Kean visits Quarry dump site and calls for special meeting

By Linda Welchenieder

Kean visited the proposed site last Friday afternoon.

The governor was accompanied by Assemblyman John Kelly (R-27th), Fred DeFuria, county freeholder and Dennis Lindsay, deputy mayor of Little Falls.

On Friday, Kean told Lindsay that he couldn’t break the municipality’s lease to dump, but would call for a special meeting in Trenton this week to discuss the matter.

Assemblyman John Kelly (R-27th), said, “I’m in the area.” Barrett said, “I’m glad I went because they had a lot of questions.”

They think that the clay lining Carrino will install is sufficient to prevent leachate seeping into the water supply, Gaita said. “We’ve asked the board of trustees to use money from the trust fund to help buy Carrino out, and Little Falls is also looking into its budget for the available funds.”

Gaita said, “We have a legal contract and there’s nothing he can do.”

“We’re quite pleased Kean saw the site,” Lindsay said. “During his visit Kean admitted this is not an appropriate use of computer time, according to Dr. Martin.

Proposal offers alternate route to N.J. teacher certification

By Mark Hatfield

A new system of licensing elementary and secondary school teachers was introduced by Governor Thomas Kean and Saul Cooperman, education commissioner. Although it may not be put into effect until September 1985, the proposal concerns many teachers.

Under the new proposal, a person interested in teaching would only be required to have a bachelor of arts degree. After passing a subject matter test, a provisional license would be issued. Following a year long internship, a teaching certificate would then be awarded.

On the other hand, requirements under MSC’s existing certification program include field experience, methods training with computer applications, effective teaching studies, demographic studies, developmental reading, philosophical orientation to education and educational psychology.

“Cooperman’s proposal is absurd. The requirements for certification are not sufficient. If this new proposal goes through, within five years the entire state will be calling for reform. I’m in favor of subject matter tests, while subject matter is a necessary condition, it is not a sufficient condition to good teaching performance.”

According to Dr. David W.D. Dickson, president of the college, “This present hoopla is likely to deny opportunity to thoughtful input regarding the certification situation. Is it wise to send people no matter how gifted into a public school situation without any experience in methods training, or any previous field experience?”

“Nevertheless, the existing standards do not address the problem. We face with high quality certification applicants who have already graduated but did not major in education. These people attracted to the teaching field. Cooperman also said most of the extra credits involved in teacher certification are not necessary.”

Among other organizations, the New Jersey Education Association (N.J.E.A.) helped formulate the existing program. According to Klaghos, “These new standards will provide colleges with an opportunity to achieve excellence over a period of years. Some will do an outstanding job, while some may merely re-cast old practice into a new format.”

Becker, president of the MSC faculty union, said, “I hope the new proposal goes through, it is a good proposal and it will attract higher quality students into education programs.”

The SGA sponsored “Information Day” yesterday to give students the opportunity to find out more about on-campus organizations. Many organizations set up tables in the Student Center Mall to encourage students to join their clubs.

Computer account thefts are still a problem but situation improves

By Cathy Clarke

Last spring several MSC students spent thousands of dollars in unauthorized computer time, according to Dr. Edward C. Martin, associate dean of student affairs.

Martin said computer time is paid for by the second. Students are allotted a specific amount of money which they are supposed to budget for the semester. Sometimes students working on a problem run into an infinite loop, when they can’t solve the problem but the computer keeps trying. This combined with stealing time, has cost the college an unspecified amount of money, ranging at about two thousand dollars per semester, according to Martin.

The situation has been turned over to David P. Wedyka, Deputy Attorney General and John A. Coklin, State Investigator who have been working with MSC administrators since last spring.

Martin said he cannot reveal any more about the case until the investigation is completed.

Some students, under pressure to get their assignments in on time, are using someone else’s computer allowable money, according to Dr. K. Wolff, chairman of the computer science department.

Wolff said until this semester an entire computer science class was given the same password. If a student opened another’s account, either directly or by punching numbers until he found the correct combination, he could enter the account and use that student’s money.

Wolff said he is “confident there has been stealing,” but he “can’t point the finger at any one person.” He said there were no laws in NJ to govern such situations.

This semester the system was changed, according to Edward Baden, a year-round assistant director of information services. Individual account numbers were assigned to the students. See Computer Thieves p.3

**Kean meets with teachers’ union to discuss contract dispute**

By John Connolly

Governor Thomas Kean and the council of faculty at NJ State College met at 10:30 a.m. today to discuss the contract dispute between the State Board of Higher Education and the Council of N.J. State College Locals.

At last night’s faculty senate meeting, Dr. Catherine Becker, president of the MSC faculty union, said the state is trying to “create a squeeze line if there is a strike, and are trying to force their students to come to class by assigning tests. Becker called this a “despicable act” and said the teachers were trying to “use the students as'a buffer. Becker said she will do whatever she can to stop these actions. If the teachers strike, the faculty will distribute leaflets to inform the students, Becker said.

In other business, the faculty senate unanimously passed a resolution that “deplores the efforts by the commissioner of education and the governor’s office (and eventually eliminate) professional teacher preparation by permitting non-certified persons to teach in public schools.”

Dr. Jack Sacher, chairman of the music department, said this resolution is “not only to protect our jobs, it is to emphasize that teaching is a skill and it requires discipline and training.”

According to Dr. Edward Boyno, president of the faculty senate, the executive committee of the senate will meet to devise a resolution opposing the appointment of Rene Gimbrere to the position of associate vice-president of academic affairs. Gimbrere, formally the office of the president, was appointed by Dr. David W. D. Dickson, president of the college, over the summer. According to Dr. Roland Garrett, vice president of academic affairs, the appointment took place over the summer “to enable good planning for the academic year.” Garrett added that due to budgetary constraints, the person hired should already be an employee of the college.

The faculty senate also discussed the first 1985 budget submission for MSC from the state. According to the proposed budget 12 full-time salary lines will be cut. The proposal is also $340,000 less than the college’s request. Although the budget was cut in salary funds, it is higher in non-salary funds.

**Southside postpones concert due to problems in scheduling**

By Judy Susser

Glas I Concerts (CIC) rescheduled its Southside Johnny and the Jukes concert to Oct. 24, after negotiating contract difficulties with the band. The group was scheduled to perform in Memorial Auditorium on Sept. 29, until the William Morris Agency, which handles Southside, rescinded the contract offer last week.

According to Rich Neisen, the agent who negotiated the deal between CIC and the William Morris Agency, the show was postponed because Mirage Records said Southside’s new Album Tish It Up, was not known well enough yet. Also, the Jukes get paid on a weekly basis and there weren’t enough shows for that week. “It was not financially feasible,” Neisen said.

John Lennarrell, producer of CIC, said the problem is a result of “lack of communication between William Morris and Dave Sonnenberg, Southside’s tour agent.” The former agreed to CIC’s offer and failed to inform Sonnenberg, according to Lennarrell.

“The worst we could do is file a grievance acknowledging their unprofessionalism,” said Neisen.

Neisen said, “This is something Southside has done before and I believe he will continue to do so.”

He added that Southside’s agent says this is part of the “trail of blood Southside has left behind.”

The band will appear with accapella group 14 Carat Soul. Smithereens, the opening band, complements Southside’s music.

CIC recently had contract complications with Billy Idol as well. Idol, scheduled to appear on Oct. 23, had to postpone his tour because his drummer had just been replaced. The concert is now scheduled for Nov. 15.

CIC was planning three shows this semester: Southside, Idol, and The Flows, but the latter group cancelled all tour dates.

Lennarrell said he hopes the unused money carried over to the spring will obtain larger bands, such as The Pretenders.

**SGA supports teachers’ strike and resolution to close dump**

By Cathy Clarke

The SGA legislature passed a bill during this week’s meeting supporting the American Federation of Teachers (AFT) “in their negotiations inclusive of a strike” set for Oct. 4.

Dr. Catherine Becker, president of MSC’s faculty union, announced that she will be at the bargaining table in Trenton on Sept. 29 for the first time since Aug. 15. Becker said the SGA has already been hired to support the strike.

Beginning Oct. 1, all SGA legislators will spend one hour each month working to inform students about the SGA and how it helps the campus community. Students with questions about the SGA are welcome to stop by its office in the Student Center Annex, Room 103.

The Riding Club was appropriated $390 for their trip to the Metropolitan Museum of Art.

The group 14 Carat Soul, Smithereens, the opening band, complements Southside’s music. Smithereens, the opening band, complements Southside’s music.

In other business, Little Falls’ Mayor Carmen Bela asked the SGA to adopt a resolution calling upon Governor Kean and state legislators to support the closing of the dump site near Clove Road. The SGA agreed to sign the resolution.

Beginning Oct. 1, all SGA legislators will spend one hour each month working to inform students about the SGA and how it helps the campus community. Students with questions about the SGA are welcome to stop by its office in the Student Center Annex, Room 103.

The riding club was appropriated $1,240 for their eighth annual riding show. Le Cirque Francois and the Spanish Club were collectively appropriated $1,240 for their trip to the Metropolitan Museum of Art.

The group 14 Carat Soul, Smithereens, the opening band, complements Southside’s music. Smithereens, the opening band, complements Southside’s music.

**NJSAs invited to meet with Kean to discuss possible strike**

By Jim Benson

Governor Thomas Kean asked to meet with the N.J. Student Association (NJSAs) today at 10:30 a.m. after Bill Solomon, NJSAs president, spoke before the Board of Higher Education and sent Kean a letter supporting the Council of N.J. State College Locals decision to strike.

The NJSAs, which represents the 80,000 students enrolled in NJ’s state colleges, announced their support of the union on Sept. 18. Solomon’s letter to Kean expressed NJSAs view that the state’s current proposal to the union is “adverse and highly counterproductive to higher education.”

Solomon said, “The NJSAs support the teachers in their collective bargaining efforts and will support them in the event of a strike.”

According to Solomon, the governor will discuss the possibilities of a teachers’ strike. In addition to Kean and Solomon, Cindy Marcorsi, NJSAs representative to the U.S. Student’s Association and Marcoantonio Lacatena, statewide union president, will also attend the meeting.

**Computer account thefts still a problem**

Usually, however, students do not budget their money correctly and they spend too early in the semester. Then they panic because unless they use someone else’s money, there is no way to finish their programs.

Buscavage said if a student is found guilty of stealing a print or misusing a computer, his account is closed down and he loses his money. Usually, however, students do not budget their money correctly and they spend too early in the semester. Then they panic because unless they use someone else’s money, there is no way to finish their programs.

Nikki and Nikki bring British culture to MSC

By Chris Worthington

Life at MSC might seem like old hat to most upperclassmen, but to senior Nikki Maul and junior Nikki Buckland, everything is new and exciting. Both women are exchange students from Yorkshire, England where they attend Leeds Polytechnic School.

The two students are fine arts majors. In February, Buckland decided to go abroad. She wanted to come to New York City to see all the art galleries and shops and the brownstone houses, as well as the cultural atmosphere.

Maule is preparing her thesis on a relatively unknown British artist and loves cats and the sea.

Both women thought they would be bored here at MSC and were surprised when this was not the case. They find it amusing that so many people want to see them again. buckle said, "It's very sad in a way. We're meeting all these people and they are making many friends and other features.

Although many Americans think British culture is only recently become popular in the U.S. She is presently giving haircuts to MSC students for $4 in her dorm room, one of many different stations and the variety of music that is played on FM.

Britishers find MSC students very friendly and enjoy being a novelty. They are making many friends and "having a really good time." But as Buckland said, "It's very sad in a way. We're meeting all these people and making friends, but we probably never see them again."

Both women thought they would blend in here at MSC and were surprised when this was not the case. They find it amusing that so many people want to see them again. Buckland has her blonde hair cut short and shaved in a fashion that has

Police report minor incidents of vandalism and harassment

By Pat DiFulco

On Sept. 20, a car belonging to a student was vandalized while it was parked in Lot 25. The car's roof was walked on and dented.

On Sept. 23, a car belonging to a student was vandalized while it was parked in Lot 24. The rear window was smashed by rocks and the car was also dented.

On Sept. 20, Blanton Hall was evacuated after a bomb threat was called in. Campus police searched the building, but nothing was found.

On Sept. 22, a secretary's office was entered and personal property was stolen. Among the missing items were several credit cards and a wallet containing 30 dollars.

Two incidents of harassment were reported this week. The first occurred on Sept. 19 in Lot 13. A female student complained of continued harassment from another female student. The woman who probed the harassment was reported being harassed by unknown persons. This is the first time she reported an incident, although she has been receiving crank calls for some time.

On Sept. 24, a male left from Blanton Hall and returned after he refused to sign in. He was apprehended in Lot 25 and escorted from campus.

Cooperative education rate is up drastically from last year

This fall, co-op placements are up 150 percent from last year, with students combining learning and earning in jobs related to their major fields.

MSC's co-op enjoys substantial support in the business community. Its highly active advisory council boasts leaders from firms like Prudential, Schering and Ted Bates Advertising amongst its 25 members. These industry executives volunteer their time to spread the word about the benefits of co-op to their business peers and colleagues. In addition, they provide insight into the corporate mind and contribute concrete suggestions for job development. They're convinced that co-op works. That's no surprise because some of the executives were once co-op students from MSC.

All MSC students are potential co-op participants, either now or at some point in the future. Basic requirements are a 2.25 GPA and the completion of 45 credits, although individual departments do have additional criteria.

The Co-Op Office is located in Room 104 of the Student Center Annex and provides an introductory sound slide program for students interested in learning more about the program. It can be viewed between 8:30-4:00 Monday-Friday, and 8:30-10:30 p.m. Thursday nights, without an appointment.
The faculty, non-teaching professionals, and librarians represented by AFT local 1904 wish to thank the Montclarion for its editorial (9/22/83) supporting the teachers in their bargaining efforts with the state/administration.

We urge the entire MSC student community to support our position. The Union is doing everything possible to avoid a strike but should we fail to have the state/administration change its position, we will strike on Tuesday, October 4, 1983. Reprinted below is the Montclarion editorial. We think it says it best when it comes to the issues involved.

NJ cutbacks jeopardize the future quality of higher education

Last week the Council of NJ State College Locals voted in favor of a statewide teachers' strike. It's a decision that has been in the making for a long time. It's a decision that no doubt makes many people unhappy, but it's one that had to be made.

New Jersey teachers have been unappreciated and underpaid for too long. Teachers are the backbone of education in any society. They are the ones who guide us from kindergarten to graduate school. They are the ones who ultimately produce business executives, doctors, lawyers, and sometimes Indian chiefs. Yet the teachers stand in the shadows, often less successful than some of their pupils. They often earn less than most of their graduated pupils.

Yes, it's true that teachers know what they're getting into when they apply for the job. They know that there's not much money in the profession. But they take the job because they are dedicated, and believe in the importance of their job.

Now the state is trying to take the few employment benefits they have away from them. The state wants to decrease layoff notices from 195 days to 45 days and decrease sabbatical leaves from 160 to 100 days. In addition, the state is considering withholding over $6 million in increment pay increases and plans to use the money for merit raises. Such raises would be "awarded" to teachers at the discretion of the college presidents. A program like this would only promote friction and competition among faculty. It's almost as if the state were saying, "Now boys and girls, if you get an A on your report card daddy will give you a raise in your allowance."

Teachers are professionals, and deserve to be treated as professionals. Yes, it would be nice to have a few days off from school if the teachers strike, but it would be even nicer if the teachers could make the state realize it's jeopardizing the future of higher education in New Jersey.
Career Services' increased recruitment reflects the improving economy

By Eileen Bruck

Six 1983 MSC graduates began working at New Jersey Bell as sales representatives this August. The long hiring process, which included passing a written test and role playing a business problem, began with interviews these six students took at Career Services the previous spring.

Beginning on November 1 and almost every day thereafter through mid-December, employers will send representatives to the MSC campus to interview January and May graduates for entry-level positions. This process is called recruitment.

Recruitment activities are a direct reflection of current job trends. As the economic recovery becomes more of a reality, we can expect that more organizations will come to campus seeking our graduates. Employers such as Xerox, Mahone's, Chubb & Son, Bell Labs, Ingersoll-Rand, AT&T, Long Lines, Ameda Hess and the Bergen Record Labs, Ingersoll-Rand, AT&T Long Lines, Amerada Hess and the Bergen Record are scheduled for visits this fall.

A sample of jobs available include programmer, sales representative, internal auditor, Junior accountant, financial analyst, management trainee, and assistant buyer. Some of these employers seek students with specific majors, but others look for those who are capable and have a keen interest in their industry or job title.

Being able to communicate one's worth to an employer is a key element in obtaining a position. It is important to recognize that employers hire whole people, not just "majors.

You are eligible for recruitment if you are a student currently enrolled at MSC, completing your degree in December or May, and are available for employment after graduation. Those interested must be registered with the Career Services Office and should follow the procedures for on-campus interviews. The dates of November on-campus interviews, and information about the requirements of recruiters, are currently available in the Career Services Office. When you come in, ask for the recruitment schedule.

Because these interviews start in November, seniors, whether graduating in January or May, should complete the required forms and provide the office with copies of their resume as soon as possible.

As is the case in all interview situations, preparation is important. To help seniors prepare for these interviews, Career Services offers a series of interviewing and resume writing seminars. It is strongly urged that students attend these sessions prior to signing up for interviews. Students should also study all information that is available about the employer.

The on-campus recruitment program is only one way which is available for seniors to conduct an effective job search. Employers, such as social service agencies, publishers, public relations firms, environmental groups, museums and organizations for the fine and performing arts, also recruit on campuses anywhere.

These types of organizations do list jobs in nationwide bulletins, which Career Services receives monthly or bimonthly. These listings can be found in the full-time books on the tables in the Career Services Office, Student Center Annex, Room 104.

Cooperman proposal has its advantages and disadvantages

The recent proposal introduced by Governor lawn and Saul Cooperman to alter the current teacher certification program is certainly food for thought. Under the new proposal, a potential teacher would only be required to have a bachelor of arts degree, pass a subject matter test and complete a year-long internship. That has many teachers distressed, and rightly so. Current teaching requirements include a college degree, field experience and mandatory courses such as effective teaching studies, developmental reading, and educational psychology.

The Cooperman proposal is certainly food for thought. Saul Cooperman to alter the current teacher certification program is certainly food for thought.

Saul Cooperman proposal to alter the current teacher certification program is certainly food for thought.

The college degree and field experience are the basics necessary for the job. But perhaps most important and useful to prospective teachers are the educational courses. To get in front of a class of 30 students without psychologically understanding them could be a disaster for the teacher, and more importantly the students. The effective teaching and educational psychology courses are designed to help prospective teachers understand the 'brains' of teaching. They are designed so that teachers can better understand their students and their learning habits.

Teaching is a skill. It is the ability to transfer information from one individual to a group clearly and effectively. Some people can do that naturally, but most have to learn it. Allowing anyone with an undergraduate degree after a test and an internship is like letting everyone with the same requirements become an engineer, chemist, or nurse.

But the positive points of this proposal must not be ignored. Raising teachers salaries to $18,500 is certainly a smart move. More college students will consider teaching after a test and an internship is like letting everyone with the same requirements become an engineer, chemist, or nurse.

But the positive points of this proposal must not be ignored. Raising teachers salaries to $18,500 is certainly a smart move. More college students will consider teaching after a test and an internship is like letting everyone with the same requirements become an engineer, chemist, or nurse.

The Montclarion is for Hispanics only. We want to show the campus community, just stop by the Student Center Annex. Who knows? We probably have more similarities than dissimilarities!

thoughts of conscience / Jim Benson

Diversions upon diversions

After much deliberation and careful thought in choosing a name for my column, I chose "Thoughts of Conscience." Before I finalized my decision, I asked friends how they thought it sounded; most were receptive to the name and voiced their approval. Of course there are always those who will disagree for disagreeable sake.

I was a bit hesitant using this name, I did not want to sound pompous, egotistic or the like. I chose this name because I feel that is how I write. I feel what I write comes truly from my thoughts of conscience, what I see as right and wrong.

Thinking more on the "Korean Tragedy," I began to see a different angle covered by all its publicity. Ever since the beginning of Sept., KAL flight 007 has been the dominant news story in the media, print and non-print alike. Time and time again I have seen this happen, just as one issue heats up, the focus is nearly shifted to another. Recently (within the past year and a half) the emphasis was shifted from El Salvador to the Nuclear Freeze movement. The "freeze" was foresaken for the Israeli invasion of Lebanon, which was replaced by U.S. covert aid to overthrow the Sandinistas in Nicaragua. From Nicaragua we were back in Lebanon looking at the expanded role of the U.S. Marines.

luckily for the Reagan administration the fever from the KAL incident had generated such intense anti-Soviet emotions, the permission for the peace keeping Marines in Lebanon to shoot back and call in air strikes in support of the Lebanese army has generally been overlooked by the public.

Of all the faults our media has, things of this nature are their worst. I can understand covering the latest "hot" news story, but in a nation such as ours should it not be one of the goals of our media to help us uncover injustice, protect freedom and the rights of others? Or is that asking them for too much to lose their objectivity, stop thinking of profits and start taking a real look at the world?

If America is truly the watchdog of freedom, why then as a nation are we not concerned with the racem in South Africa, the political murders in the Philippines, the sovereignty of Nicaragua, the plight of El Salvador or the war in Lebanon? The U.S. is so close to getting caught in a war in Lebanon that it scares me.

Students speak out against Carrino's dump

By Patty Winters
Photos by Ted Jane

If MSC's teachers should strike on October 4, will you cross their picket line to attend any classes you might still have?

Yes, I would rather keep up with my school work. If the teacher is going through all that trouble to get to class, so will I.

Michele Phillips
Sophomore/undeclared

I sympathize with their position and agree that they are entitled to what they are asking for. I would still attend class.

Robin Cartagena
Senior/economics

I empathize with the teachers, but I would still go to class. I will probably continue going even after the strike.

Debbie Holland
Senior/marketing management

Yes, if the teachers have enough nerve to cross the line knowing that their peers and union are against them, they must be dedicated. That dedication deserves the same from the students.

Steve Nosek
Junior/art photography

Although I sympathize with their position and agree that they are entitled to what they are asking for, I would still attend class.

Wendy
deb Carter/agen Senior/undeclared

To the editor:

This is in response to The Montclarion's coverage of last week's protests against the proposed re-opening of the garbage dump near Clove Rd. There are several points which need to be clarified or added to make this important story complete.

The article implies that there were 150 of us there on all three days (Monday, Tuesday, and Wednesday). This is true of Monday only. On Tuesday, it dropped to a scattered group of about 35. However, increased awareness and the promise of dump trucks brought our numbers up to 300 on Wednesday.

Another ambiguous item concerns the dump's clay lining. Although the MSC administration has given up in the courts, the entire site must be lined before it can be re-opened. As of Sept. 19, only half an acre, out of 7.9 acres had been lined. Little Falls officials have been denied access to inspect progress of the lining operation.

The Montclarion article states only that opponents claim it (the clay lining) is inadequate to prevent seepage into local water supplies.

The "local water supplies" are the head waters of Pearl Brook, which flows through a wildlife preserve in Montclair. Montclair's Mountainside Hospital draws part of its water supply from Pearl Brook.

The original contract, signed in 1972 (not 1975), called for the dumping of household garbage only. But it was terminated in 1975, when it was found that the Carrino Contracting and Trucking Co. was dumping dead animals, sewage sludge and agricultural wastes (pesticides?) on the site. This led to the site being declared toxic by the EPA. Not toxic enough to qualify for Superfund money, but toxic nonetheless. The termination also led to the just-ended eight-year court battle between MSC and Carrino.

Another point of contention is the bridge leading to the dump site. This narrow bridge is already congested at times. Mayor Gatta of Little Falls is currently looking into its design specifications to find out if it can withstand the additional strain of 50 to 100 garbage trucks per day.

Carrino stands to make a lot of money from haulers dumping on his (our) property—certainly more than the cost of the athletic field which we will get in exchange. Besides, landfill sites often are not a stable base for buildings, or even athletic fields. There is also the question of seepage—remember Love Canal?

Please, learn more about this issue and take a stand. For more information, contact the Conservation Club or the Students for Social Responsibility.

The Montclarion
deb Carter/agen Freshman/undeclared

I would rather keep up with my school work. If the teacher is going through all that trouble to get to class, so will I.

Bob Cartagena
Senior/economics

Yes, the teachers will be giving us work to do and it will have to be done eventually. So I might as well go to class.

Jim Yankowicz
Sophomore/undeclared

To the editor:

MSC students speak out against Carrino's dump

To the editor:

I'm a transfer student from William Paterson College. I transferred to MSC for many reasons, most of them academic.

One reason I didn't transfer for, but saw it when I arrived, was the beauty of MSC's campus. The grounds around MSC's buildings seem like wide open space that gives me such a free feeling. I live in the Clove Road apartment buildings, and at night, when I look out of my window, I can see all the lights from the campus and the open field around the parking lot.

I read the other day that they were going to put a garbage dump right in the middle of my view. I don't want to look out my window and see a garbage dump, nor do I want to open my window for fresh air and smell garbage. As a resident of Clove Road, I don't think it's fair that I might have to.

I think this garbage dump is going to take away from the beauty of the campus. In the future, freshmen and transfer students will think about rats walking around campus, and may decide to go somewhere else.

I'd hate for people to think of MSC as "The college with the garbage dump on it." If they allow garbage to be dumped on MSC, it will not only ruin the beauty of the school, but the name and credibility as well.

Kim Daniel
Sophomore/undeclared

I would definitely keep up with my school work. I'd hate to have to drop out because the teachers are on strike. I feel that they should be dedicated enough to continue to teach even if it means the strike.

Alyce Jane Strapac
Sophomore/undeclared

I would not go to class. I'm a transfer student from William Paterson College. I transferred to MSC for many reasons, most of them academic.

One reason I didn't transfer for, but saw it when I arrived, was the beauty of MSC's campus. The grounds around MSC's buildings seem like wide open space that gives me such a free feeling. I live in the Clove Road apartment buildings, and at night, when I look out of my window, I can see all the lights from the campus and the open field around the parking lot.

I read the other day that they were going to put a garbage dump right in the middle of my view. I don't want to look out my window and see a garbage dump, nor do I want to open my window for fresh air and smell garbage. As a resident of Clove Road, I don't think it's fair that I might have to.

I think this garbage dump is going to take away from the beauty of the campus. In the future, freshmen and transfer students will think about rats walking around campus, and may decide to go somewhere else.

I'd hate for people to think of MSC as "The college with the garbage dump on it." If they allow garbage to be dumped on MSC, it will not only ruin the beauty of the school, but the name and credibility as well.

PLENTY OF MUNICIPAL PARKING • FULL SERVICE BAR

Congress for a change is trying to limit the role of our Marines in that country, and they are trying to stop covert aid to anti-Sandinista rebels. But unfortunately the Reagan administration is fighting their every step.

This administration's contempt for justice, freedom and civil rights are evident in its policies toward Nicaragua, El Salvador and the Philippines. Their contempt for the wishes of the majority of the American people is shown in their stance on nuclear arms reduction. Their contempt for women, minorities and the less fortunate is prevalent not only in their cut backs of social programs, but embodied in cabinet member James Watt and their refusal to fire him.

It's time to wake up America! Our greatest threat comes not from nuclear power, a nuclear war or Communism, but from Ronald Wilson Reagan. The 1984 election is still more than a year away. And in that year Reagan will behave himself and do his best to help America forget these past three years. Hopefully America will remember, if they don't I can't help thinking that Lebanon will be Arabic for "Vietnam with a desert.

**Letters**

**Cooperman proposal not popular with MSC teachers**

Cont. from p. 1

To the editor:

This letter is in response to the article referring to the Harvey Jett concert (The Montclarion, Sept. 22). After reading the article twice (the first time through I was in shock), I decided to write and try to clarify a few things.

It was not so much the writer's opinion of Harvey Jett, but his portrayal of today's Christian believers that surprised me. Christians came across as a group of over-zealous, commercialized, gimmick-using, loud-mouths, attaching the name JESUS to everything like a cheap jingle. The very heart of the Christian message is receiving life through Christ's death, there was nothing cheap about that. Christianity is often portrayed as a circumstantial, pie-in-the-sky, uninteresting religion.

However, the very fabric of our society is woven with Christian principles. No other person has affected history (and the entire world) as much as Jesus Christ. This year of 1983 has been proclaimed as "The Year of The Bible" by President Reagan. Our president is urging every citizen to take time out to read the book that has changed more lives and given hope to more people than any other book in existence except the Bible.

The money we use has the inscription "In God We Trust," the very essence of Christianity. Any honest and rational person who looks at the world's situation has to admit it's not getting better. As a matter of fact it's getting worse. Have the great philosophical, political, and scientific minds of our day considered 2 Chronicles 7:14?

"If my people, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then I will hear from heaven, and will forgive their sin, and will heal their land.

— Bible Sharing and Prayer Group: The Newman Community is holding its 8th Annual Intercollegiate Horse Show at 7 p.m. in the Newman Center. Donation is a dollar or a dessert.
— Workshop: Sponsored by the Women's Center, from 7 to 10 p.m. in Room 206 of the Student Center.

Tuesday, Oct. 4
— Meeting: First meeting of the Student Paralegal Association will be held at 1 p.m. in the Purple Conference Room on the fourth floor of the Student Center. New members welcome.
— Workshop: Sponsored by the Newman Community at 12:15 p.m. in the Newman Center.

Wednesday, Oct. 5
— Discussion: "The Women's Center" is holding a discussion called "Feeling Great 2," from 12 noon to 1 p.m. in Room 417 of the Student Center.

Thursday, Oct. 6
— Discussion: "Godel incompleteness and Finite Combinatorics," sponsored by the department of math and computer science, with Dr. Kenneth McAlloon of Brooklyn College. The lecture will be held at 3 p.m. in Room 117 of Richardson Hall. Admission is free. For further information contact Prof. Gideon Net­tier at (201) 993-4294/5132.

Friday, Oct. 7
— Meeting: The Second Careers Club will be holding its monthly meeting with its guest speaker being Dr. Con­stance Weller of the Women's Center. The meeting will begin at 7:30 p.m. in Meeting Room 1 on the fourth floor of the Student Center Annex.
Necessity of college radio grows as commercial stations go top-40

By CC Ryder

There was a time not too long ago when radio claimed to be its found treasure. But the one rule that college radio has not broken is its commitment to provide quality music. And although there are still some roadblocks, we are gaining a long-awaited outlet. When they find that outlet to fill that space. At WMSC we get new albums from at least 25 bands a month, who are local acts putting out their own records, and new bands working with independent record companies. There are all looking for their break, and college radio is where they know they can start. There are so many bands no one has even heard of that really are talented and putting out some great music. But unless they're willing to fit the style that's selling, they won't make it in commercial radio. I spend a lot of time contacting these bands, getting them on my shows for interviews. That's the only way to get them connected with the audience, and that's what radio is all about.

And the D.J. says he or she is playing fewer commercials and more music, yet there seems to be no escaping the nail-across-the-chalkboard voice of Crazy Eddie.

Meanwhile, college radio has never been hotter. It's discovering and premiering such artists as Thomas Dolby and Juluka, who commercial radio claims to be its found treasure.) College radio is playing more than the top forty hits; it's playing all kinds of music and doing well. Frustrated listeners of commercial radio are tuning in to college radio for a fresh approach to music and that audience is growing far past college campuses.

But there at WMSC-FM, there's an excitement over the sudden attention to college radio by the public, and artists as well. Where commercial radio has lost its momentum, college radio has picked up the pace. College radio continues to take risks while commercial radio has stopped. Because it's non-profit, there is no worry over financial losses or salaries, whereas commercial radio could lose thousands of dollars if it takes a loss. Without the worry of financial pressures, college radio concentrates on its main purpose: the music.

Without the pressures of sponsors, college radio is able to include, along with more music, public service announcements, community bulletins and general personal safety messages.

Because they spend more time playing music, than do commercial radio stations, college stations must look beyond the obvious musical trends to fill that space. At WMSC we get new albums from at least 25 bands a month, who are local acts putting out their own records, and new bands working with independent record companies. There are all looking for their break, and college radio is where they know they can start. There are so many bands no one has even heard of that really are talented and putting out some great music. But unless they're willing to fit the style that's selling, they won't make it in commercial radio.

I spend a lot of time contacting these bands, getting them on my shows for interviews. That's the only way to get them connected with the audience, and that's what radio is all about.

Maybe that's something to look at. What radio all about? Has the meaning and purpose of this media changed in the past year? The only purpose of any radio station, above all, is to provide its listeners with quality music. People look to radio as a means of escape, an outlet. When they find that outlet to be worse than the situation that led them there in the first place, it is not serving its purpose.

Listeners who restrict themselves only to commercial radio are limiting their musical growth and general knowledge of what's going on with today's music. There's no challenge anymore, and frankly, it's quite boring. That's why college radio is working. It's stimulating, challenging and unpredictable.

Like commercial radio, each college station has its own rules and regulations, as well as the general FCC laws by which all radio stations must abide. WMSC-FM is a prime example of a college radio station that has a unique format.

It's not what you think
It's not on paper now page no ink
It's just a declaration of mine
commitment is my thine

I got my body and soul
Immersed
It's just a declaration of mine
in the universe
it's not who i am
theo my puzzled mind doesn't understand
I've got the power
got the wheel in my hands
driving is scary as hell
Die?! God i thought i might as well

so all there is to know
is that sooner or later the other side is gonna show
it's just a declaration of mine
i love you
and i know that you love me too
it's just a declaration of mine.

by Bitsy Shultis

Poetry Corner

Transformation
It Doesn't Mean a Thing
Your voice seemed distant...even cold
like you didn't want to talk...to me
i said "it's me," you said...i know
suddenly i felt like a wound-up spring...

Until i remembered...it didn't mean a thing.

I came to see you where you work
the lights were glowing brightly...in my eyes, anyway
the music playing softly...jazz i think it was
and butterflies dancing lightly...in the pit of my stomach
then you said hello...and everything went black

when suddenly i remembered...it didn't mean a thing.

This time, tho, this time i shall not stumble,
will not grope...or then again,

maybe i will
i might not look the way i thought
sometimes loose and sometimes taut
i'll have no fear, not overwrought
and when you pay me notice naught

before your feet myself i'll fling
for now i know it doesn't mean a thing.

by Susan August

Tennis team crushes Rutgers in second match of the season

By Patty Flynn

The MSC women's tennis team played a tremendous match last Saturday, giving up only one point to destroy Rutgers-Camden 8-1.

A closer look at the individual match scores shows how easily the Indians took the win. First singles, Pat Lassen, took the two sets 6-1, 6-0. Second singles was MSC's sole loss when Ellen Sposa gave up her match 2-6, 4-6. Third singles Karen Canino had a clean sweep with the match going 6-3, 6-2. The most impressive wins for MSC came in the fourth, fifth and sixth singles, and third doubles when each match was taken 6-0, 6-0. Amber Smith, Kelly Carroll and Adrea Crapuzza were responsible for the singles victories while the partnership of Geri Hogan and Patty Flynn picked up the doubles win.

First doubles, Amber Smith and Pat Lassen, took an easy victory, 6-1, 6-2. Eileen McNeil and Madeline Swiss got in their first match-play of the season, teaming up as MSC's second doubles pair for a 6-2, 6-4 win.

The team will take their talents away Tuesday when they face Seton Hall University in South Orange. Their next home match is Oct. 4 against William Paterson College at 3:30.
Indians massacre Kean's Squires 48-7 in Fifth Annual Pride Bowl

By Perry "The Jet" Schwartz

It was a day of restoring pride for the MSC football team as the Indians massacred the Kean College Squires 48-7 in the Fifth Annual Pride Bowl at Schools Stadium in Newark, Saturday.

The Indians took the first possession. A six-play, 38-yard drive was capped off by a 1-yard quarterback sneak by Mark Casale. Kicker Joe Perri failed to make the extra point.

Again at the Kean 38-yard line, the Indians took eight plays to score. There were two key plays in the drive. The first came from rookie sensation, Bryan Scipio from Hillside, who caught a 17-yard pass from Casale to land at the Kean eight-yard line. However, a 10-yard penalty for holding set the Indians back to the 18. Jerry Wassel, the game's Most Valuable Player, made up the loss, rambling 16 yards to the two and then broke through on the next play for a touchdown. The two-point conversion came from a pass to Wassel from Casale.

With 7:22 left in the first half, Kean tried to get into the game when running back Andy Ford plunged one-yard for the touchdown and George Martin kicked the extra point. Kean wanted to threaten with another TD before halftime but this wish was crushed by the MSC defense, who held Kean at half-time but this wish was crushed by the MSC defense, who held Kean at the 41-yardline. The Squires tried for a field goal but Martin's attempt went wide to the left. The half ended with the Indians leading, 14-7.

The second half was action packed, with the Indians scoring 34 points to pace them to victory. In MSC's longest drive of the game, 74 yards were gained in 10 plays with Pierce Fraunhie scoring on a 10-yard pass from Casale. Perri failed to make the extra point.

On the Indians' next possession, Casale threw a 33-yard pass to Bobby Vannoy for another touchdown with only 57 seconds remaining in the third quarter. Perri again failed to make the extra point, but the Indians held a commanding 26-7 lead going into the fourth quarter.

At the start of the fourth, Archie Peterson rushed 11 yards for another MSC touchdown and pass from Casale to wide receiver, Mike Alberque for the conversion brought the Indians eight more points to the scoreboard.

MSC's Bob Daly picked up a Kean fumble to start the drive and a touchdown was led by freshman quarterback, Walter Briggs who replaced Casale. MSC moved 46 yards to score on a 17-yard pass from Briggs to Peterson. Perri nailed the extra point to make the score 41-7.

MSC's final touchdown came after the Indians recovered a fumble on Kean's five-yard line. Just following a Kean-fumble recovery, Phil LaGraca carried the ball three yards for the score. The extra point was good to make the final score 48-7.

The victory was MSC's 15th consecutive league win and the ninth time they have defeated the Squires in the last nine meetings. Senior fullback, Jerry Wassel was chosen as Most Valuable Player for the game, totaling 77 yards on nine carries, made one touchdown and was a key player in two other TD's.

Women harriers claim first victory

The women's cross country team gained its first victory of the season by defeating Drew University, 19-41, Tuesday on MSC's home course at Garrett Mountain.

Junior Dana Caruso led the Indian harriers with a time of 19:56 for first place and a personal best at Garrett. She carried the season's best that Caruso ran at the Trenton State Invitational where she finished fourth-eight among many runners from Division I and II schools.

Behind Caruso was sophomore Gabe Noto who placed second in 22:10. Nancy Wright's fourth place time was 22:37 with teammate Sarah Soman close behind in fifth, running a 22:52. Amy McLaughlin finished seventh for the Indians with freshman Stacey Pellock right behind her in eighth and sophomore Cyndi Maddox in tenth.

Coach Tim Marotti was pleased with everyone's performance and realizes that the time gap between MSC's first and fifth runner is too wide for winning the regional this season as a team.

The team is now 1-1.
