a secluded room, Dozier said, “Many of the students writing for the newsletter are interested in journalism. I like that because they know what approach to take in the writing.

“I hope this newsletter will help in their journalism careers.” Students can submit materials, but Dozier is more concerned with working with a particular staff. Each publication of People's Voice will differ. Dozier contends “The second will deal specifically with education.”

Dozier concluded that she hopes the newsletter will aid the staff of the newsletter in their careers as well as “crossing cultural barriers.”

Law day at Rutgers

Rutgers Law School will host a Minority Student Law Day at its new SI Newhouse Law Center located at 15 Washington Street, Newark, NJ. It will take place on Sat., Nov., 3 from 9 am to 5 pm. Existing and prospective minority law students will meet and attend a one day conference designed to inform and advise individuals about the mechanics of applying to Law School, and the various programs available to minority students throughout the nation.

Get out of that blue mood now

Are you depressed? If the answer is yes, you are not alone. According to a recent study by Oliver, Croghan, and Katz at four universities, a large percentage of students enrolled in American colleges suffer from some form of depression.

Loneliness was discovered to be one of the main causes of depression. Students who live on campus, it's the loss of family, friends, and familiar surroundings. For freshmen, it resulted from the transition of being the popular senior to the nobody freshman. Another reason for depression cited in the study was the need to compete academically. Students have always worried about their grades. They felt that they must prove to their parents and peers that they are a success at school. Many students felt if they could not compete in school, they would be unable to compete in the job market.

Some symptoms of college depression are unhappiness, emptiness, sadness, and loneliness. Also the students had difficulty falling asleep at night, bad feelings of fatigue, and had a loss of appetite. If you suffer any of these systems, it was recommended you see your advisor as soon as possible.

For students at MSC, there are a myriad of services that aid in health problems, emotional adjustment as well as social adjustment, and any other problems you might encounter.
For the students of the '70s the future is the common concern. Analysts are predicting a tight, and even closed, job market for the '80s. Today's college student is conscious of the fact that a career goal is necessary during school in order to get a few steps ahead of others entering the professional work force.
We're not alone

FAIRLEIGH DICKINSON UNIVERSITY

"The people here are anxious to get into the real world. They're looking to do things for themselves, that's why they're in school. The biggest concerns we hear are good grades and more activities. There aren't enough activities for people to get involved," said MC Smith, a junior at FDU. "This is the typical commuter college. People don't make too many friends. Most people study, then come home and study more."

GLASSBROOK STATE COLLEGE

"The students here are conservative; they don't get involved in political issues, and when they do it's not radical. Many of them are busy working towards careers, or on their jobs now, that's one of the reasons GSC isn't thought of as academic, but people here are concerned with getting good grades. I've never been to MSC and I'm not familiar with it, except what I read in the newspaper we have sent to us," said Bruce Krajewski, editorial in-chief at Whit.

JERSEY CITY STATE COLLEGE

"We're a commuter college and that places some restrictions on extra-curricular activities for students. This year, we have a good involvement with the media; that's the newspaper, radio station, and yearbook. But it's still difficult to get people to come in. Students are here for the education that will get them a job, especially those in our nursing program."

"Being on the newspaper I know about MSC. The first thing that comes to my mind is a long-haired, blue-eyed student with an art major. On the paper the ran a similar cartoon against MSC as a form of retaliation. However, I'm looking forward to an improved relationship between our schools. When I think of majors at MSC, the first one to come to my mind is teaching education."

—Tom Patterson, editorial-in-chief

Gothic Times

KEAN COLLEGE

"The average Kean student is here to get a degree. They're really biding their time here. Ten years ago people were hung-up on academics and trying to finish up. This decade they're not facing the reality of the lack of jobs available. Many of them stay here for more than four years, sometimes five and six years. I don't think, maybe it's a lack of confidence in themselves, or education. They're very, casual about taking credits—sometimes dropping down to nine or 12 a semester."

"When I think of MSC I think of a smaller school. The biggest concern people have there is getting through college so they can get a good job. Most are concerned with getting good grades in their technical courses, so they don't put as much effort into their humanities courses."

"Thinking of MSC, I think of a school that offers diversified programming. I think of the new football field. I don't think it's as academically-oriented as NJIT simply because your major is more standard compared to ours, you have more dorms, and more people. It's more college in people's minds. The major I think of is probably education."

—Doug Hamblet, editorial-in-chief

VECTOR

NEW JERSEY INSTITUTE OF TECHNOLOGY

"The typical student here is conservative and studious. It's an engineering oriented school, so most are achievement-oriented. People are concerned with getting through college so they can get a good job. Most are concerned with getting good grades in their technical courses, so they don't put as much effort into their humanities courses."

"Thinking of MSC, I think of a school that offers diversified programming. I think of the new football field. I don't think it's as academically-oriented as NJIT simply because your major is more standard compared to ours, you have more dorms, and more people. It's more college in people's minds. The major I think of is probably education."

—Doug Hamblet, editorial-in-chief

VECTOR

STOCKTON STATE COLLEGE

"Trends have been apathetic within the past few years. But in the last year there's been a complete reversal. Basically people came in and resurrected our newspaper and the radio station. Our student government was formed. No one knew why the station had been broken up, but the administration had something to do with it. It wasn't until now that students got angty enough to do something about it."

"I think of a fairly good school when I think of MSC. I think of a good school, a respectable school. I think of the typical 'me generation' person, the 70's person who railed against the establishment and became a liberal."

—Nancy Greenberg, editor in-chief

Targum

TRENTON STATE UNIVERSITY

"There's a fairly heavy emphasis on further education and students are interested in areas such as law school, business school, med. school, and graduate school in both the humanities and sciences."

"MSC? There's not much information about the school in the Princeton Review, but there are a vast number of colleges in the state. Each one has its own personality. In an attempt to gain an overall view of almost a dozen schools in the state, student newspapers were contacted. Editors were asked: "What is the general attitude of students on your campus towards school and their future?"

"What is the first thing to come to your mind when you hear the words Montclair State College?" To see if we have kicked the reputation of being only a teachers college they were also asked: "What is the first thing that comes to your mind that your school offers?"

William Paterson College

"Basically, everyone here sticks with their own separate groups and go their own ways. A study was done and it showed that most people have a part-time job. There isn't too much interaction between the students. It's easy to say there's apathy, but there are a considerable amount of activities. The thing about the organizations on campus is that each one appeals to a special interest an individual may have. If people join clubs to get something personal out of it."

"When I think of MSC I think of a good school, with facilities, nice dorms, and the many people I know who go there. The first major to come to my mind is education."

—Anne Mackay-Smith, editor in-chief

Montclarion/Thurs., Oct. 18, 1979 13

Signal
The me generation

Upon first examination of today's centerfold, the average college student should feel an underlining sense of depression.

The centerfold, which attempted to get an idea of how NJ college students view their own schools and MSC, left us with just one conclusion—the student of the '70s has fallen into a pit of conservatism and stagnation.

When asked what college newspaper editors thought of first when they envisioned their fellow classmates, almost all of them saw a group of self-centered career-oriented people. Not to say that there's anything wrong with this, but most of those asked expressed a tone of boredom in this vision—not many of them felt anything near the excitement that the students of the '60's experienced during their "growing years" in college.

"Take a minute or two to think about what's important in your college life. Chances are that the things that come to your mind have something to do with yourself. Oh, you might think of the environmental crisis, nuclear energy, or the state of the world's poor. But most of you would readily admit that the important issues are whether you will have a job when you graduate or if you'll get that new car when you start receiving a regular income.

Some editors in our survey cited a dissatisfaction with the food in the college; others pointed out the apathy which restricts any college-wide issues from exciting the students. None singled out any major problems on their students' minds that reached beyond the borders of their own campuses.

The simple truth of the matter is that there just isn't anything to get excited about. The staff of the Montclarion sat around for hours on end trying to think of issues to get the student body involved in. The editorials pleading for student input and interest have become passe.

What do you think about when you envision your fellow students? And what are your attitudes towards other state and private colleges in NJ? Ask yourselves, and then read our centerfold. We hope you find it as interesting as we did.

No action

On Feb. 8 of this year, the MSC Board of Trustees were faced with a memo from T. Edward Holland, chancellor of higher education. The memo concerned the state of affirmative action on the MSC campus, and the tone of the memo was far from complimentary.

A confrontation between the Trustees and the minority population at the college ensued at the regular monthly meeting of the Board. The student, faculty, and administrative representatives for affirmative action forced a showdown with the Trustees questioning why greater strides in affirmative action were not being made. The Trustees sat in front of the group and explained that great strides take a great deal of time—much longer than the college had had thus far with the program.

The anger at that meeting is something that none of the representatives have forgotten. The question remains, however, if the anger accomplished anything substantial to this date.

A new Affirmative Action Commission will begin its work tomorrow. The task before them is not an easy one. Affirmative action at MSC has had a poor record to this point, and unfortunately the college community does little to cooperate in the work.

The MSC administration would also do well not to forget the disgruntled feelings of minorities who feel they have not had a fair chance in hiring.

Perhaps the quiet we are now in concerning this issue is only the calm before the storm.

We have great hopes for the new commission, and sincerely look forward to success in their efforts this year.

Students Speak

Health hazard

by Dirk Bender and Jean Smith

Do you think the quality of the food in the Student Center matches the prices?

"No. The only thing safe to have is the coffee and tea. Maybe. Now that I think of it, I haven't eaten anything here in the last two years."

Ann Marie McClusker
home economics/consumer affairs

"No, not at all. I think that the hamburgers from, say, McDonald's, cost about half the price and taste a lot better. The hot lunches never seem like they're cooked. The hot lights are a terrible way of heating it. Those lights are supposed to keep them hot?"

Tony D'Avino
marketing

"The hot food, yes, the cold, no. All the hot foods are very reasonably priced and are mostly of good quality, but the cold dishes, particularly the breakfast meals, ought to be labeled "Alpo." I can spend $2 for breakfast and get a bunch of junk. I would say the only thing worthwhile in the morning is coffee."

Marc Mackin
accounting

"The hot meals, yes, I think they're very good. I think the yogurt is over-priced, because if you can buy it in the store for up to 40% less, it's not worth buying here. You could bring it. Compared to other schools I've been in, the hot food here is delicious and worth buying."

Susan Sirulnick
consumer affairs

"No, I don't think the quality of the food matches the price. I think the food prices are too high. I think that for the prices that we're charged we should have better food. Compared to other colleges, our prices are much higher."

Jacqueline Whitfield
sociology

"No, because the portions aren't really that large and they seem to charge an excessive price for what they serve. On certain items, there isn't much variety. I don't think the quality is that bad. It could be better, but it will do when you're hungry."

Dave Kulesz
computer science

"The hot meals, yes, I think they're very good. I think the yogurt is over-priced, because if you can buy it in the store for up to 40% less, it's not worth buying here. You could bring it. Compared to other schools I've been in, the hot food here is delicious and worth buying."

Susan Sirulnick
consumer affairs

"No, I don't. That's why I bring my lunch. For the price I pay, it should be a lot better. I'd rather carry my lunch around than buy the food here."

Michael DePalma
computer science

"No. The prices compared to other colleges are too high. I went to another school, and the food was better and cheaper. You could get more of a variety."

Candy Clark
home economics/consumer affairs
Fire safety?

To the editor:
The week of October 15th-19th is Fire Prevention Week and we the undersigned are concerned about college administrations awareness, sensitivity and concern for fire safety of the campus community.

Example 1: To our knowledge no fire drills have been conducted to this date.

Example 2: The check of classrooms on this campus indicates few if any signs in the college print shop has not been checked recently and one in particular is. Well, to be truthful, I'm doing two to me or not, all I can do is ask you.

Example 3: A number of fire extinguishers in the college print shop has not been checked over two years.

We object

To the editor:
In reference to last week's article--"Interns confront the real world"--we noticed a deletion that we feel is worthy of mentioning.

For the past five years, the broadcasting department of MSC has offered a viable and valuable internship program for its students. This program, a recommended requirement for broadcasting majors in their senior year, has gained an excellent reputation in the New York area of broadcast and broadcast related fields. Our intern runs the gamut from radio to newspapers and of course to television. We have established over the years, such programs involving many high quality corporations, including AT&T Corporation, National TV, NBC, ABC-TV, Knight-Ridder Television, Suburban Cablevision, WTVN-11, the WTVN-12, the Herald News, etc. Need we go on? The point is, our internship program, where the students receive academic credit for "hands-on experience," is one that we are very proud of and deserving of praise. However, in Ms. Henault’s article she failed to mention the broadcasting internship program and the School of Fine and Performing Arts itself.

Although we are a small department compared to others, we boast a 70% employment rate upon graduation. How can other departments make such a claim to this? We are a serious, hard-working department preparing ourselves for failure to mention the world of broadcasting. We would also like to give credit where credit is due to our devoted professors Drs. Chris Stashib and Howard Travis. Without their aid and encouragement, we would have no broadcasting department, let alone a well-respected internship program.

Let it be known that we are not condoning Ms. Hanault's article at all. It is well written and researched. Yet, we are tired of not being recognized by our fellow students.

Maybe in the near future, people will start to realize that there are other majors on campus involved in their work besides business majors.

It's not just a hut

by Lynn S. Zlotnick

While thumbing through the Montclarion two weeks ago, my friend pointed to the ad for the JSU Sukkah building. "What's a what-ever-that thing?" he asked, pointing to the word "sukkah." "A sukkah is a hut that Jewish people build to commemorate the holiday called Sukkot," I promptly replied. He was puzzled. "Huh, I don't get it." With that incident in mind, this writer dedicates the following article to any and all persons curious about the Jewish holiday called Sukkot.

Sukkot has agricultural as well as historical significance. Historically, it represents the journey of the Jews through the desert after the exodus from Egypt. Agriculturally, the holiday reflects the joy of harvest time. In this aspect, it is referred to as Hag Ha Asif, The Festival of Ingathering. Each Sukkot, small wooden huts called "sukkahs" are usually constructed in one's back yard, and decorated with fruits, vegetables, and flowers. The hut itself represents the temporary shelters used during the historic desert journey.

The fruits represent the harvest and change in seasons. This holiday also has great emotional impact. Sukkot begins two weeks after Rosh Ha-Shana and lasts for nine days.

Holy scriptures are recite during this period, and the verse, "He who sows in tears, reaps in joy" is fulfilled. The period of judgment, introspection and penitence begun at Rosh Ha Shana concludes on the final eve of Sukkot, adding much joy to the festivities.

Orthodox Jews generally live in the sukka during Sukkot, but the less traditional merely recite several prayers and eat a few meals inside the hut. The traditional ceremony includes holding the lulav (a palm branch) in one hand, and the etrog (a citrus fruit) in the other hand, and reciting the following prayer: "Blessed are You, Lord our God, King of the Universe, who has sanctified us through His commandments and commanded us to sit in the sukka."

The palm branch, of course, represents the wooden shelters used in the journey, and the citrus fruit, the reaping of the harvest.

Thus, I give you the meaning behind the Jewish holiday called Sukkot. (In case you may be wondering, the little booth in front of the Student Center last Monday was MSC's version of a sukka. Hopefully, this article has wiped the puzzled look off of my friend's face, and perhaps off of yours, too!!!

Lynn Zlotnick is a member of the Jewish Student Union (JSU).

Point of Information

Where's the money?

by Dona Soranno

As undergraduates at MSC, you contributed a total of approximately one half a million dollars to your SGA. You pay $2 per credit, each semester with a sealing of $24. The SGA is an independent non-profit corporation which is run completely by students to serve their fellow students.

In the spring, elections are held for representatives to the Student Government Legislature. All undergraduates, with at least a 2.25 cumulative average, are eligible to run. Every undergraduate has the right to vote for representatives in their department.

The legislature sets policies, charts all organizations of the SGA, and allocates money to these organizations. Money is allocated in annual budgets for Class One organizations, whose services are geared toward the whole student body, and throughout the year, for the specific activities of Class Two organizations.

Class One organizations present their proposed budgets to the legislature in the spring semester for the coming year. Deletions and additions can be made by the legislature, then the representatives vote on them. Last year the annual budgets given to Class One were as follows:

- Black Student Cooperative Union: $25,211.17
- College Life Union Board: $46,650
- Council on International and National Affairs: $48,500
- La Campana (yearbook): $18,082
- Latin American Student Organization: $19,800
- Human Relations Organization: $15,600
- Montclarion (newspaper): $12,000
- MWC-FM (radio station): $12,000
- Student Intramural & Leisure Council: $12,000
- Point of Information: $12,000

Through the same format, the legislature appropriated money to SGA operations, in which services, such as the legal service, pharmacy program, and the Drop-in Center are supported. This amount was $92,000.

If you would like any further information regarding the finances of the SGA, please contact me, Dona Soranno, SGA office located on the fourth floor of the Student Center.

Dona Soranno is the SGA treasurer.
Admit it—it's a tough job

by Robert E. MacVane

The high school senior eagerly awaits any form of communication from this office and the college freshman rarely gives it a second thought. It is out of step with the rest of the campus, while everyone is adjusting to fall 1979, this office, the Office of Admissions, is working in 1980.

Applicants to MSC do not arrive automatically; the office plans and executes recruitment activities geared to reaching the caliber of student that MSC serves. With the projected decline in the college-going population in the 1980's, these recruitment efforts will need to be strengthened and revised, and new ones designed; the admissions staff is already working in these directions. One innovative recruitment effort that was initiated by the MSC admissions staff was the "on-the-spot" admissions program. This began as a pilot program with Clifton High School in 1974. Since that time the program has been expanded to include three other local high schools (Bloomfield, Montclair and Nutley) from which MSC traditionally draws large numbers of students. At these "on-the-spot" admissions programs, MSC admission personnel interview students, review their records, and give them an immediate decision as to their admissions status. All of the high schools participating in this program have requested that MSC continue this valuable service.

A typical day of an admissions staff member reflects other methods of recruitment which reach approximately 150-200 high school and community agencies. Such a day might include visiting high school A at 9 am; high school B at 11 am; and high school C at 1 pm. At these meetings, counselors and students are briefed about academic programs, how to apply to MSC, what financial aid is available, etc. Then after a hasty supper, it's on to high school D for a college night program where parents and students spend approximately two hours seeking information about various colleges.

Another recruitment technique used by the office is Open House. Several on-campus open houses will be held during the late fall and early winter this year. At these meetings, students and their parents will have an opportunity to speak with financial aid and housing people, the SGA, and faculty. And since high school guidance counselors are an integral part of contacting students, several counselors' meetings will also be held on campus.

Recruitment involves exciting interest, communicating accurate information, answering questions, accurate record-keeping, and timely correspondence. To the MSC admissions staff it also means interpersonal contact, informal meetings and conversations with parents, counselors, and students. This personal recruitment is essential to successful recruitment and the MSC's Admissions Office track record reflects success.

While recruitment is the main function of the office, it must be remembered that effective recruitment is an all-campus-effort, from students communicating "real life" experiences to friends and acquaintances, through being directed to the right office or department, to receiving courteous attention and helpful information from anyone on the MSC campus. These kinds of recruitment efforts often are the most influential in a student's college selection.

On Second Thought

I just want a little fun in the sun

by Meryl Yourish

I was spending some time in the Rat last week, recovering from the onslaught of the elements with my newly-recovered friend Nora.

"It's October," I commented.
"I know," she answered.
"Do you know what that means?"
"Columbus Day?" she ventured.
"Columbus Day?" I sneered. "That's the least of it! Try autumn! Wind! Rain! Snow!"
"Dead last! Winter?"
"I gather you don't care for October."
"You gather correctly. The days are getting shorter, the weather's turning lousy, baseball season's over—do you know how boring the sports pages are without the Yankees in them?"
"I think they're always boring."
"What would you know? I tell you, I can't take it. The trees are getting bare, the birds are all flying south, and it snowed! I can't believe it snowed out. It's only the second week of October! It's not allowed to snow this early! I forbid it! I..."
"Calm down, Meryl. Sit down, please. And take your hands off my collar, it's hard to breathe when I'm being choked. Here, have some more wine. That's a good girl."
"Thanks, Nora. I got carried away. I just don't like October anymore. The World Series just isn't the same without the Yankees."
"Well, look, there's got to be something good about October," Nora insisted.
"Come to think of it, it is the month before my birthday."
"That's funny. I've always thought that you were born on April first."

"Funny, Nora. Would you like a beer shampoo?"
"Well, there is Halloween, later on, anyway."
"Halloween?""I screamed. "Don't mention that word to me! My God! All those creepy little twerps ringing my doorbell, begging for candy! I'll wring their little necks this year, I swear I will."
"Uh, Meryl..."
"What?"
"Would you please stop wringing mine? Thank you."
"I'm sorry, Nor, but I just can't handle this weather. I hate ski jackets. Boots hurt my feet. My ears freeze in the winter. The only good thing about winter is spring."
"You like spring best, huh?"
"Spring! Oh spring! The trees turn green again, the days get longer and warmer, baseball season opens—it's kite-flying, ball-playing, T-shirt time!"
"Meryl, please stop jumping on the table. People are staring at us," Nora hissed.
"Besides, spring is still six months away, no matter what you do."
"No it isn't! You can't tell me that!"
"I just did."
"It's spring somewhere in this world! I'll find it! I'll follow the sun! I don't have to take this weather! I'll buy a condominium in Florida! Tll."

Note from Nora: I had to finish this column for Meryl. The men in the white suits finally caught up with her. She was standing outside telling the rain to stop. She's coming along nicely, and should be back next week. The doctors just have to convince her to stop throwing frisbees at everyone she sees. She says to tell you all "Play ball!"

Meryl Yourish is the editorial page editor.
Falling short

by Chris Henderson

Tennessee Williams' drama, Orpheus Descending, is considered to be a mixture of success and failure. It was a success because he had spent a great deal of time laboring over the work and considered it to be one of his most personally rewarding. It was a failure in that the critics and the public did not take it very well, at least not in comparison to his more popular works (The Glass Menagerie, A Streetcar Named Desire, and Cat on a Hot Tin Roof).

This mixture of failure and success is also the earmark of the Major Theater Series (MTS) production of the work...

Nightclubbing

A classy, well-mannered 'Patch'

by Karen Rosenthal

The wall mirrors reflect long, sleek legs studded with sparkles, and tight, well-proportioned pants. The mirrors, lights, and immense sound system envelop the crowd at the Strawberry Patch as they rock and hustle on one of the largest dance floors in Northern NJ.

The Strawberry Patch is a relatively small club, with a 450 capacity. However, what it offers in the way of sound, light, and people is definitely big-time. More than $60,000 worth of legs studded with sparkles, and tight, dancing, partying, and meeting new people is definitely big-time. More than $60,000 worth of legs studded with sparkles, and tight, disco music, from slow romantic ballads, to pulsating, get-down-and-boogie, to hot, smooth, easy bossa, to the electric, driving sounds of a top DJ, to the latest rock and roll...

The Strawberry Patch 21 Club offers exclusive lifetime membership. For $50 (during the month of October one can belong to the 21 Club) which entitles the member and three guests free admission anytime, and advance notice of sales of tickets for special events and parties. Otherwise, admission for non-members is $4 Saturday and Sunday.

The Strawberry Patch 21 Club offers exclusive lifetime membership. For $50 (during the month of October) one can belong to the 21 Club which entitles the member and three guests free admission anytime, and advance notice of sales of tickets for special events and parties. Otherwise, admission for non-members is $4 Saturday and Sunday.

The Strawberry Patch is easily accessible. Tickets are now on sale in the box office in Life Hall. The Strawberry Patch Hotline at 256-2288.

area also offers couples a more intimate conversation area, away from the large wood dance floor.

But for those who want to dance the night away, Disc Jockey Jerry Lembo mixes a constant stream of all types of disco music, from slow romantic ballads, to pulsating, get-down-and-party beats. The people who dance at the Strawberry Patch are quick to say that nobody cares how one dances, or who one dances with, as long as everyone has a good time.

"Everyone is into their own thing at the Strawberry Patch," Speciale agreed. "Almost anything goes on the dance floor, from practiced, measured dance routines to rocking and tearing." Speciale said. The Strawberry Patch is open Wednesday through Sunday, from 9 pm to 3 am. The club is located on Gilson Drive, right off Route 46 West by the Motor Vehicle State in Wayne, the Strawberry Patch is easily accessible from Routes 23, 46, and 9, and there's unlimited free parking. For up-to-the-minute information, call the Strawberry Patch Hotline at 256-2288.
Hit the road, Jack

by Dan Marino

Desolate Angel, A Biography—Jack Kerouac, the Beat Generation, and America by Desi McNally
Random House, 400 pp. $15.00

Ten years ago on Oct. 21, Jack Kerouac drank and broke in St. Petersburg, Florida.

"Suicide—" Dennis McNally writes, "except for the slow suicide of whiskey—was something he could not countenance," but as his body rebelled against a decade of drinking, "Altogether to go let it go."

At 47, Kerouac's spirit was broken, his writing skills had atrophied, and even though he had written books in print when he died he was unable to get a decent advance on a new one. Having almost universally assimilated his autobiographical novels and poems of poetry—his work was almost universally reviled by the critical establishment. Yet he was the godfather of the hippie movement, an acknowledged influence on musicians like Bob Dylan and Janis Joplin, and in 40 years since his death his books have been issued and reissued countless times. Even the critics have begun, albeit slowly, to recognize him for the genuine literary pioneer he was.

Desolate Angel is the second major biography of Kerouac to appear since his death. It is superior to the first, Ann Charters's Kerouac, in that it not only relates the facts of Kerouac's life but also paints a vivid portrait of America in the early fifties and the peculiar sociological events that formed the Beat—short for "beats," a "sinking hipsters who knew." The years 1951-7, when Kerouac lived most of the adventures that became his books—Visions of Cody, The Subterraneans, and On The Road—were the years of Eisenhower, McCarthyism, television, and rampant postwar expansion, which in Kerouac's eyes seemed to destroy the old America and replace it with a horrible, prefabricated technological state.

The Beats consisted of a small circle of writers and poets, most influenced by Buddhism, that include Kerouac, Allen Ginsberg, William Burroughs, Gregory Corso, and Gary Snyder. The spiritual father of the Beats was a "wild yea-saying outburst of American joy" named Neal Cassady, a Denver boy who'd stolen 500 cars before he was 21, an athlete who could throw a football seventy yards, and a womanizer on par with Don Juan.

Cassady was James Dean without the undercurrent of nervous sexuality; Kerouac idolized him and made him the subject of most of his books—Dean Morriarity in On The Road, Cody Pomeroy in Visions of Cody, and Desolation Angels. Cassady, more than anyone, was the "King of the Beats," but that phrase fell to Kerouac, who spent the rest of his life trying to shake it off, when On The Road was published in 1957.

Kerouac often compared himself to Proust, and the comparison is accurate in one respect: both artists' lives were irrevocably tied to their art. Kerouac's novels, with the exceptions of his first and last, were straight autobiographies, fiction only in the sense that he superficially changed the names of those involved (Allen Ginsberg is "Irwin Garden," Gregory Corso "Raphael Urso"), From Visions of Gerard and Dr. Sax, which surreally chronicles his childhood, to Satori in Paris, which tells of his drunken, paranoid voyages to France in Kerouac's eyes seemed to destroy the old America and replace it with a horrible, prefabricated technological state.

The ways in which inventions interrelate, and the repercussions that one, may have upon the other, are truly amazing. For example, money in the form of gold 26 centuries ago made exchanges easier which led to an increase in trade. This in turn spurred improved ships, and the compass, which, when further perfected, detected the magnetic North Pole. Magnetism and electricity were connected along with vacuum. Lightning could now be artificially produced and the consequence was weather forecasting. This urged the creation of a synthetic cloud chamber that utilized X-rays. The production of X-rays was closely followed by radar and the creation of the atom bomb. The facts are too small to list at a sit-down pace carefully surrounded by a semi-drastamatication of the "how it happened" shot on location. Burke will be on a hilltop in China explaining gun powder...
by Darrel Lippman

The show was a hit. I expected "My Sharona" to be the triumphant encore but I expected a little more.

Beantown hoppers

by Steve Valvano

Jethro Tull

Madison Square Garden
October 11, 12.

One starts to wonder why Jethro Tull gets so much ridicule from the rock press. In the past, critics have faulted the Tull stage show stating it is repetitive. The critics feel Ian Anderson is an egotist overshadowing the other members of the band when in concert. The critics view the band as too mechanical, not able to move an audience.

I took these ideas to Madison Square Garden on Oct. 11 and 12 and kept them in mind throughout both shows to determine how strong a case these critics have.

The points concerning the group's repetitiveness was proven incorrect as was seen in Ian Anderson opened the show by playing on several ropes that were dangling from the light fixtures above the stage. Some people are less or more known to perform their songs calmly and efficiently, but not on Tuesday. Tuesday they ran all the red lights; it was damn the points, full speed ahead.

After ending with "Just What I Needed," the crowd spontaneously whipped out their binate flackers and the place lit up like hundreds of Christmas trees. Two-three minutes of accolades accompanied this until the group appeared for the appropriate encore of 'You're All I've Got Tonight," a song not so familiar to me in concert. The Coliseum shook and so did my body.

But you didn't think that the crowd would let the Cars get away that easy, did you? No way. Another ovation ensued as the banduged their own. "The Dangerous Type" with Ocasek (pronounced O-kay-seck) stepped up to the mic in typical garb: black leather outfit, poity dark "Ocasek" shades, and shoulder length black hair tucked neatly behind his ears, revealing his pointy face. He opened with "Got a Lot On My Head," a song of the group's second hot-selling album, Candy-O. They performed songs from their first and second albums very effectively,-a case these critics have.

No matter what you say about Ian Anderson, the man has style. He often does) by acting out the fantasy of his old days. His double encore performance left the crowd frenzied. What else can I say but "Fantastic, simply fantastic!"

Never mind the critics

by Toni Lenz

OK to knock the Knack

The Knack

Capitol Theatre, Passaic
October 10, 1979

The marque insisted that this show was sold out— but to whom? I think there were more people trying to sell tickets than there were to see the show. I tried to get rid of one lone ticket and the competition was stiff. Maybe I had a bad corner, but my fellow salesmen could barely give theirs away. Cries of "Buy one, get one free" and "Free pizzetta with every ticket" were not enough. Prices of $2.50 couldn't even entice this crowd.

I missed two of the opening band's songs, due to standing out in the cold for over an hour, but the rest of the set (about six songs) was terrific! The Fools look the way you'd expect them to, but better than you could imagine. Their hilarious spoof of the Talking Heads' "Psycho Killer," is called "Psycho Chicken," complete with checking and a rubber chicken. They also do a great rocking version of "I Don't Want to Grow Up," from the childhood classic Peter Pan.

After a short intermission, our heroes, The Knack, appeared. At first I thought the pseudo-fab four was going to go right through their wonder album, song for song. Fortunately, they didn't. Lead vocalist-guitarist Doug Fieger's little-boy shyness seemed rather rehearsed. When he move up, he caused a mad rush for the stage...I'm not sure why. They ripped through their pop album, and also played some stuff which I assume will be on their next. Some old fellows rockers rocked out the set. I expected "My Sharona" to be the triumphant encore but it was, instead, the last song, followed by two (count 'em) encores. I was afraid to look — fear for more. The entire set was just about what I had anticipated. I came to hear a specific thing, and I think they got exactly what they wanted. No more, no less. I expected a little more from the Knack. Don't give it to me...
Luna-ticks at play

by Bonnie Jerbasi

The moon, the stars, a boy, a girl and a romantic Italian setting—ingredients for a healthy love affair, right? Not so in the eyes of Bernardo Bertolucci, the director of Luna (which should be more appropriately renamed LUNATIC!).

With a wild, unrealistic stretch of the imagination these basic ingredients have been twisted and distorted to make Luna more like a "believe it or not" fairy tale than a quality, serious drama. Bertolucci goes a little too far beyond the limits of the human psyche, but somehow manages to neatly package and sell it to his viewers.

The use of symbolism and rather bizarre coincidences are used heavily in the film. You can thank your lucky stars that Jill Clayburgh who was superb but the story itself was like a walking paradox and the relationship between mother and son undergoes intense, traumatic changes. An incestuous love develops complete with sex, jealousy and pain. But just in case this isn't enough to satisfy the audience, Bertolucci throws in a few more surprises.

On the whole Luna has its good and bad points. The filming, scenery and acting were superb but the story itself rather confusing and drawn out. The true challenge lies in trying to decipher the disturbed and complicated relationships—so don't go see this movie unless you are in a patient mood.

Is Marquand's gores more?

by Chris Henderson

In the wake of such satirical thrillers as The Exorcist and Rosemary's Baby, The Legacy is a major disappointment. While its predecessors used many incredibly effective fright tactics to make the skin crawl, The Legacy resorts to old clichés and an amazing abundance of watery blood in a feeble attempt to keep its audience in suspense.

The movie starts out suitably enough, with a young American couple being brutally trapped inside a vault-like, English, country manor complete with a bevy of strangest and monstrous guests. The eerily beautiful camera shots of a mysterious white cat, and a young beauty cavorting in a pool above a devil-bird insinuation are enough to keep its audience interested, as are the quick camera cuts from scene to scene that serve to shock us. But beyond these elements, the movie has no substance. The importance of the cat becomes quite laughable by the end of the movie. The only ones in the theater who don't at least suspect its true meaning are the protagonists (who walk by the painfully obvious clues as though they weren't even there). The quick camera cuts are overserved and become predictable and worn. After the first death occurs, the pool with its haunting emblem is not seen again until the close of the movie.

With these tricks gone the movie degenerates into a ridiculous bloodbath. It is revealed that all but one of the houseguests is to die and the survivor is to inherit the demonic powers that are present in the house.

In the end, The Legacy winds up as a less than exciting copy of other, finer films. Whatever promise the movie had in its early sections has been washed out by director Richard Marquand's apparent belief that "Gore is more.

Unless very cheap thrills are desired it would be best to rule out any theater featuring The Legacy.
The Indians of MSC came back from seven points down to Central Connecticut State College (CCSC) to beat the Blue Devils, 31-15.

Quarterback Joe Rebholz has become the new starter for the Indians and he showed that this is where he wants to be, as he threw two touchdown passes and got the offense moving. Rebholz took control of the offense and it appears that he has finally developed into the kind of quarterback that he was thought to be. He completed nine of 20 passes for 154 yards, almost doubling the per game average.

Tailback Mike Horn once again went over the 100 yard rushing mark, as he piled up 116 yards in 22 carries. Horn is considered one of the best backs in Division III, and one of the best in the area. He is well on his way to a 1000 yard season as he has now gained 707 yards, with four games remaining.

The MSC offense was definitely in high gear as they scored all 31 points. They totally dominated the first half, in which they scored 24 points. They totally, appeared that this would be a high scoring game. They came away with points on almost every possession, while totaling 353 yards in the first half. After a stalled drive, Keith Sahlin was called through with a 26 yard field goal, to give the Indians a 24-7 lead at the half. The Blue Devils scored their last touchdown on the day after a fumble and two 15 yard penalties against MSC. The penalties gave CCSC the ball on the 11 yard line, four plays later, running back Ted Stoneburner scored. Stoneburner also got the call on the two point conversion attempt, to close the gap to 24-15. It didn't take long for the Indians to score again. Grundy returned the kickoff 24 yards, giving MSC the ball on their own 31 yard line. Some good running and a 15 yard penalty on the Blue Devils gave the Tribe the ball on the CCSC 20 yard line. Fullback Chris McGrath scored from two yards out to end the scoring, and assuring MSC of a win.

Defensively the Indians had only one lapse, that being on the 81 yard touchdown run. Without that long run, the Blue Devils total offensive production was 87 yards, which goes to show just how tough the defense is.

Linebacker Sam Mills led the defense with 11 tackles, while defensive tackle Andy Wagner and middle guard Mike Lovett each had 10 each. Mills also recovered a fumble, one of three on the day for CCSC, but the only one they lost.

Punter Peter Kane has been a pleasant surprise for the Indians on the season. Kane had one punt blocked earlier in the year, but has since had, on the average, 34.7 yards per punt.

MSC feasts on Hawks

In all but one of their several victories thus far, the MSC cross-country team has captured at least five of the first seven places. Well, the red-and-white thinclds staged another parade last Thursday afternoon, this time the disgruntled victims being the Hawks of Monmouth College.

John Kirchhof and Ian Gordon tied for first, with Steve Boyle, Rich Wallace, Ron Macey, Charley Clivwick, Paul Maloney, and Julius Muinde all finishing in the top 16. Such results make for quite an attractive sight for coach James "Chief" Harris at the finish.

Harris commented on the team's performance, "The whole team is continuing to show scheduled progress. We should really be strong for the championships that are coming up in the next three weeks."

"Chief" concluded by saying that every meet thus far has provided a difficult long-distance runner. Thursday's accolades went to freshman Charley Clivwick, who took well over a minute off his previous best time at Garret Mountain.

The race itself did turn out to be a little bit tougher than the Indians had bargained for. Knowing that the Hawks haven't provided a strong team in several years, MSC was not expecting too much of a battle. What Monmouth did provide though, was enough to force the maximum potential out of the Indians.

Kirchhof and Gordon ran virtually the whole race together with Monmouth's Ken Dillon pressuring an outstanding team in several years. MSC was not expecting too much of a battle. What Monmouth did provide though, was enough to force the maximum potential out of the Indians.

Last year, MSC goalkeeper Bill Muller was named the top college division goalie in the state. This year, Muller has struggled. The ball has nestled in the cords behind him at a rate that has MSC soccer enthusiasts perplexed. Last week, though, Muller returned to his honor-winning form in earning the MSC athlete of the week honor.

Muller offers no excuses for the play which has put his goals against average at the two goals per game mark; far above his career mark of 1.36. "There have been some fluky goals," Muller notes. "But I haven't played as well as I should." He adds, "There's nothing physically wrong with me. I just can't put my finger on what's wrong."

Last week was a great opportunity for Muller to redeem himself. MSC had a key conference game against Kean last Tuesday and with one conference loss already on their slate, MSC could ill-afford another defeat. Muller was ready for the task at hand. "When I'm nervous before a game, I'm ready," Muller noted. "Before that game, I was shaking." Victory eluded the Indians as Kean picked up a 1-0 victory despite a heroic effort by Muller in goal. The Manasquan native recorded 17 saves, several of the spectacular variety.

One to nothing losses have not been uncommon to MSC during Muller's tenure here. In his sophomore season Muller fashioned a solid 1.17 goals against average but wound up with a losing record as MSC lost five games by a 1-0 margin! With the exception of last season when Nasr Moussa added spark to MSC's attack, the pressure has been on Muller and the rest of the defensive corps.

"Yeah, I've felt the pressure," Muller confirmed. "We just haven't been able to come through for the 20 goals Muller turned in during the season. He has a strong arm and can put the ball where he wants to. He is a solid 1.17 goals against average but wound up with a losing record as MSC lost five games by a 1-0 margin!"

Muller commented on his back line. He said about team captain Keith Ruggieri, "He's just a super player. He's got excellent skills and a tremendous determination to win."

He says about Paul Liddy, "He's the best sweeper back I've seen all season. He also has excellent skills." Discussing Tom Treacy, Muller added, "What he lacks in skill, he makes up for in hustle. I've never seen anyone run around like him. He summed up the line by talking about Steve Mullin, "Not too many goals come from his side of the field. He's especially good in the air."

The loss to Kean left MSC's winning touchdown. The Indians' team effort has given MSC their first legitimate season play for the Indians. Last year's game, the Indians' offense exploded in the second-half to score a 38-24 come-from-behind victory. In that game, tailback Bill Grundy turned in a super offensive game, rushing for 187 yards on 32 carries, while scoring three touchdowns. "It will be hard for Horn to improve upon that record this year."

Linebacker Sam Mills, who's having a great season to this point, will be relied upon to lead his men against the Pioneers. In last year's game, it was Mills' interception that set up MSC's winning touchdown. The Indians' team effort has been good to this point. While the offense sputtered during last season's 8-2 campaign, this year they have not. Mike Horn gives MSC their first legitimate running back in almost a decade. His rushing through the first six games would give him close to 1200 yards, should

WPC next victim

by Kenneth Lang

In a continuation of the Indians' quest for the New Jersey State College Athletic Conference (NJSCAC) title, they will be traveling to Wayne this Friday night to play the Pioneers of William Paterson College (WPC).

The victory over Central Connecticut State College (CCSC) last week improved the Indians' record to 5-1 overall this season. A victory over WPC would improve the team's conference record to 3-0. MSC has already beaten Glassboro State College (GSC) and Kean College.

The offense appears in full gear for the Pioneers. Joe Rebholz had a good day passing the ball, and tailback Mike Horn added another 100-plus yard rushing day to his credit.

The Pioneers have been struggling so far this year. With a 2-4 record at this point, the defense has had difficulties, especially against the pass. In the 28-21 loss to Hofstra Friday night, the secondary allowed Flying Dutchman quarterback George Muller to throw two touchdown passes within the first 10 minutes of the game, one to John Morris, the other to Kurt Murrell. On the evening, Muller completed 12 of 18 passes for 190 yards against the hapless Pioneers.

WPC offensively has been more impressive. Ed Belina is having another good season, having added two more touchdowns in the Hofstra game. Belina has scored four touchdowns this year. The game looks to be another step towards post-season play for the Indians. In last year's game, the Indians' defense killed itself in the second-half to score a 38-24 come-from-behind victory. In that game, tailback Bill Grundy turned in a super offensive game, rushing for 187 yards on 32 carries, while scoring three touchdowns. "It will be hard for Horn to improve upon that record this year."

Linebacker Sam Mills, who's having a great season to this point, will be relied upon to lead his men against the Pioneers. In last year's game, it was Mills' interception that set up MSC's winning touchdown. The Indians' team effort has been good to this point. While the offense sputtered during last season's 8-2 campaign, this year they have not. Mike Horn gives MSC their first legitimate running back in almost a decade. His rushing through the first six games would give him close to 1200 yards, should

Joe Rebholz will most likely be the starting quarterback against the Indians. He appears to have regained his early season form and is out of his two-game slump, during which Scot Fischer was one of the offensive heroes. Although he threw only six times, he completed four, good for 80 yards. Fischer also rushed the ball 15 times for 75 yards and two touchdowns, a good day for any offensive back anywhere.

All in all, MSC's offense will be looking to take advantage of the suspect Pioneer defense. Coach Frank Glazier of the Pioneers will be opening with Bob Pirmann at quarterback. Pirmann threw one touchdown strike of 53 yards to Belina to account for the Pioneers' first touchdown against Hofstra last week. He continues at bis 119 yards per game rushing average.

The MSC field hockey team has had an up and down season, but are hoping that the younger players will get the experience.

Conlon leads Squaws

by Carole Jones

The women's cross country team, with a 3-0 dual meet record, has been quite competitive this year. Leading the team in their quest for consistency is senior Carol Conlon. Conlon is the state champion for the 1500 meters, and also set two school records last year in both the 1500 and 3000 meter runs.

In addition to Conlon, Pat Cavallero, Pat Salmon, Margaret Savage, and Laura Gloshinsky have helped the team. Cavallero, a junior, has returned to the squad in excellent form after a long summer of hard work, to become the team's second runner. Salmon, a freshman from Jersey City has become the team's third runner. The physical education major has an impressive running history and she is proving to be a key runner for MSC. Senior and co-captain of the team, Savage has provided quality performances coupled with superior strategic abilities.

Gloshinsky, one of the team's most outstanding newcomers, is running very well, and the sophomore shows a very promising future.

Sixth and seventh positions are up for grabs at this point, juggled among Karen Plutnicki, Debreen Conklin, Beth Fallon, Carole Jones, and Debbie Blades. Plutnicki, the senior three-year veteran, along with Blades and co-captain Jones are somewhat disappointed at their efforts, but continue to work hard to reach their maximum abilities, which are needed by the team. Freshman Beth Fallon of Upper Montclair is doing some extremely good running upon recovering from several injuries. Trenton State College (TSC) transfer Conklin has proved to be a tremendous asset to the team, and seems the likely runner for sixth position.

Completing the roster are Nancy Kelly and Diane Noah. Kelly has returned remarkably improved, and is producing increasingly lower times. Noah is making her first attempt at competitive running.

Conlon placed seventh in a field of 64 runners at the Princeton Invitational cross country meet with a time of 18:44 for 5000 meters. She was followed by MSC's Cavallero (24th) in 19:50, Salmon (28th) in 20:32, Savage (32nd) in 20:41, Gloshinsky (35th) in 21:23, Plutnicki (36th) in 21:29, and Conlon (37th) in 21:47. Since MSC is a Division III school, coach Joan Schleede was very pleased with the team's results as well as personal performances. Princeton captured the meet with a score of 29, followed by Auburn (34), Cornell (79), University of Pennsylvania (107), MSC (126), Barnard (180), and Queens (225).

The women's second meet, the Rutger's Invitational, took place at Buccleuch Park, New Brunswick. On a beautiful, crisp fall day 16 schools attended the meet, some having traveled from as far away as Florida for the event.

MSC entered both A and B teams. For the two 5,000 meter races scheduled a half-hour apart. The top finishers included Conlon, placing 22nd overall in 18:42, Cavallero in 20:32, Salmon in 20:42, Savage in 20:44, and Conlon in 20:49.

Other good efforts were added from Fallon and Blades. The final scoring of the meet saw the first three places taken by Maryland, Florida State, and Princeton respectively with MSC occupying the 12th position.

MSC's easy victory over William Paterson College (WPC) and St. Peter's at Garrett Mountain in their first home meet of the season was described as "a truly super effort" by coach Schleede. Despite the adverse weather conditions, which consisted of thunder and rain and therefore lots of mud and puddles, the girls pushed on to defeat their opponents and in addition, turned in some great times for the course. And what a course! The last mile is all uphill and it gets mighty tough in some spots to work those hills. But perseverance was the key for MSC, as the girls captured the first 10 places. Conlon won the race in 19:30. Gloshinsky and Noah emerged with personal bests for the three mile run.

Coach Schleede was pleased with the team's performance and is looking toward the nationals, which will be held in Florida this year. MSC needs to place third in the regionals in order to attend the national meet.

The team's top seven runners will travel to New Brunswick for the New Jersey Association for Athletics for Women (NJAAW) Championship on Saturday.

Olympics for special people

State coordinators Lucenko and Bob Gleason in cooperation with the Essex County Commission, sponsored sporting events for the handicapped children, from the surrounding area. The events were supervised by students from Montclair High School and MSC.

The Special Olympics were held this past Tuesday at Brookdale Park, and many MSC people were on hand to help. While there are many worthwhile causes, this one has to be one of the most rewarding.

Dr. Leonard Lucenko and students from MSC were on hand to help the handicapped and show them that people care. The athletic events are scheduled for the handicapped and there are no losers.

Left to right-Paul Camitta, the Essex County Supervisor of Park Commissioner and Dr. Leonard Lucenko were two of the people active in the Special Olympics program.
